University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ KLP/08	Course name: Clinical Psychology
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Conditions for seminar completion: The aim of seminars is to provide insight into psychopathological manifestations of different types of mental health problems. Seminars will be realized at the Psychiatric clinic, therefore the student may have the practical contact with hospitalized patients. He/she may practice interview, to discuss the choice of psychodiagnostic methods for specific types of clinical situations, as well as possible psychotherapeutic interventions. During the seminars the student has to prepare a seminar work on the assigned topic. Maximum points 40. Final exam (60 points) Requirements: Theoretical knowledge (basic literature, lectures) - test Case study analysis – oral discussion Final evaluation (sum of all points): For A is needed minimum 91 points, for B minimum 81 points, for C minimum 71 points, for D minimum 61 points, for E minimum 51 points, for FX = 50 and less	
Learning outcomes: The general goal of this course is application of theoretical knowledge into the practice of clinical psychology, understanding of basic features of specific groups of mental health changes. Course brings orientation in psychodiagnostic and psychotherapeutic methods. Main aim is ability to analyse the individual case. Together with the subject Psychiatry and psychopathology for psychologists, Clinical psychology forms the main knowledge base of the necessary knowledge and practical skills for the subject Psychotherapy. The result of the education is for students to gain the ability to comprehensively analyze an individual case and work independently with the patient. They also expanded their knowledge about the possibility of specific recommended psychological interventions and treatments. In addition, they will acquire: <ul style="list-style-type: none"> - insight into the application of theoretical knowledge of clinical psychology in practice, - deepen the basic characteristics of individual groups of mental health changes, - get acquainted with psychodiagnostic procedures for individual mental disorders, 	

- insight into the basic recommended psychotherapeutic procedures for individual groups of mental health disorders.

Students will expand their practical experience and acquire skills

- conduct psychological interviews with patients with psychiatric diagnoses under supervision,
- work with specific clinical and test psychodiagnostic methods in the field of clinical psychology,
- in selected basic psychotherapeutic procedures,
- create a clinical-psychological affiliation
- formulate an adequate clinical-psychological conclusion.

Experts from practice will also be invited to selected lectures. The lectures will also include preparation in the form of studying podcasts, articles or videos.

Brief outline of the course:

Clinical psychology

1. Basic psychological concepts of mental health changes: psychoanalytic and psychodynamic approach, behavioristic perspectives, cognitive approach, humanistic view. Factors influencing mental health.
2. Systems of classification: DSM V, ICD – 10, similarities and differences, description of basic categories of mental disorders
3. Specific issues in clinical psychology: anxiety disorders, schizophrenia, mood disorders, sexual disorders, personality disorders, eating disorders, developmental disorders, neurological disorders, addictions.
4. Psychological examination: general aspects of psychological report writing, diagnostic methods in clinical psychology (clinical and testing methods). Assessment interview (general and specific considerations, procedure in clinical interview). Clinical evaluation of intellectual function, personality assessment (inventories and projective methods in clinical practice), neuropsychological assessment.
5. Basics in psychotherapy – review of basic approaches, their principles and psychotherapeutic modalities. Psychodynamic perspective, cognitive-behavioral approach. Individual, group and family psychotherapy, therapeutic community. Principles of crisis intervention. Supportive psychotherapy.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/KBT2/19	Course name: Cognitive Behavioral Therapy 2
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites: KPS/KBT1/19	
Conditions for course completion: Course completion conditions: 60% assessment during semester (60p), 40% exam (40p) Assessment during semester: 4 requirements (75% attendance, active participation in seminars, work on homework and writing case studies (max. 10 points) and submission of written work (max. 50 points). The written work is focused on a specific disorder, which is the content of the semester curriculum and treatment options used in CBT. The work must contain at least 6 pages of text from at least 8 sources, primarily articles from journals published in the last 5 years, conference proceedings of KBT and professional literature. Min. the number of points obtained per semester required for admission to the examination is 31p. Exam: written, in the form of a test A final evaluation is a sum of assessment during semester and exam: A = 90 - 100 B = 80 - 89 C = 70 - 79 D = 60 - 69 E = 51 - 59 FX = 0 - 50	
Learning outcomes: The aim of this subject is to gain knowledge about CBT and expand student's ability to apply the CBT model in practice in a therapeutic relationship with their own clients. At the end of the semester, students present the issues of their clients within CBT and present the use of appropriate procedures and methods. They can follow three basic functions: 1. Describe clearly the specific problem behavior. 2. Determine what causes this problem behavior. 3. Determine what consequences sustain the problem behavior. Within the clinical experience, students conduct therapeutic sessions with the client, under supervision. They can examine problem behavior, measure its frequency, the intensity of selected manifestations, their duration.	
Brief outline of the course: 1. Basic principles of cognitive therapy, the basic assumptions of cognitive therapy, method of troubleshooting. 2. Depressive disorders – diagnostic criteria and cognitive behavioral therapy, types of depressive	

<p>disorders, cognitive distortions in depressions, ways to increase patient activity.</p> <p>3. Diagnostic criteria and cognitive behavioral therapy of posttraumatic stress disorder flashbacks, work with exposure in PTSD.</p> <p>4. Use of social skills in the prevention of depression, training of social skills by Lieberman.</p> <p>5. The prevention of depression by practicing awareness – mindfulness.</p> <p>6. Diagnostic criteria and cognitive behavioral therapy of obsessive compulsive disorder, evaluation and measurement in OCD, exposure of barrier rituals.</p> <p>Page: 2</p> <p>7. Diagnostic criteria and cognitive behavioral therapy of eating disorders – anorexia nervosa and bulimia, working with the recording of consumption, work with ideas, change attitudes towards themselves, their physique and body weight.</p> <p>8. Cognitive behavioral therapy of obesity, group programs, work with records – eating and exercise habits. Techniques of self – control and self-strengthening.</p> <p>9. Cognitive behavioral approaches in management of marital and family problems.</p> <p>10. Diagnostic criteria for mental and behavioral disorders caused by effects of psychoactive substances, cognitive behavioral therapy of addictions, 12 steps approach, community reinforcement approach.</p> <p>11. Learning disabilities and behavioral disorders in children, cognitive behavioral therapy in children – school phobia, enuresis, encopresis.</p> <p>12. The diagnostic criteria for personality disorders, cognitive behavioral therapy of personality disorders, identifying of cognitive distortions, therapeutic letters to emotional processing of core beliefs, role playing.</p>

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ EPS/16	Course name: Ethics for psychological practice
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites:	
Conditions for course completion: COURSE REQUIREMENTS 1. THE ETHICS AUTOBIOGRAPHY —To explore how to be ethical and professional, you need to know where you're coming from. To help accomplish this goal, the short paper (2-3 pages), will be an "ethics autobiography" in which you will explore the aspects of your background that might make it easier or harder to be ethical. Ethics autobiography is followed with your presentation some main ethic dilemmas. 2. ACTIVE DISCUSSING AND PARTICIPATING - I invite you to be active, to come along and explore with me how we make the transition from nice, caring, bright people to effective, ethical, caring professionals. 3. COMPARISON OF APA ETHIC CODE OF CONDUCT AND CODE OF CONDUCT IN YOUR LANGUAGE - You will find out ethic code of conduct in your language and bring it to seminar lesson. 4. CLASS PRESENTATION - The presentation's purpose is to be acquainted with a variety of topics in the fields of ethics and law. Each student is required to prepare and present materials. As part of the background material and the presentation one can use articles, clips from professional and folk books and films, information from the internet etc. The presentation would be minimum 25-30 minutes, thus leaving time for a short debate in class. FINAL GRADE is sum of activities during semester 1. THE ETHICS AUTOBIOGRAPHY 30% 2. ACTIVE DISCUSSING AND PARTICIPATING during semester 10% 3. COMPARISON OF ETHIC CODES OF CONDUCT (Slovak to APA, Izraeli to APA) 20% 4. CLASS PRESENTATION 40% = 100%	
Learning outcomes: The general goal of this course is to introduce core ethical principles and answer some of the ethical questions/ dilemmas that psychologists encounter in their everyday practice. The theme of the course is that learning to be ethical. Because of the active and enduring nature of ethical acculturation, this is not a lecture course! My role is not to tell you what was important or what is the best. Rather, we will help each other explore the ethical standards together. In this way, you will learn the skills necessary to understand what is ethic and what is unethical.	

Brief outline of the course:

1. Place ethics in psychology
2. Historical roots
3. Overview of national and international ethics codes and principles
4. Resolving ethical issues and competence
5. Human relations
6. Privacy and Confidentiality
7. Ethics in psychotherapy

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ SEX/12	Course name: Human Sexuality
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Course completion conditions: 40% assessment during semester, 60% exam Assessment during semester: active participation in classes (including lectures), fulfillment of ongoing tasks 40% Exam: written work, where the student will use the newly acquired knowledge of the course 60% Final evaluation (sum of all points): A = 90 - 100 B = 80 - 89 C = 70 - 79 D = 60 - 69 E = 51 - 59 FX = 0 - 50	
Learning outcomes: The course Human Sexuality extends the knowledge obtained in the subjects Clinical Psychology, Psychiatry, Psychopathology and Psychotherapy considering the human sexuality. The aim of the subject is for students to obtain the overview and understanding about the most important fields of sexuology, to be able to think about it globally, in connection to the consulting practice, psychotherapeutical practice and medical practice. The course is mainly focused on the connection of scientific knowledge and practical experience so that students also acquire specific tools and competencies suitable for a possible meeting with a sexological client in the performance of their work.	
Brief outline of the course: Human sexuality – historical context Czech and Slovak sexuological setting (in the past as well as in the present) Standard and Normalization in sexuology Biological frame of human sexuality Psychosexual development and deviations in development Sexual education (communication about the topics of human reproduction and intimacy, contraception, sexually transmitted diseases and sexually risk behaviour considering the particularities of children and juveniles)	

Sexual dysfunctions – diagnostics and therapy Sexual deviations in object and activity - diagnostics and therapy

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ IDYNT/19	Course name: Introduction to Psychodynamic Psychotherapy
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites: KPS/PTER/08	
Conditions for course completion: Course completion conditions: 40% assessment during semester, 60% exam Assessment during semester: short test and class presentation of selected topic. Min. the number of points obtained per semester required for admission to the examination is 21p A final evaluation is a sum of assessment during semester and exam: A = 90 - 100 B = 80 - 89 C = 70 - 79 D = 60 - 69 E = 51 - 59 FX = 0 - 50	
Learning outcomes: The discipline is a combination of theoretical lectures and practical exercises. After successful completion of lectures, students are able to orient themselves in the basic psychodynamic principles. Through exercises, students train the application of these principles in practice. Students are acquainted with the application of psychodynamic theoretical concepts in everyday practice. In addition to theoretical knowledge, they will also gain the ability to learn and listen from several perspectives.	
Brief outline of the course: Theoretical outline: Introducing key concepts of psychodynamic psychotherapy. The Unconscious <ul style="list-style-type: none"> • Early childhood experiences. • Psychosexual development • The Oedipus complex • Repression • Dreams are wish-fulfilments. • Transference - countertransference • Free association • The Ego, the Id and the Super-Ego 	

Psychic determinism Neuropsychanalytic perspective of psychodynamics Practical outline: Psychodynamic listening Theory of reflection - focus on implicit (pre-conscious) feelings Becoming a flexible listener

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PDO/08	Course name: Psychodiagnostics of Adults
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Students are evaluated based on class participation, class presentation (20p) (the topic of presentation should relate to the field of psychological assessment. Example: multicultural issues in assessment, controversies in assessment, or the use of a specific instrument (provide a brief overview of its intended use as well as its technical features) Write a report (20p.) of 4 assessment instruments, each report will include the following: the possibility of using a diagnostic tool, advantages and disadvantages user qualification level Next, please answer the following questions: How did results confirm or disconfirm your knowledge of yourself? What are the implications of your findings as far as your understanding of yourself as a therapist ? Any surprises? Please elaborate. The reports should be at least two pages and no longer than four pages and a final exam. Activities during semester are evaluated max. 40 p, final exam max 60 p. (written form with open-end questions) Final evaluation (sum of all points): For A is needed minimum 90 points, for B minimum 80 points, for C minimum 70 points, for D minimum 60 points, for E minimum 50 points, for FX = 49 and less	
Learning outcomes: The result of the course is to present a systematic overview of psychological assessment methods and introduce the principles of adult psychodiagnostics. The focus of the course is on practical training of abilities and skills needed in psychological assessment. The absolvent of the course will master the theoretical and practical principles of diagnostics and evaluation with a focus on the adult client. Student can assemble a psychodiagnostic battery for diagnosing monitored psychological processes. The student is able to work and administer psychodiagnostic tests and questionnaires for adults. He is able to interpret the results of psychological tests and questionnaires. He has the ability to formulate psychodiagnostic conclusions and recommendations.	
Brief outline of the course:	

Principles and specifics of adult psychological diagnosis. Clinical and test methods. Assessment of intelligence, partial and special abilities. Evaluating individual mental functions. Personality assessment: Questionnaire methods - single and multi-dimensional. Rating scale. Projective methods.

Topics

1. Psychological Testing and Assessment - definition of key terms - psychological testing, psychological tests, psychological assessment, psychological measurement, and surveys. The characteristics of psychological tests. Similarities and differences between tests. Assumptions of psychological testing. Classification of assessment methods. Brief overview of history of development and use of methods. User qualifications and professional competencies – responsibilities of test users in specific contexts. Cultural, ethical and legal context of psychological assessment. 2. Non-testing methods - observation, interview, case history. Definition. Types of Clinical Interviews (intake, diagnostic, mental status exam, case history - structure). The interviewer general and specific skills. Components of the interview (rapport, technique). Type of observation. Note-taking – cultural, ethical and technical issues. Advantages and disadvantages of non-testing methods. 3. Intelligence tests - definition of intelligence, A brief overview of models of intelligence (Spearman, Cattell, Thurstone, Vernon, Sternberg, Piaget, Gardner). Assessment of intelligence. Intelligence Quotient. Simple (partial) tests of Intelligence - Raven's Progressive Matrices (SPM, APM), Kohs Block Design Test. Complex tests of Intelligence: group-administered - Intelligence Structure Analysis (ISA), Intelligence Structure Test (IST), individually administered - Wechsler Adult Intelligence Scale, Stanford–Binet Intelligence Scale. 4. Tests of mental functions, special abilities – attention, memory, creativity, reaction time (Bourdon Test, Trail Making Test, Rey Complex Figure Test, Stroop Test, Wechsler Memory Scale, WCST, Torrance Tests of Creative thinking) - application possibilities, advantages and disadvantages. 5. Tests of organicity - neuropsychological assessment, Neurological damage and the Concept and definition of a cognitive deficit. Neuropsychological testing vs. standard psychological testing. Conditions and objectives of neuropsychological assessment. Test selection, Test administration, and preparation of the patient. (Verbal Learning Test, Bender-Gestalt, Benton Visual Retention Test, Delis-Kaplan Executive Function System.....) 6. Personality measurement – Projective methods. Characteristic and theoretical foundations of projective methods. Advantages and limits of use (reliability, validity). The difference between the methods, techniques and tests. Classification (verbal, drawing and handling projective tests – association, construction, completion, expressive choice ordering). Word Association Experiment, Hand test, The Thematic Apperception Test (History and Development, Theoretical Perspectives, Reliability and Validity, Advantages and Limitations, Administration, Typical Themes Elicited, Scoring Procedures, Interpretation) Baum test ("Tree test"), The Luscher Color Test. 7. Personality measurement - questionnaires, inventories, rating scales - the principle, overview, classification, advantages and limits of use. Unidimensional questionnaires (Manifest Anxiety Scale, The State-Trait Anxiety Inventory, Beck Depression Inventory, Beck Depression Inventory, Hamilton Rating Scale for Depression, Hamilton Anxiety Scale, Zung Self-Rating Depression Scale, Multidimensional questionnaires (Eysenck Personality Inventory, Eysenck Personality Questionnaire, Sixteen Personality Factor Questionnaire, Big Five Inventory, Minnesota Multiphasic Personality Inventory) 8. Psychological Report - Findings of assessment and proper formulations. General guidelines (length, style, terminology, topics, presenting test interpretations, use of raw data, feedback). Format for a psychological report (referral question, evaluation procedures, behavioral observations, relevant history, test results, impressions and interpretations, summary and recommendations).

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PDE/08	Course name: Psychodiagnostics of Children and Young Adults
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites: KPS/PDO/08	
Conditions for course completion: Students are evaluated based on class participation, class presentation (the topic of presentation should relate to the field of psychological assessment of children), writing report and final exam. psychological report. Activities during semester are evaluated max 40 p. Final exam max. 60 p. (written form with open-end questions) Final evaluation (sum of all points): For A is needed minimum 90 points, for B minimum 80 points, for C minimum 70 points, for D minimum 60 points, for E minimum 50 points, for FX = 49 and less	
Learning outcomes: The aim of the course is the introduction of principles and approaches to psychological assessment of children and adolescents. The focus is on the process of administration and evaluation in diagnostic situation. The aim of the course is to acquaint students with the basic methods used in the psychodiagnostics of children and youth with emphasis on the training of abilities and skills needed in the psychological evaluation of children and youth. The graduate of the course has mastered the theoretical and practical principles of diagnostics and evaluation in basic specializations (clinical psychology, educational psychology, school psychology, counseling psychology) with a focus on the child client.	
Brief outline of the course: 1. General issues of psychological assessment of children and youth (theoretical models). Situation of psychological assessment and its specifics in childhood. Qualitative and quantitative analysis of psychodiagnostic findings, idiographic and nomothetic approach. 2. Diagnosis, systems of diagnostic classification (problem formulation, assessment questions, diagnostic hypothesis, method choice, diagnosis construction, differential diagnosis, developmental diagnosis, characteristics of children assessment, sources of diagnosis, DSM V, ICD 10. 3. Normal development and influences on problem development (biological predisposing factors, Personal maintaining factors, Contextual pre-disposing factors, Contextual maintaining factors 4. Assessment methods of early development - neonatal and developmental scales (NBAS, NAPI, Gesell developmental scales, Belyev developmental scales)	

5. Assessment of early and preschool development. Evaluation of intellectual abilities Evaluation of speech and language. Autism and pervasive developmental disorders (WISC III, IV, S-B 4,5, WJ IE, Kaufman ABC, SON-R, CARS)
6. Assessment of school achievement. School maturity vs. school readiness. Partial learning disabilities. Tests of special abilities and individual mental functions. (Reading and spelling, Mathematics, Visual, visuospatial and visuoconstructive skills, Motor skills, Memory functions). Paintings - a developmental approach. Draw-a-Person test (DAP) - analysis of samples.
7. Problems of middle childhood - Assessment of external and internal troubles (ADHD/ADD, behaviour disorders, emotional troubles, neurotic problems)
8. Evaluation of personality, interpersonal relationships - the questionnaire techniques, projective techniques. Drawing tests - evaluation of drawing expressions of the child.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ ROD/09	Course name: Psychology of Family
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 1 Per study period: 28 / 14 Course method: present	
Number of ECTS credits: 5	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Course completion conditions: 40% assessment during semester, 60% exam Assessment during semester: 2 assignments Exam: written form A final evaluation is a sum of assessment during semester and exam.	
Learning outcomes: Students will gain an overview of the basic concepts related to family psychology and an understanding of the multicously conditioned processes that take place within the family as a system of mutual relations. Knowledge complements the repertoire of knowledge from developmental psychology, as the family plays a key role in the development of the individual. At the same time, students gain orientation in current approaches to the family and within the seminars they will gain experience with specific possibilities and examples of working with the family. It also includes a lecture by an expert from practice.	
Brief outline of the course: 1. The subject of psychology families, objectives, perspectives and application areas. Terminology: adaptability, cohesion, normality, interaction, identity . 2. Main characteristics of the family. Family functions. 3. Family theories, standards, assessment family. 4. Models of family functioning, their importance of research and practice. 5. Systemic versus systems approach to the family. Definitions of system, family system, possibilities and limitations of applying the approaches. 6. Family over time (life stages of family life, family life cycle). Satisfaction in the family because of the family cycle stages. 7. Partnership, family formation and parenthood. 8. Family communication - levels of communication, communication in relationships, communication problems. Special forms of communication: family rituals, family myths. 9. Theory of family stress and its management. Family Resiliency (resistance). Family crisis. 10. Principles of work with the family - the basic differences in counseling and therapy. 11. Upbringing, alternating upbringing (shared parenting). Seminars content	

<p>Individual and group preparation specifically designed for successive exercise.</p> <ol style="list-style-type: none"> 1. Introduction to discipline, discussion of the basic concepts. 2. Research on the family - methodological specifics. The adequacy of the methods, the problem of interpretation of family data. The significance of the research in practice. 3. Socio-psychological specifics and problems of modern family. Functional versus dysfunctional family. 4. Biological versus adoptive families. 5. Fostering and professional parents (psycho-social features) 6. Intergenerational family and its specific features (benefits and challenges) 7. Reconstructed family. Step-families - parenting in step-families, family identity formation in step-families. 8. Cohabitation versus marriage in the context of the family. Studies of different types of parenting and families: 9. Lack of parenting, involuntary childlessness. 10 Single-parent families: mother-lonely single mother, a divorced mother, a widow, lonely father - widowed, divorced father. 11. The exercise will be devoted to case studies from the field of family counseling led by expert of the consulting practice. The term will be specified during the semester (change in terms of exercise is possible).

Methods and forms of research. 4. Analysis of work and work activity, methods. What is the analysis of work activity and what is the procedure for its implementation? Activity and employee focus. Requirements. Relevant methods. Profesiography. Where can job information be drawn from? 5. Selection of employees, procedure, methods, decision-making models, headhunting. 6. Recruitment - who to contact and how. Employee selection procedure, predictors, methods, decision models, other forms of selection (headhunting) 7. Development, training and education of employees, cycle, methods. What is development about and who is it about? Steps of the training cycle. Methods of training programs and their advantages (lectures, instructions, simulations ...), coaching, mentoring.	

8. Evaluation of employees, evaluation process, methods, psychological assessment. The role of occupational psychologists in the evaluation process, the evaluation process and its importance. What does the psychological assessment contain and when is it issued?
9. Personality of manager, leader, leader, characteristics. Leadership and employee management leadership styles, gender differences in managerial positions. Education of managers. Concepts of manager, leader, leader. Leadership approaches and leadership styles. Requirements for a manager, a pyramid of managerial skills. Men and women in managerial positions, glass ceiling. Talent pool.
10. Team, working group, typology, models, methods of working with groups. Group and team features, typology of working groups / teams, team roles, Tuckman's and Gershik's model of group development. Sociometry and T-groups.
11. Negative phenomena in the workplace, characteristics, impacts. Contraproductive work behavior (absences, late arrivals, fluctuations). Workaholism. Technophilia. Burnout - triggers, symptoms, MBI Questionnaire. Mobbing, mobber. Bossing.
12. Conducting an interview and its specifics in work psychology
Individual context - skills in estimating people, resistance to mistakes and prejudices, professional context - acceptance, empathy, ethics, mastering the technique of conversation
Interview structure, strategy, work with questions, types of interview, recording and processing of information
13. Interactive diagnostics: Assessment / Development Center. Characteristics, definition of goals, creation of the program, selection of techniques and model situations, evaluation criteria, observation schemes, selection and incorporation of evaluators, processing of outputs, presentation to the client and participants, pitfalls of providing FB on the part of psychologist, work with problematic client, ethical principles in reporting to superiors .
14. Psychodiagnostics in HR, processing of outputs from personnel analysis, AC, DC and their presentation. Procedure for creating a test battery, data collection, evaluation and processing of results, qualitative analysis, diagnostic hypotheses, synthesis of results, principles of writing conclusions, their content and structure, development topics, presentation of results to the client.
15. Principles and technique of 360 ° feedback. Basic characteristics, goal, design and application of the program, creation of methodology, principles of providing feedback to participants, outputs from 360 ° feedback, benefits and risks.
16. Basic characteristics of organizations. Organization as a department and as an activity. Signs of formal organizations. Organization and management. Organizational behavior.
17. Culture of the organization. Definitions of organizational culture. Manifestations of organizational culture. The power of organizational culture. Organizational culture and management.
18. Organization structure. Characteristics and function of the organization structure. Principles of creating the structure of the organization. Line of authority and division of labor as the basis for creating the structure of the organization. Types of organizational structures.
19. Work motivation. Theories of motivation and areas of work. Theories of content (needs) - theories of Maslow, Alderfer, Herzberg. Process theories - motivation and expectations, justice, attributions.
20. Psychological characteristics of the market. Definition of the concept of consumer behavior and its main determinants. Purchasing as a decision-making process.
21. Consumer perception and attention. Active and passive information retrieval. Use of knowledge about the differential and absolute threshold of perception. Subthreshold consumer perception.
22. Learning and memory in shopping behavior.
23. Personality and motivation as determinants of consumer behavior. The role of personality traits and self-concept in shopping. Motivation of consumer behavior.

24. Social determinants of consumer behavior. Culture as a determinant of consumer behavior. Social group and its influence on consumer behavior. Opinion leaders. The family and its importance for consumer behavior, family life cycle and consumer behavior. 25. Personality of the customer and the seller. Classification and characteristics of personality types of customers. Personality traits of successful sellers. 26. Advertising. Definition of advertising. Advertising model. Psychological processes and advertising Appeals of advertising. Elements of effectiveness in advertising. 27. The problem of advertising effectiveness. Measuring the effect of advertising. Testing print and TV ads. Techniques and technical means used in advertising research. 28. Psychological characteristics of the image. Methods of image analysis. Packaging and its effect on the consumer. Principles and procedures for packaging testing. 29. Consumer typologies and segmentation research. Market segment concept. Segmentation variables. Market segmentation methods and steps. Areas of application of segmentation research. 30. Research methods of market psychology and advertising. Use of focus groups and assessment scales, repertoire grid in consumer behavior research and advertising. 31. The position of a psychologist in prison.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PTER/08	Course name: Psychotherapy
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites: KPS/KLP/08	
Conditions for course completion: The final evaluation is a combination between semester activities 40p (minimum 28p) and an exam at the end of the semester. - Active participation during seminars is in form of active class participation and discussion - presentation of the read book - short video presentation of selected psychotherapeutic techniques and their demonstration an explanation in class Basis of exam test with next analysis and discussion about case study (maximum 60 points) Final evaluation (sum of all points): For A is needed minimum 91points, for B minimum 81 points, for C minimum 71 points, for D minimum 61 points, for E minimum 51 points, for FX = 50 and less In case of absence, it is necessary to inform the teacher in advance and clarify the reason for the absence. Book presentation: In the first seminar lesson, each student selects the psychotherapy book which he/she will read and present in class. For the seminar lesson, the student will prepare 20 minutes presentation about the selected book, personal understanding of the book, relevant associations, criticism, and interesting examples or knowledge from a book. The student's presentation is intended to be an interactive, cooperative effort involving the entire class. The class ends with a 10-minute discussion of the presentation. Students are encouraged to express their views of the book and their learning experience. Psychotherapy video presentation: The student record and prepare a short video displaying a demonstration of specific therapeutic technic. In the in-class presentation, he explains demonstrated technic, the therapeutically theoretical basis of technic. Clarify for which psychological/ psychiatric problem is this technique recommended.	
Learning outcomes: This course introduces students to the various concepts and issues surrounding the field of psychotherapy. Psychotherapy deals with the treatment of psychical disorders by psychological methods. It includes interactive processes between a person or group and a psychologist. This course	

<p>is focused on the clarification of the essential background, which is necessary for understanding concrete psychotherapy theories.</p> <p>During this course students will get this knowledges</p> <ul style="list-style-type: none"> - essential background, which is necessary for understanding concrete psychotherapy theories connected to clinical psychology orientation, - the understanding the role of psychotherapy (pros and cons in treatment of psychopathology), - answers if some theories more valid than others, - information about specifics of psychotherapy interview, - information about intake and initial therapy interview. <p>During this course students will get these competencies and skills:</p> <ul style="list-style-type: none"> - necessary skills in psychotherapy, - necessary skills to provide specific psychotherapeutical technics, - ability to complete psychotherapeutical interview.

Faculty: Faculty of Arts							
Course ID: ÚTVŠ/ TVb/11		Course name: Sports Activities II.					
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: combined, present							
Number of ECTS credits: 2							
Recommended semester/trimester of the course: 2., 4.							
Course level: I., I.II., II.							
Prerequisites:							
Conditions for course completion: active participation in classes - min. 80%.							
Learning outcomes: Sports activities in all their forms prepare university students for their professional and personal life. They have a great impact on physical fitness and performance. Specialization in sports activities enables students to strengthen their relationship towards the selected sport in which they also improve.							
Brief outline of the course: Within the optional subject, the Institute of Physical Education and Sports of Pavol Jozef Šafárik University provides for students the following sports activities: aerobics, aikido, basketball, badminton, body form, bouldering, floorball, yoga, power yoga, pilates, swimming, body-building, indoor football, S-M systems, step aerobics, table tennis, tennis, volleyball and chess. In the first two semesters of the first level of education students will master basic characteristics and particularities of individual sports, motor skills, game activities, they will improve level of their physical condition, coordination abilities, physical performance, and motor performance fitness. Last but not least, the important role of sports activities is to eliminate swimming illiteracy and by means of a special program of medical physical education to influence and mitigate unfitness. In addition to these sports, the Institute offers for those who are interested winter and summer physical education trainings with an attractive program and organises various competitions, either at the premises of the faculty or University or competitions with national or international participation.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/STA2/08	Course name: Statistics 2
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Students evaluation is based on class activity during the semester (10 points) and on the test in the middle of the semester (30 points). The test consists of three practical questions solved on computers with SPSS software. Students with at least 21 points during the semester are allowed to take an exam. Final exam (60 points) consists of theoretical as well as of practical questions and more than 30 points is needed to pass the exam. Final evaluation (sum of all points): A (90-100p) B (80-89 p.) C (70-79p.) D (60-69 p.) E (51-59 p.) FX (0-50 p.)	
Learning outcomes: The purpose of this course is to provide information about advanced statistical methods when familiarity with the basic methods is expected. Basis fields include various kinds of analysis of variance (independent samples, repeated measures, mixed ANOVA MANOVA), factor analysis, multiple linear and logistic regression, cluster analysis and structural equation modelling. These statistical methods are introduced firstly on lectures with the theoretical background and the process of computing together with assumptions is presented. Next, these methods are practised on exercises with SPSS software.	
Brief outline of the course: 1. Review of basic statistical methods 1 (descriptive statistics – measures of central tendency, variability, position, hypothesis testing – parametric statistics). 2. Review of basic statistical methods 2 (hypothesis testing – nonparametric statistics, correlation, regression). 3. One-way analysis of variance. Purpose, assumptions, procedure, results interpretation, post hoc tests. 4. Two-way ANOVA, repeated measures ANOVA. Purpose, assumptions, procedure, results interpretation, post hoc tests.	

5. Nonparametric alternatives of ANOVA (Kruskal-Wallis, Friedman, Cochran Q). Suitable scientific questions and data, purpose of methods, assumptions, procedure, results interpretation, post hoc tests.
6. MANOVA. Purpose, assumptions, differences in comparison with ANOVA, logic of test, procedure in SPSS, results interpretation, post hoc tests (ANOVA).
7. Polynominal regression analysis, logistic regression. Differences from simple regression, purpose, methods of regression, assessing regression model and predictors. Appropriateness of logistic regression in psychological research.
8. Factor analysis (exploratory), principal components analysis. Purpose of factor analysis, methods of factor analysis, rotation, factor loadings, decisions about number of factors, interpretation of results.
9. Cluster analysis. Purpose and logic of cluster analysis. Methods, reading cluster analysis results.
10. Multidimensional scaling. Purpose and logic of multidimensional scaling, its methods and possible applications.
11. Structural equations modelling. Differences from "classical" statistical methods (confirmation technique), examples of use (confirmatory factor analysis, mediation), assessing model, changing model.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PSVKM/16	Course name: Students' Scientific Conference in the Field of Psychology (MA)
Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Presentation of a research contribution. A submission of the research contribution in a written form and its critical evaluation and defense at the student scientific conference. Guidelines for the research contribution: A maximum of 10 standard pages. A structure of the research contribution: <ul style="list-style-type: none"> - title - name of an author - abstract - keywords - introduction - method - results - discussion - conclusion – references 	
Learning outcomes: Presentation and defense of a research contribution in the field of psychology to an audience at the student scientific conference at the Department of Psychology.	
Brief outline of the course: Project preparation, implementation of the research project, processing and analysis of the research findings, preparation of a research report. Presenting the results of the research at the student scientific conference. A submission of a written form of the scientific research. Consultation of the scientific assumptions, methods, analysis and writing of the contribution with the consultant.

Course ID: ÚTVŠ/ KP/12	Course name: Survival Course
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: Per study period: 36s Course method: combined, present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 1., 3.	
Course level: I., II.	
Prerequisites:	
Conditions for course completion: Conditions for course completion: Attendance Final assessment: continuous fulfilment of all tasks within the course	
Learning outcomes: Learning outcomes: Students will be familiarized with principles of safe stay and movement in extreme natural conditions as they will obtain theoretical knowledge and practical skills to solve the extraordinary and demanding situations connected with survival and minimization of damage to health. The course develops team work and students will learn how to manage and face the situations that require overcoming of obstacles.	
Brief outline of the course: Brief outline of the course: Lectures: 1. Principles of behaviour and safety for movement and stay in unknown mountains 2. Preparation and leadership of tour 3. Objective and subjective danger in mountains 4. Principles of hygiene and prevention of damage to health in extreme conditions Exercises: 1. Movement in terrain, orientation and navigation in terrain (compasses, GPS) 2. Preparation of improvised overnight stay 3. Water treatment and food preparation.

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PMOR/09	Course name: The Essentials of Moral Psychology
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 1 Per study period: 28 / 14 Course method: present	
Number of ECTS credits: 5	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Course completion conditions: 40% assessment during semester, 60% exam Assessment during semester: 2 assignments Exam: written, in the form of a test A final evaluation is a sum of assessment during semester and exam: More detailed instructions are published on the electronic bulletin board of the course.	
Learning outcomes: Upon successful completion of the course, students are able to orient themselves in current theories and approaches in the development of moral reasoning, they are able to compare these approaches. Based on this, they can find ways to measure moral judgment and use it when working with a client.	
Brief outline of the course: Psychology of morality in the context of related disciplines. Developmental-psychological aspect of morality - analysis of stages and degrees of morality according to J. Piaget and L. Kohlberg - evaluation and application of theories in practice. Theory of moral development by H. Bull Theory of social areas by E. Turiel and L. Nucci Male and female morality according to C. Gilligan The Social Perspective of Moral Reasoning R.L. Selmana Eisenberg's theory of prosocial moral reasoning G. Lind's two-aspect theory of morality Moral reasoning in relation to moral conduct Moral development from the point of view of learning theories Situational context of moral reasoning - the concept of the morality of everyday life by Dennis Krebs Moral emotions - typology of moral emotions. Social norms and morality, insight into the issue of social and moral norms, definition of the relationship between norm and morality, the influence of norms on behavior. Current views on social norms and their regulatory function. Research, diagnosis and influencing moral judgment by psychological methods Pedagogical-psychological aspects of morality - approaches to stimulating moral development Education and upbringing for moral personality (problems of good character).
