COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PDO/08	Course name: Psychodiagnostics of Adults
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of credits: 6	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Students are evaluated based on class participation, class presentation (20p) (the topic of presentation should relate to the field of psychological assessment. Example: multicultural issues in assessment, controversies in assessment, or the use of a specific instrument (provide a brief overview of its intended use as well as its technical features) Write a report (20p.) of 4 assessment instruments, each report will include the following: the possibility of using a diagnostic tool, advantages and disadvantages user qualification level Next, please answer the following questions: How did results confirm or disconfirm your knowledge of yourself? What are the implications of your findings as far as your understanding of yourself as a therapist ? Any surprises? Please elaborate. The reports should be at least two pages and no longer than four pages and a final exam. Activities during semester are evaluated max. 40 p, final exam max 60 p. (written form with open-end questions) Final evaluation (sum of all points): For A is needed minimum 90 points, for B minimum 80 points, for C minimum 70 points, for D minimum 60 points, for E minimum 50 points, for FX = 49 and less	
Learning outcomes: The aim of the course is to present a systematic overview of psychological assessment methods and introduce the principles of proper application and prepare for the practical application of the most frequently used psychodiagnostic methods.	
Brief outline of the course: Principles and specifics of adult psychological diagnosis. Clinical and test methods. Assessment of intelligence, partial and special abilities. Evaluating individual mental functions. Personality assessment: Questionnaire methods - single and multi-dimensional. Rating scale. Projective methods. Topics	

1. Psychological Testing and Assessment - definition of key terms - psychological testing, psychological tests, psychological assessment, psychological measurement, and surveys. The characteristics of psychological tests. Similarities and differences between tests. Assumptions of psychological testing. Classification of assessment methods. Brief overview of history of development and use of methods. User qualifications and professional competencies – responsibilities of test users in specific contexts. Cultural, ethical and legal context of psychological assessment. 2. Non-testing methods - observation, interview, case history. Definition. Types of Clinical Interviews (intake, diagnostic, mental status exam, case history - structure). The interviewer general and specific skills. Components of the interview (rapport, technique). Type of observation. Note-taking – cultural, ethical and technical issues. Advantages and disadvantages of non-testing methods. 3. Intelligence tests - definition of intelligence, A brief overview of models of intelligence (Spearman, Cattell, Thurstone, Vernon, Sternberg, Piaget, Gardner). Assessment of intelligence. Intelligence Quotient. Simple (partial) tests of Intelligence - Raven's Progressive Matrices (SPM, APM), Kohs Block Design Test. Complex tests of Intelligence: group-administered - Intelligence Structure Analysis (ISA), Intelligence Structure Test (IST), individually administered - Wechsler Adult Intelligence Scale, Stanford–Binet Intelligence Scale. 4. Tests of mental functions, special abilities – attention, memory, creativity, reaction time (Bourdon Test, Trail Making Test, Rey Complex Figure Test, Stroop Test, Wechsler Memory Scale, WCST, Torrance Tests of Creative thinking) - application possibilities, advantages and disadvantages. 5. Tests of organicity - neuropsychological assessment, Neurological damage and the Concept and definition of a cognitive deficit. Neuropsychological testing vs. standard psychological testing. Conditions and objectives of neuropsychological assessment. Test selection, Test administration, and preparation of the patient. (Verbal Learning Test, Bender-Gestalt, Benton Visual Retention Test, Delis-Kaplan Executive Function System.....) 6. Personality measurement – Projective methods. Characteristic and theoretical foundations of projective methods. Advantages and limits of use (reliability, validity). The difference between the methods, techniques and tests. Classification (verbal, drawing and handling projective tests – association, construction, completion, expressive choice ordering). Word Association Experiment, Hand test, The Thematic Apperception Test, Baum test ("Tree test"), The Luscher Color Test. 7. Personality measurement - questionnaires, inventories, rating scales - the principle, overview, classification, advantages and limits of use. Unidimensional questionnaires (Manifest Anxiety Scale, The State-Trait Anxiety Inventory, Beck Depression Inventory, Beck Depression Inventory, Hamilton Rating Scale for Depression, Hamilton Anxiety Scale, Zung Self-Rating Depression Scale, Multidimensional questionnaires (Eysenck Personality Inventory, Eysenck Personality Questionnaire, Sixteen Personality Factor Questionnaire, Big Five Inventory, Minnesota Multiphasic Personality Inventory) 8. Psychological Report - Findings of assessment and proper formulations. General guidelines (length, style, terminology, topics, presenting test interpretations, use of raw data, feedback). Format for a psychological report (referral question, evaluation procedures, behavioral observations, relevant history, test results, impressions and interpretations, summary and recommendations).

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PDE/08	Course name: Psychodiagnostics of Children and Young People
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of credits: 6	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites: KPS/PDO/08	
Conditions for course completion: Students are evaluated based on class participation, class presentation (the topic of presentation should relate to the field of psychological assessment of children), writing report and final exam. psychological report. Activities during semester are evaluated max 40 p. Final exam max. 60 p. (written form with open-end questions) Final evaluation (sum of all points): For A is needed minimum 90 points, for B minimum 80 points, for C minimum 70 points, for D minimum 60 points, for E minimum 50 points, for FX = 49 and less	
Learning outcomes: The aim of the course is the introduction of principles and approaches to psychologic assesment of children and adolescents. Focus is on the process of administration and evaluation in diagnostic situation. Course graduate should be able to choose relevant diagnostic methods for identifying developmental disorders.	
Brief outline of the course: 1. General issues of psychological assessment of children and youth (theoretical models). Situation of psychological assessment and its specifics in childhood. Qualitative and quantitative analysis of psychodiagnostic findings, idiographic and nomothetic approach. 2. Diagnosis, systems of diagnostic classification (problem formulation, assessment questions, diagnostic hypothesis, method choice, diagnosis construction, differential diagnosis, developmental diagnosis, characteristics of children assessment, sources of diagnosis, DSM V, ICD 10. 3. Normal development and influences on problem development (biological predisposing factors, Personal maintaining factors, Contextual pre-disponing factors, Contextual maintaining factors 4. Assessment methods of early development - neonatal and developmental scales (NBAS, NAPI, Gesell developmental scales, Beyeley developmental scales) 5. Assessment of early and preschool development. Evaluation of intellectual abilities Evaluation of speech and language. Autism and pervasive developmental disorders (WISC III, IV, S-B 4,5, WJ IE, Kaufman ABC, SON-R, CARS)	

6. Assessment of school achievement. School maturity vs. school readiness. Partial learning disabilities. Tests of special abilities and individual mental functions. (Reading and spelling, Mathematics, Visual, visuospatial and visuoconstructive skills, Motor skills, Memory functions).
7. Problems of middle childhood - Assessment of external and internal troubles (ADHD/ADD, behaviour disorders, emotional troubles, neurotic problems)
8. Evaluation of personality, interpersonal relationships - the questionnaire techniques, projective techniques. Drawing tests - evaluation of drawing expressions of the child.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PROZ/09	Course name: Psychology of Decision-making
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 2 Per study period: 14 / 28 Course method: present	
Number of credits: 4	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Students are evaluated based on class activity during the semester (10 points) and on the project from the selected area of decision-making (30 points). Final exam (60 points) consists of theoretical as well as of practical questions and more than 30 points is needed to pass the exam. Practical questions ask about the application of studied decision-making processes in concrete situations. Points during semester 40. Minimum number of points needed to enter an exam: 21 Written exam – 60 points 31 points necessary Final evaluation A = 91-100, B = 81-90, C = 71-80, D = 61-70, E = 51-60, FX = 50 and less	
Learning outcomes: The purpose of this course is to provide information about basic themes of psychology of judgment and decision-making. While necessary theoretical background is presented in the beginning of the course, its remainder presents basic themes and experiments with their applications in psychological work.	
Brief outline of the course: 1. Subject of psychology of decision-making (DM). Basic terms. Approaches in psychology of DM 2. History of DM. Basic models of DM 3. DM process. Biological correlates of DM 4. Rationality of DM. Critique of rationality 5. Reasoning 6. Hypothesis testing 7. Judgment. Cognitive biases and heuristics. Specific questions of probability judgment 8. Risk perception 9. Group DM 10. Game theory 11. Morality and DM 12. Individual differences in DM

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ ROD/09	Course name: Psychology of Family
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 1 Per study period: 28 / 14 Course method: present	
Number of credits: 5	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Elaboration, presentation and surrender semester work on a predetermined theme and active participation in the preparation and presentation of the group is a prerequisite for admission to the examination. Final exam: written test Final evaluation (sum of all points): For A is needed minimum 91 points, for B minimum 81 points, for C minimum 71 points, for D minimum 61 points, for E minimum 51 points, for FX = 50 and less	
Learning outcomes: Understand multifactoring conditional processes of family as a system. Bring opportunities for prevention of negative phenomena in the family.	
Brief outline of the course: 1. The subject of psychology families, objectives, perspectives and application areas. Terminology: adaptability, cohesion, normality, interaction, identity . 2. Main characteristics of the family. Family functions. 3. Family theories, standards, assessment family. 4. Models of family functioning, their importance of research and practice. 5. Systemic versus systems approach to the family. Definitions of system, family system, possibilities and limitations of applying the approaches. 6. Family over time (life stages of family life, family life cycle). Satisfaction in the family because of the family cycle stages. 7. Partnership, family formation and parenthood. 8. Family communication - levels of communication, communication in relationships, communication problems. Special forms of communication: family rituals, family myths. 9. Theory of family stress and its management. Family Resiliency (resistance). Family crisis. 10. Principles of work with the family - the basic differences in counseling and therapy. 11. Upbringing, alternating upbringing (shared parenting). Seminars content Individual and group preparation specifically designed for successive exercise. 1. Introduction to discipline, discussion of the basic concepts.	

2. Research on the family - methodological specifics. The adequacy of the methods, the problem of interpretation of family data. The significance of the research in practice. 3. Socio-psychological specifics and problems of modern family. Functional versus dysfunctional family. 4. Biological versus adoptive families. 5. Fostering and professional parents (psycho-social features) 6. Intergenerational family and its specific features (benefits and challenges) 7. Reconstructed family. Step-families - parenting in step-families, family identity formation in step-families. 8. Cohabitation versus marriage in the context of the family. Studies of different types of parenting and families: 9. Lack of parenting, involuntary childlessness. 10 Single-parent families: mother-lonely single mother, a divorced mother, a widow, lonely father - widowed, divorced father. 11. The exercise will be devoted to case studies from the field of family counseling led by expert of the consulting practice. The term will be specified during the semester (change in terms of exercise is possible).

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PTER/08	Course name: Psychotherapy
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of credits: 6	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites: KPS/KLP/08	
Conditions for course completion: Test, active participation during seminars (class participation, class presentation), max 40p, min 22 p semester 40%, exam 60% Basis of exam is test with next discussion about spatial topic from psychotherapy Final evaluation (sum of all points): For A is needed minimum 91points, for B minimum 81 points, for C minimum 71 points, for D minimum 61 points, for E minimum 51 points, for FX = 50 and less In case of absence it is necessary to receive permission in advance and inform the teacher as to the reason for the absence.	
Learning outcomes: The general goal of this course is to introduce students to the various concepts and and issues surrounding the field of psychotherapy. Psychotherapy deals with treatment of psychical disorders by psychological methods. It includes interactive processes between a person or group and a psychologist. During this course we would like to focus on essential background, which is necessary for understanding concrete psychotherapy theories. Course brings answers on following questions: What is the role of psychotherapy, and how does it relate to psychological practice? Are some theories more valid than others? Does psychotherapy work? If psychotherapy works, how does it work and how do we know it works? How does a new practitioner choose a psychotherapy orientation?	
Brief outline of the course: 1. Psychotherapy as a discipline and activity; Types of psychotherapy; Psychotherapy aims; training in psychotherapy; magazines; professional societies 2. Integrative psychotherapy framework; effective factors in psychotherapy; Indications for psychotherapy 3. Psychoanalytic and psychodynamic psychotherapy 4 The person centered therapy 5. Existential psychotherapy 6. Behavioral psychotherapy 7. Cognitive psychotherapy	

8. Gestalt psychotherapy 9 Interpersonal psychotherapy 10. Group psychotherapy, therapeutic community 11. Family therapy, systemic therapy Seminar lesson: In the first seminar lesson, each student selects the psychotherapy book which he/she will read and present in class. For seminar lesson the student will prepare 45 minutes presentation about selected book, personal understanding of book, relevant associations, criticism and examples. The student's presentation is intended to be an interactive, cooperative effort involving the entire class. The class ends with a 15 minute discussion of the presentation. Students are encouraged to express their views of the book and their learning experience.

Prerequisites:	
Conditions for course completion: To present a paper on a selected topic	
Learning outcomes: Students will acquire an overview of the world of religions without confessional prejudices. They will be able to compare timeless values and human wisdom incorporated in symbolic and mythological language of different religions.	
Brief outline of the course: <ol style="list-style-type: none"> 1. Importance of mythology for development of knowledge. 2. Relationality of religious belief. 3. Symbol, myth, narrative. 4. Overview of world religions. 5. Tribal religions. 6. History of Judaism. 7. Buddhism and Hinduism. 8. Social benefit of Christianity. 9. Division of Christianity and current situation. 10. Establishment of Islam and its current situation. 11. Differentiation of churches, movements and sects. 12. Importance of spirituality for the meaning of life.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ROR/08	Course name: Rorschach Method
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 2 Per study period: 14 / 28 Course method: present	
Number of credits: 5	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites: KPS/KLP/08	
Conditions for course completion: 1. Each student has to prepare two written case studies in RoR 2. Final exam (both, written and oral)	
Learning outcomes: 1. To understand in deep essence of projective methods, especially RoR 2. To get knowledge and basic skills in work with RoR (administration, preparation of summary data, and partially, also basics of interpretation)	
Brief outline of the course: Introduction into projective methods: classification of methods, essence, the ways of work. History and development in Rorschach method. Administration, coding and interpretation of RoR. Non-conventional work with RoR and RoR - modifications. Lectures: 1. Brief overview of projective methods: Theoretical issues, classification. Advantages and limits of projective assessment. 2. History of Rorschach test: Preliminaria. Herman Rorschach and his work. European and American schools: Behn, Bohm, Beck, Hertz, Klopfer. Exner and his comprehensive system. Exner, J.E. (1969): The Rorschach Systems. New York: Grune and Stratton Exner, J.E. (2003): The Rorschach. A Comprehensive System. New York: Wiley p.3 - 41 3. Administration and steps in work with Rorschach test: Preparation for taking test. Introducing test and response phase. Inquiry, scoring and interpretation. Exner, J.E. (2003): The Rorschach. A Comprehensive System. New York: Wiley p. 45 - 67 4. Scoring: Location and Developmental quality. Exner, J.E. (2003): The Rorschach. A Comprehensive System. New York: Wiley p. 68 - 84 5. Scoring: Determinants I.: Form, movements and colors. Assessment of form quality Exner, J.E. (2003): The Rorschach. A Comprehensive System. New York: Wiley p. 85 - 103, 120 - 125 6. Scoring: Determinants II.: Shading determinants, Form dimension and Pairs. Exner, J.E. (2003): The Rorschach. A Comprehensive System. New York: Wiley p. 104 - 119 7. Scoring: Contents, Popularity and Special scores.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ SKOP/08	Course name: School Psychology
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of credits: 6	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites: KPS/PDE/08	
Conditions for course completion:	
Learning outcomes:	
Brief outline of the course: Vertical and horizontal structure of work of school psychologist, sequential model, the process of change and its management. Selected psychological trends and their reflection in the work of school psychologist. School culture, social class and school climate, school atmosphere and the class model of quality of life in the school environment. Challenging situations in the school environment of the learner, difficult situations in the school environment from a position of teacher biopsychosocial factors sustaining, enhancing and promoting the health of teachers and pupils. Educationally problematic behaviour, coping, unobtrusive educationally disruptive problem behaviour, mediation as an alternative way of resolving conflicting situations in the work of school psychologist. Professional and non-professional forms of support and control the work of school psychologist. Consulting, advisory, therapeutic and supervisory activities, crisis intervention in the work of school psychologist. Career development as a lifelong process, choice of profession as a vital developmental role, occupational training, career guidance and counselling in the work of school psychologist. Consulting, intervention, diagnostic activity of school psychologist in relation to family. Primary, secondary and tertiary prevention of drug use in the prevention phase, a prevention strategy work, the effectiveness of the prevention work in the work of school psychologist. Unit 1 Professional forms of control and help in school practice; educational guidance and counselling. Teacher's personality. Psychological aspects of job satisfaction of school staff. Biopsychosocial factors sustaining, enhancing and promoting the health of school staff. Positive psychology in school practice, coping with the difficulties of life, social support, prevention of loss of enthusiasm. Biopsychosocial factors damaging and destroying health. Unit 2 The concept of school psychological services. The development of educational psychology in Slovakia and abroad. The mission of school and school psychology. The role of school psychologists in school; activities of school psychologist in relation to pupils, teachers, parents.	

Intergenerational relationships at school, demands of the teaching profession and school psychology. Ethical standards of school psychologist work.

Unit 3 Selected psychological trends and perspectives of education in terms of school psychology. The role of school psychologist in the educational process - learning in the school context and types of learning. Learning styles. Circadian rhythms in the teaching process. Psychological factors and circadian rhythms.

Unit 4 Control and management of the classroom. Coping with school stress. School climate and school trends. Decision-making within guidance. Prevention of risky behaviour of adolescents and young adults. Effective strategies for preventing drug use. Crisis management in the school environment.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/STA2/08	Course name: Statistics 2
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of credits: 6	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Students evaluation is based on class activity during the semester (10 points) and on the test in the middle of the semester (30 points). The test consists of three practical questions solved on computers with SPSS software. Final exam (60 points) consists of theoretical as well as of practical questions and more than 30 points is needed to pass the exam. Final evaluation (sum of all points): A (90-100p) B (80-89 p.) C (70-79p.) D (60-69 p.) E (51-59 p.) FX (0-50 p.)	
Learning outcomes: The purpose of this course is to provide information about advanced statistical methods when familiarity with the basic methods is expected. Basis fields include various kinds of analysis of variance (independent samples, repeated measures, mixed ANOVA MANOVA), factor analysis, multiple linear and logistic regression, cluster analysis and structural equation modelling. These statistical methods are introduced firstly on lectures with the theoretical background and the process of computing together with assumptions is presented. Next, these methods are practised on exercises with SPSS software.	
Brief outline of the course: 1. Review of basic statistical methods 1 (descriptive statistics – measures of central tendency, variability, position, hypothesis testing – parametric statistics). 2. Review of basic statistical methods 2 (hypothesis testing – nonparametric statistics, correlation, regression). 3. One-way analysis of variance. Purpose, assumptions, procedure, results interpretation, post hoc tests. 4. Two-way ANOVA, repeated measures ANOVA. Purpose, assumptions, procedure, results interpretation, post hoc tests.	

5. Nonparametric alternatives of ANOVA (Kruskal-Wallis, Friedman, Cochran Q). Suitable scientific questions and data, purpose of methods, assumptions, procedure, results interpretation, post hoc tests.
6. MANOVA. Purpose, assumptions, differences in comparison with ANOVA, logic of test, procedure in SPSS, results interpretation, post hoc tests (ANOVA).
7. Polynominal regression analysis, logistic regression. Differences from simple regression, purpose, methods of regression, assessing regression model and predictors. Appropriateness of logistic regression in psychological research.
8. Factor analysis (exploratory), principal components analysis. Purpose of factor analysis, methods of factor analysis, rotation, factor loadings, decisions about number of factors, interpretation of results.
9. Cluster analysis. Purpose and logic of cluster analysis. Methods, reading cluster analysis results.
10. Multidimensional scaling. Purpose and logic of multidimensional scaling, its methods and possible applications.
11. Structural equations modelling. Differences from "classical" statistical methods (confirmation technique), examples of use (confirmatory factor analysis, mediation), assessing model, changing model.
