COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ EPS/16	Course name: Ethics for psychological practice
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of credits: 6	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites:	
Conditions for course completion: FINAL GRADE is sum of activities during semester 1. THE ETHICS AUTOBIOGRAPHY 30% 2. ACTIVE DISCUSSING AND PARTICIPATING during semester 10% 3. COMPARISON OF ETHIC CODEs OF CONDUCT (Slovak to APA, Izraeli to APA) 20% 4. CLASS PRESENTATION 40% = 100% A 100 – 90 B 89 – 80 C 79 – 70 D 69 – 60 E 59 – 51 FX 50 and less	
Learning outcomes: The general goal of this course is to introduce core ethical principles and answer some of the ethical questions/ dilemmas that psychologists encounter in their everyday practice. The theme of the course is that learning to be ethical. Because of the active and enduring nature of ethical acculturation, this is not a lecture course! My role is not to tell you what was important or what is the best. Rather, we will help each other explore the ethical standards together. In this way, you will learn the skills necessary to understand what is ethic and what is unethical.	
Brief outline of the course: 1. Place ethics in psychology (19.2) 2. Historical roots (26.2) 3. Overview of national and international ethics codes and principles (5.3) 4. Resolving ethical issues and competence (12.3) 5. Human relations (19.3) 6. Privacy and Confidentiality (26.3) 7. Ethics in psychotherapy (9.4)

Notes:

COURSE REQUIREMENTS

1. THE ETHICS AUTOBIOGRAPHY —To explore how to be ethical and professional, you need to know where you're coming from. To help accomplish this goal, the short paper (2-3 pages), will be an "ethics autobiography" in which you will explore the aspects of your background that might make it easier or harder to be ethical. (19.2.2019). Ethics autobiography is followed with your presentation some main ethic dilemmas.

2. ACTIVE DISCUSSING AND PARTICIPATING - I invite you to be active, to come along and explore with me how we make the transition from nice, caring, bright people to effective, ethical, caring professionals.

3. COMPARISON OF APA ETHIC CODE OF CONDUCT AND CODE OF CONDUCT IN YOUR LANGUAGE - You will find out ethic code of conduct in your language and bring it to seminar lesson. (26.2.2019)

4. CLASS PRESENTATION - The presentation's purpose is to be acquainted with a variety of topics in the fields of ethics and law. Each student is required to prepare and present materials. As part of the background material and the presentation one can use articles, clips from professional and folk books and films, information from the internet etc.

The presentation would be minimum 25-30 minutes, thus leaving time for a short debate in class. Topics and dates: to be submitted to the lecturer until the 2th meeting (19.2.2019), including name of presenter and a topic for presentation. The class presentations start on 4th meeting (5.3.2018). At the end of presentations, students send presentation to lecturer.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ KLP/08	Course name: Clinical Psychology
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of credits: 6	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Conditions for course completion: Attendance and activity at practical lessons, seminar work (40 points) Requirments:1 Theoretical knowledge (basic literature, lectures) - test Case analysis – oral discussion Final exam (60 points) Final evaluation (sum of all points): For A is needed minimum 91 points, for B minimum 81 points, for C minimum 71 points, for D minimum 61 points, for E minimum 51 points, for FX = 50 and less	
Learning outcomes: The general goal of this course is aplication of theoretical knowledge into the practice of clinical psychology, understanding of basic features of specific groups of mental health changes. Course brings orientation in psychodiagnostic and psychotherapeutic methods. Main aim is ability to analyse the individual case.	
Brief outline of the course: Clinical psychology II. 1. Basic psychological concepts of mental health changes: psychoanalytic and psychodynamic approach, behavioristic perspectives, cognitive approach, humanistic view. Factors influencing mental health. 2. Systems of classification: DSM V, ICD – 10, similarities and differences, description of basic categories of mental disorders 3. Specific issues in clinical psychology: anxiety disorders, schizophrenia, mood disorders, sexual disorders, personality disorders, eating disorders, developmental disorders, neurological disorders, addictions. 4. Psychological examination: general aspects of psychological report writing, diagnostic methods in clinical psychology (clinical and testing methods). Assessment interview (general and specific considerations, procedure in clinical interview). Clinical evaluation of intellectual function, personality assessment (inventories and projective methods in clinical practice), neuropsychological assessment.	

5. Basics in psychotherapy – review of basic approaches, their principles and psychotherapeutic modalities. Psychodynamic perspective, cognitive-behavioral approach. Individual, group and family psychotherapy, therapeutic community. Principles of crisis intervention. Supportive psychotherapy.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PDE/08	Course name: Psychodiagnostics of Children and Young Adults
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of credits: 6	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites: KPS/PDO/08	
Conditions for course completion: Students are evaluated based on class participation, class presentation (the topic of presentation should relate to the field of psychological assessment of children), writing report and final exam. psychological report. Activities during semester are evaluated max 40 p. Final exam max. 60 p. (written form with open-end questions) Final evaluation (sum of all points): For A is needed minimum 90 points, for B minimum 80 points, for C minimum 70 points, for D minimum 60 points, for E minimum 50 points, for FX = 49 and less	
Learning outcomes: The aim of the course is the introduction of principles and approaches to psychological assessment of children and adolescents. Focus is on the process of administration and evaluation in diagnostic situation. Course graduate should be able to choose relevant diagnostic methods for identifying developmental disorders.	
Brief outline of the course: 1. General issues of psychological assessment of children and youth (theoretical models). Situation of psychological assessment and its specifics in childhood. Qualitative and quantitative analysis of psychodiagnostic findings, idiographic and nomothetic approach. 2. Diagnosis, systems of diagnostic classification (problem formulation, assessment questions, diagnostic hypothesis, method choice, diagnosis construction, differential diagnosis, developmental diagnosis, characteristics of children assessment, sources of diagnosis, DSM V, ICD 10. 3. Normal development and influences on problem development (biological predisposing factors, Personal maintaining factors, Contextual pre-disposing factors, Contextual maintaining factors 4. Assessment methods of early development - neonatal and developmental scales (NBAS, NAPI, Gesell developmental scales, Bayley developmental scales) 5. Assessment of early and preschool development. Evaluation of intellectual abilities Evaluation of speech and language. Autism and pervasive developmental disorders (WISC III, IV, S-B 4,5, WJ IE, Kaufman ABC, SON-R, CARS) 6. Assessment of school achievement. School maturity vs. school readiness. Partial learning disabilities. Tests of special abilities and individual mental functions. (Reading and spelling,	

Mathematics, Visual, visuospatial and visuoconstructive skills, Motor skills, Memory functions).
 Paintings - a developmental approach. Draw-a-Person test (DAP) - analysis of samples.
 7. Problems of middle childhood - Assessment of external and internal troubles (ADHD/ADD, behaviour disorders, emotional troubles, neurotic problems)
 8. Evaluation of personality, interpersonal relationships - the questionnaire techniques, projective techniques. Drawing tests - evaluation of drawing expressions of the child.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PDM/15	Course name: Counselling Psychology for Children and Adolescents
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of credits: 6	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites:	
Conditions for course completion: 1. Completion of 80% of instruction (lectures, seminars). 2. Written test - Continuous evaluation (10 points, min. 6): 15.11.2018. 3. study - own consulting case. 30 points, 16 min). 13.12.2018 - submitting the report from counseling process with the client and his legal representative. 4. A written test - final assessment. 60 points, minimum 31 points. Final evaluation (sum of all points): For A is needed minimum 91 points, for B minimum 81 points, for C minimum 71 points, for D minimum 61 points, for E minimum 51 points, for FX = 50 and less	
Learning outcomes: A student who completes the subject, should have knowledge of theoretical character on the evaluation level in relation to their application; he/she should be able to apply different theoretical frameworks in choosing the counseling approach. The aim is to provide the basic skills of conseling work with child and adolescent clients, the ability to assess the level and efficiency of conseling work.	
Brief outline of the course: Theoretical approaches and models of children's and youth's psychological counseling. Psychological approach in counseling young people and adolescents. General principles of child and youth psychological counseling and psychological examinations of children and youth. Competence and specific skills for working with children and youth. Specifics of child psychological counseling. The integrative model of child and youth psychotherapy and counseling. Counseling on learning disabilities, mental retardation, brain dysfunction, sensory defects, disorders of behavior and emotions arising in childhood and youth. Psychological counseling in school failure: in children with sensory disorders, anxiety children. Psychological counseling in behavioral problems. Counseling work with maltreated children and perpetrators of bullying. Social and socio-cultural disadvantaged children, neglected children as clients of counseling psychology. Counseling work with young people in learning, personality, relationship problems. Career counseling: career choice and study as a vital developmental role, objectives and actions career counseling, career guidance relevant factors. Career guidance specific groups. Counseling programs and group counseling. Evaluation of the effectiveness of the counseling process.	

Ethics in counseling process.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PDO/08	Course name: Psychodiagnostics of Adults
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of credits: 6	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Students are evaluated based on class participation, class presentation (20p) (the topic of presentation should relate to the field of psychological assessment. Example: multicultural issues in assessment, controversies in assessment, or the use of a specific instrument (provide a brief overview of its intended use as well as its technical features) Write a report (20p.) of 4 assessment instruments, each report will include the following: the possibility of using a diagnostic tool, advantages and disadvantages user qualification level Next, please answer the following questions: How did results confirm or disconfirm your knowledge of yourself? What are the implications of your findings as far as your understanding of yourself as a therapist ? Any surprises? Please elaborate. The reports should be at least two pages and no longer than four pages and a final exam. Activities during semester are evaluated max. 40 p, final exam max 60 p. (written form with open-end questions) Final evaluation (sum of all points): For A is needed minimum 90 points, for B minimum 80 points, for C minimum 70 points, for D minimum 60 points, for E minimum 50 points, for FX = 49 and less	
Learning outcomes: The aim of the course is to present a systematic overview of psychological assessment methods and introduce the principles of proper application and prepare for the practical application of the most frequently used psychodiagnostic methods.	
Brief outline of the course: Principles and specifics of adult psychological diagnosis. Clinical and test methods. Assessment of intelligence, partial and special abilities. Evaluating individual mental functions. Personality assessment: Questionnaire methods - single and multi-dimensional. Rating scale. Projective methods. Topics 1. Psychological Testing and Assessment - definition of key terms - psychological testing, psychological tests, psychological assessment, psychological measurement, and surveys. The	

characteristics of psychological tests. Similarities and differences between tests. Assumptions of psychological testing. Classification of assessment methods. Brief overview of history of development and use of methods. User qualifications and professional competencies – responsibilities of test users in specific contexts. Cultural, ethical and legal context of psychological assessment. 2. Non-testing methods - observation, interview, case history. Definition. Types of Clinical Interviews (intake, diagnostic, mental status exam, case history - structure). The interviewer general and specific skills. Components of the interview (raport, technique). Type of observation. Note-taking – cultural, ethical and technical issues. Advantages and disadvantages of non-testing methods. 3. Intelligence tests - definition of intelligence, A brief overview of models of intelligence (Spearman, Cattell, Thurstone, Vernon, Sternberg, Piaget, Gardner). Assessment of intelligence. Intelligence Quotient. Simple (partial) tests of Intelligence - Raven's Progressive Matrices (SPM, APM), Kohs Block Design Test. Complex tests of Intelligence: group-administered - Intelligence Structure Analysis (ISA), Intelligence Structure Test (IST), individually administered - Wechsler Adult Intelligence Scale, Stanford–Binet Intelligence Scale. 4. Tests of mental functions, special abilities – attention , memory, creativity, reaction time (Bourdon Test, Trail Making Test, Rey Complex Figure Test, Stroop Test, Wechsler Memory Scale, WCST, Torrance Tests of Creative thinking) - application possibilities, advantages and disadvantages. 5. Tests of organicity - neuropsychological assessment, Neurological damage and the Concept and definition of a cognitive deficit. Neuropsychological testing vs. standard psychological testing. Conditions and objectives of neuropsychological assessment. Test selection, Test administration, and preparation of the patient. (Verbal Learning Test, Bender-Gestalt, Benton Visual Retention Test, Delis-Kaplan Executive Function System.....) 6. Personality measurement – Projective methods. Characteristic and theoretical foundations of projective methods. Advantages and limits of use (reliability, validity). The difference between the methods, techniques and tests. Classification (verbal, drawing and handling projective tests – association, construction, completion, expressive choice ordering). Word Association Experiment, Hand test, The Thematic Apperception Test (History and Development, Theoretical Perspectives, Reliability and Validity, Advantages and Limitations, Administration, Typical Themes Elicited, Scoring Procedures, Interpretation) Baum test ("Tree test"), The Luscher Color Test. 7. Personality measurement - questionnaires, inventories, rating scales - the principle, overview, classification, advantages and limits of use. Unidimensional questionnaires (Manifest Anxiety Scale, The State-Trait Anxiety Inventory, Beck Depression Inventory, Beck Depression Inventory, Hamilton Rating Scale for Depression, Hamilton Anxiety Scale, Zung Self-Rating Depression Scale, Multidimensional questionnaires (Eysenck Personality Inventory, Eysenck Personality Questionnaire, Sixteen Personality Factor Questionnaire, Big Five Inventory, Minnesota Multiphasic Personality Inventory) 8. Psychological Report - Findings of assessment and proper formulations. General guidelines (length, style, terminology, topics, presenting test interpretations, use of raw data, feedback). Format for a psychological report (referral question, evaluation procedures, behavioral observations, relevant history, test results, impressions and interpretations, summary and recommendations).

Recommended semester/trimester of the course:	
Course level: II.	
Prerequisites: KPS/PDE/08	
Conditions for course completion:	
Learning outcomes:	
Brief outline of the course: Psychodiagnostics of Adults, Psychodiagnostics of Children and Young Adults 1. Psychological Testing and Assessment - definition of key terms - psychological testing, psychological tests, psychological assessment, psychological measurement, and surveys. The characteristics of psychological tests. Similarities and differences between tests. Assumptions of psychological testing. Classification of assessment methods. Brief overview of history of development and use of methods. User qualifications and professional competencies – responsibilities of test users in specific contexts. Cultural, ethical and legal context of psychological assessment. 2. Non-testing methods - observation, interview, case history. Definition. Types of Clinical Interviews (intake, diagnostic, mental status exam, case history - structure). The interviewer general and specific skills. Components of the interview (raport, technique). Type of observation. Note-taking – cultural, ethical and technical issues. Advantages and disadvantages of non-testing methods. 3. Intelligence tests - definition of intelligence, A brief overview of models of intelligence (Spearman, Cattell, Thurstone, Vernon, Sternberg, Piaget, Gardner). Assessment of intelligence. Intelligence Quotient. Simple (partial) tests of Intelligence - Raven's Progressive Matrices (SPM, APM), Kohs Block Design Test. Complex tests of Intelligence: group-administered - Intelligence Structure Analysis (ISA), Intelligence Structure Test (IST), individually administered - Wechsler Adult Intelligence Scale, Stanford–Binet Intelligence Scale. 4. Tests of mental functions, special abilities – attention , memory, creativity, reaction time, neuropsychological assessment (Bourdon Test, Trail Making Test, Rey Complex Figure Test, Stroop Test, Wechsler Memory Scale, WCST, Torrance Tests of Creative thinking) - application possibilities, advantages and disadvantages. 5. Personality measurement – Projective methods. Characteristic and theoretical foundations of projective methods. Advantages and limits of use (reliability, validity). The difference between the methods, techniques and tests. Classification (verbal, drawing and handling projective tests – association, construction, completion, expressive choice ordering).	

- Word Association Experiment, Hand test, The Thematic Apperception, Test. Baum test ("Tree test").
6. Personality measurement - questionnaires, inventories, rating scales - the principle, overview, classification, advantages and limits of use. Unidimensional questionnaires (Manifest Anxiety Scale, The State-Trait Anxiety Inventory, Beck Depression Inventory, Beck Depression Inventory, Hamilton Rating Scale for Depression, Hamilton Anxiety Scale, Zung Self-Rating Depression Scale, Multidimensional questionnaires (Eysenck Personality Inventory, Eysenck Personality Questionnaire, Big Five Inventory, Minnesota Multiphasic Personality Inventory)
 7. Psychological Report – Findings of assessment and proper formulations. General guidelines (length, style, terminology, topics, presenting test interpretations, use of raw data, feedback). Format for a psychological report (referral question, evaluation procedures, behavioral observations, relevant history, test results, impressions and interpretations, summary and recommendations).
 8. General issues of psychological assessment of children and youth. (theoretical Situation of psychological assessment and its specifics in childhood. Qualitative and quantitative analysis of psychodiagnostic findings.
 9. Diagnosis, systems of diagnostic classification of children (problem formulation, assessment questions, diagnostic hypothesis, method choice, characteristics of children assessment, sources of diagnosis, DSM V, ICD 10 - main differences).
 10. Normal development and influences on problem development (biological predisposing factors, Personal maintaining factors, Contextual pre-disposing factors, Contextual maintaining factors of children)
 11. Assessment methods of early development - neonatal and developmental scales (NBAS, NAPI, Bayley developmental scales)
 12. Assessment of early and preschool development. Evaluation of intellectual abilities (WISC III, IV, S-B 4,5, WJ-IE, Kaufman ABC, SON-R).
 13. Assessment of school achievement. School maturity vs. school readiness. Partial learning disabilities. Tests of special abilities and individual mental functions. (Reading and spelling, Mathematics, Visual, visuospatial and visuoconstructive skills, Motor skills, Memory functions). Paintings - a developmental approach.
 14. Problems of middle childhood - Assessment of external and internal troubles (ADHD/ADD, behaviour disorders, emotional troubles, neurotic problems). Evaluation of personality, interpersonal relationships - the questionnaire techniques, projective techniques.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/STA2/08	Course name: Statistics 2
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of credits: 6	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Students evaluation is based on class activity during the semester (10 points) and on the test in the middle of the semester (30 points). The test consists of three practical questions solved on computers with SPSS software. Students with at least 21 points during the semester are allowed to take an exam. Final exam (60 points) consists of theoretical as well as of practical questions and more than 30 points is needed to pass the exam. Final evaluation (sum of all points): A (90-100p) B (80-89 p.) C (70-79p.) D (60-69 p.) E (51-59 p.) FX (0-50 p.)	
Learning outcomes: The purpose of this course is to provide information about advanced statistical methods when familiarity with the basic methods is expected. Basis fields include various kinds of analysis of variance (independent samples, repeated measures, mixed ANOVA MANOVA), factor analysis, multiple linear and logistic regression, cluster analysis and structural equation modelling. These statistical methods are introduced firstly on lectures with the theoretical background and the process of computing together with assumptions is presented. Next, these methods are practised on exercises with SPSS software.	
Brief outline of the course: 1. Review of basic statistical methods 1 (descriptive statistics – measures of central tendency, variability, position, hypothesis testing – parametric statistics). 2. Review of basic statistical methods 2 (hypothesis testing – nonparametric statistics, correlation, regression). 3. One-way analysis of variance. Purpose, assumptions, procedure, results interpretation, post hoc tests. 4. Two-way ANOVA, repeated measures ANOVA. Purpose, assumptions, procedure, results interpretation, post hoc tests.	

5. Nonparametric alternatives of ANOVA (Kruskal-Wallis, Friedman, Cochran Q). Suitable scientific questions and data, purpose of methods, assumptions, procedure, results interpretation, post hoc tests.
6. MANOVA. Purpose, assumptions, differences in comparison with ANOVA, logic of test, procedure in SPSS, results interpretation, post hoc tests (ANOVA).
7. Polynominal regression analysis, logistic regression. Differences from simple regression, purpose, methods of regression, assessing regression model and predictors. Appropriateness of logistic regression in psychological research.
8. Factor analysis (exploratory), principal components analysis. Purpose of factor analysis, methods of factor analysis, rotation, factor loadings, decisions about number of factors, interpretation of results.
9. Cluster analysis. Purpose and logic of cluster analysis. Methods, reading cluster analysis results.
10. Multidimensional scaling. Purpose and logic of multidimensional scaling, its methods and possible applications.
11. Structural equations modelling. Differences from "classical" statistical methods (confirmation technique), examples of use (confirmatory factor analysis, mediation), assessing model, changing model.

Course ID: ÚTVŠ/ TVa/11		Course name: Sports Activities I.					
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present							
Number of credits: 2							
Recommended semester/trimester of the course: 1., 3.							
Course level: I., I.II., II.							
Prerequisites:							
Conditions for course completion: Conditions for course completion: Min. 80% of active participation in classes.							
Learning outcomes: Learning outcomes: Increasing physical condition and performance within individual sports. Strengthening the relationship of students to the selected sports activity and its continual improvement.							
Brief outline of the course: Brief outline of the course: Within the optional subject, the Institute of Physical Education and Sports of Pavol Jozef Šafárik University provides for students the following sports activities: aerobics, basketball, badminton, floorball, yoga, pilates, swimming, body-building, indoor football, self-defence and karate, table tennis, sports for unfit persons, streetball, tennis, and volleyball. In the first two semesters of the first level of education students will master basic characteristics and particularities of individual sports, motor skills, game activities, they will improve level of their physical condition, coordination abilities, physical performance, and motor performance fitness. Last but not least, the important role of sports activities is to eliminate swimming illiteracy and by means of a special program of medical physical education to influence and mitigate unfitness. In addition to these sports, the Institute offers for those who are interested winter and summer physical education trainings with an attractive program and organises various competitions, either at the premises of the faculty or University or competitions with national or international participation.

Course ID: KPS/ VKLP/16		Course name: Research in Clinical Psychology			
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present					
Number of credits: 4					
Recommended semester/trimester of the course: 3.					
Course level: II.					
Prerequisites:					
Conditions for course completion: Written exam (max. 100 points). For A is needed min. 90 points, for B 80 - 89, for C 70 - 79, for D 60 - 69, for E 51 - 59.					
Learning outcomes: To familiarize students with nature of clinical research using the quantitative and qualitative approach in this sphere of empirical research.					
Brief outline of the course: Basic questions of research in clinical psychology. Ethical issues of clinical research. Introduction - the research process. Research project: Formulation of research questions, hypothesis testing, literature review, variables, sampling in clinical research. Foundations of quantitative approach - measurement (scaling, reliability, validity). Foundation of qualitative approach - case studies, phenomenological approaches, grounded theory. Instrumentation.

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: ÚTVŠ/ ÚTVŠ/CM/13	Course name: Seaside Aerobic Exercise
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: Per study period: 36s Course method: present	
Number of credits: 2	
Recommended semester/trimester of the course: 2., 4., 6.	
Course level: I., II.	
Prerequisites:	
Conditions for course completion: Conditions for course completion: Attendance	
Learning outcomes: Learning outcomes: Students will be provided an overview of possibilities how to spend leisure time in seaside conditions actively and their skills in work and communication with clients will be improved. Students will acquire practical experience in organising the cultural and art-oriented events, with the aim to improve the stay and to create positive experiences for visitors.	
Brief outline of the course: Brief outline of the course: 1. Basics of seaside aerobics 2. Morning exercises 3. Pilates and its application in seaside conditions 4. Exercises for the spine 5. Yoga basics 6. Sport as a part of leisure time 7. Application of projects of productive spending of leisure time for different age and social groups (children, young people, elderly) 8. Application of seaside cultural and art-oriented activities in leisure time
