University: P. J. Šafárik University in Košice

Faculty: Faculty of Medicine

Course ID: UA/A- | **Course name:** Anatomy

VZ/15

Course type, scope and the method:

Course type: Lecture / Practice / Controlled study hour

Recommended course-load (hours):

Per week: 2 / 1 / 3 **Per study period:** 28 / 14 / 42

Course method: present

Number of ECTS credits: 4

Recommended semester/trimester of the course: 1.

Course level: I.

Prerequisities:

Conditions for course completion:

To pass the subject and register for the final exam, you need:

- 1. Mandatory attendance at lectures, two excused absences are allowed.
- 2. Active participation in practical exercises. A student can have a maximum of 3 absences, 4 or more absences do not entitle the student to continue study of the subject if he/she misses a practical exercise (maximum of 3 times) for serious health or family reasons, his/her absence must be excused by the teacher and the compensation of the missing exercise completed at the Institute of Anatomy after agreement with the teacher.
- 3. During the semester, the student takes part in 2 current tests, each test consists of 30 questions. For passing the subject, it is required to be successful in both tests, i.e. j. he/she must achieve a minimum of 18 points (60%) from each test. Non-participation in any current test is considered as the absence.
- 4. Student who did not meet the conditions for passing the subject, i.e. j. has the number of absences more than 3, or did not take part in the tests and did not justify his non-participation, he/she will not be allowed to take part in an alternate date of tests and will be evaluated with classification level "X" unclassified student.
- 5. A student who was evaluated with an Fx grade from the current test and has no more than 3 compensated absences will take part in retake test.
- 6. The final exam is in the form of a test and will be evaluated according to the following tables. Evaluation of the final exam:

93 - 100 / A /excellent

85 - 92 /B/ very good

77 - 84 / C / good

69 - 76 / D / satisfactory

60 – 68 /E/ sufficient

59 and below /FX/ insufficient

Learning outcomes:

The aim of the subject is to provide students with basic information about the structures and functions of the human body. Students gradually have to deal with the anatomical nomenclature,

and description and, function of organ systems, individual organs and organ participation, which must be mastered for further preclinical subjects and clinical practice.

Brief outline of the course:

Introduction to anatomy. Passive movement system. Active movement system. Cardiovascular system. Breathing system. Digestive system. Urinary system. Male and female reproductive system. Lymphatic system. Endocrine system. Central and peripheral nervous system. Sensory organs.

BG-VZ/15

Course type, scope and the method:

Course type: Lecture / Practice / Controlled study hour

Recommended course-load (hours):

Per week: 1 / 2 / 2 **Per study period:** 14 / 28 / 28

Course method: present

Number of ECTS credits: 3

Recommended semester/trimester of the course: 1.

Course level: I.

Prerequisities:

Conditions for course completion:

All practical lessons (100%) are obligatory for all students.

Prerequisite for the final oral examination (to register for the final examination) is each test assessment minimum of 60% from continuous assessment during the semester (in the present course method).

Final oral examination (100%).

Learning outcomes:

To introduce the basic concepts of cell biology, molecular biology and genetics.

Students have acquired an understanding of the major concepts in cell and molecular

biology and have obtained basic information related to cytogenetics in clinical practice.

Students have acquired an understanding of the major concepts in human genetics and have obtainined basic in clinical practice.

Brief outline of the course:

Cell structure – prokaryotic and eukaryotic cells, cell membranes, cell organelles, their structure and function. Cell cycle – phases, control of cell cycle, mitosis, meiosis. Biomacromolecules – the fundamental components of biological macromolecules, common characteristics, the structure and function of saccharides, lipids, proteins and nucleic acids. DNA – structure, replication of DNA. The structural organization of genome - organization of DNA in genomes, the basic principles of human cytogenetics. Gene expression – genetic code, gene structure and function, transcription, translation.

Mutations - classification of mutations, mechanisms of mutagenesis, gene (point) mutations, structural and numerical chromosome mutations. Mendelian genetics – general characteristics, Mendel's laws of inheritance. Human genetics – monogenic and polygenic inheritance, multifactorial diseases. Gene linkage. Heredity and sex. Inheritance of blood group systems - ABO, Rh system. Genealogy and genetic counselling. Molecular biology methods in human genetics and clinical practice.

Prerequisities:

Conditions for course completion:

1. 100% participation at least in practicals and lectures.

2. Final independent task.

Last update: https://www.upjs.sk/app/uploads/sites/9/2023/02/USBM UP Pr-

Cv VZ-1 DZ1 2023-02-03.pdf.

Conditions for completing the course: Obtaining credits.

Final assessment (examination): Final task.

Learning outcomes:

To provide students with evidence-based knowledge of the health determinants - individual, behavioral, socio-economic and political determinants, environment and health care, with the aim of gaining a deeper understanding of their positive and negative effects on health and disease. After completing the course, students will better orient themselves in the relationships between health determinants and health at the individual and population level, they will become familiar with the most common causes of health inequalities and basic ethical principles in influencing health determinants

Brief outline of the course:

Health and disease; Models of health determinants; Determinants of health – individual determinants (age, sex, genetic factors), behavioral determinants (nutrition, physical activity, psychoactive substances), socio-economic determinants, political determinants, environment (housing conditions, working environment) and health care; Inequalities in health; Ethical principles in influencing health determinants. The current timetable for the given semester is published on the website of the Dept of Social and Behavioral Medicine: https://www.upjs.sk/lekarska-fakulta/ustav/socialna-a-behavioralna-medicina/vyucba/predmety/bc

Course type, scope and the method:

Course type: Practice

Recommended course-load (hours): Per week: 2 Per study period: 28

Course method: present

Number of ECTS credits: 2

Recommended semester/trimester of the course: 1.

Course level: I.

Prerequisities:

Conditions for course completion:

Active participation (2x90 min. absences tolerated).

2 tests (6th/7th week, 12th/13th week), no retake. Oral presentation.

Students must obtain 60% in continuous assessment to be elligible for the final exam registration. Exam - final exam test Final evaluation = continuous assessment results - 50%, final exam test result - 50%. Grading scale: A 93-100 %, B 85-92 %, C 77-84 %, D 69-76 %, E 60-68 %, FX 59% and less.

Learning outcomes:

The development of students' language skills - reading, writing, listening, speaking, improvement of their linguistic competence - students acquire knowledge of selected phonological, lexical and syntactic aspects, development of pragmatic competence - students can efectively use the language for a given purpose, with focus on English for specific/professional purposes - Physiotherapy, Nursing Care, Public Health, level B1.

Brief outline of the course:

PHYSIOTHERAPY

Study at UPJŠ.

Human body, muscles, bones and joints, their functions.

Working day of a physiotherapist, physical examination and treatment.

Physiotherapist - patient communication, giving instructions.

Physiotherapy and rehabilitation, stretching exercises.

Areas of physiotherapy. Common physiotherapy treatment techniques.

NURSING CARE

Study at UPJŠ.

The human body, body systems. Functions of the human body.

Health and illness, a healthy lifestyle.

Diseases and their symptoms.

Medical specialties, nursing specialties, role of a District Nurse.

Hospital wards.

Patient's examination - taking observations (BP, weigth, higth, etc.)

Medication labels.

PUBLIC HEALTH

Study at UPJŠ.

History of Public Health. Public Health today.

Key areas of Public Health.

Immunization and screening.

Epidemiology.

Course ID: UE/HV- | Course name: Food Hygiene 1

VZ1/14

Course type, scope and the method:

Course type: Lecture / Practice / Controlled study hour

Recommended course-load (hours):

Per week: 2 / 3 / 5 **Per study period:** 28 / 42 / 70

Course method: present

Number of ECTS credits: 5

Recommended semester/trimester of the course: 4.

Course level: I.

Prerequisities: UVZH/HZP-VZ1/22

Conditions for course completion:

oral exam

Learning outcomes:

After completing the subject, students will master the issue of nutrition hygiene, so that they acquire knowledge, insights and practical skills in the field of nutrition hygiene, food hygiene and food establishments, health safety of food and dishes, nutrition physiology, the importance of nutrition in the prevention of non-infectious diseases related to nutrition, performance of state health supervision and food supervision, principles of good production practice, on risks from food-diseases and poisoning, issuing administrative acts according to the Act on Administrative Procedure.

Brief outline of the course:

Introduction to the subject. Science of nutrition, physiological and therapeutic nutrition, healthy nutrition and disease prevention. A brief historical overview of nutrition, the genetics-nutrition-environment relationship. Teaching organization, literature, information. Resources. Nutrition and its deficiencies as risk factors for diseases. Basic terms. Basic nutrients and their energy value. Metabolism, obesity and related diseases. Vitamins and trace elements and their importance in physiological and medical nutrition. Antioxidants and probiotics in prevention and treatment. Rational nutrition and alternative forms of nutrition. Diets for various diseases, pathological conditions. Oral health, nutrition, food poisoning. Foreign substances in nutrition. Alcohol and other addictive substances in relation to nutrition. The concept of nutrition hygiene, the scope of the department's activities and work methods. Hygienic requirements for food establishments. Legal standards applied in the activities of the food hygiene department. Performance of state health supervision, official control of food. Forms of eating, therapeutic nutrition, nutritional recommendations, recommended nutritional doses, nutritional status. Health food safety.

Recommended course-load (hours): Per week: 1 Per study period: 14

Course method: present

Number of ECTS credits: 2

Recommended semester/trimester of the course: 3.

Course level: I., I.II.

Prerequisities:

Conditions for course completion:

Active participation in class, completed homework assignments, two missed classes at the most (i.e. two 45 minute classes).

3 verbal presentations (a brief presentation of a product/person - 30%, a conference presentation - 40%, and a patient presentation - 30%).

Final evaluation = the average obtained

Final exam = test.

Final grade will be calculated as follows: A 93-100 %, B 85-92 %, C 77-84 %, D 69-76 %, E 60-68 %, FX 59% and less.

Learning outcomes:

Students extend the knowledge of medical English vocabulary and acquire skills for preparing and delivering different types of oral presentations in medical context.

Brief outline of the course:

Types of presentations

Language of presentations

Conference presentations

Structure of presentations

Presentation of data

Graphs and figures

Case presentation

Doctor's ward round

Learning outcomes:

Sports activities in all their forms prepare university students for their professional and personal life. They have a great impact on physical fitness and performance. Specialization in sports activities enables students to strengthen their relationship towards the selected sport in which they also improve.

Brief outline of the course:

Brief outline of the course:

Within the optional subject, the Institute of Physical Education and Sports of Pavol Jozef Šafárik University provides for students the following sports activities: aerobics, aikido, basketball, badminton, body form, bouldering, floorball, yoga, power yoga, pilates, swimming, body-building, indoor football, S-M systems, step aerobics, table tennis, tennis, volleyball and chess.

In the first two semesters of the first level of education students will master basic characteristics and particularities of individual sports, motor skills, game activities, they will improve level of their physical condition, coordination abilities, physical performance, and motor performance fitness. Last but not least, the important role of sports activities is to eliminate swimming illiteracy and by means of a special program of medical physical education to influence and mitigate unfitness.

In addition to these sports, the Institute offers for those who are interested winter and summer physical education trainings with an attractive program and organises various competitions, either at the premises of the faculty or University or competitions with national or international participation.
