Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 1., 3.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Mastering of basic terms and phenomena and their application in text analysis. Application of development tendencies in flexion when explaining the system of contemporary language, its "exceptions", "irregularities", system-creating elements and relicts of development of German.	
Learning outcomes: Diachronic view of language will enable students to understand and explain the system of contemporary language as a result of its development tendencies from the Old High German, to identify relicts and progressive phenomena of future development.	
Brief outline of the course: - Ablaut as a system-forming element of verbal flexion, strong (primary) verbs from the Old High German up to present, preterite-present verbs, athematic verbs, weak (secondary) verbs - Vocalic and consonant declension of nouns and their development into contemporary German; developmental tendencies in the system of nouns flexion (formation of clear opposition sg. and pl., differentiation of genres, gender variation); formation of mixed declension of nouns in Early New German - Flexion and comparative and superlative adjectives, formation of adverbs - Flexion of pronouns and numerals in history

Number of ECTS credits: 3	
Recommended semester/trimester of the course: 2., 4.	
Course level: II.	
Prerequisites:	
Conditions for course completion: examination - written test or oral exam	
Learning outcomes: Students will learn some new approaches in synchronic linguistics and they will master terminology of selected linguistic disciplines (pragmalinguistics, discourse linguistics, sociolinguistics, psycholinguistics) and their basic methods.	
Brief outline of the course: - Fundamentals of pragmalinguistics - Using of sign, relation between sign and recipient - Content elements in terms of pragmalinguistics - propositional and performative elements - Deixis - Theory of speech act - Postulates and principles of understanding of messages - Fundamentals of discourse linguistics, definition of discourse - Epistemological and textualistic analysis of discourse, critical and descriptive analysis of discourse, procedures in discourse analysis - Sociolinguistics – subjects of research of sociolinguistics, relationship to linguistics and sociology; methods of sociolinguistics, selected aspects of sociolinguistics - Language identity of social groups, social attitudes to language - Relationship between social classes and language: Bernstein's deficit hypothesis, Labov's difference hypothesis - Standard and non-standard forms of language (Standard variety of German in SRN, Austria and Switzerland, Dialects, Sociolects) - current topics of sociolinguistic research (language of young people, specific aspects of communication behaviour of men and women, language of multi-ethnic cities, pidgins and Creole language, foreign talk) - Language policy in Slovakia, in Germanophone countries, directives of EU language policy - Fundamentals of psycholinguistics: subjects of research of psycholinguistics, relationship to linguistics and psychology; methods of psycholinguistics, selected aspects of psycholinguistics - Language learning theories	

- Mental lexicon – processing of language sensations in brain, speech disorders - aphasias - Meaning of words in terms of psycholinguistics: term, prototype, primary terms, sensory, categoric signs

Number of ECTS credits: 6	
Recommended semester/trimester of the course: 1., 3.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Written work Written and oral examination	
Learning outcomes: To provide information on quantum computer and quantum computations. To compare classical and quantum models and methods.	
Brief outline of the course: The basics of classical theory of computation: Turing machines, Boolean circuits, parallel algorithms, probabilistic computation, NP-complete problems, and the idea of complexity of an algorithm. Introduction of general quantum formalism (pure states, density matrices, and superoperators), universal gate sets and approximation theorems. Grover's algorithm, Shor's factoring algorithm, and the Abelian hidden subgroup problem. Parallel quantum computation, a quantum analogue of NP-completeness, and quantum error-correcting codes.

Prerequisites:	
Conditions for course completion: project, exam	
Learning outcomes: Advanced topics in study of the central nervous system and cognitive processes in human, with focus on computational concepts important in the study of cognitive and neural sciences. Prerequisite: Intro to Neuroscience	
Brief outline of the course: Selected topics in cognitive science (following up on Intro to Neuroscience). Overview of the methods of theoretical study in cognitive and neural science, including connectionistic, statistical and system-theory principles in modeling of cognitive processes and neural circuits. Selected models of the human visual and auditory systems, learning, thinking, attention, development and plasticity.

Prerequisites:	
Conditions for course completion: The preliminary assessment shall be based on the results of independent work of student on computers for a number of sub-assignments (course and evaluation of own inquiry activity, didactical quiz, interactive modelling applet, inquiry-based worksheet with tasks and questions). In final exam students will demonstrate an overview of the theoretical knowledge in the field of computer science education in written form and they will present and defend their own educational project for the chosen topic of the computer science (containing objectives, system of tasks with increasing complexity, tasks solutions and methodological commentaries and didactical quiz).	
Learning outcomes: 1. For the chosen topic of school informatics create didactic quiz, inquiry-based worksheet with tasks and questions, implement and evaluate own inquiry activity. 2. To create an interactive model for the chosen natural phenomenon or computer science concept. 3. To create a lesson preparation using modern teaching methods and aids, to implement it in practice and evaluate.	
Brief outline of the course: Teaching paradigms. Inquiry based computer science education. Process of creating concepts in computer science. Assessment of learning objectives of pupils, didactical quizzes. Programming teaching (paradigms, environments, data types, commands, variables). Specifics of computer arithmetics. Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 1 Per study period: 28 / 14 Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course: 1., 3.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Students can get a maximum of 90 points for the course: Part 1 of the assessment: participation in the training (30p) - replaces the classic lessons, students choose the date of the training at the introductory first meeting to the course, therefore their participation is necessary. As the training takes place in two days, participation in the entire training is required. If it is impossible to participate in both days of training, the student must change to another date of training, which he will be able to complete. The training takes place partly over the weekend and also outside the school or in the training center in Danišovce (it starts on Thursday evening and ends on Saturday with lunch). The costs of accommodation, meals and travel are paid by the student himself. 2nd part of assessment: workshops (20p) - they replace classic lectures, are held 4 times per semester and for each workshop the student can get 5p (a total of 20p for workshops). Part 3 of the assessment - preparation (10p) and implementation (10p) of block activities in pairs - a total of 20b. Students must send the prepared preparation of the block of activities on the chosen topic for the pair or an individual, which is evaluated with a maximum of 10 points, no later than one week before the date of their training. The preparation should include a clear goal, a description of the selected activities and their goals and justification on the topic, a description of the necessary tools, preparation of questions for discussion as well as activities in stock. The preparation will then be consulted by the lecturers and a possible correction will still be possible. The actual implementation of training activities will be evaluated by a maximum of 10 points, while evaluating the adequacy of selected activities with respect to the selected topic, to fulfill the goal of activities, ability to stimulate group discussion, equal distribution of all members in the group block with other members in the group. The minimum that needs to be achieved from the preparation and implementation of activities is at least 11 points. Part 4 of the assessment - knowledge test (20b). The exam will consist of 5-6 questions related to prevention and the social skills needed in prevention. Students will be able to answer these questions based on the study literature and participation in the training. The minimum number of points required for successful completion of the course in this part of the evaluation is 11 points. In total, students can get 90bp per subject and the final evaluation is as follows: 90 - 82: A 81 - 73: B 72-66: C 65 - 59: D 58 - 54: E 53 and less: FX. Any modifications to the implementation of the course in connection with the current order of the Rector are listed in the electronic board of the course.	
Learning outcomes:	

To provide students with more detailed information on the psychological aspects of drug prevention through an interesting, engaging explanation of theory and practice. Development of skills for the work of teachers in the field of drug use prevention also thanks to the use of experiential methods in teaching and the possibility of developing professional skills in the work of a teacher and a prevention coordinator at school.

Number of ECTS credits: 4	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Assessment of preliminary assignments - design of a teleproject, design of an e-learning course lesson, design and implementation of a video-conference activity. In final exam students will demonstrate an overview of using the Internet in education in written form and they will present and defend their final work focused on using the Internet in education (design and implementation of an e-learning course, teleproject, webquest, on-line competition, lesson exploiting several Internet sources and tools).	
Learning outcomes: 1. To acquire an overview of the possibilities of using the Internet in education. 2. To enhance skills for searching, acquiring, exchanging and presenting information via the Internet. 3. To design, develop and verify an Internet activity (e-learning course, teleproject, WebQuest, online competition, video lecture).	
Brief outline of the course: Overview of using the Internet in education. Educational Web sites and search engines. Design, implementation and evaluation of e-learning courses. Educational teleprojects, online competitions, teleexperiments. Communicating via the Internet - forums, blogs, videoconferences, social networking. Social, medical, ethical and legal aspects of using the Internet.

Number of ECTS credits: 3	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: continuous assessment of interpreting, formation of two RTPs, active participation in seminars, ex-post assessment	
Learning outcomes: - learning of language, communication, procesual, situational, cognitive and psychological factors affecting interpreting - mastering of textual typology and typology of speaker relevant to interpreting - ability to understand a source text (original) and its adequate transfer to a target language and culture	
Brief outline of the course: - systematic development of perceptive and productive interpreting skills through identification and elimination of deficits in comprehension, flexible assimilation and adequate decision-making processes in the phase of production of target text - training of interpreting from letter as an elementary form of simultaneous interpreting which precedes interpreting of A and B type (sight interpreting and spontaneous speech). The precondition for their implementation is selection of texts – authentic speeches of speakers – according to the specific requirements of the study field and conference typology with increasing difficulty (starting from official speeches of governmental officials and heads of states and important persons of social life, current forum, official speeches in European institutions up to specific topics) - training of interpreting strategies, e.g. anticipation as typical reception strategy in interpreting direction German - Slovak, inference, segmentation, preparation phase, output monitoring, compression, transcoding, syntactic transformations, evaluation of translation, etc. - memory exercises: storing and holding of information in memory (short-term and long-term memory) - optimisation of time lag - microphone discipline of speakers and interpreters - ethics of interpreting - preparing of retrospective interpreting reports
