| 22. Continuous practice teaching I.....                                                 | 26 |
| 23. Continuous practice teaching II.....                                                | 27 |
| 24. Cosmetic chemistry.....                                                             | 28 |
| 25. Creating Text Teaching Aids.....                                                    | 30 |
| 26. Culture of Spoken Discourse.....                                                    | 31 |
| 27. Czech Language for Slavists.....                                                    | 32 |
| 28. Dialectology.....                                                                   | 33 |
| 29. Didaktika chémie I.....                                                             | 34 |
| 30. Didaktika chémie II.....                                                            | 35 |
| 31. Digitálne technológie vo výučbe chémie.....                                         | 36 |
| 32. Diploma Project I.....                                                              | 37 |
| 33. Diploma Project II.....                                                             | 39 |
| 34. Diploma Project III.....                                                            | 41 |
| 35. Diploma Thesis and its Defence.....                                                 | 42 |
| 36. Diplomový seminár z chémie pre XCH.....                                             | 43 |
| 37. Diplomový seminár z chémie pre XCH.....                                             | 44 |
| 38. Drug Addiction Prevention in Educational Practice.....                              | 45 |
| 39. Educational Counselling.....                                                        | 46 |
| 40. Essentials of Special Education.....                                                | 47 |
| 41. Experiential Education.....                                                         | 48 |
| 42. General Linguistics.....                                                            | 49 |
| 43. Historical Poetics.....                                                             | 50 |
| 44. History of Linguistics.....                                                         | 51 |
| 45. Internal and External History of Slovak Language.....                               | 52 |
| 46. Introduction to Environmental Chemistry.....                                        | 53 |
| 47. Introduction to Material Chemistry.....                                             | 55 |
| 48. Literary Excursion 2.....                                                           | 57 |

|                                                                                     |     |
|-------------------------------------------------------------------------------------|-----|
| 49. Master's Thesis Defense.....                                                    | 58  |
| 50. Master's Thesis Seminar 1.....                                                  | 59  |
| 51. Master's Thesis Seminar 2.....                                                  | 60  |
| 52. Master's Thesis Seminar 3.....                                                  | 61  |
| 53. Methodology of Teaching Literature.....                                         | 62  |
| 54. Methodology of Teaching Slovak as a Foreign Language.....                       | 63  |
| 55. Methodology of the Slovak Language 1.....                                       | 64  |
| 56. Methodology of the Slovak Language 2 (Composition).....                         | 65  |
| 57. Modern Didactical Technology.....                                               | 66  |
| 58. Pedagogy and Psychology.....                                                    | 68  |
| 59. Personality Development and Key Competences for Success on a Labour Market..... | 69  |
| 60. Professional Ethics for Teachers and School Counsellors.....                    | 70  |
| 61. Project Learning (Slovak Language and Literature).....                          | 71  |
| 62. Psychology and Educational Psychology.....                                      | 72  |
| 63. Psychology of Health.....                                                       | 73  |
| 64. Reading Literacy in Educational Process.....                                    | 74  |
| 65. Reading Literacy in Teaching Literature.....                                    | 75  |
| 66. Reception of Children's Literature.....                                         | 76  |
| 67. Scheduled practice teaching.....                                                | 77  |
| 68. Seaside Aerobic Exercise.....                                                   | 78  |
| 69. Selected Topics in Analytical Chemistry.....                                    | 80  |
| 70. Selected Topics in Inorganic Chemistry.....                                     | 81  |
| 71. Selected topics in organic chemistry.....                                       | 82  |
| 72. Semantic Syntax.....                                                            | 83  |
| 73. Semiotics, Linguistics and Literary Studies.....                                | 84  |
| 74. Slovak Language for Teachers.....                                               | 85  |
| 75. Slovak Language, Literature and Methodology.....                                | 87  |
| 76. Special Toxicology.....                                                         | 88  |
| 77. Special practising the school experiments I.....                                | 89  |
| 78. Special practising the school experiments II.....                               | 91  |
| 79. Sports Activities I.....                                                        | 93  |
| 80. Sports Activities II.....                                                       | 95  |
| 81. Stereochemistry of Inorganic Compounds.....                                     | 97  |
| 82. Structure Analysis.....                                                         | 98  |
| 83. Summer Course-Rafting of TISA River.....                                        | 100 |
| 84. Supervised Teaching Practice.....                                               | 102 |
| 85. Supervised Teaching Practice.....                                               | 103 |
| 86. Survival Course.....                                                            | 104 |
| 87. System Analysis of Literary Work.....                                           | 106 |
| 88. Teaching Methodology and Pedagogy.....                                          | 107 |
| 89. The Art of Aiding by Verbal Exchange.....                                       | 108 |
| 90. The Fundamentals of Pedagogico-Psychological Research Methodology.....          | 109 |
| 91. Theory and History of Theatre.....                                              | 110 |
| 92. Theory of Communication and Information.....                                    | 111 |
| 93. Theory of Editing.....                                                          | 112 |
| 94. Vybrané kapitoly z chémie.....                                                  | 113 |
| 95. Web Pages Production.....                                                       | 115 |
| 96. Winter Ski Training Course.....                                                 | 116 |
| 97. World Literature 1.....                                                         | 117 |

|                             |     |
|-----------------------------|-----|
| 98. World Literature 2..... | 118 |
| 99. Xenobiochemistry.....   | 119 |

| <b>Learning outcomes:</b><br>Goal of the course is to provide the students with a knowledge of types of toxic substances and their metabolism, safe and handling of toxic substances.                                                                                                                                                                                                                                               |       |                                      |       |      |     |
| <b>Brief outline of the course:</b><br>Historical aspects, types of toxic substances, types of exposure, dose-response relationship. Disposition of toxic compounds (absorption, distribution, excretion of toxic compounds). Metabolism of toxic compounds. Drugs as toxic substances, food additives and contaminants, environmental pollutants. Statement of chemistry laboratory policy. Safe and handling of toxic substances. |       |                                      |       |      |     |

| <b>Learning outcomes:</b><br>Students obtained the knowledge of basic biotechnological processes and their applications in agriculture, industry, food production and medicine.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |      |                                   |     |     |     |
| <b>Brief outline of the course:</b><br>Classification of biotechnology, disciplines and subjects which are involved with biotechnology. The fermentation processes, types of bioreactors, impellers, principles of microbial growth, media and substrates for fermentation processes. The bioremediation, production and application of biogas, in-vessel composting. Micro-organisms used to preparation amino acids, their fermentation preparation, isolation and possible uses. The methods of classical Plant Biotechnology. Ethanol fermentation, spirits, production of wine and beer. The biological filters, nutrient removal and the membrane bioreactors. Antibiotics. |      |                                   |     |     |     |

Terminal examination by oral form.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                        |
| <b>Learning outcomes:</b><br>The basic chemical ingredients in cosmetic products, their isolation from natural sources. The construction of some interesting groups of the organic structures and their application in cosmetic industry.                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                        |
| <b>Brief outline of the course:</b><br>Skin and its components. The chemistry of lipids. Lipids, their classification (triacylglycerols, glycerophospholipids and sphingophospholipids), liposomes as transport systems. Fatty acids and alcohols, natural and synthetic waxes. Surfactants, their classification. Antioxidants. Dyes, their classification, organic and inorganic dyes, natural and synthetic. Biological active compounds (amino acids, peptides, proteins hydroxy acids, vitamins, polysaccharides) as the cosmetic ingredients. The chemistry of fragrances. Compounds derived from shikimic acid and mevalonic acid, their biosynthesis, Synthetic fragrances and their construction. |                                        |

| <b>Learning outcomes:</b><br>Introduction to topics in environmental chemistry and basic procedures applied for environmental protection.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                             |
| <b>Brief outline of the course:</b><br>Introduction to Environmental Chemistry<br>Chemical aspects of pollution and environmental problems. Composition and behavior of the atmosphere. Energy balance of the Earth and climate changes. Principles of photochemistry, photoprocesses in the atmosphere. Petroleum, hydrocarbons and coal (characteristics, sources and environmental pollution). Soaps, polymers and synthetic surfactants. Haloorganics and pesticides. Environmental chemistry of some important elements (C, N, S, P, halogens, biologically important metals ...). Environmental chemistry in aqueous media. Aqueous systems, parameters, cycles and their protection. The Earth's crust (rocks, minerals, soils). Natural and artificial radioactivity, utilization. Energy and energy sources (fossil fuels, nuclear, geothermal, solar energy, wind and water energy). Solid waste disposal and recycling. |                                                             |

| <b>Learning outcomes:</b><br>To present the different types of functional materials, their atomic structure and mechanical properties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                        |
| <b>Brief outline of the course:</b><br>Historical perspectives. Materials and human being. Participation of natural science in material engineering. Material revolutions. Classification of materials. Atomic structure and interatomic bonding. Amorphous and crystalline materials. Mechanics of materials. Imperfections in solids. Crystal lattice defects. Point defects. Line defects. Dislocations. Diffusion. Diffusion mechanisms. Deformations and failures, re-crystallization. Deformations. Plastic deformations. Solid solutions. Intermediary phases. Phases in ceramic systems. Phase transformations. Crystallization of metals. Phase identification methods. Stress and strain. Structure of metallic and ceramic materials. Alloys. Steel. Light metals. Metallic glasses. Gold. Inorganic non-metallic materials. Ceramic construction materials. Ceramic tools. Bio-ceramics. Ceramics in cosmos. High-temperature superconductors. Glass. Building binders. Polymers. Essence of polymers. Thermoplastics. Reactoplastics. Polymer structure. Mechanical properties of polymers. Natural materials. Wood. Bones. Teeth. Conchs and shells. | <b>Prerequisites:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                  |
| <b>Conditions for course completion:</b><br>The knowledge of the reaction mechanism of the main tests of several organic compounds derivatives and the ability of their laboratory realization are required.<br>Written tests: at least 51% from each one is required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                  |
| <b>Learning outcomes:</b><br>The students will become familiar with the basic laboratory skills and techniques that they can apply in demonstrating experiments in their future career as a teacher. The rules of healthy and safety laboratory work are emphasised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                  |
| <b>Brief outline of the course:</b><br>Qualitative analysis of organic compounds<br>Alkanes - preparation of methane<br>Alkenes - preparation and addition reactions of ethene, addition reactions of $\beta$ -carotene<br>Alkynes - preparation of acetylene and studying of its reaction<br>Aromatic hydrocarbons and their derivatives – preparation and their characteristic reactions<br>Halogenoderivatives – preparation of chloroethane and iodoform<br>Hydroxoderivatives and ethers – properties and reactivity - methanol, ethanol, glycerol, preparation of sodium ethanolate, phenols, characteristic properties of diethylether<br>Carbonyl compounds - preparation and their reactions<br>Carboxylic acids and their derivatives – preparation and properties<br>Natural compounds – carbohydrates, proteins, amino acids, lipids<br>Column chromatography -acetylation reaction of ferrocene - its preparation and separation of the obtained products by column chromatography<br>Isolation of the fragrant components using steam distillation<br>Everyday life chemistry |                                                                  |

| <b>Learning outcomes:</b><br>Learning outcomes:<br>Increasing physical condition and performance within individual sports. Strengthening the relationship of students to the selected sports activity and its continual improvement.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                           |
| <b>Brief outline of the course:</b><br>Brief outline of the course:<br>Within the optional subject, the Institute of Physical Education and Sports of Pavol Jozef Šafárik University provides for students the following sports activities: aerobics, basketball, badminton, floorball, yoga, pilates, swimming, body-building, indoor football, self-defence and karate, table tennis, sports for unfit persons, streetball, tennis, and volleyball.<br>In the first two semesters of the first level of education students will master basic characteristics and particularities of individual sports, motor skills, game activities, they will improve level of their physical condition, coordination abilities, physical performance, and motor performance fitness. Last but not least, the important role of sports activities is to eliminate swimming illiteracy and by means of a special program of medical physical education to influence and mitigate unfitnes.<br>In addition to these sports, the Institute offers for those who are interested winter and summer physical education trainings with an attractive program and organises various competitions, either at the premises of the faculty or University or competitions with national or international participation. |                                           |

| <b>Brief outline of the course:</b><br>Symmetry, elements of symmetry, point groups, symmetrical properties of orbitals and bonds. Principles of stereochemistry, VSEPR, configuration of molecules, polyhedra, regular and semiregular polyhedra. Valence shells with 4–12 electron pairs, geometry of molecules and periodic system. |       |                                                            |       |     |     |

| <b>Prerequisites:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                        |
| <b>Conditions for course completion:</b><br>2 written tests.<br>30 %<br>The final examination is in a written form. The final mark is based on the results from current and final tests.                                                                                                                                                                                                                                                                                                                                                                      |                                        |
| <b>Learning outcomes:</b><br>Students get an overview about the symmetry at the micro- and macrostructure level and about diffraction methods used for the crystal structure determination and they will learn how to use the results of the crystal structure analysis in their own work.                                                                                                                                                                                                                                                                    |                                        |
| <b>Brief outline of the course:</b><br>Macrostructure and microstructure symmetry, individual work with space groups. Theoretical basis of the diffraction experiment. Practical aspects of crystal structure solution. Processing the results of structural analysis. Theoretical basis, practical aspects and possibilities of X-ray powder diffraction analysis, its use at work of a chemist.                                                                                                                                                             |                                        |

| <b>Learning outcomes:</b><br>Learning outcomes:<br>Students will be familiarized with principles of safe stay and movement in extreme natural conditions as they will obtain theoretical knowledge and practical skills to solve the extraordinary and demanding situations connected with survival and minimization of damage to health. The course develops team work and students will learn how to manage and face the situations that require overcoming of obstacles.                                                                      |                                     |
| <b>Brief outline of the course:</b><br>Brief outline of the course:<br>Lectures:<br>1. Principles of behaviour and safety for movement and stay in unknown mountains<br>2. Preparation and leadership of tour<br>3. Objective and subjective danger in mountains<br>4. Principles of hygiene and prevention of damage to health in extreme conditions<br>Exercises:<br>1. Movement in terrain, orientation and navigation in terrain (compasses, GPS)<br>2. Preparation of improvised overnight stay<br>3. Water treatment and food preparation. |                                     |

| <b>Learning outcomes:</b><br>Organic chemistry:<br>The general review on the basic chemistry of saccharides, lipids, amino acids and peptides.<br>Inorganic chemistry:<br>To get acquaintance of the students with the stereochemistry of inorganic compounds, methods of the study and its influence on the properties of the compounds. Moreover to get acquaintance of the students with actual direction of inorganic chemistry in the area of nanomaterials.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                               |
| <b>Brief outline of the course:</b><br>Organic chemistry:<br>Nomenclature of monosaccharides, their stereochemistry (the Fischer projection, the Haworth projection, conformation of sugars). Monosaccharide derivatives. Ascending reactions. Oligosaccharides and polysaccharides.<br>Lipids, their structure and classification. Groups of lipids. Triacylglycerols, glycerophospholipids sfingophospholipids, glycosphingolipids.<br>Amino acids, their nomenclature, classification and stereochemistry. Synthesis of amino acids. Nonribosomal construction of peptides.<br>Inorganic chemistry:<br>Symmetry, elements of symmetry, point groups, symmetrical properties of orbitals and bonds. Principles of stereochemistry, VSEPR, configuration of molecules, polyhedra, regular and semiregular polyhedra, the use of concept of symmetry in IR and UV-VIS spectroscopy. Nanochemistry - definition, bonds in nanoparticles and nanopowders, interactions between nanoparticles. Unique properties of nanomaterials, new methods of the synthesis of nanomaterials. |                                               |
