the study of nucleic aware of the latest tre increasingly contribu- at the molecular leve and prognostic purpo	s the theoretical and practical foundations of laboratory methods used in acids (NA), knows the current possibilities of gene therapy. Students are ends in the study of RNA molecules, including non-coding RNAs, which are ting to the improvement of laboratory diagnostics of pathological conditions el. The graduate is oriented in the possibilities of using NA for diagnostic uses, as molecular methods are becoming an essential part in the study of s and in clinical biochemical diagnostics.
RNA. Isolation of I sequencing, hybridiza	anscription. Proteosynthesis. Regulation of gene expression. Non-coding NK from biological material. Molecular-biochemical methods (eg PCR, ation). Basics of genetic material analysis. Use of special analyzes. The latest boratory diagnostics. More details: https://www.upjs.sk/public/media/25151/

#### **Conditions for course completion:**

All information about the doctoral study is specified on the faculty's website in the Doctoral Study section, including the conditions of completion, which are detailed in the State Examinations section. Students will find here all the necessary information, forms and documents, including information on the formal side of the dissertation, which are in accordance with Directive No. 1/2011 on the basic requirements of final theses and the PhD Study Regulations at UPJŠ in Košice. The submitted work must be in accordance with the Rector's Decision No. 5/2021, issuing the principles of good practice of scientific publication at UPJŠ in Košice and its parts, Rector's Decision No. 21/2021, on issuing rules for the assessment of plagiarism at UPJŠ in Košice and its parts, Rector's Decision No. 2/2022 which issues the principles of good research practice at UPJŠ in Košice and its parts.

### **Learning outcomes:**

The dissertation has the character of a scientific work and the student demonstrates by this work extensive mastery of the theory and professional terminology from the field of study/study program, acquisition of knowledge, skills and competencies in accordance with the declared profile of the graduate, as well as the ability to apply them in an original way. The student demonstrates the ability of independent scientific work in terms of content, formal and ethical, ant the ability to present and critically analyses obtained results.

Course type, scope and the method:

**Course type:** Practice

Recommended course-load (hours): Per week: 2 Per study period: 28

Course method: present

**Number of ECTS credits: 17** 

#### Recommended semester/trimester of the course:

Course level: III.

### **Prerequisities:**

#### **Conditions for course completion:**

Completion of e-course English for PhD Students (lms.upjs.sk), consultations (1-3).

Written assignments - Professional/Academic CV, Short Academic Biography.

Test. Final exam in accordance with the exam requirements: //www.upjs.sk/filozoficka-fakulta/cjp/poziadavky-na-skusku/

#### **Learning outcomes:**

The development of students' language skills - reading, writing, listening, speaking, improvement of their linguistic competence - students acquire knowledge of selected phonological, lexical and syntactic aspects, development of pragmatic competence - students can efectively use the language for a given purpose, with focus on Academic English and English for specific/professional purposes, level B2.

#### **Brief outline of the course:**

Specific aspects of academic and professional English with focus on vocabulary development (formality, academic word-list), English grammar (passive voice, nominalisatio), language functions (expressing opinion, cause/effect, presenting arguments, giving examples, describing graphs/charts/schemes, writing Academic CV and short BIO, etc.). Cross-language interference. Academic communication (self-presentation, presenting at scientific meetings and conferences).
