COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice					
Faculty: Faculty of Medicine					
Course ID: 1. KAIM/AIM-GM/16		Course name: Anaesthesiology and Intensive Medicine			
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present					
Number of ECTS credits: 3					
Recommended semester/trimester of the course: 10.					
Course level: I.II.					
Prerequisites: IK/IM-GM1/16 and NLK/NL-GM1/19 and UFR/PM-GM1/19					
Conditions for course completion: 1. Test - minimum percentage of 60% 2. Drawing up a written work (literature review) on a specific topic					
Learning outcomes: General Principles of General Anaesthesia and Regional Anaesthesia, perioperative patient management General Principles of Care about Critically ill Patients CPR-Basic life support					
Brief outline of the course: Introduction to Anaesthesiology & Resuscitation. General preoperative preparation. Monitoring in Anaesthesiology & ICU. General anaesthesia. Regional anaesthesia. Acute and chronic pain management. Respiratory failure. Basic of Artificial ventilation. Enteral and parenteral nutrition. Shock. Multiorgan failure. General and specific treatment of intoxications. Life support and advanced life support.					
Recommended literature: 1. Critical Care Medicine at a Glance, 3rd Edition Autor: Richard Leach 2014 2. Anaesthesia at a Glance by Julian Stone, William Fawcett 2014,, 3. C.Spoors, K.Kiff: Training in anaesthesia, 2010					
Course language: English					
Notes:					
Course assessment Total number of assessed students: 981

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: UA/A-GM1/14	Course name: Anatomy 1
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 3 / 3 Per study period: 42 / 42 Course method: present	
Number of ECTS credits: 7	
Recommended semester/trimester of the course: 1.	
Course level: I.II.	
Prerequisites:	
Conditions for course completion: 100% presence in all practical lessons with opportunity to have maximum three absences which must be compensated. 100% presence in 2 theoretical and 2 practical tests with the possibility to absolve retake test in the exam period from the curriculum of the all semester. The achievement minimum 72 points earned by the sum of points from two theoretical and two practical tests.	
Learning outcomes: The aim of this subject is to use anatomical nomenclature, to know the structure of upper and lower limbs, bones, their joints, muscles, vessels and nerves. Study of anatomical structures location in individual regions of upper and lower limbs in mutual topographical relationships with the ability to apply it in practical medicine. Knowledge gained from the study of both systemic and regional anatomy of upper and lower limbs should be used in application from the view of functional anatomy.	
Brief outline of the course: Ethical principles in teaching of anatomy, introduction to anatomy. Knowledge of anatomical nomenclature and its using during the study of anatomy and also in practical medicine. Become familiar with general knowledge of bones (osteology), joints (syndesmology), muscles (myology) and vessels. Study of the skeleton, joints and muscles of upper and lower limbs. Study of the blood and lymphatic systems and upper and lower limbs innervation. Topographical dissection of individual regions of upper and lower limbs. Dissection and study of superficial and deep structures in individual regions of limbs, with emphasis on their practical application.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: UA/A-GM2/14	Course name: Anatomy 2
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 3 / 3 Per study period: 42 / 42 Course method: present	
Number of ECTS credits: 9	
Recommended semester/trimester of the course: 2.	
Course level: I.II.	
Prerequisites:	
Conditions for course completion: 100% presence at all practical lessons with opportunity to have maximum three absences which must be compensated. 100% presence at 2 theoretical and 2 practical tests with the possibility to absolve one retake test during the exam period from the curriculum of the whole semester. 75% presence at lectures. The achievement 72 points at least, earned by the sum of points from two theoretical and two practical tests.	
Learning outcomes: Study of structures of the thoracic wall, abdomen and pelvis. Study of the anatomical structures of these areas in mutual relationships and the study of individual organs in the thoracic, abdominal and pelvic cavities located. To know the mutual regional relationships of individual anatomical structures, projection and skeletotopy of the organs located in the thorax, abdomen and pelvis. The acquired knowledge should be used in terms of spatial arrangement in the individual parts of the body and usable also in terms of functional anatomy in practical medicine.	
Brief outline of the course: Study of structures of the thoracic wall, organs located in the thoracic cavity, their projection on the thoracic wall. Topographical dissection of individual parts of mediastinum. Study of the vertebral column, abdominal wall and pelvis. Study of abdominal and pelvic organs, their projection, topography and skeletotopy. Abdominal wall dissection, study of weakest abdominal and pelvic walls spots (possibility of hernia occurrence).

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: UA/A-GM3/14	Course name: Anatomy 3
Course type, scope and the method: Course type: Lecture / Practice / Controlled study hour Recommended course-load (hours): Per week: 3 / 3 / 2 Per study period: 42 / 42 / 28 Course method: present	
Number of ECTS credits: 9	
Recommended semester/trimester of the course: 3.	
Course level: I.II.	
Prerequisites: UA/A-GM2/14 and UA/A-GM1/14	
Conditions for course completion: Written test (40%), practical tests (30%) and bonus points (30%). Student has to reach minimum 60 points to be allowed attend oral exam.	
Learning outcomes: The aim of this subject is to explain the detail anatomy of the head and neck. Students obtain information of skull, skull cavities, cervical vertebrae and their connections. Knowledge of muscles, blood supply, venous and lymphatic drainage of head and neck are substantial as well. Explanation of innervations of head and neck is performed in connexion with study of CNS, its inner and outer organizing and functions of particular structures of CNS.	
Brief outline of the course: Skull, cervical vertebrae and craniovertebral joints, muscles of the head and neck. Vessels of head and neck. Cranial nerves, innervation of head and neck. Regions of the head and neck. Central nervous system, spinal cord, brain stem, cerebellum, diencephalon, basal ganglia and their connections. Telencephalon - function of brain cortex, limbic system, nerve tracts.	
Recommended literature: Kluchová D.: Neuroanatomy - handouts from the lectures, Košice, 2013 Crossman A. COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice						
Faculty: Faculty of Medicine						
Course ID: UA/ AD-GM1/14		Course name: Anatomy Dissection 1				
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 0 / 2 Per study period: 0 / 28 Course method: present						
Number of ECTS credits: 2						
Recommended semester/trimester of the course: 5.						
Course level: I.II.						
Prerequisites: UA/A-GM3/17						
Conditions for course completion: Student has to prepare at least two anatomical specimens and to present it to teacher and younger students. Credits will not be awarded to a student who misses more than 6 hours of seminars and will not complete his work on specimens.						
Learning outcomes: Students have the opportunity to deepen their knowledge of anatomy by performing anatomical dissection under the supervision of the teacher and preparing material for teaching medical students in the lower grades of medical school. Students improve their practical skill to work with tweezers and a scalpel, which will be helpful to them in their own medical practice.						
Brief outline of the course: Dissection of subcutaneous structures on the palmar and dorsal side of upper limb, dissection of axillary fossa, dissection of subfascial layer in anterior region of arm and forearm, cubital fossa, anterior region of wrist, palm of hand, scapular region, posterior region of arm and forearm, posterior region of wrist and dorsum of hand.

University: P. J. Šafárik University in Košice						
Faculty: Faculty of Medicine						
Course ID: UA/ AD-GM2/14		Course name: Anatomy Dissection 2				
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 0 / 2 Per study period: 0 / 28 Course method: present						
Number of ECTS credits: 2						
Recommended semester/trimester of the course: 6.						
Course level: I.II.						
Prerequisites: UA/A-GM3/17						
Conditions for course completion: During semester, students help to teacher with prosection of the thorax and abdomen. Results of the prosection are demonstrated to the other students. Credits will not be awarded to a student who misses more than 6 hours of practical exercises.						
Learning outcomes: Anatomical dissection is carried out under the supervision of teacher. Students prepare cadaveric material for teaching of medical students. Students improve their knowledge of anatomy of the trunk and abdomen. Participants can develop manual dexterity skills						
Brief outline of the course: Dissection of subcutaneous structures of the anterior chest wall, dissection of intercostal spaces, opening of thoracic cavity, dissection of upper mediastinum, taking off lungs, heart and pericardium, dissection of arteries and veins of heart, dissection of hert chambers, dissection of posterior mediastinum. Dissection of subcutaneous structures of abdominal wall, abdominal muscles, inguinal canal, opening of abdomen, dissection branches of abdominal aorta.						
Recommended literature: Rohen, Yokochi: Color Atlas of Anatomy, Lippincott Williams & Wilkins, 2011 Netter F. H.: Atlas of Human Anatomy.						
Course language: English						
Notes: The subject is provided only in the summer semester, capacity of the subject is limited to 10 students, in case of higher interest students will be selected.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: ULBL/ B-GM1/09	Course name: Biology 1
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course: 1.	
Course level: I.II.	
Prerequisites:	
Conditions for course completion: active presence in all practical lessons each test assessment: minimum of 60%	
Learning outcomes: To introduce the basic concepts of cell biology and molecular biology, including cell structure, biomacromolecules, cell cycle, cell reproduction, gene expression and cell communications. To give students a thorough grounding in the theoretical and practical foundations of molecular biology and cytology. Students have acquired an understanding of the major concepts in cell and molecular biology and have obtained basic information related to cytogenetics in clinical practice.	
Brief outline of the course: Biomacromolecules – the fundamental components of biological macromolecules, common characteristics, the structure and function of saccharides, lipids, proteins and nucleic acids. Cell structure – prokaryotic and eukaryotic cells, cell organelles, their structure and function. General characteristic of biomembranes, molecular structure of biomembranes; movement of molecules through the membrane. The structural organization of genome - organization of DNA in genomes, the basic principles of human cytogenetics. Replication of DNA. Cell cycle – phases, control of cell cycle, mitosis, meiosis, spermatogenesis, oogenesis. Cell signalling. Gene expression – gene structure and function, transcription, post-transcriptional RNA processing, translation, synthesis of proteins, posttranslation modifications, regulation of gene expression. The basic principles of epigenetics. Cell differentiation, cell ageing and cell death. Genomics and medicine.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: ULBL/ B-GM2/12	Course name: Biology 2
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 3 Per study period: 28 / 42 Course method: present	
Number of ECTS credits: 7	
Recommended semester/trimester of the course: 2.	
Course level: I.II.	
Prerequisites: ULBL/B-GM1/09	
Conditions for course completion: All practical lessons (100%) are obligatory for all students. Assessment of the student's learning achievements is carried out as a combination of continuous monitoring of the study during the teaching part of the semester (40%) with the final examination for the period of the semester concerned (60%). Prerequisite for the final examination (to register for the final examination) is the acquirement of 20 points minimum from continuous assessment during the semester.	
Learning outcomes: To introduce the basic concepts of general biology and human genetics, including mutations and their role in pathogenesis in human diseases, Mendelian genetics, quantitative and population genetics. To give students a thorough grounding in the theoretical and practical foundations of basic genetics. Students have acquired an understanding of the major concepts in human and molecular genetics and have obtained basic information related to genetic and molecular biology methods in clinical practice.	
Brief outline of the course: Mutations I. - classification of mutations, mechanisms of mutagenesis, gene (point) mutations, structural and numerical chromosome mutations. Mendelian genetics - historical overview, general characteristics, Mendel's laws of inheritance. Quantitative genetics - polygenic inheritance, heritability, multifactorial diseases. Gene linkage. Heredity and sex. Genetics in pathogenesis of human diseases. Inheritance of blood group systems I. - ABO, Rh, MNss, Lewis, HLA system. Population genetics - Hardy-Weinberg law, population equilibrium, panmixis, inbreeding, genetic drift, eugenics, euphenics. Genealogy and genetic counselling. Genetics of cancer. Molecular biology methods in human genetics and clinical practice. Ethical issues in human genetics.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: KVL Šaca/CGM-GM/15	Course name: Clerkship - General Medicine
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: Per study period: 40s Course method: present	
Number of ECTS credits: 1	
Recommended semester/trimester of the course: 9.	
Course level: I.II.	
Prerequisites: KVL Šaca/GM-GM/15	
Conditions for course completion: Completion of General medicine course	
Learning outcomes: Familiarize students with the operation, organization and administration outpatient facility of general practitioner. Teach students practical knowledge and skills in examination and treatment of patients at clinic of general practitioner. Control the ethical-legal principles of healthcare provision. Demonstrate the ability to communicate effectively with patients at the clinic . Handle keeping the medical records in written and electronical form. The student should learn to apply the examination and treatment procedures on medicine based on evidence and correct clinical practice. The student should be competent to execute detailed withdraw of medical history, handle physical examination, make a diagnosis and consider differential diagnosis options. Followed by the treatment (by the nature of diagnosis definitive, primary, acute in situations that require follow-up diagnosis and treatment in specialized facilities ambulatory or hospital type).	
Brief outline of the course: Students will fully participate in work at the clinic under the guidance of the teacher and after acquiring the theoretical knowledge of general medicine they should master the following processes : <ol style="list-style-type: none"> 1. Preventive care, particularly in terms of periodic medical examinations which consider all factors that affect the health of the patient (age, living and working conditions, eating habits , etc.) 2. Diagnostic and therapeutic care in patient affected by acute or chronic diseases 3. Available diagnostic methods – in hematology, biochemistry, microbiology and manage different sampling of biological material in relation with particular disease 4. Assessment of the health status and subsequent management either in his discretion or request for a consultation or hospitalization 5. Assessment activity – especially with regards to medical ability to carried out work and generally in relation to sickness absence in each category (defined by working Health Service) 6. Contact with professional and social institutions with which the practitioner for adults necessarily cooperates (eg. Public health, ADOS, Health insurance companies, Health Unions) 7. Technically master application of different types of medication (especially subcutaneous, intramuscular, intravenous) 	

- 8. Manage all acute conditions (eg. cardiovascular, anaphylactic, psychiatric, basics of CPR)
- 9. Keep the recorder during the clerkship

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: IK/ CIM-GM/16	Course name: Clerkship - Internal Medicine
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: Per study period: 120s Course method: present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 8.	
Course level: I.II.	
Prerequisites: IK/IM-GM1/16	
Conditions for course completion: 1. Appreciation of the knowledges during classes by the teacher	
Learning outcomes:	
Brief outline of the course: All medical students are required to undertake the clinical internship in the hospital wards under the supervision of the clinical tutor or other clinician who is responsible for the internship. The students make the ward rounds daily, they make daily medical notes, write case histories of newly admitted patients, read and assess X-rays, ECGs and other laboratory findings with their supervisor and at the same time they acquaint themselves with other medical records and work in the hospital ward. Practical clinical work (under tutorial guidance nad support) includes taking various biological samples for laboratory testing, administration of subcutaneous, intramuscular, intravenous injections and transfusions. The students take responsible part in therapeutic procedures and physical examinations such as pleural, abdominal and sternal puncture in monitored patients (or in other cases interesting from the diagnostic view), USG, X-ray, ECG, bicycle ergometry, pulmonary function examination, endoscopy, and autopsy in the case of death. According to hospital possibilities the clinical internship requires 1-2 days of laboratory work to perform in order to become familiar with available basic diagnostic techniques such as doing urine tests, blood counts and blood smears. In more common internal diseases sternal biopsies are demonstrated to students. According to hospital possibilities, the students are required to become familiar with the work of Central Admission Department, Intensive Care Unit, Dialysis Unit and Anaesthesiology and Resuscitation Department. The students are required to take part in seminars. If it is possible they are supposed to perform night duties with qualified medical staff at least twice during their internship course. The students are required to write an internship diary with the records of all the performed procedures during their internship. The diary will be regularly checked by the clinical tutor at the end of each week.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: ULBF/ CB-GM/09	Course name: Clinical Biophysics
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 0 / 1 Per study period: 0 / 14 Course method: present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 9.	
Course level: I.II.	
Prerequisites: ULBF/MBF-GM/18	
Conditions for course completion: Presence at practical lessons, the student may have maximum three absences. Compensations are mandatory. Final exam - at least 60% form written test. The minimum number of students is 5 students.	
Learning outcomes: Clinical biophysics comprises the scientific and technological basis of clinical techniques and procedures that are based on physics. Most direct diagnostic tests and many of the therapeutic procedures use the effects of physical forces, ionizing and non-ionizing radiation on human body. Clinical biophysics implies that an understanding of the function, as well as an appreciation of the scope and limitations of the equipment used in diagnosis or therapy, are absolutely necessary for good medical practise.	
Brief outline of the course: Lasers in medicine, Physical basics of lasers, types of lasers used in medicine, safety aspects of the use lasers, Clinical application of lasers in ophthalmology, diabetic retinopathy - panretinal photocoagulation, glaucoma – iridotomy, capsulotomy, correction of refractive properties of the eye, laser surgery observation, Physiotherapy in rehabilitation, Physical and biophysical basics of galvanic current, diathermy and diadynamic current, magnetotherapy and ultrasound in physiotherapy of vertebral diseases, Observation of practical application of physiotherapy, Audiometry - The physical nature of sound, simple harmonic motion, interference of sound waves, Structure and physiology of middle ear and inner ear, tonal, threshold and speech audiometry, examination of recruitment phenomenon, tympanometry and the examination of stirrup reflex, examination of evoked potentials of cerebral areas, Observation of diagnostics and therapy of patients. Nuclear magnetic resonance tomography, Physical basics of nuclear magnetic resonance, magnetic properties of nuclei, larmor equation, resonance and relaxation, relaxation times, Basic principles of imaging, spatial encoding of signal, possible hazards of NMR imaging, Clinical application of magnetic resonance (MR), equipment in local hospital, modelling of the examination of patient, images of tissues with disorders, advantages and disadvantages MR compared to CT, Observation of the examination of patient.	

Recommended literature: Clinical biophysics, M. Anbar, R.A.Spangler, P. Scott, Warren H. Green, Inc., St. Louis, 1985 Ophthalmic laser surgery: W. E. Benson, G. Coscas, L.J. Katz, Philadelphia, 1993 An Introduction to biophysics with medical orientation, edited by G.Rontó, I.Tarján, Akadémiai Kiadó, Budapest, 1991

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: ULI/ CB-GM/09	Course name: Computer Biometrics
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 0 / 1 Per study period: 0 / 14 Course method: present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 5.	
Course level: I.II.	
Prerequisites:	
Conditions for course completion: 1. 100% and active attendance. 2. Min. 60% from each test during the term. 3. Elaboration of all given classworks. 4. Final exam.	
Learning outcomes: This subject should provide an understanding of the basic principles that underlie research design, data analysis and interpretation of results and enable the students to carry out a wide range of statistical analyses.	
Brief outline of the course: Basic notion. General sequence of steps in a research project. The design of experiment. Descriptive statistics - mean, standard deviation, variance, standard error of the mean, quartils, confidence intervals. The distribution of observations. Theoretical models of distribution probability. Data protection in information systems. Estimation and hypothesis testing. Data collection, data entry, data checking, data cleaning, data analysis. The two-sample test for equal means, paired and not-paired. Homogeneity of variance in the two samples means test. Analysis of variance one way, parametric. Non-parametric tests. Solution of tasks with using commercialy software. Regression and correlation. Relation between two continuous variables. Simple linear regression and correlation. Correlation coefficient. Point and interval estimates for parameters of line. Testing hypothesis of probability. Contingency tables. Uncertainty models and their applications in medicine. Solution of typical tasks.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: KD/D-GM1/09	Course name: Dermatovenerology 1
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present	
Number of ECTS credits: 1	
Recommended semester/trimester of the course: 7.	
Course level: I.II.	
Prerequisites: ULM/MB-GM1/09	
Conditions for course completion: tests medical examination of a patient, credit	
Learning outcomes: The students have a thorough grounding in internal medicine, enabling insight into the interactions between the skin and other systems of the body, and a detailed understanding of the structure and function of the skin. Main aim of dermatovenerology is initiated in histology, histopathology of the skin, essential skin biology, functions of the skin, and skin lesions. The students have to be certain of history taking, describing the skin manifestations, investigation and patch testing for occupational and non-occupational contact allergic dermatoses. The students have to be skilled in microscopy investigations. They must have knowledge of immunohistology of autoimmune diseases, determination of skin tumors, new non-invasive treatment methods. The students will be familiar with the epidemiology of sexually transmitted diseases, their clinical manifestations, modes of transmission, and their appropriate treatment.	
Brief outline of the course: Histology and histopathology of the skin. Skin diseases due to physical and chemical causes. Photodermatoses. Viral, bacterial, fungal and parasitic skin infections. Erythematousquamous diseases. Pustular diseases. Keratoses. Drug eruptions and allergic reactions. Dermatitis and eczema, occupational skin disease.

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: KD/D-GM2/09	Course name: Dermatovenerology 2
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 2 Per study period: 14 / 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 8.	
Course level: I.II.	
Prerequisites: KD/D-GM1/09 and UP/PA-GM1/14 and UPF/PP-GM1/16	
Conditions for course completion: tests medical examination of a patient, credit	
Learning outcomes: The students have a thorough grounding in internal medicine, enabling insight into the interactions between the skin and other systems of the body, and a detailed understanding of the structure and function of the skin. Main aim of dermatovenerology is initiated in histology, histopathology of the skin, essential skin biology, functions of the skin, and skin lesions. The students have to be certain of history taking, describing the skin manifestations, investigation and patch testing for occupational and non-occupational contact allergic dermatoses. The students have to be skilled in microscopy investigations. They must have knowledge of immunohistology of autoimmune diseases, determination of skin tumors, new non-invasive treatment methods. The students will be familiar with the epidemiology of sexually transmitted diseases, their clinical manifestations, modes of transmission, and their appropriate treatment.	
Brief outline of the course: Atopic dermatitis. Seborrheic dermatitis. Clinical features, diagnosis, management Diseases of the sebaceous glands Acne. Allergic and irritant contact dermatitis. Urticaria. Angioedema Bullous diseases. Malignant cutaneous tumours . The skin in systemic disease.

Faculty: Faculty of Medicine	
Course ID: UE/E-GM/16	Course name: Epidemiology
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 2 Per study period: 14 / 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 8.	
Course level: I.II.	
Prerequisites: ULM/MB-GM2/14 and UPF/PP-GM1/16	
Conditions for course completion: Attendance on lectures, active participation and discussion. Seminar – seminars work on chosen topic with presentation. Written test.	
Learning outcomes: Student of the subject will receive the basic knowledge about occurrence and distribution of infectious diseases and chronic diseases with outbreaks in a population, about fundamental factors influencing their occurrence, about preventive and repressive measures against their spread and to improve the health status of the population.	
Brief outline of the course: Epidemiology - characteristics, goals. Basic epidemiological methods, causality. Descriptive methods, analytic methods, experimental epidemiology, epidemiological surveillance. Statistical methods in epidemiology. Evolution of parasitism and infectious diseases. Sources of infection – forms, characteristics, scope and epidemiological measures. Transmission of infectious diseases. Phases of transmission, particular ways of transmission. Classification of infectious diseases. Epidemiology of intestinal, airborne, arthropod-borne, and skin and external mucosae infections. Epidemiology of zoonoses. Epidemiology of nosocomial infections. Epidemic process – characteristics, determinants. Principles of control of infectious diseases. Specific prophylaxis, active and passive immunization. Decontamination, disinfection, sterilization, disinsection, rodent control.

Course ID: ULI/MZND-GM/12		Course name: Evidence Based Medicine				
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 0 / 1 Per study period: 0 / 14 Course method: present						
Number of ECTS credits: 2						
Recommended semester/trimester of the course: 6., 8., 10.						
Course level: I.II.						
Prerequisites: ULI/MInf-GM/09						
Conditions for course completion: 1. 100% and active attendance. 2. Min. 60% from each test during the term. 3. Elaboration of all given classworks.						
Learning outcomes: Understand basic principles of Evidence based Medicine (EBM). The students will get skills to obtain information about clinical scientific outputs; they will know how to critically evaluate clinical information as well as they will know to present benefits for clinical praxis. Basics of scientific work related to the medicine will be also explained.						
Brief outline of the course: The history, the development and the recent state on Evidence Based Medicine. Characteristics of clinical trials. Formulation of clinical questions. Specialized information resources for evidence based medicine. Methodology of clinical information searching. Qualitative evaluation of clinical studies and reviews. Presentation of practical works.

Course level: I.II.						
Prerequisites: G-PK/GO-GM2/09						
Conditions for course completion: - 100 % participation in practical lectures, signed in logbook - obtain at least 60% from credit test (Mark E)						
Learning outcomes: aim of subject: get to know operative techniques in gynecology and obstetrics, reiteration of knowledge						
Brief outline of the course: basic structure: basic operative techniques in gyn&obs specialiyed operative, techniques, prenatal diagnostic techniques (amniocentesis), techniques in minimal invasive surgery (hysteroscopy, laparoscopy), process of physiological and pathological gravidity, psysiological birt, menstrual cycle disorders, infection in gynecology, benign and malignant tumors, sterility, urogynecology, breast disease						
Recommended literature: Obsterics and gyneacology Steven G. Gabbe Jeniffe R. Niebyl Joe Leih simpson ISBN 978-1-4377-1935-2 2012						
Course language: English language

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: UHE/ HE-GM1/13	Course name: Histology and Embryology 1
Course type, scope and the method: Course type: Lecture / Practice / Controlled study hour Recommended course-load (hours): Per week: 2 / 3 / 1 Per study period: 28 / 42 / 14 Course method: present	
Number of ECTS credits: 5	
Recommended semester/trimester of the course: 2.	
Course level: I.II.	
Prerequisites:	
Conditions for course completion: Requirements for completion of subject: 1. Student has to attend all practical lessons (100%) and minimally 70% of the lectures. 2. Limits to pass the subject Histology and Embryology 1: control tests during practical classes – average minimum 60% semestral slide test – minimum 60% of each slide semestral written test – minimum 60% If these conditions are not completed the student is evaluated - FX	
Learning outcomes: The student gains knowledge about the microscopic structure and function of the cells and tissues within living human organism. This serves as the base for studying pathology and pathophysiology. Cells and tissues are studied practically by the light microscope. Embryology I is concerned with basic principles of early human development.	
Brief outline of the course: Histologic technic; Cytology; Epithelial tissue; Connective tissue proper; Cartilage; Bone; Ossification; Muscle tissue; Nervous tissue; Cardiovascular system. Embryology - blastogenesis, early organogenesis.	
Recommended literature: 1. Basic histology (Junqueira, 2013) 2. Functional histology (Adamkov, 2011) 3. Netters functional histology (Ovalle, Nahirney, 2013) 4. Wheater's Functional histology, Text and Color Atlas (B. Young, G. O'Dowd, 2014) 5. Before we are born (Moore, 2013)

Course ID: ULI/ HIS-GM/09	Course name: Hospital Information System
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 0 / 1 Per study period: 0 / 14 Course method: present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 5.	
Course level: I.II.	
Prerequisites:	
Conditions for course completion: 1. 100% and active attendance. 2. Min. 60% from each test during the term. 3. Elaboration of all given classworks. 4. Final exam.	
Learning outcomes: The main aim is to manage work with the real hospital information system. Students should understand principles of electronic health records, to know how to organize patients administration using individual modules of information system and to understand flow of information across the hospital departments and clinics.	
Brief outline of the course: Basics of hospital information systems. Parts of complex HIS (modules), access rights, interface description. Communication between users of HIS. Central register, Central card. Module of Outpatient clinic, creation of new outpatient clinic card, entry examination, anamnesis, emergency data set, score schemes, examination requests and orders, waiting room, outpatient clinic examination, consilium report, dispensatory treatment. Module of Hospital departments, administrative acceptance of patient for hospitalisation, entry examination, organisation of patients in rooms and beds, creation of health care records, displacement of patients in and between hospital departments, administrative discharge of hospitalised patients, final report. Gynaecological and maternity department. Module of Intensive Care Units. Module of Surgery departments. HIS for nurses and caregivers.

Course ID: UVZH/ H-GM/15	Course name: Hygiene
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 2 Per study period: 14 / 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 7.	
Course level: I.II.	
Prerequisites:	
Conditions for course completion: Attendance at practical lesson and seminars and accepted correct report on measurement, preparation and presentation of seminar thematic topic. Duty attendance minimum 20 % at lectures. The final exam in the written form- at least 64 % to pass the exam.	
Learning outcomes: Students will acquire knowledge about patterns of factors resulting from living and working environment, the impact of the different lifestyle factors on health, health promotion, health protection principles, population health and will receive the knowledge through addressing preventive measures.	
Brief outline of the course: Primary prevention in health care of the population. Primary, secondary and tertiary prevention, risk factors of chronic non-infectious diseases (cardiovascular, cancer, mental, metabolic, accidents, chronic respiratory, etc.). State health supervision, its meaning, structure of governmental service for public health, public health institutes. Public health service in Slovakia. Principles for evaluating health risks in living and working environment. Impact of factors resulting from environmental health. Environmental health, air quality, air contaminants effect on the health. Water its quality and its impact on health. Essential nutrients, their importance and the daily intake, rational nutrition. Food hygiene, principles of food control, contaminants in food. Occupational hygiene, health in the workplace, distribution and influence of factors from working conditions and occupational environment on health (physical, chemical, biological, ergonomic, specific, unspecific, hazardous work). Hygiene and sanitary in health care facilities. Effect of ionizing and non-ionizing radiation on health, protection of the population. Hygienic problems of housing and urbanization. Hygiene of children and youth. Growth and development of children, their health determinants, depending on the environment. Practical and theoretical principles in design, implementation and monitoring of population-based studies determinants of health. Practical visit of selected departments.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: IK/IP-GM/15	Course name: Internal Medicine - Propedeutics
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 5	
Recommended semester/trimester of the course: 5.	
Course level: I.II.	
Prerequisites: UA/A-GM2/14 and UFZ/Ph-GM1/17	
Conditions for course completion: <ol style="list-style-type: none"> 1. Attendance confirmed in the student's book, possible two absences, more needs to compensate 2. Test, 30 questions 3. Appreciation of the knowledge during classes by the teacher 4. To the exam bring the student's book with the appreciation 5. Conditions for preterm – teacher's recommendation , achievement of 27 points from 30 questions test 	
Learning outcomes:	
Brief outline of the course: Introduction to clinical medicine. History taking .Inspection – part II, physical examination of the head and neck . Palpation – part I. Palpation of the chest (lung and heart), physiological and pathological findings. Measurement of blood pressure.Palpation – part II. Palpation of the abdomen, physical examination of ascites. Palpation of the peripheral vessels, examination of the pulse.Percussion. Percussion of the lung, heart and abdomen – physiology and pathology.Auscultation of the lung – physiological and pathological findings. Main symptoms in most frequent diseases (bronchitis, asthma, pneumothorax, pneumonia and pleuritis.Auscultation of the heart. Heart sounds and murmurs.Auscultation findings in most frequent valvular diseases /.Principles of clinical electrocardiography, normal ECG, pathologic changes, myocardial hypertrophy, electrolyte disturbances.ECG – coronary heart disease, acute myocardial infarction, pulmonary embolism, pulmonary heart disease, myocarditis, pericarditis. ECG – arrhythmias .X-ray in Internal Medicine. Topics : <ol style="list-style-type: none"> 1. History taking – The history of presenting complaints 2. History taking – Previous medical history 3. History taking – Family history 4. History taking – Social and travelling history 5. The symptoms and signs of gastrointestinal diseases 6. The symptoms and signs of cardiac diseases 7. The symptoms and signs of diseases of peripheral arteries and veins 8. The symptoms and signs of the respiratory diseases 	

9. The symptoms and signs of kidney and bladder diseases
10. The symptoms and signs of the hematological diseases
11. The symptoms and signs of rheumatic disorders
12. Symptoms and signs of endocrine disorders
13. The symptoms and signs of the allergy
14. First impression
15. Mobility and posture
16. Physical examination of the head
17. Physical examination of the skin
18. Physical examination of the mouth
19. Physical examination of the neck
20. Facial appearance
21. Jaundice
22. Cyanosis
23. Dyspnea – main causes and physical examination
24. Hemoptoe and hemoptysis
25. Physical examination of the heart (heart sounds)
26. Physical examination of the chest (inspection, palpation, auscultation and percussion of the lung)
27. Physical examination of the abdomen – inspection, palpation, percussion, auscultation
28. Heart murmurs
29. Physical examination of the unconscious or poorly responsive patient
30. Physical examination of the spine and joints
31. Measurement of blood pressure, examination of pulse
32. Body temperature and fever
33. The physical signs in some respiratory disorders / pleural effusion, pneumothorax, bronchial asthma /
34. Aortic stenosis and regurgitation
35. Mitral stenosis and regurgitation
36. ECG – basic principles
37. ECG – hypertrophy of the left and right ventricles
38. Pneumonia, acute and chronic bronchitis, emphysema –physical examination
39. ECG – acute pulmonary embolism, pericarditis, electrolyte disturbances
40. ECG – supraventricular arrhythmias
41. ECG - ventricular arrhythmias
42. ECG – coronary heart disease, acute myocardial infarction
43. Diagnostic and therapeutic punctions
44. X-ray methods in internal medicine /chest, investigations with contrast agents/
45. Palpation of the liver and spleen

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice						
Faculty: Faculty of Medicine						
Course ID: IK/IM-GM1/16		Course name: Internal Medicine 1				
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 3 / 3 Per study period: 42 / 42 Course method: present						
Number of ECTS credits: 5						
Recommended semester/trimester of the course: 6.						
Course level: I.II.						
Prerequisites: UFZ/Ph-GM2/14 and IK/IP-GM/15						
Conditions for course completion: Education can alternatively by conducted in a distant mode. The teachers will communicate with students by email or teleconference applications. In the case of distant teaching 1. Teachers will assign the tasks to students in the form of essays and solving case reports. 2. Teacher who assigned the task will control their fullfillment 3. Knowledge assessment will be carried out by a distance test. 4. Completion of the course will be evaluated on the basis of the records of presence, written assignments and test results.						
Learning outcomes:						
Brief outline of the course: Coronary heart disease- diagnosis and treatment.Myocardial infarction – clinical features, diagnosis and treatment .Endocarditis, myocarditis and pericarditis – dif. diagnosis and treatment. Heart failure .Arrhythmias I. Arrhythmias II .Angiology. Peripheral vascular diseases Acute and chronic cor pulmonale. Thromboembolic disease .Arterial hypertension Syncope. Shock .Echocardiography.Secondary hypertension.Cardiomyopathy.Tuberculosis Chronic obstructive pulmonary disease. Chronic respiratory insuficiency.Inflammatory lung diseases. Investigation methods in pneumology.Bronchogenic carcinoma, other lung tumours Bronchial asthma – diagnosis and treatment .Interstitial lung diseases						
Recommended literature: 1. Kumar and Clarks: Clinical Medicine, 7th – 8th Edition 2. Kasper D, Fauci A. Harrison’s principles of Internal Medicine

Course ID: IK/IM-GM4/09	Course name: Internal Medicine 4
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 9.	
Course level: I.II.	
Prerequisites: IK/IM-GM3/17	
Conditions for course completion: 1. Attendance confirmed in the student's book, possible two absences, more needs to compensate 2. Appreciation of the knowledge during classes by the teacher, Test, 30 questions, needs to achieve 60%	
Learning outcomes:	
Brief outline of the course: Investigation methods in nephrology .Nephrotic syndrome. Differential diagnosis of proteinuria Fluid and electrolyte disorders .Tubulointerstitial nephropathy. Nephrolithiasis. Acute renal failure. Dialysis.Chronic renal failure. Kidney transplantation.Glomerular diseases. Glomerulonephritis.Investigation methods in rheumatology .Rheumatoid arthritis Systemic connective tissue diseases : Classification, systemic sclerosis, dermatomyositis. Sjogren syndrome.Systemic lupus erythematosus .Spondylarthropaties. Metabolic /crystal/ induced arthropaties .Metabolic bone diseases. Occupational Health. Syllabus - Introduction to occupational health.Occupational diseases caused by biological agents Occupational asthma - lung function testing (spirometry, bronchoprovocation tests, spiroergometry) Occupational diseases from overload - examination of upper extremities. Hand arm vibration syndrome.Occupational pneumopathies – differentiation.Pneumoconiosis - ILO classification, HRCT.Occupational rhinitis – rhinomanometry.Other occupational diseases - cancer, skin diseases, other ...Toxicology I – intoxication by anorganic substances. Toxicology II – intoxication by organic substances.Obesity, cachexia, main causes, possibility of the treatment. Demonstration of the patients.Water and electrolyte disturbances. Disorders of acid.-base homeostasis, dg., principles of the treatment.Sleep apnea syndrome, central and obstructive sleep apnoe syndrome, dg., possibility of the treatment.Reaven syndrome, obesity and insuline resistance. Hyperlipoproteinemias. Nephrology.Blood transfusion, indications, procedures for blood transfusion, complications. Application of the blood transfusion within limits.Atherosclerosis – pathophysiology, clinical manifestations, treatment.

Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 2 Per study period: 14 / 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 10.	
Course level: I.II.	
Prerequisites: IK/IM-GM4/09	
Conditions for course completion: 1. Attendance confirmed in the student's book, possible two absences, more needs to compensate 2. Appreciation of the knowledge during classes by the teacher, Test, 30 questions, needs to achieve 60% 3. To the exam bring the student's book with the appreciation 4. The exam in the form of test, 60 questions	
Learning outcomes:	
Brief outline of the course: Investigation methods in nephrology. Urinalysis. Nephrotic syndrome. Differential diagnosis of proteinuria, dg., treatment of nephrotic syndrome. Demonstration of patients with most frequent electrolyte disturbances. Hyponatremia – differential diagnosis and treatment. Hyper and hypokalemia – differential diagnosis, treatment. Tubulointerstitial nephritis. Nephrolithiasis. Demonstration of patients. Investigations – i.v. urography, ultrasonography of the kidney. Acute kidney injury, causes, dif. dg., treatment. Demonstration of patients with acute kidney injury (within limits). Chronic kidney disease, dividing, main complications of CKD, treatment. Elimination therapy, demonstration of hemodialysis. Acute and chronic glomerulonephritis, dg., dif. dg., treatment. Demonstration within limits. Investigation methods in rheumatology Rheumatoid arthritis. Demonstration of patients – symptoms, investigations, differential diagnosis, treatment. Demonstration of patients with connective tissue diseases. Vasculitis. Diagnosis, laboratory investigations, treatment. Demonstration of patients with connective tissue diseases. Vasculitis. Diagnosis, laboratory investigations, treatment. Osteoporosis and osteomalacia. Epidemiological importance, diagnosis, possibilities of treatment. Topics: 1. Investigation methods in nephrology 2. Glomerulonephritis – acute, rapid and progressive 3. Chronic glomerulonephritis 4. Nephrotic syndrome 5. Tubulointerstitial nephritis 6. Tumours of the kidney, polycystic kidney disease	

7. Renal calculi -nephrolithiasis
8. Acute kidney injury
9. Chronic kidney disease (chronic renal failure)
10. Rheumatoid arthritis
11. Spondylarthropathies (ankylosing spondylitis, reactive arthritis, psoriatic and enteropathic arthritis)
12. Organophosphate, insecticides and CO poisoning
13. Drug poisoning (paracetamol, NSAID, salicylates, antihistaminics)
14. Mushrooms poisoning
15. Acute poisoning – principles of management
16. Crystal arthritis – gout, hyperuricaemia
17. Water and electrolyte balance
18. Acid base balance
19. Osteoporosis
20. Systemic lupus erythematosus
21. Systemic inflammatory vasculitis
22. Systemic sclerosis (scleroderma), Sjögren's syndrome
23. Disease and the environment (heat, cold, electric shock, ionizing radiation)
24. The most common geriatric diseases
25. Osteoarthritis
26. Immune-based therapies (immunosuppressive, immunostimulant drugs, main indications in internal medicine)

Recommended literature:

1. Kumar and Clarks: Clinical Medicine, 8th Edition
2. Kasper D, Fauci A. Harrison 's principles of Internal Medicine

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: ULBF/MBF-GM/09	Course name: Medical Biophysics
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 4 / 3 Per study period: 56 / 42 Course method: present	
Number of ECTS credits: 8	
Recommended semester/trimester of the course: 2.	
Course level: I.II.	
Prerequisites:	
Conditions for course completion: A. Students can gain points during the term: a) small test at practical exercise b) attendance at practical lesson and accepted correct report (protocol) on measurement c) big test concerning lectured topics at midterm The gain less than 60 % must be compensated by successful retake test at the end of practical course. Practical exercises is evaluated according the dean's methodological guideline No. 1/2016. Students have the duty take part minimum at 50% of lectures. B. Final exam evaluation: Two items contribute to the final exam evaluation. Their particular contribution to the final evaluation: 1. the gain during permanent study check 20% 2. the final exam in the written form - at most 80%. To pass exam, no of above two items can be classified as Fx (failure). The knowledge evaluation is expression of percentual level (20%+80%) according the dean's methodological guideline No. 1/2016.	
Learning outcomes: At the end of the course students will become familiar with elementary knowledge about physical background of processes in human body on molecular, atomic and subatomic level. Students will understand physical principles of diagnostic and therapeutic devices, as well as biophysical effects in human body after application of biophysical techniques, encountered side effects and safe, efficient usage of medical devices in practice. Course will introduce also subjects of molecular biophysics, membrane biophysics, and bioenergetics. As the additional benefit from the course students will be able to address biophysical problems having close relationship to health and sickness in man.	
Brief outline of the course: Relation physics and medicine, Structure of matter, Nuclear radiation and its application in medicine, Magnetic resonance imaging, Lasers in medicine, X rays – the nature and physical properties, Conventional radiography and CT, Pulse oximetry, Ultrasound–physical characteristics, Medical application of ultrasound, Disperse system – classification and physical properties, Colligative properties of disperse systems, Transport processes – flow, diffusion, Membrane	

biophysics, Bioelectricity, Electrical current and tissues, Biophysics of senses, Sound and hearing, Biophysics of vision, Biophysics of cardiovascular system.					
Recommended literature: An introduction to biophysics with medical orientation, edited by G.Rontó, I.Tarján, Akadémiai Kiadó, Budapest, 1991 Medical biophysics practical exercises, M. COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: CJP/ LFMCS/11	Course name: Medical Communication in Slovak
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 1 Per study period: 14 Course method: present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 5.	
Course level: I.II.	
Prerequisites: Dek. LF UPJŠ/SL-GM1/09 or Dek. LF UPJŠ/SL-GM2/15 or Dek. LF UPJŠ/SL-DM2/15 or Dek. LF UPJŠ/SL-DM1/09	
Conditions for course completion: Students must actively participate in the class. Max. 2 absences (2x 45 min.). Continuous assessment is based on 2 written tests (week 6/7 and 12/13), a minimum overall average of 60% is required. Students with a final overall average lower than 60 percent are given an opportunity to take a test in the last week (Week 14) of the semester. The test result must be at least 60 percent. Students with a final overall average lower than 60 percent are not allowed to register for the final exam, i.e. their final grade is FX. Final assessment is based on one oral exam. Scale: A 100-93% B 92-85% C 84-77% D 76-69% E 68-60 % FX 59-0%	
Learning outcomes: After completing the course, students are able to communicate with patients in various departments in the hospital (internal medicine, surgery, paediatrics, gynaecology and obstetrics). They can take a history using specific questions and giving specific instructions to the patients, depending on the department/clinic.	
Brief outline of the course: History taking. Personal details, Family history, Present illness. Drug and social history. Taking history in surgery, paediatrics, gynaecology and obstetrics, etc. Doctor – patient communication.

Course ID: ULI/ MInf-GM/09	Course name: Medical Informatics
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 0 / 2 Per study period: 0 / 28 Course method: present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 1.	
Course level: I.II.	
Prerequisites:	
Conditions for course completion: 1. 100% and active attendance. 2. Min. 60% from each test during the term. 3. Elaboration of all given classworks.	
Learning outcomes: The aim of the course is to get knowledge about the basic terms, methods and tools of information and communication technologies. To reach the computer skills at the level, that allows students to create and to use databases and to get skills in information systems used in health care system. Students should also understand the importance of medical terminology, standards and evidence based medicine.	
Brief outline of the course: Utilization of ICT and informatics tools in medicine, eHealth, electronic health record, ePrescription, eMedication, eAllocation, information systems, telemedicine, bioinformatics, electronic signature, eLearning. Databases, data processing, database tables, primary keys, input mask, relations between tables. Forms in database, controls in forms, searching for information in database, data filtering, data sorting, queries, selection criteria, working with printing reports. Introduction into the biomedical statistics, descriptive statistics. Hospital information system. Terminology in medicine. PACS. Laboratory information system. Evidence based medicine.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: NLK/ NL-GM1/14	Course name: Neurology 1
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 7.	
Course level: I.II.	
Prerequisites: UA/A-GM3/17	
Conditions for course completion: 1. 100 % active participation in practical exercises, in the case of absence, may substitute up to 3 exercises per semester 2. Compulsory attendance in at least 9 lectures (national holidays are not included). 3. Practical examination of the neurological patient. 4. Successful completion of the test, evaluation A – E (possibility to repeat the test 2 times).	
Learning outcomes:	
Brief outline of the course: Neurology - general considerations. History taking. Cranial nerves I-XII, anatomy, physiology, pathology. Affection of the upper and the lower motor neurons – anatomic and physiologic considerations, diagnosis of paralytic states – lesion of corticospinal tract, brain stem syndromes, lower motor neuron lesions. Sensation. Anatomy, pathology. Cerebellum. Anatomy. Paleocerebellar and neocerebellar syndromes. Disorders of stance and gait. Extrapyramidal system. Hypertonic - hypokinetic syndrom. Hypotonic - hyperkinetic syndrom. Dystonia. Language and higher cortical function. Physiological and anatomical considerations. Language disorders, brain lobes pathology. Consciousness and unconsciousness. Causes of unconsciousness, quantitative disorders of consciousness: drowsiness, stupor, coma. The investigation of unconscious patient. Glasgow coma scale. Delirium. Brain death. Meningeal syndrom. Cerebrospinal fluid. Physiology, pathology. Lumbar puncture. Intracranial hypertension. Herniation of the brain – temporal, occipital. Plane X-ray of the skull and spine. Computer tomography of the brain and spinal column. MRI of the brain and spinal cord. PET, SPECT, DAT SCAN. Neurophysiological examination in neurology. Evoked potentials, electromyography. General considerations, clinical value. Electroencephalography. Polysomnography. Ultrasound examination in neurology. Duplex ultrasound of extracranial and intracranial cerebral arteries. Angiography of cerebral arteries. General considerations, clinical value. Head injury. Concussion, subdural, epidural hematoma, contusion of the brain. Spinal column and spinal cord injury. Dementia. Diagnosis, differential diagnosis. Alzheimer disease, Lewy body disease, frontotemporal dementia. Vascular dementia, other dementias. Diagnostic, therapy. Sleep disorders. Hypersomnia of the CNS origin. Restless leg syndrome. Developmental diseases of the nervous system. Cranial abnormalities, cerebral	

palsy, fakomatosis, neurofibromatosis (M. Recklinghausen,) angiomas, myelodysplasia, syringomyelia.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: NLK/ NL-GM2/14	Course name: Neurology 2
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course: 8.	
Course level: I.II.	
Prerequisites: NLK/NL-GM1/19	
Conditions for course completion: Due to the change in the form of study to distance study due to the Covid 19 virus epidemic, the conditions for passing the subject Neurology II will change as follows: The condition for passing the subject Neurology II is: 1. Preparation of power point presentations by each study group on the topics listed below, with marking which student has prepared which parts / slides of the presentation, each student must participate in the presentation 2. These presentations are sending to their teachers once a week, the latest one by 15.5. 2020. 3. The sources for the preparing of presentations are lectures, which are on the website of the Department of Neurology UPJŠ LF and recommended literature. 4. The condition for signing up for the exam is fulfilling of the conditions 1-3. 5. The final test will consist of the content of the subjects Neurology I and Neurology II. As it is uncertain whether contact teaching will resume, the exams of Neurology II in the school year 2019/2020 will be only by ROGO tests. In order to successfully complete the subject Neurology II, the student must pass the exam in the regular or 1st or 2nd term, with a minimum of 60% in the given test. Students will be informed about the terms of tests (exams) continuously in the AIS system (from 20 April 2020), each student is required to apply for the exam term 2 days in advance. Verification of technical compatibility and connectivity of students to the ROGO system will be on 11. – 12. May 2020 from 7AM to 7PM. In case of technical problems the student should contact Ing. Vladislav Ondič (mail: vladislav.ondic@upjs.sk). Presentation topics: 5. teaching week: 9. 3. - 13.3.2020 Ischemic stroke, Spinal cord ischemia 6. teaching week : 16.3. - 20.3.2020 Brain haemorrhage, Subarachnoid haemorrhage, Spinal cord haemorrhage 7. teaching week: 23.3. -27.3.2020 Demyelinating disorders of the CNS: MS, NMOSD, ADEM. 8. teaching week: 30.3. - 3.4.2020 Disorders affecting extrapyramidal system 9. teaching week: 6.4. - 10.4.2020 Headache 10. teaching week : 13.4. - 17.4.2020 Brain tumors. Paraneoplastic disorders. Pseudotumor cerebri. 11. teaching week : 20.4. - 24.4.2020 Neuroinfections I a II 12. teaching week : 27.4. - 1.5.2020 Inflammatory polyneuropathies – AIDP, CIDP, MMN.	

13. teaching week : 4.5. - 8.5.2020 Myopathies, Myasthenia gravis.
 14. teaching week : 11.5. - 15.5.2020 Metabolic disorders, Mononeuropathies and plexopathy

Learning outcomes:

Brief outline of the course:

Epilepsy and seizures. Classification, generalized and partial seizures. Diagnostic, therapy. Febrile convulsions. Ischemic stroke. Risk factors, clinical feature, diagnosis, therapy. Brain haemorrhage, subarachnoid haemorrhage. Risk factors, clinical feature, diagnosis, therapy. Brain tumors. Classification, clinical feature, general and focal signs, diagnostic, therapy. Brain MTS. Paraneoplastic disorders. Pseudotumor cerebri. Demyelinating disorders - multiple sclerosis. Infectious disorders of the nervous system –meningitis, encephalitis. Neurosyphilis. Lyme disease. AIDS. Brain abscess. Polyradiculoneuritis Guillain-Barre. Muscle diseases. Metabolic disorders.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: KDaD/ PE-GM2/12	Course name: Paediatrics 2
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 10.	
Course level: I.II.	
Prerequisites: KDaD/PE-GM1/15	
Conditions for course completion: Important announcement! According to the last rector ordinance No. 3/2020 from 16.3.2020 the teaching process of Pediatrics 2 will be carried out by distance method from 23.3.2020. More informations you will find on website of Department of Paediatric and Adolescent Medicine. 1. Attendance on practical lessons confirmed by assistant's signature in the record book of the student - it is obligatory to compensate more than one legitimate absence - (in case of 2 absent practical lessons their compensation in the corresponding form shall be determined by the teaching assistant, in case of more than 3 absences the Head of the department shall decide how to compensate) 2. Compulsory attendance in at least 10 lectures in summer term 3. Active participation on practical lessons – estimated by the teaching assistant 4. Successful passing of the credit test – achieving minimum 75 % of total score from credit test 5. Credits from the subject are going to be administered on the basis of fulfillment of criterias 1-4 on the last day of the block teaching	
Learning outcomes: Examination and health care of a child patient on pediatric department. Acquisition of theoretical and practical skills beginning from admission of the patient to his discharge from hospital (medical history taking, physical examination, layout of diagnostic procedures, their interpretation, differential diagnosis, treatment). Working with medical records, documentation. Learning of basic diagnostic and therapeutic algorithms following the most common diseases of childhood, according to systems presented on lectures.	
Brief outline of the course: Kidney disesaes – congenital anomalies, Urinary tract infections, renal syndromes, glomerulonephritis, inherited tubular disorders, electrolyte and acid-base disorders. Genetic syndromes, anemias, Disorders of coagulation and trombocytes, leukemias and most common solid tumors of childhood. Pediatric neurology – epilepsy, neuromuscular disorders. Rheumatic diseases – JIA, SLE, most common immunologic system disorders, neonatal pathology. Disorders of the Adrenal glands and side-effects of corticotherapy.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice						
Faculty: Faculty of Medicine						
Course ID: UP/PA-GM1/14		Course name: Pathological Anatomy 1				
Course type, scope and the method: Course type: Lecture / Practice / Controlled study hour Recommended course-load (hours): Per week: 4 / 4 / 1 Per study period: 56 / 56 / 14 Course method: present						
Number of ECTS credits: 7						
Recommended semester/trimester of the course: 5.						
Course level: I.II.						
Prerequisites: UA/A-GM1/14 and UA/A-GM2/14 and UHE/HE-GM2/17						
Conditions for course completion: Tests and Colloquium						
Learning outcomes: gain knowledge from the field of General pathology, mastery of histomorphology selected diagnoses, learn about with macroscopic autopsy diagnosis						
Brief outline of the course: Introduction to Pathology, Biopsy, cytology and autopsy, Thanatology, Cell Injury, Dystrophic changes: Alterations in protein metabolism, Alterations in carbohydrate metabolism, Alterations in lipid metabolism, Disturbances of electrolytes and body fluids, Pigments, calcification, crystals and lithiasis, Progressive changes, Atrophy and necrosis, Inflammation, Growth disorders, Teratology, Pseudotumors, Basis histological features of tumors, Tumors, Tumor systematics, Lymphomas, Hypersensitivity reactions, Immunodeficiency diseases, Cardiovascular system.						
Recommended literature: Kumar V, Abbas AK, Fausto N, Robbins SL, Cotran RS: Robbins and Cotran pathologic basis of disease, 7th edition, Elsevier/Saunders, Philadelphia, 2005 Böör, A., Jurkovič, I., Benický, M. and Havierova, Z: Practical lessons in histopathology and methods in pathology, UPJŠ Košice, 2004

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: KFBLR/PRM-GM/16	Course name: Physical and Rehabilitation Medicine
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 6.	
Course level: I.II.	
Prerequisites: UA/A-GM2/14	
Conditions for course completion: Conditions for course completion: 1. 100% and active attendance 2. Monitoring of the study during the teaching part of the term 3. Final exam. Students are required to participate at all parts (100 % participation). The exam will be in a written form. The course is assessed by an assessment mark. The mark reflects the quality of acquiring knowledge in accordance with the study subject objectives. In distance form of study, the student is obliged to observe: 1st website of the Department of Physiatry, Balneology and Medical Rehabilitation where topics of lectures and exercises and recommended literature, teaching materials, announcements for students will be published. The student will study the topics of lectures in the form of self-study. 2. The student is also obliged to follow the AiS through which the topics of lectures and exercises and the forms of their processing and control will be entered on the electronic bulletin board of the subject. Practical part: continuous checking of knowledge according to the teacher's instructions (seminar work, case reports, or other) - according to the schedule of exercises: according to a schedule once every 2 weeks. The student is graded A to E or Fx. Continuous assessment of theoretical knowledge should be included in the above requirements. The exam is carried out in a distance form according to the teacher's instructions.	
Learning outcomes: Learning outcomes: Prepare the students for the diagnostics, treatment and prevention of disabilities of all types and holistic approach to patient care, working with an interdisciplinary team of experts in many fields - nursing, physical therapy, occupational therapy, speech and language pathology, psychology, social work and others, help patients achieve their maximum functional capacity and highest quality of life. Brief outline of the course: 1. Field of competence of physical and rehabilitation medicine (PRM). Definition, philosophy,	

objectives and methodology. 2. PRM and the WHO ICF concept, including the use of Outcome Measures for assessing QOL, Functional Health. 3. Assessment in PRM, clinical and functional evaluation. 4. Kinesiology. 5. Main health interventions in PRM: Information, education, medical treatments, PRM programmes. 6. Physical modalities, therapeutic exercise, infiltration techniques, FES. 7. Orthoses, prostheses and assistive technology. 8. PRM and musculoskeletal disorders. 9. PRM and nerve lesions. 10. PRM and spine disorders, amputations. 11. PRM and disorders of nervous system, Stroke - from cell to society. 12. PRM and Spinal Cord Injury - from cell to society. 13. PRM and traumatic Brain Injury - from cell to society. 14. PRM, chronic neurological conditions (Parkinson's disease, MS, etc.) and other specific disabling conditions (Elderly Patient, Child with Disability, Cardiopulmonary Patient, Cancer Patient, etc.). 15. PRM Services, PRM management, Community-based Rehabilitation, PRM Research.

Brief outline of the course:

1. Field of competence of physical and rehabilitation medicine (PRM). Definition, philosophy, objectives and methodology. 2. PRM and the WHO ICF concept, including the use of Outcome Measures for assessing QOL, Functional Health. 3. Assessment in PRM, clinical and functional evaluation. 4. Kinesiology. 5. COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: CJP/LFPSG/11	Course name: Practical Slovak Grammar
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 1 Per study period: 14 Course method: present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 3., 5.	
Course level: I.II.	
Prerequisites: Dek. LF UPJŠ/SL-GM1/09 and Dek. LF UPJŠ/SL-GM2/15	
Conditions for course completion: Students must actively participate in the class. Max. 2 absences. Continuous assessment is based on written tests (week 6 and 12), a minimum overall average of 60% is required. There is an opportunity to write a course test in a week 14 in case of a fail to reach the minimum of 60%. In the event of failure to attain the limit, the examination procedure is not permitted and the student is graded FX - failed at the end of teaching in the respective semester. Final assessment is based on one written exam. Scale: A 100-93% B 92-85% C 84-77% D 76-69% E 68-60 % FX 59-0%	
Learning outcomes: Students with acquired skills of Slovak grammar are able to participate effectively in a variety of common situations of everyday communication including doctor - patient communication.	
Brief outline of the course: At the university. Medical specialties. In the hospital. At the doctor. Case history. Physical examination. Communication doctor – patient. Selected grammatical issues (selected morphological cases, verb tenses, prepositional phrases, imperative, conditional verb forms, active and passive voice, reflexive verbs with “sa/si“).

Course ID: ÚTVŠ/ TVa/11	Course name: Sports Activities I.
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 1.	
Course level: I., I.II., II.	
Prerequisites:	
Conditions for course completion: Conditions for course completion: Min. 80% of active participation in classes.	
Learning outcomes: Learning outcomes: Increasing physical condition and performance within individual sports. Strengthening the relationship of students to the selected sports activity and its continual improvement.	
Brief outline of the course: Brief outline of the course: Within the optional subject, the Institute of Physical Education and Sports of Pavol Jozef Šafárik University provides for students the following sports activities: aerobics, basketball, badminton, floorball, yoga, pilates, swimming, body-building, indoor football, self-defence and karate, table tennis, sports for unfit persons, streetball, tennis, and volleyball. In the first two semesters of the first level of education students will master basic characteristics and particularities of individual sports, motor skills, game activities, they will improve level of their physical condition, coordination abilities, physical performance, and motor performance fitness. Last but not least, the important role of sports activities is to eliminate swimming illiteracy and by means of a special program of medical physical education to influence and mitigate unfitnes. In addition to these sports, the Institute offers for those who are interested winter and summer physical education trainings with an attractive program and organises various competitions, either at the premises of the faculty or University or competitions with national or international participation.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: ChK/ SP-GM/15	Course name: Surgery - Propedeutics
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 5	
Recommended semester/trimester of the course: 5.	
Course level: I.II.	
Prerequisites: UHE/HE-GM2/17 and UA/A-GM2/14	
Conditions for course completion: 1. 100% attendance confirmed in the student's book, possible two absences needed to be compensated 2. Attendance 75% at lectures 3. Test, 20 questions, needs to achieve 12 points. 4. Oral exam	
Learning outcomes: Get knowledge from the basics of symptomatology and diagnostics of surgical diseases, using physical, laboratory and instrumental examination. Students will acquire basics of RTG diagnostics of acute abdomen and other RTG contrast examinations of gastrointestinal tract, thorax and skeletal injuries. Apprise principles of surgical procedures, preoperative care of the patient and postoperative care. The attention is focused on the basics of surgical thinking and scientific work in surgery.	
Brief outline of the course: Lectures: Introduction to Surgical Propaedeutic. Surgery, its focus and scope. History of development of surgery. Anamnesis and symptomatology of surgical diseases. Basic principles of clinical examination in surgery. Basics of instrumental, RTG and laboratory examination in surgery. Principles of antisepsis and asepsis. Disinfection and sterilization on surgical departments and in all healthcare institutions. Bleeding in surgery. Medical ethics in surgery. Legal aspects of surgery.	
Recommended literature: Frankovičová, M. et al.: Surgery for medical students. Košice, Faculty of Medicine, Pavol Jozef Šafárik University in Košice, 2014, 408 p. COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: ChK/S-GM1/16	Course name: Surgery 1
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 6.	
Course level: I.II.	
Prerequisites: ChK/SP-GM/15	
Conditions for course completion: Education can alternatively be conducted in distant mode. The teachers will communicate with students by email or teleconference applications, assign the tasks to students in the form of essays and solving case reports. Teacher who assigned the task will control their fulfillment. Knowledge assessment will be carried out by quality of students reports. Completion of the course will be evaluated on the basis of the records of presence and written assignments.	
Learning outcomes: Students gain basic information on diagnosis and treatment of surgical diseases of infectious origin. The outcome of the studies of trauma and war surgery is the acquiring the basic knowledge of injury causes and prevention, pointing out the peculiarities of war injuries. Important is the knowledge of open and closed wounds – students must master first aid as well as the basics of conservative and surgical treatment and its complications. Important is the knowledge of shock pathophysiology as well as its diagnosis and treatment. The aim in the field of plastic and replacement surgery is the knowledge of the possibilities in these fields as well as indications, preparation, transportation of a patient as well as a replacement to the corresponding department. The important part of the surgery is the gained knowledge in the field of post-surgical rehabilitation of patients. Significant are also the basics of dietetics of surgical patients with the possibilities of parenteral and enteral nutrition. Students master the basics of home parenteral nutrition all-in-one, taking into consideration the increasing number of patients also in Slovakia. Significant is the knowledge of the increasing importance of enteral nutrition everywhere in the post-surgical period where its usage is possible.	
Brief outline of the course: Injuries, Surgical infections, Rehabilitation, Transplant Surgery, Principles of dietetics

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: ChK/S-GM4/09	Course name: Surgery 4 (Neurosurgery, Orthopedics)
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 9.	
Course level: I.II.	
Prerequisites: ChK/S-GM3/17	
Conditions for course completion: solution of the problems, test	
Learning outcomes: Neurosurgery, orthopedics Students will acquire basic knowledge of investigative methodologies in orthopedics. They will learn the diagnosis and treatment of inflammatory, degenerative and metabolic diseases of the bone system. It is important to manage the diagnostic and treatment of primary and secondary tumors of the axial skeleton. Students will learn the basics of rehabilitation and assessment activities in the field of orthopedic surgery. It is crucial to obtain information about the symptoms and treatment of intracranial hypertension diagnosis and determination of brain death, which is important for the possibility of organ transplantation. Findings of birth defects of the nervous system similar to the diagnosis and treatment of head and spinal injuries are an essential range of what the student obtains at this semester. Diagnosis and treatment of tumors of the nervous system, as well as using of radioinvasive procedures in neurosurgery are necessary, which must be controlled after completing each section of the course.	
Brief outline of the course: Investigative techniques in orthopedics. Inflammatory and degenerative diseases of the musculoskeletal system. Metabolic disease, bone tumors and tumor-like affections. The most frequent orthopedic diseases arms and legs. Disease of the axial skeleton. Reconstructive and assessment activities in orthopedics. Intracranial pressure - pathophysiology of intracranial hypertension. Congenital malformations of the nervous system. Head injuries. Trauma of spine, spinal cord and peripheral nerves. Tumours of the nervous system. Vascular neurosurgery. Pain and nerve compression syndromes of peripheral nerves.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: ChK/S-GM5/09	Course name: Surgery 5 (Trauma Surgery, Urology)
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 10.	
Course level: I.II.	
Prerequisites: ChK/S-GM4/09	
Conditions for course completion: solution of the problems, test	
Learning outcomes: Trauma surgery, urology Students will acquire knowledge of the diagnosis and treatment of traumatic brain injury and spinal cord injury often simultaneously with chest injuries. Also important are the knowledge acquired in the abdomen and retroperitoneal injury, especially for its relative rarity. Frequently occurring musculoskeletal injuries, which is important to proper diagnosis and treatment. The student has to know the life-threatening symptoms of compartment syndrome and other rarely occurring due to injuries / Crush syndrome, algodystrophic syndrome, etc. /. In the field of urology is the result of learning the knowledge of the occurrence of urogenital anomalies syndrome. It is important to gain knowledge about the relatively frequently occurring inflammatory diseases in this area. Students master the diagnosis and treatment of calculous disease of the urinary system. In terms of incidence of diseases of the prostate is a common disability - whether benign hyperplasia or tumors, thus acquiring knowledge about the disease is extremely important. Similarly, the student must control the symptoms and treatment of injuries of the urogenital system, although they occur less frequently.	
Brief outline of the course: Craniocerebral injury. Spinal injuries. Chest injury. Injury to the abdomen, pelvis and urogenital system. The injuries of the upper limb. Lower limb injuries. Specific types of injuries and injury complications. History, terminology and basic principles of examination in urology. Anomalies of the urogenital system. Inflammatory diseases of the urogenital system, epidemiology, etiopathogenesis, diagnostic principles. Urolithiasis - etiopathogenesis, diagnostic procedure, complications and prognosis. Tumors of the urogenital system. Benign prostatic hyperplasia. Injuries of the urogenital system.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice						
Faculty: Faculty of Medicine						
Course ID: ChK/ OTT-GM/15		Course name: The Organ and Tissue Transplantation				
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 0 / 2 Per study period: 0 / 28 Course method: present						
Number of ECTS credits: 2						
Recommended semester/trimester of the course: 10.						
Course level: I.II.						
Prerequisites:						
Conditions for course completion: Final research.						
Learning outcomes: The students will acquire basic knowledge on the theory of biology and transmission organs and tissues. They will know the principle donors of organs, brain death determination and the principle of selection of suitable recipients. The students will acquire knowledge of the techniques of collection, storage and transportation of the tissues and organs, the basic principles of organ and tissue transplantation. They will know the possibilities of the products of The Tissue Banks.						
Brief outline of the course: History of transplantation of organs and tissues. Theory of biology and transmission organs and tissues. Immunology and transplantation, principles for donors and recipients. Sampling techniques, storage for transporting tissues. Transplant techniques. Legal and organizational aspects of transplantation of organs and tissues.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: UA/ GM/09	Course name: Topographic Anatomy
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 8.	
Course level: I.II.	
Prerequisites: UA/A-GM3/17	
Conditions for course completion: Students must present anatomical specimens they prepared during the semester. Evaluation: completed	
Learning outcomes: The aim of this subject is the study of topographical relationships of the anatomical structures, their position in the human body with emphasis on needs of clinical medicine. The explanation of the existence of different variations of various anatomical structures is very important for the next practice. The lectures are divided into anatomical and clinical part. The clinical part is lectured by doctors – clinicians.	
Brief outline of the course: Topographical anatomy of the various regions of the head, neck, chest, abdomen, pelvis, upper and lower limbs. The dissection and study of surface and in-depth services in these areas.
