Learning outcomes: To outline the issue of history of philosophy and modern times. The specific feature of philosophy of Leibniz (one of the creators of modern society) is a shift from modern thinking, which wants to separate medieval and scholastic ways of thinking. Leibniz finds solutions for coping with medieval culture in its creative revision and return to the sources of ancient thinking, especially to its classical period (classical Greek philosophy) in order to formulate the basic problems of further development of European thinking. The aim is to point out the importance of studying the works written by philosophers (especially those by Leibniz) and through these works to attempt for returns and re-thinking of certain issues of philosophy.	
Brief outline of the course: Leibniz and new thinking. God - soul - world as basic issues of philosophical reflection of Leibniz. Meditations as a way of Leibniz's thinking about basic issues of philosophy and science, but also freedom of a man. Four pillars of European culture. Freedom and happiness as fundamental topics of reflections of new philosophers.

Course ID: KF/ DaT/15	Course name: M. Foucault: Discipline and Punish
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 6.	
Course level: I.	
Prerequisites:	
Conditions for course completion: Conditions of continuous control: during the semester a student is continuously assessed according to his/her activity in seminars. To be awarded the credits for semester, a student must attend seminars. Assessment of students in seminars is conditioned by receiving the respective number of points (1 point for each active participation). Reading and understanding of the assigned texts can be checked during the seminars.	
Learning outcomes: The aim of the course is to present philosophical thinking of the “Professor of the History of Systems of Thought”, genealogist and (although he did not like this description) post-structuralist thinker M. Foucault. Students have a chance to become familiar with (postmodern) genealogical understanding of history as the critique of ideologies that support (traditional) history. On the basis of Foucault’s analysis of establishment of prison and the related developing punishment practices, the seminar in written discourse attempts to draw the attention to the controversial points of our (optimistic) historical understanding of progressive ideas.	
Brief outline of the course: 1) Torture 2) Punishment 3) Discipline 4) Prison
