COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: CJP/ OPAJ/15	Course name: Academic Presentations in English
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 1 Per study period: 14 Course method: present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 1., 3.	
Course level: I., III.	
Prerequisites:	
Conditions for course completion: Active classroom participation (max. 2x45min. absences tolerated). Test (10th week). Oral presentation. Final assessment = test result (50%), presentation (50%) Grading scale in %: A 93-100, B 86-92, C 79-85, D 72-78, E 65-71, FX 64 and less	
Learning outcomes: Students acquire practical skills for preparing an effective academic presentation in English, they learn how to prepare and structure a presentation, they extend their active vocabulary and knowledge of functional grammar structures and selected pronunciation aspects and improve their verbal performance, level B2.	
Brief outline of the course: Presentation structure. Presenting graphs, tables, diagrams, pictures, maps and other visuals. Functional grammar - defining, explaining, clarifying, exemplifying, etc. Sign-posting language. Question and answer session. Self-presentation, presentation of the university, study field. Non-verbal communication in presenting (mimics, gestures, eye-contact, room layout, etc.).	
Recommended literature: Erica, J.: Presentations in English. MacMillan, 2008. Burton, G.: Presenting. Deliver presentations with confidence. HarperCollins Publishers, 2013. Powel, M.: Dynamic Presentations. CUP, 2010. Armer, T.: Cambridge English for Scientists. CUP, 2011. Thaine, C.: Cambridge Academic English - Intermediate, CUP, 2012. www.uefap.com	
Course language: English language, level B1/B2 according to CERF

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KSP/ AUDVP1/11	Course name: Active Participation in a Domestic Academic Event 1
Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present	
Number of ECTS credits: 5	
Recommended semester/trimester of the course: 1., 2., 3., 4..	
Course level: III.	
Prerequisites:	
Conditions for course completion: Verbal or written (face-to-face or online) presentation of one's own contribution at a scientific event.	
Learning outcomes: The graduate of the course can: <ul style="list-style-type: none"> - prepare a separate scientific contribution based on the processing of the results of theoretical elaboration of results and empirical research, - create a meaningful text based on the theoretical basis of current knowledge of the issues under development, - determine the theoretical basis for the development of the issue, - explain the basic context and use the terms appropriate to the scientific field from which the issue is processed, - draw conclusions from the results of the elaboration and explain the individual findings, - prepare a presentation of the scientific contribution, which will ensure sufficient visualization of the text, - present in a comprehensible form the paper at the conference, while maintaining expertise, - explain those parts of the paper to which the discussion will take place. 	
Brief outline of the course: Mastering the administrative standards for the preparation and processing of a professional paper or poster. Practical use of legal norms in the preparation of the paper, especially by mastering the limits of personal data protection, compliance with the citation standard, knowledge of the legislation of the analyzed area. Mastering the processing of a professional paper or poster using the latest knowledge in the field, finding contextual, content and procedural contexts. Gaining experience associated with presenting the paper to the professional public using a presentation or poster and mastering the professional discussion of the paper.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KSP/AUZVP/11	Course name: Active Participation in a Foreign Academic Event
Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present	
Number of ECTS credits: 15	
Recommended semester/trimester of the course: 1., 2., 3., 4., 5., 6., 7., 8..	
Course level: III.	
Prerequisites:	
Conditions for course completion: Presentation of the results of own theoretical and empirical analysis of the dissertation in oral or poster presentation. An active presentation can also take place electronically.	
Learning outcomes: By actively participating in a foreign scientific event, the doctoral student will acquire competencies of various natures. In addition to knowledge of planning and preparation of the paper, he demonstrates a high level of knowledge and ability to identify, evaluate and apply correct scientific methods as well as research methodology in the social sciences. By actively participating in a scientific conference, the doctoral student demonstrates a high degree of ability to identify and formulate a scientific problem. Can interpret a scientific problem using the latest theoretical and empirical knowledge and their critical comparison. Demonstrates the ability to communicate research results to a wider audience by adequate means through a foreign language.	
Brief outline of the course: Active participation in a foreign scientific conference, the content of which is related to the focus of the doctoral thesis. The scientific conference must be organized by a university abroad and must include the scientific and organizing committee of the conference, as well as a professional guarantor. An anthology must be created from the event, which is reviewed by at least two reviewers.

Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present	
Number of ECTS credits: 10	
Recommended semester/trimester of the course: 1., 2., 3., 4., 5., 6., 7., 8..	
Course level: III.	
Prerequisites:	
Conditions for course completion: The condition for completing the course is the topic of the bachelor's thesis and its subsequent management, which is in accordance with the theoretical and methodological analysis of the doctoral thesis.	
Learning outcomes: Acquisition of skills for conducting final theses. Ability to formulate a partial scientific problem in accordance with the topic of the dissertation and to methodologically guide the student in solving it, in writing the final thesis. Students' ability to critically evaluate the course of research work and creation of the final text.	
Brief outline of the course: Preparation of topics and project of bachelor theses, communication with students - solvers of final theses.

Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present	
Number of ECTS credits: 10	
Recommended semester/trimester of the course:	
Course level: III.	
Prerequisites:	
Conditions for course completion: Preparation of written material documenting the completion of the research phase set trainers (preparation of project proposal, theoretical overview, verification of methodologies, statistical data processing).	
Learning outcomes: The ability to create a research plan and its organization into stages. Acquisition of skills for the implementation of individual stages of research. The ability to define the problem of research, critically analyze and synthesize current knowledge in the field of social sciences with regard to the topic of the dissertation. The doctoral student is able to implement theoretical and empirical knowledge, as well as adequate methodological procedures in the creation and implementation of the project. He is able to create and verify suitable research methods for solving the researched problem.	
Brief outline of the course: Implementation of individual stages of the dissertation solution: <ul style="list-style-type: none"> • dissertation project proposal • theoretical overview / preparation of theoretical background • research project proposal • preparation and verification of methodologies • data collection 	
Recommended literature: LICHNER, V., 2020. Základy štatistiky v sociálnych vedách I. Teoretické východiská a deskriptívna analýza. Košice: Univerzita Pavla Jozefa Šafárika v Košiciach. COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KSP/ DvSP/12	Course name: Diagnostics in Social Work
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present	
Number of ECTS credits: 8	
Recommended semester/trimester of the course: 1., 2., 3., 4..	
Course level: III.	
Prerequisites:	
Conditions for course completion: The requirement for completing the course is the completion of education through consulting teaching in the range of min. 7 hours aimed at deepening knowledge about the process of diagnostics / assessment according to the syllabus of the course. Completion is also conditioned by the acquisition of practical skills in diagnostics through the development of a proposal for diagnostic procedures through objective assessment methods in the topic of the dissertation. After elaboration, the proposal is submitted and consulted with the teacher, who evaluates the adequacy of the methods used in the target group. The student obtains the evaluation after fulfilling the conditions of participation and after successful defense of the proposed diagnostic methods.	
Learning outcomes: The course is aimed at deepening knowledge and practical skills leading to the assessment of the situation of the client or clients (client group). By completing the course the student is able to distinguish different ways of assessment in a specific life situation of the client based on an objective assessment of social conditions. Can design, evaluate and implement an assessment plan. It thus demonstrates the ability to combine knowledge of different methods of social work and work with a wide range of target groups. Recognizes and uses objective diagnostic methods of its own standardized diagnostics and is able to apply multidisciplinary knowledge in assessing and subsequently resolving the life situation of the client or client group. Can plan diagnostic procedures and propose updates.	
Brief outline of the course: Diagnostic model of case social work Diagnosis, assessment and evaluation in the practice of social work Changes in the concept of assessment in the context of the development and present of social work Theoretical-empirical frameworks, starting points and approaches to assessment Assessment process Objective assessment methods Standardized vs. non-standardized diagnostics Social records Proposal of a diagnostic plan for the assessment of the client's social problem Work with the obtained information and with the anamnesis, proposal of interventions

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KSP/ VMZ/11	Course name: Foreign Monograph
Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present	
Number of ECTS credits: 30	
Recommended semester/trimester of the course: 1., 2., 3., 4., 5., 6., 7., 8..	
Course level: III.	
Prerequisites:	
Conditions for course completion: Publication in a foreign publisher or confirmed by a foreign publisher for publication in a scientific monograph or chapter / chapters in a scientific monograph in the range of min. 3AH in a topic closely related to the topic of the dissertation. The student's share for completing the course must be at least 50% (subject to the condition of the author's contribution in the range of at least 3AH).	
Learning outcomes: The result of the training is the demonstration of competence for the preparation of a monograph or chapters in scientific monograph published by a foreign publisher to a specified extent in the topic narrowly related to the topic of the dissertation. By preparing and publishing a monograph, the student demonstrates a high degree of ability to identify evaluate, apply and disseminate relevant scientific information on the basis of foreign standards methods and methodologies in the field of study. Demonstrates the ability to find, define the scientific problem by using scientific methods, their critical and creative application. It proves competence to use relevant theories and concepts in an innovative way, as well as generate new original scientific knowledge that can publish according to established qualitative and ethical standards of the department.	
Brief outline of the course: Elaboration of theoretical and methodological analysis on a topic related to the topic of the dissertation and publication as a separate monograph in a foreign publishing house or as a separate chapter (s) in a monograph published in a domestic foreign country to the required extent.	
Recommended literature: LICHNER, V., 2020. Základy štatistiky v sociálnych vedách I. Teoretické východiská a deskriptívna analýza. Košice: Univerzita Pavla Jozefa Šafárika v Košiciach. Faculty: Faculty of Arts	
Course ID: KSP/VGP/11	Course name: Participation in a Research Project Grant
Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present	
Number of ECTS credits: 10	
Recommended semester/trimester of the course: 1., 2., 3., 4., 5., 6., 7., 8..	
Course level: III.	
Prerequisites:	
Conditions for course completion: The condition for the inclusion of the doctoral student in the solution of the scientific research task is the compatibility of the grant task and the doctoral student's dissertation.	
Learning outcomes: Participation in the solution of a scientific grant project gives the student the opportunity to get acquainted with the process of preparing and submitting a grant application. The doctoral student is able to plan his / her own part of the research task, thus demonstrating his / her knowledge of research methodology. He is able to deduce from the acquired knowledge original thoughts or ideas that lead to new knowledge. The design of a research task is the result of a planning ability that is derived from sound scientific knowledge in the field of social work. The doctoral student is required to be responsible, determined, independent and able to join the research team.	
Brief outline of the course: Solving scientific research tasks in the range of at least 200 hours per year and at most 500 hours per year.
