COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: USBM/ AZSP-VZM/09	Course name: Administration of Health Services and Insurance
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites: USBM/MLZ-VZM/22	
Conditions for course completion: 1. 100% participation in practicals and 100% participation in lectures. 2. Successful presentation of the selected topic (minimum 20 points). 3. Successful completion of the final test (minimum 31 points). Last update: https://www.upjs.sk/app/uploads/sites/9/2023/02/USBM_UP_Pr-Cv_VZmgr-1_AZSP_2023-02-03.pdf . Conditions for passing the course: Successful completion of the final exam. Final assessment (exam): presentation of the selected topic and final test.	
Learning outcomes: To provide students with an overview of the basic legislative standards related to the administration of health services and health insurance in Slovakia, with the aim of gaining a deeper understanding of the acquisition and use of data in the National Health Information System. After completing the course, students can search for relevant data from the outputs of statistical surveys (health yearbooks, annual activity reports of selected health care providers, health status reports). They will become familiar with the functions of electronic healthcare and the activities of the National Center for Health Information. They will know the basic principles of managing, processing and providing health documentation and the basic principles of administration of insurance services.	
Brief outline of the course: Legislative standards related to the administration of health services and the insurance industry in Slovakia; Healthcare information system, systematic collection of data on the health status of the population - statistical surveys; Electronic healthcare in Slovakia - the e-Health project and the National Health Portal; Electronic healthcare services - electronic health worker's ID card, electronic health book, electronic prescription, e-Allocations; National Administrative Registers and National Health Registers; Annual reports on the activities of health care providers; Basic principles of management, processing and provision of health documentation; Basic principles of administration of insurance services. The current timetable for the given semester is published on the website of the Institute of Social and Behavioral Medicine: https://www.upjs.sk/lekarska-fakulta/ustav/socialna-a-behavioralna-medicina/vyucba/predmety/mgr/

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: UPZMV/EMZ- VZM/14	Course name: Economics and management in healthcare
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites:	
Conditions for course completion: active participation, completed assignments, final exam	
Learning outcomes: By completing the subject, students will acquire basic knowledge in the field of economics in the health care. Get acquainted with the principles of economics in the health sector, as well as the principles of providing health care in the context of a market economy. Students will also become familiar with legal and ethical aspects, organisation and financing of health care. At the same time, students will acquire basic knowledge in the field of management in health care and become familiar with basic management tools and techniques. Last but not least, students will acquire basic knowledge of business management.	
Brief outline of the course: Introduction to economics in healthcare. Providing health care in the context of a market economy. Health policy. Legal and ethical aspects of health care provision. Organization, management and financing of health care. Basic health care systems. Health care system in SR. Introduction to management in healthcare. Quantitative methods and techniques in healthcare. Introduction to business management.

Number of ECTS credits: 5						
Recommended semester/trimester of the course: 1.						
Course level: II.						
Prerequisites:						
Conditions for course completion: presentation of seminar work, credit test, oral exam						
Learning outcomes: To provide basic knowledge about the epidemiology of infectious diseases and measures against their occurrence. After completing the subject, the student will be able to practically and theoretically solve epidemiological situations and decide on possible measures against their occurrence, especially in the field of intestinal, respiratory, parasitic and other infections.						
Brief outline of the course: Epidemiology of selected infectious diseases from the group of intestinal infections and respiratory infections. Basic data on the most medically important pathogens, host-parasite relationship, or intermediate host, biological cycles of parasites in relation to clinical manifestations. The basic epidemiological characteristics of these diseases - the occurrence of the disease in our country and in the world, risk groups, transmission of the disease and factors that influence it. Preventive and punitive measures related to these diseases. Analysis of published and well-documented epidemics.

Course ID: UE/ Ep2-VZM2/09	Course name: Epidemiology II. - 2
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 2 Per study period: 14 / 28 Course method: present	
Number of ECTS credits: 5	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites: UE/Ep2-VZM1/09	
Conditions for course completion: presentation of seminar work, credit test, oral exam	
Learning outcomes: To provide students with basic knowledge about the epidemiology of infectious diseases and measures against their occurrence. After completing the subject, the student will be able to practically and theoretically solve epidemiological situations and decide on possible measures against their occurrence, he will also be able to assess the results of vaccination, the results of reporting various infectious diseases, e.g. flu, polio disease, meningococcal disease.	
Brief outline of the course: Organization, scope of work of the public health and departments fo public healths, reporting and anti-epidemic measures for diseases against which vaccination is carried out. Vaccination - planning, organization, control, evaluation, handling and storage of the vaccine, indication and contraindications, immunological reviews. Influenza legislation, new knowledge about avian flu. Methodological guidelines for the occurrence of invasive meningococcal diseases, epidemiological situation in the occurrence of these diseases. Acquisition and processing of data on influenza and influenza-like diseases in the district, region and the Slovak Republic, system for processing influenza and influenza-like diseases (EPIS). Reporting of diseases, procedure for implementing anti-epidemic measures when they occur, preventive measures, cooperation with laboratory components and clinics. Reporting of polio-like diseases (special questionnaires), preventive and anti-epidemic measures, sampling of waste water for enteric viruses. Acquaintance with the action plan for poliomyelitis, the current epidemiological situation, preventive measures and surveillance of poliomyelitis.

Course ID: UE/HV-VZM/09	Course name: Food Hygiene
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 3 Per study period: 28 / 42 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites:	
Conditions for course completion: oral exam	
Learning outcomes: Acquire theoretical and practical knowledge from the activities of the department of nutrition hygiene - nutrition physiology, physiological situations in which specific / special / nutritional requirements are applied, from the detection and evaluation of the nutritional status of the inhabitants of the Slovak Republic, diseases related to nutrition - excessive and insufficient, from the enforcement of the principles of correct of nutrition and education of residents to changes in eating habits, implementation of programs and projects resulting from the state nutrition policy.	
Brief outline of the course: Introduction to the subject. Nutrient substances represented in nutrition, optimal nutrition regime, number and frequency of daily food intake. Physiological factors and factors of the living and working environment related to nutritional needs. Objectification of positive and negative factors of nutrition related to the principles of protection, support and development of health. Hygienic issues of eating together with regard to the nutritional value, sensory value and safety of the food served. Applying and enforcing the principles of healthy nutrition with a focus on changes in nutritional and dietetic nutrition systems with the aim of achieving a reduction in morbidity, mortality and an increase in the average life expectancy of the population. Incidence of non-infectious diseases related to nutrition. Educational and advisory activities with an emphasis on influencing eating habits and enforcing the principles of proper nutrition among residents. Monitoring of nutritional status, nutritional disorders and occurrence of non-infectious diseases in relation to nutrition. Promoting society-wide programs in the field of healthy nutrition.

Course ID: ULI/ ZMIVZ-VZM1/09	Course name: Health and Medicine Informatics in VZ 1
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 0 / 2 Per study period: 0 / 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: 1. 100% and active attendance. 2. Min. 60% from each test during the term. 3. Elaboration of all assigned tasks.	
Learning outcomes: The aim of the subject is to master the basic concepts, procedures and means of information and communication technologies used in the electronic healthcare system. To achieve computer literacy among students at a level that will allow them to effectively use the elements of informatics when processing various experimental and clinical tasks, student professional activities as well as the basics of scientific works. Master the work with the database system in order to understand the principle of working with data in information systems and the essence of their functioning, basic statistical processing of data.	
Brief outline of the course: Utilization of ICT and informatics tools in medicine, eHealth, electronic health record, ePrescription, eMedication, eAllocation, information systems, telemedicine, bioinformatics, electronic signature, eLearning. Databases, data processing, database tables, primary keys, input mask, relations between tables. Forms in database, controls in forms, searching for information in database, data filtering, data sorting, queries, selection criteria, working with printing reports. Introduction into the biomedical statistics, descriptive statistics.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: USBM/ ZSPMS-VZM/09	Course name: Health and Social Problems of Minority Populations
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 3 Per study period: 28 / 42 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Successful completion of interim study checks, development and presentation of an intervention project in a selected minority population. Successful completion of an oral examination. Detailed course prerequisites are updated annually on the AiS2 electronic course bulletin board and on the Institute of Social and Behavioral Medicine website. Link to the course prerequisites on the Institute of Social and Behavioral Medicine website at https://www.upjs.sk/public/media/11604/Ucebny_plan_Pr_Cv%20ZaSPMS_2VZ_Mgr_2020%2021.pdf	
Learning outcomes: Upon completion of the course, students will be familiar with recent trends in the health status of selected minority populations, the major social causes and social consequences of disease in selected minority populations. They will become familiar with state health policy and legislation related to the provision of health and social care to selected minority populations. They will be able to provide basic information on health care and social assistance options for selected minority populations in practice. Students will be able to design public health interventions for minority populations.	
Brief outline of the course: Minority groups - general characteristics. Selected minority population groups - unemployed, homeless, Roma, elderly, immigrants ... Demographic indicators, health status indicators and determinants of health of selected minority population groups. Barriers in the lives of selected minority groups, universal design/design. Specifics of health care provided to selected minority populations. Social assistance options for selected minority populations. Challenges for the public health system in the comprehensive rehabilitation of vulnerable population groups.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Medicine	
Course ID: UVZH/ OP2-VZM/15	Course name: Public Health - Clerkship II.
Course type, scope and the method: Course type: Controlled practical outcome Recommended course-load (hours): Per week: Per study period: 70s Course method: present	
Number of ECTS credits: 5	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites:	
Conditions for course completion: The diploma thesis is the result of the student's own creative work. It must not show elements of academic fraud and must meet the criteria of proper research practice defined in Rector's Decision no. 21/2021, which establishes the rules for assessing plagiarism at the University of Pavel Jozef Šafárik in Košice and its components. The fulfillment of the criteria is verified mainly in the training process and in the process of defending the work. Failure to comply with them is grounds for initiation of disciplinary proceedings.	
Learning outcomes: Acquaintance of listeners with the practical activities of individual departments of the regional public health office in the sense of protection and creation of healthy living conditions population. The student will be able to perform practical tasks within the framework of the work of the regional office of public health under supervision. With the diploma thesis, the student demonstrates mastery of the extended theory and professional terminology of the field of study, the acquisition of knowledge, skills and competences in accordance with the declared profile of the graduate of the study program, as well as the ability to apply them in an original way when solving the selected problem of the field of study. The student will demonstrate the ability of independent professional work from a content, formal and ethical point of view. Further details of the diploma thesis are determined by Directive no. 1 /2011 on the basic requirements of final theses and Art. 16 of the Study Regulations of UPJŠ LF in Košice.	
Brief outline of the course: Practical solutions to the hygienic-epidemiological situation and current hygienic-epidemiological problems in the creation of healthy living conditions for the population, at individual workplaces of the regional public health office, namely the departments of environmental microbiology, the department of preventive occupational medicine, the department of health protection against radiation, the department of chemical analysis, the department of support of health, department of environmental hygiene.
