Prerequisites:	
Conditions for course completion: Conditions of continuous control: during the semester a student is continuously assessed according to his/her activity in seminars. To be awarded the credits for the semester, a student must attend the seminars successfully. Prerequisites:	
Conditions for course completion: Continuous assessment of attendance and activity. Final assessment based upon preparation of an individual project.	
Learning outcomes: To lead a student, through Socrates's dialogue, to the active way of life, development of critical thinking, active position in professional, public, and private life. The substantive aim is to cross closely specialised views of the world as well as willingness and ability to help others in altruistic way. It will concern a return to ancient times through the issue of man – knowing (wisdom and cleverness) and to some renaissance texts (On Dignity of a Human), which offer us a possibility to think of culture and civilisation, art and technology, heights and threats of a man in the period of birth, peak, and crises of development of European mankind.	
Brief outline of the course: By studying philosophical texts - Plato - Politeia – a student will go in more detail through issues, which occupy philosophical thinking of the present. Justice, wisdom, education, knowing, care for soul – these are the topics, which apart from being philosophical issues, occupy thinking of an ordinary man (and, especially, young man looking for orientation of his/her life) Ancient times, Middle Ages, Renaissance, Modern Period – modern science (origin of mathematical natural science), manorial relation to the world. Nature and the world as the object of man subduing power – the only and absolute lord of the world. God - soul – world on the path of a man looking for happiness, delight, and suffering. A man in coordinates of power. Gadamer: Back to Greeks. Heidegger: Letter on Humanism. Several words on one problem: What is a man? What does it mean to philosophy? What is humanism? What is thinking? What is left behind horizon of our asking?

Course level: II.	
Prerequisites:	
Conditions for course completion: Assessment depends on student's active approach to fulfilment of study duties, individual work with texts in a library, active work during seminars, but also preparation and submission of a seminar paper at the end of the semester by the agreed deadline.	
Learning outcomes: The aim is to make students familiar with life and work of thinker Hannah Arendt who significantly influenced the Western thinking of the 20th century. Arendt as a talented pupil of K. Jaspers influenced such thinkers as M. Heidegger and Ján Patočka. The study will be focused on the texts written by Arendt, in which she examines ontological and anthropological preconditions of the common world of human life, the world characterized by the fact that it is ruled by reason, but it is also very important that living human beings live in it. The issue of man is crucial topic for Arendt, because thinking about the current state of human affairs seems to be a serious problem of Western thinking - spiritual and political crisis of European mankind. What are the possibilities of rethinking elementary prerequisites of political life? What makes the basis of political reality? The Gap between Past and Future. Vita activa and condition humaine. What is Authority? What is Freedom? Greek polis and household. Polis and paideia. The Crisis of Education. The Crisis of Culture.

Learning outcomes: Analysis of ideas of fundamental work of European linguistics-oriented analytical philosophy, emphasizing the issue of natural language and the so-called “language-games” in the work Philosophical Investigations by L. Wittgenstein. The course draws the attention to the fact that Wittgenstein and also the major part of representatives of the linguistic philosophy were gradually emphasizing that it is necessary to examine not only the language of science, but also the natural language and its development.	
Brief outline of the course: Comparison of roots of philosophy of L. Wittgenstein in the first and second periods of his theoretical activity (Wittgenstein I; Wittgenstein II). Concept and essence of analytical philosophy (analysis of background of the Tractatus Logico-Philosophicus); language and logics; picture language and language of metaphor in the Tractatus and in Philosophical Investigations. The problem of natural language and meta-language. Natural language and languages of science. Semantic and semiotic analysis of natural language and language of science. Language-games.
