| <b>Prerequisites:</b> ÚMV/ALGa/10                                                                                                                                                                                                                                                                                                              |       |                                |      |       |      |
| <b>Conditions for course completion:</b><br>According to tests and to the exam.                                                                                                                                                                                                                                                                |       |                                |      |       |      |
| <b>Learning outcomes:</b><br>To obtain basic knowledge on matrices, linear spaces, linear transformations and polynomials and their roots over a field; to be able to apply the theory in concrete excercises.                                                                                                                                 |       |                                |      |       |      |
| <b>Brief outline of the course:</b><br>Linear spaces, bases. Rank of a matrix. Systems of homogeneous linear equations. Linear transformations.<br>Ring, fields. Polynomials over a field. Factorization into irreducible factors, roots. Roots of complex numbers. Cubic equations. Polynomials with several unknowns, symmetric polynomials. |       |                                |      |       |      |

| <b>Learning outcomes:</b><br>To learn the method of review of translation of an Old Greek text with parallel reading of its Old Greek source text. Individual and critical review of source text and its links to other documents written by Aristotle. To learn basic concepts of Aristotle's metaphysics and Metaphysics                                                                                                                                                                                                                                                                                                                                                       |       |                                            |     |      |      |
| <b>Brief outline of the course:</b><br>The course is focused on philosophical lecture of Metaphysics by Aristotle, with understanding and its interpretation variants. Identification of individual books of Metaphysics, their arrangement, issue of authenticity of individual books. Learning basic determinations of the so-called "proté filosofia" from the books A1-3, Γ and the final books of Metaphysics. Studying the first causes and principles, to on he on and his (not only translation-related) issues, polysemy of the word "being", studying of essence (usia), potentiality- actuality, critique of Plato, God (proton kunun akineton a noesis tes noeseos). |       |                                            |     |      |      |

| <b>Prerequisites:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                     |
| <b>Conditions for course completion:</b><br>Attendance: A student may have one unexcused absence in seminar at the most. Absence in more than one seminar must be reasoned and substituted by consultations. Conditions of continuous and final control: during the semester a student is continuously checked and assessed according to his/her activity and own preparation for exercises. To be awarded the credits, a student must pass a test from knowledge obtained at the meetings and make a presentation for the assigned topic or the assigned part of the work Confessions. Results of the test, activity and presentation will make up the final grade.              |                                                     |
| <b>Learning outcomes:</b><br>Having completed the course, students are expected to be able to analyse the text of the source work by Aurelius Augustine: Confessions. The aim of the course is also to interpret the basic topics of Ancient philosophy localised also in the source text “Confessions” – such as the issue of characteristics and cognition of God, issue of time, epistemic function of memory, and relation to different shapes and forms of Christian philosophy in the Late Antiquity.                                                                                                                                                                       |                                                     |
| <b>Brief outline of the course:</b> <ul style="list-style-type: none"> <li>• Context and period: philosophy of the Late Antiquity and the Early Middle Ages.</li> <li>• Neoplatonism and Christian philosophy.</li> <li>• Augustine: life and work</li> <li>• Philosophy and the issue of characteristics of God.</li> <li>• Confessions in the context of Augustine’s work. Soul and human nature.</li> <li>• Faith – insight – reason – enlightenment. Origin of evil. Cognition of God.</li> <li>• Paths to God. Blessedness. Temptation.</li> <li>• Memory.</li> <li>• Paradoxes of Time. Concept of time in Ancient philosophy – Augustine, Aristoteles, Plotinus</li> </ul> |                                                     |

| <b>Conditions for course completion:</b><br>Conditions of continuous control: during the semester a student is continuously checked and assessed according to his/her activity. To be awarded the credits for the semester, a student is also required to produce a seminar paper – philosophical translation and to pass a written test from basic information related to the life and work of philosophers from Husserl to Gadamer. Taking a final written exam requires positive assessment of the semester paper and passing of the written test.                                                                                                                                                                                                                                                                                                                                                                 |                                               |
| <b>Learning outcomes:</b><br>Understanding the main trends in anthropology-oriented philosophy of the 20th century. Introduction into formation and development of phenomenology, philosophy of existence, existentialism, philosophical hermeneutics, post-modern philosophy, post-structuralism and deconstructivism. Critical analysis of the texts written by contemporary philosophers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                               |
| <b>Brief outline of the course:</b><br>Emergence of phenomenology. Transcendental phenomenology by Edmund Husserl. Philosophy of existence and existentialism. Philosophy of possible existence by Karl Jaspers. Being as a philosophical issue of Martin Heidegger. Cosmological philosophy by Eugen Fink. Existentialism by Jean-Paul Sartre. Existential phenomenology by Maurice Merleau-Ponty. Philosophical hermeneutics. Philosophical hermeneutics by H.-G. Gadamer. Postmodern philosophy, post-structuralism and deconstructivism. Postmodern philosophy by J.-F. Lyotard. Post-structuralism by M. Foucault. Post-structuralism by G. Deleuze. Deconstructivism by J. Derrida.                                                                                                                                                                                                                             |                                               |

| <b>Prerequisites:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                               |
| <b>Conditions for course completion:</b><br>Conditions of continuous control: during the semester a student is continuously checked and assessed according to his/her activity. To be awarded the credits for the semester, a student is expected to pass a test from basic knowledge obtained in the seminars. Another condition is to make a presentation at the seminar, the contents of which will be specified during the first two weeks of the semester on the basis of individual consultations. Conditions for taking the exam: a student will be allowed to take a written exam only after passing the test. Grading scale for the exam: 40-38 points – A; 37-35 points – B; 34-32 points – C; 31-29 points – D; 28-26 points – E; 25 and less points – FX (failed). |                                               |
| <b>Learning outcomes:</b><br>The aim of the course is to examine the sources, genesis, and form of the analytic philosophy from the end of the 19th century up to the present and to present the works by main representatives of the analytic philosophy (G. Frege, G. E. Moore, B. Russell, L. Wittgenstein, J. Searle, W. V. O. Quin, P. Strawson, D. Davidson etc.)                                                                                                                                                                                                                                                                                                                                                                                                        |                                               |
| <b>Brief outline of the course:</b><br>G. E. Moore – the nature of philosophical analysis, G. Frege and the beginnings of analytic philosophy, B. Russell and his influence on analytic philosophy, Neo-positivistic understanding of philosophy, L. Wittgenstein – Tractatus Logico-Philosophicus, The later Wittgenstein and formation of analytic philosophy in the second half of the 20th century, Ordinary language philosophy, J. Searle and development of the theory of speech acts, W. V. O. Quine and neo-pragmatic version of analytic philosophy, P. Strawson and the boom of analytic metaphysics, D. Davidson and the issue of truth, interpretation and behaviour, New initiatives in the philosophy of language and mind (Chomsky, Fodor, Pinker).            |                                               |

| <b>Learning outcomes:</b><br>To be familiar with some factual knowledge of combinatorics and graph theory. To understand and appreciate mathematical notions, definitions, and proofs, to solve problems requiring more than just standard recipes, and to express mathematical thoughts precisely and more rigorously.                                                                                                                                                                                                                                                                                      |       |                                            |       |       |      |
| <b>Brief outline of the course:</b><br>Basic principles.<br>Counting and binomial coefficients, Binomial theorem, polynomial theorem.<br>Recurrence: Some miscellaneous problems, Fibonacci-type relations, Using generating functions, miscellaneous methods.<br>The inclusion-exclusion principle. Rook polynomials.<br>Introduction to graphs: The concept of graphs, paths in graphs. Connectivity. Trees, bipartite graphs. Planarity. Polyhedra.<br>Traveling round a graph: Eulerian graphs, Hamiltonian graphs.<br>Partitions and colourings: Vertex colourings of graphs. Edge colourings of graphs |       |                                            |       |       |      |

| <b>Conditions for course completion:</b><br>Within the seminar in written discourse, a student is required to: <ol style="list-style-type: none"> <li>1. Actively participate in seminars - it means preparation, i.e. theoretical mastering of a source or interpretation text assigned for the respective seminar and ability to react or join the discussion about the topic(s) of the seminar.</li> <li>2. Produce a semester (final) paper of approximately 10 pages</li> </ol>                                                                                                                                                                                                                                                                                                 |                                                                 |
| <b>Learning outcomes:</b><br>Presentation of the content of the work by E. Husserl and his setting to the context of issues of contemporary philosophy. Critical analysis of the text.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                 |
| <b>Brief outline of the course:</b><br>Crisis of sciences and modern physicalistic objectivism and transcendental subjectivism. Galilei's mathematisation of nature. Pure geometry and nature as mathematical universum. Galilei's wrong interpretation of the meaning of mathematisation. Descartes as the founder of the idea of objectivistic rationalism and transcendental motive, breaking this rationalism. Descartes' foundation stone – ego cogito. Explanation of the meaning of the Cartesian period. The issue of intentionality in Descartes and his wrong self-interpretation. Descartes as the background of two developmental lines in modern philosophy: rationalism and empiricism.                                                                                |                                                                 |

| <b>Course language:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                          |

**Notes:**

Content of lessons will be flexibly adapted to the field of study of learners. Language learners will be able to work more with pictures and sounds, physicists with simulation programs, mathematicians with mathematical software, etc.

**Course assessment**

Total number of assessed students: 43

| A     | B     | C     | D   | E    | FX  |
|-------|-------|-------|-----|------|-----|
| 58.14 | 23.26 | 16.28 | 0.0 | 2.33 | 0.0 |

**Provides:** doc. RNDr. Ľubomír Šnajder, PhD.

**Date of last modification:** 03.05.2015

**Approved:** doc. RNDr. Ondrej Hutník, PhD., doc. RNDr. Matúš Harminc, CSc., prof. PhDr. Eugen Andreanský, PhD., doc. PhDr. Pavol Tholt, PhD., mim. prof.

| <b>Learning outcomes:</b><br>Identification of basic terms and basic theses of Leibniz's philosophy by reading the work Monadology. Understanding of the issue of Leibniz's substantial metaphysics through the concept of 'individual substance' and theses which led to development of this concept (especially entitas tota, substantial form, logical subject...).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                               |
| <b>Brief outline of the course:</b><br>The course is aimed at in-depth insight to the work by Leibniz: Monadology. It is focused on presentation of summarized knowledge obtained by Leibniz in his lifelong theoretical efforts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                               |

| <b>Prerequisites:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                            |
| <b>Conditions for course completion:</b><br>Assessment depends on student's active approach to fulfilment of study duties, individual work with texts in a library, active work during seminars, after interruption presents study preparation and submission of a seminar paper at the end of the semester by the agreed deadline.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                            |
| <b>Learning outcomes:</b><br>To present the issue of modern philosophy in the context of history of philosophy (the Middle Ages, Renaissance) between philosophy and culture by returning to the sources of philosophy – Ancient thought, mainly its peak period (classical Greek philosophy). The aim is to draw the attention to the importance of studying the texts by G. W. Leibniz who, through the optics of ancient philosophers, leads us to the returns and the need to study and think about the ideas and texts of the entire philosophical tradition.                                                                                                                                                                                                                                                                                                                                               |                                                            |
| <b>Brief outline of the course:</b><br>To present the issue of modern thinking in the context of tradition - G. W. F. Hegel: History of Philosophy. Leibniz and history of philosophy. Leibniz: Meditations on Metaphysics. The problem of settlement with medieval culture (scholasticism and the so-called "second scholasticism") - Descartes and Leibniz – the problems of metaphysics. Leibniz and Heidegger on the need to return to the sources of ancient thinking – mainly to its peak period (classical Greek philosophy). The aim is to draw the attention to the importance of studying the works of philosophers. Leibniz and his returns to tradition – the attempt for reconsideration of scholasticism and original texts related to the history of the ancient philosophy. Leibniz, Patočka and history of philosophy.                                                                          |                                                            |

| <b>Conditions for course completion:</b><br>Mandatory attendance and active participation in seminars. Continuous assessment of activity, continuous test focused on knowledge of the source texts. Final test in the last week of semester focused on knowledge of the source texts. Both tests have maximum of 50 points. Grading scale: A – at least 45 points, B - at least 40 points, C - at least 35 points, D - at least 30, and E - at least 25 points. Credits will not be awarded to a student who will get less than 25 points from any of the tests.                                                                                                                                                                                                                     |                                                   |
| <b>Learning outcomes:</b><br>Introduction to the study of history of philosophy by means of Hegel's concept of philosophy of history of philosophy and history of philosophy as a part of philosophy. Hegel's philosophical interpretation of Pre-Socratic philosophy as gradual development of spirit. Basic thoughts of Pre-Socratic philosophy in the philosophical view.                                                                                                                                                                                                                                                                                                                                                                                                         |                                                   |
| <b>Brief outline of the course:</b><br>Concept and basis of philosophy of history of philosophy. Place of Hegel's History of Philosophy in the system of his philosophy. Philosophy in its historical metamorphoses as the subject of the history of philosophy and as the attempt to determine the essence of philosophy. History of philosophy as organically developing unit of interconnected ideas. External and internal history of philosophy. The issue of diversity of philosophical systems and the unity of philosophy. Concept of development and history of philosophy. Internal history of philosophy as self-development of philosophical ideas. Movement of ideas of philosophy from the abstract to the concrete in their content – within Pre-Socratic philosophy. |                                                   |

| <b>Prerequisites:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                             |
| <b>Conditions for course completion:</b><br>Within this discipline, a student is required to: <ol style="list-style-type: none"> <li>1. Actively participate in seminars, i.e. to make his/her own written preparation for seminar (précis). It should be used primarily by a student as preparation and basis for analysis and interpretation of a source text for the respective seminar and secondarily as a proof that a student has studied the text. At the end of each seminar a student must submit to the teacher his/her précis related to the topic analysed in seminar. Participation in seminars is mandatory in the course of the semester. In case of excused absence the consultation on substitution with the course guarantor is necessary.</li> <li>2. Produce a final paper (a test from factography)</li> <li>3. Pass an exam</li> </ol> |                                             |
| <b>Learning outcomes:</b><br>The aim of the course is to introduce main issues, terms, and representatives of the modern philosophy from the beginning of its formation to the peak of the Enlightenment philosophy.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                             |
| <b>Brief outline of the course:</b><br>Characteristics of modern picture of the world. Philosophy of F. Bacon and T. Hobbes. Modern rationalism: philosophy of R. Descartes, monistic – pantheistic philosophy of B. Spinoza, monadological pluralism of G. W. Leibniz. Modern empiricism: empirical – sensualistic philosophy of J. Locke, subjectivist sensationalism of G. Berkeley, sceptical – critical sensationalism of D. Hume. Philosophy of the Enlightenment: characteristics of the century of light and its phases, anti-speculative philosophy of F. M. A. Voltaire, philosophy of man and society of J. J. Rousseau, social philosophy of Ch. L. Montesquieu.                                                                                                                                                                                  |                                             |

| <b>Prerequisites:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                             |
| <b>Conditions for course completion:</b><br>Conditions of continuous control and awarding of credits: during the semester a student is continuously checked and assessed according to his/her activity. To be awarded the credits for the semester, a student is also required to produce a seminar paper – philosophical translation and to pass a written test containing basic information related to the life and work of philosophers from Kant to Nietzsche. Conditions of the exam: only after obtaining the points for the continuous activity during the semester a student may take a written exam.                                                                                                                                                                                                                                                              |                                             |
| <b>Learning outcomes:</b><br>Understanding of the basic trends in philosophy of the 19th century. Getting familiar with German classical philosophy, its emergence, development and gradual decline (Kant, Fichte, Schelling, Hegel, Feuerbach, Marx) as well as voluntarism, irrationalism, and philosophy of life (Schopenhauer, Kierkegaard, Nietzsche, Dilthey).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                             |
| <b>Brief outline of the course:</b><br>German classical philosophy and its influence (critical idealism of I. Kant, subjective idealism of J.G. Fichte, F. W.J. Schelling and German idealism, absolute dialectical idealism of G.W.F. Hegel, decline of the Hegel school – the Old Hegelians and the Neo-Hegelian movement, philosophy of future of L. Feuerbach, philosophy of history of K. Marx). Voluntarisms, irrationalism and philosophy of life (voluntarism, phenomenism and pessimism of A. Schopenhauer, philosophy of existence of S. A. Kierkegaard, philosophy of future of F. Nietzsche, philosophy of life of W. Dilthey)                                                                                                                                                                                                                                 |                                             |

| <b>Prerequisites:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                   |
| <b>Conditions for course completion:</b><br>Within this discipline, a student is required to:<br>1. Actively participate in seminars, i.e. to make his/her own written preparation for seminar (précis). It should be used primarily by a student as preparation and basis for analysis and interpretation of a source text for the respective seminar and secondarily as a proof that a student has studied the text. At the end of each seminar a student must submit to the teacher his/her précis related to the topic analysed in seminar. Participation in seminars is mandatory in the course of the semester. In case of excused absence the consultation on substitution with the course guarantor is necessary.<br>2. Produce a semester paper (based on agreement with the guarantor or teacher of the course)<br>3. Pass an exam (test) |                                                                   |
| <b>Learning outcomes:</b><br>The aim is to familiarize students with the development of philosophical thinking in Slovakia and Bohemia from the Middle Ages to the 20th century, to assess the influence of foreign streams of thinking on Slovak and Czech philosophy and to identify its original features.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                   |
| <b>Brief outline of the course:</b><br>Beginnings of religious and philosophical thinking in literature from the period of the Great Moravia. Philosophical thinking of Constantine. Philosophical thinking in Slovakia and Bohemia in the period of reformation and counter-reformation (Jan Hus, J. A. Comenius, Prešov School and University of Trnava). Enlightenment philosophy in Slovakia and Bohemia. Response to Herder's and Kant's philosophy in Slovakia. The Štúrs and Hegelianism and anti-Hegelianism in Slovak philosophical thinking. Response to Nietzsche's philosophy in Slovakia and Bohemia. Positivism in Slovakia and Bohemia. Religious philosophy in Slovakia and Bohemia. Philosophy of E. Rádl and J. Patočka.                                                                                                          |                                                                   |

| <b>Conditions for course completion:</b><br>Elaborating test by using a computer. Solving problems of worksheet and elaboration of seminar work.                                                                                                                                                                                                                                                                                                                                                                                                                    |       |                                                                    |      |      |     |
| <b>Learning outcomes:</b><br>To develop the students' knowledge and skills in the basics of working with standard ICT, which provide opportunities for their use in mathematics education. To teach students to use the basic commands of Logo language for writing and generalization algorithms for constructing geometric shapes and basic principles of creation of constructions in the environment of dynamic geometry. To develop creative and evaluative students' ability to allow meaningful integration of modern technologies in mathematics education. |       |                                                                    |      |      |     |
| <b>Brief outline of the course:</b><br>Basics of development of algorithms in Logo. Basics of working in the dynamic geometry environment. Educational applications and Internet in mathematics education. Use of numerical and graphical representations of data and modelling in the spreadsheet environment.                                                                                                                                                                                                                                                     |       |                                                                    |      |      |     |

| <b>Conditions for course completion:</b><br>Conditions of continuous control: during the semester a student is continuously checked and assessed according to his/her activity. To be allowed to take a final exam, a student must pass a written test from terminology (to pass the test at least 70% of answers must be correct). Conditions of the exam: answering the questions correctly in terms of both quantity and quality.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                |
| <b>Learning outcomes:</b><br>To learn different approaches to the subject of philosophy and basic models of philosophy from the ancient times up to present. To understand the relations between philosophy and other areas of human thinking and behaviour. To clarify main philosophical disciplines.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                |
| <b>Brief outline of the course:</b><br>Introduction to the university discipline. The subject of philosophy in historical contexts and metamorphoses. Philosophy as dialogue and communication. Structure and systematic form of philosophy. Philosophy as critical reflexion and self-reflexion of man and world. Philosophy and history.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                |

| <b>Conditions for course completion:</b><br>Test and individual project work.<br>Oral presentation of the individual project work.                                                                                                                                                                                                                                                                                                                                                                                  |                                                   |
| <b>Learning outcomes:</b><br>To know the basic purpose of statistical data analysis, its methods and statistical thinking and understand its importance for science and practical life.<br>To understand elementary statistical concepts.<br>To gain experience in handling real data using spreadsheet Excel and statistical software R.                                                                                                                                                                           |                                                   |
| <b>Brief outline of the course:</b><br>1. Introduction (the basic philosophy and aim of statistical data analysis, descriptive and inductive statistics)<br>2. Collecting Data (types of data, random sample, randomized experiment)<br>3. Handling Data (visualization, summarizing – measures of center, measures of variability, skewness and kurtosis, relationships in data – introduction to regression and correlation)<br>4. Statistical inference (elementary view into estimation and testing hypothesis) |                                                   |

| <b>Prerequisites:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                       |
| <b>Conditions for course completion:</b><br>Attendance: A student may have one unexcused absence in seminar at the most. Absence in more than one seminar must be reasoned and substituted by consultations. Conditions of continuous and final control: during the semester a student is continuously checked and assessed according to his/her activity and own preparation for exercises. To be awarded the credits for the semester, a student must pass a test from knowledge obtained at the meetings and make a presentation for the assigned topic or the assigned part of the work An Essay Concerning Human Understanding. Results of the test, activity and presentation will make up the final grade. |                                                                       |
| <b>Learning outcomes:</b><br>The aim of the course is to familiarize students with basic issues of the work by John Locke: An Essay Concerning Human Understanding. The major part will be about presentation of the main selected chapters of the work and this objective will be reached by reading of the source and interpretative texts. Students will become familiar with fundamental background of philosophy of empiricism and also improve their techniques of interpretation of the source texts with a help of interpretation literature.                                                                                                                                                             |                                                                       |

| <b>Learning outcomes:</b><br>Through the analysis of conceptual and categorial apparatus of the work Tractatus Logico-Philosophicus by L. Wittgenstein, as a fundamental work of analytical or linguistic philosophy, to learn Wittgenstein's views on the language of the science and its logical analysis.                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                     |
| <b>Brief outline of the course:</b><br>1) Analytical philosophy – essence, structure and objectives.<br>2) L. Wittgenstein in the context of analytical philosophy.<br>3) L. Wittgenstein and searching for the answer to the question: What is philosophy? Attitude to metaphysics.<br>4) Demonstrative theory of cognition in Tractatus Logico-Philosophicus.<br>5) Double language of Wittgenstein in the Tractatus: language as a logical calculus and language of metaphor.<br>6) The issue of logicism and apriorism in the Tractatus.<br>7) World, events, cognition. Essence and real importance of the work for the present time. Story of the message of L. Wittgenstein.<br>8) Tractatus as “unwritten” work and the issue of the so-called “beautiful sentences”. |                                                                     |

| <b>Learning outcomes:</b><br>Introduction to crucial works of Leibniz, aimed at tracing the terms of individual substance and logical subject and their conjunction.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                       |
| <b>Brief outline of the course:</b><br>The subject is focused on evolution of Leibniz's thinking from early works up to the well-known Discours de Métaphysique, with the aim to establish main milestones leading to determination of the term "individual substance", which (also) in this work coincides with the term "logical subject".                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                       |

| <b>Learning outcomes:</b><br>To outline the issue of history of philosophy and modern times. The specific feature of philosophy of Leibniz (one of the creators of modern society) is a shift from modern thinking, which wants to separate medieval and scholastic ways of thinking. Leibniz finds solutions for coping with medieval culture in its creative revision and return to the sources of ancient thinking, especially to its classical period (classical Greek philosophy) in order to formulate the basic problems of further development of European thinking. The aim is to point out the importance of studying the works written by philosophers (especially those by Leibniz) and through these works to attempt for returns and re-thinking of certain issues of philosophy.                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                  |
| <b>Brief outline of the course:</b><br>Leibniz and new thinking. God - soul - world as basic issues of philosophical reflection of Leibniz. Meditations as a way of Leibniz's thinking about basic issues of philosophy and science, but also freedom of a man. Four pillars of European culture. Freedom and happiness as fundamental topics of reflections of new philosophers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                  |

| <b>Prerequisites:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                        |
| <b>Conditions for course completion:</b><br>Conditions of continuous control: during the semester a student is continuously assessed according to his/her activity in seminars. To be awarded the credits for semester, a student must attend seminars. Assessment of students in seminars is conditioned by receiving the respective number of points (1 point for each active participation). Reading and understanding of the assigned texts can be checked during the seminars.                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                        |
| <b>Learning outcomes:</b><br>The aim of the course is to present philosophical thinking of the “Professor of the History of Systems of Thought”, genealogist and (although he did not like this description) post-structuralist thinker M. Foucault. Students have a chance to become familiar with (postmodern) genealogical understanding of history as the critique of ideologies that support (traditional) history. On the basis of Foucault’s analysis of establishment of prison and the related developing punishment practices, the seminar in written discourse attempts to draw the attention to the controversial points of our (optimistic) historical understanding of progressive ideas.                                                                                                                                                                                                                                                         |                                                        |
| <b>Brief outline of the course:</b><br>1) Torture<br>2) Punishment<br>3) Discipline<br>4) Prison                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                        |

| <b>Prerequisites:</b>                                                                                                                                                                                                                                                                                                                       |     |                                             |       |       |       |
| <b>Conditions for course completion:</b><br>Two written test during semester and activity student to practice. Final evaluation is given by continuous assessment, written and oral part of the exam.                                                                                                                                       |     |                                             |       |       |       |
| <b>Learning outcomes:</b><br>The aim of the course is to give introductory knowledge about real numbers, sequences and series of real numbers, and to develop certain calculation skills in the field.                                                                                                                                      |     |                                             |       |       |       |
| <b>Brief outline of the course:</b><br>Real numbers - axioms and properties. Real functions - basic properties (monotone, bounded, even/odd, inverse), transformations of graphs of functions. Infinite sequences - operations, boundedness, monotonicity, convergence. Infinite series - operations, convergence, criteria of convergence. |     |                                             |       |       |       |

| <b>Prerequisites:</b> ÚMV/MANa/10                                                                                                                                                                                                                                                                                                                                                                   |      |                                              |       |       |       |
| <b>Conditions for course completion:</b><br>Two written test during semester and activity student to practice. Final evaluation is given by continuous assessment, written and oral part of the exam.                                                                                                                                                                                               |      |                                              |       |       |       |
| <b>Learning outcomes:</b><br>The purpose of the course is to provide introductory knowledge in differential and integral calculus of real functions of one real variable and to develop computational skills in the field.                                                                                                                                                                          |      |                                              |       |       |       |
| <b>Brief outline of the course:</b><br>Limit and continuity of real functions, elementary functions. Differential calculus - derivatives of the first and of higher orders, the basic theorems of differential calculus and their use to study properties and behavior of functions. Indefinite integral - basic methods for finding primitive functions. Newton integral and its basic properties. |      |                                              |       |       |       |

| <b>Prerequisites:</b> ÚMV/MANb/19                                                                                                                                                                                                                                                                                                                                                                                               |                                               |
| <b>Conditions for course completion:</b><br>Two written test during semester and activity student to practice. Final evaluation is given by continuous assessment, written and oral part of the exam.                                                                                                                                                                                                                           |                                               |
| <b>Learning outcomes:</b><br>The purpose of the course is to provide introductory knowledge in Riemann integral calculus of real functions of one real variable and series of real functions. To develop computational skills in the field and extend the student ability to use this theory in applications.<br>To teach the basic knowledge of the subject matter in the syllabus and develop the ability to use this theory. |                                               |
| <b>Brief outline of the course:</b><br>Definite Riemann integral - definition, elementary properties, calculation methods, applications. Improper Riemann integral. Sequences and series of real functions – pointwise and uniform convergence, properties of the limit function and the sum. Power series, Taylor series and their applications.                                                                               |                                               |

| <b>Conditions for course completion:</b><br>Continuous assessment is taken the form of small tests and two main tests during the semester. Final evaluation is given by continuous assessment (40%), written and oral part of the exam (60%).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                              |
| <b>Learning outcomes:</b><br>To teach the basic knowledge of the subject matter in the syllabus and develop the ability to use this theory. The students also learn mathematical culture, notation and mathematical way of thinking and expression.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                              |
| <b>Brief outline of the course:</b><br>1. Metric space - Euclidean space, topological properties of points and sets in metric space.<br>2. Function of several real variables - basic concepts, limits and continuity.<br>3. Differential calculus of functions of several real variables - partial derivative, differentiability and total differential (also higher order), Taylor polynomials, directional derivative, local and global extrema, constrained local extrema.<br>4. Double (two dimensional) integral - definition, calculation methods, applications.                                                                                                                                                                                                                                                  |                                              |

| <b>Conditions for course completion:</b><br>Regular participation in seminars; appropriate preparation during the whole semester. Continuous test – 50%; final test – 50%.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                           |
| <b>Learning outcomes:</b><br>To reveal mutual interconnection among renaissance philosophy, modern philosophy, and emerging natural science during the 17th century and at the beginning of the 18th century on the basis of historical, philosophical and period natural science sources.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                           |
| <b>Brief outline of the course:</b><br>Renaissance philosophy and natural science as a pre-stage of modern science. Exact natural sciences as the form and method of cognition of reality. Cosmos and cognition: M. Kusánsky, N. Copernicus, G. Bruno, J. Kepler, G. Galilei. J. Patočka on concept and subject of the “mathematical natural science”. F. Bacon – a troubadour of the modern science. Transformation in substantial determination of the modern natural science – the idea of dominion over nature. Cartesian physics and the Cartesians. I. Newton and the end of the first stage in building of the modern natural science. I. Kant on the nature of science and on mathematical natural science. Mathematical natural science and the issue of care for the soul. |                                                           |

| <b>Conditions for course completion:</b><br>During the semester a student is continuously checked and assessed according to his/her activity. Students must pass the test to be awarded the credits for the semester.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                         |
| <b>Learning outcomes:</b><br>The course is aimed at presentation of fundamental issues of philosophical logic as well as clarification of the intersection between logical analysis and philosophical subject matter.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                         |
| <b>Brief outline of the course:</b><br>Themes of philosophical logic. Issue of philosophical entities and existence. Issue of understanding of individuals. Issue of understanding of universalities. Philosophical issues of semantics of modal logics and possible worlds. Modal realism (possibilism) of D. Lewis. Actualistic versions of philosophy of possible worlds. The problem of truth. Theories of truth.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                         |

| <b>Prerequisites:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                |
| <b>Conditions for course completion:</b><br>Conditions of continuous control: during the semester a student is continuously checked and assessed according to his/her activity. To be awarded the credits for the semester, a student is expected to attend the seminars. Assessment of students in seminars is conditioned by receiving the respective number of points (1 point for each active participation). Reading and understanding of the assigned texts can be checked in writing during the seminars. Conditions of exam: After obtaining the credits necessary to meet the criteria and attending the seminars a student may take a (written) exam. If a student passes the exam, he/she will get the defined credits for the course. Absence must be substituted by a consultation as agreed with the teacher. |                                                |
| <b>Learning outcomes:</b><br>The main aim of the discipline is to emphasize understanding of the meaning and importance of the critique of metaphysical thinking in the context of contemporary philosophical tradition; understanding of the crucial philosophical critiques of the metaphysical thinking.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                |
| <b>Brief outline of the course:</b><br>Hermeneutics – emergence of the philosophical hermeneutics (Friedrich Daniel Ernst Schleiermacher and Wilhelm Dilthey), Hans-Georg Gadamer or Man and Language. Linguistic turn in philosophy – the issue of language, Ludwig Wittgenstein – the silent philosopher. Structuralism - Ferdinand De Saussure, Claude Lévi-Strauss. Neo-structuralism – Michel Foucault – The Words and the Things, archaeology and genealogy of knowledge, power and knowledge. Transition to postmodernism and open structure - J. F. Lyotard, G. Deleuze. Deconstruction by Jacques Derrida - J. Lacan, S. Žižek. Feminism. The aspect of religion in the contemporary (postmodern) philosophy thinking - Gianni Vattimo                                                                             |                                                |

| <b>Learning outcomes:</b><br>To obtain knowledge of the axiomatic theory of probability, random variables and their characteristics, special types of distributions and their applications.                                                                                                                                                                                                                                                                                                                                                                                                                                              |       |                                                  |       |       |       |
| <b>Brief outline of the course:</b><br>Probability space, definitions and properties of probability. Conditional probability and independence. Random variables, their distribution function and characteristics. Mean, variance and skewness.. Discrete and absolutely continuous distributions. Quantile and characteristic functions, their properties. Relation between characteristic function and moments. Median and mode. Transformation of random variables. Special types of distributions with applications (binomial, Poisson, geometric, uniform, exponential, normal, chí-square, Student, Fisher). Central limit theorem. |       |                                                  |       |       |       |
