Conditions for course completion: Assessment depends on student's active approach to fulfilment of study duties, individual work with texts in a library, active work during seminars, but also preparation and submission of a seminar paper at the end of the semester by the agreed deadline.	
Learning outcomes: The aim is to make students familiar with life and work of thinker Hannah Arendt who significantly influenced the Western thinking of the 20th century. Arendt as a talented pupil of K. Jaspers influenced such thinkers as M. Heidegger and Ján Patočka. The study will be focused on the texts written by Arendt, in which she examines ontological and anthropological preconditions of the common world of human life, the world characterized by the fact that it is ruled by reason, but it is also very important that living human beings live in it. The issue of man is crucial topic for Arendt, because thinking about the current state of human affairs seems to be a serious problem of Western thinking - spiritual and political crisis of European mankind. What are the possibilities of rethinking elementary prerequisites of political life? What makes the basis of political reality? The Gap between Past and Future. Vita activa and condition humaine. What is Authority? What is Freedom? Greek polis and household. Polis and paideia. The Crisis of Education. The Crisis of Culture.
