Course ID: ÚBEV/ PMZ/10	Course name: Comparative Animal Morphology
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 1 Per study period: 28 / 14 Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course: 1.	
Course level: I.	
Prerequisites:	
Conditions for course completion: Lectures and practical exercises, original drawing of some parts of animal body or its derivatives, examination.	
Learning outcomes: The student will acquire basic knowledge about the principles of building the animal body from the simplest protostomian invertebrates to vertebrates. Despite the huge taxonomic diversity of animals, their bodies can be interpreted by a relatively limited number of building principles that correspond to the systematic position of the examined animal and functional adaptations to the environment and way of life. The subject examines the structure of the body at the level of organs and organ systems, by applying the method of comparison it seeks general principles and also peculiarities. It is also important to get acquainted with the principal terms, which the student will use in the spectrum of other study subjects.	
Brief outline of the course:

Notes: The study of the animal body structure of animals is a very old scientific discipline that has accumulated a vast amount of detailed knowledge. Comparing them is not only a way to put the knowledge into a comprehensive system, but mainly a way to find general anatomical rules that are tied to one of the animal's phylogenetic lineage or have general validity and reveal the degree of phylogenetic relationship of animals or the degree of adaptation to the environment	

and a way of life. A brief summary of the phylogeny of the animal body building plan and organ systems using the knowledge of classical and modern comparative morphological approach, supported by knowledge of embryology and molecular data for interpretation of the phenotype are the content of this course.

Prerequisites: ÚBEV/VB1/01	
Conditions for course completion: 1. Active participation in laboratory practicals. In case of justified non-participation, the teacher will determine an alternative form of lessons. 2. Before the practicals, the students will study the main points of the task that will be carried out. Students will receive an exact list of tasks according to individual lessons at the beginning of the semester. 3. Students make a written report of the practicals. The students will evaluate the results of the tasks and form a conclusion. The protocols are handed over to the teacher before the next lessons at the latest. The teacher checks the protocols and, in case of errors, returns the protocols for revision. If the submitted protocol is correct, the task is considered validly completed. 4. Practical tasks are considered to have been completed when at least 10 practical tasks are validly completed. Completion of practicals by the end of the semester at the latest (the date will be specified by the teacher) is obligatory for participation in the exam. 5. The activity in the practicals is evaluated by means of an ongoing point evaluation. A student can get 1-3 points. Obtaining 2 points is considered a standard completion of practicals. The best students can get 3 points for high-quality performance in the laboratory or excellent protocols. On the other hand, 1 point will be awarded to students who completed the practicals despite the teacher's minor reservations. 6. The examination of the subject takes place orally. Students need to answer to three questions and have a max. 30 minutes to prepare them. Any changes or modifications to the conditions for completing the subject due to the COVID19 pandemic or other serious reasons are continuously posted on the subject's electronic board.

Conditions for course completion: The condition for passing the course is active participation in mandatory exercises, completion of all interim assessments during the exercises and successful completion of 3 interim tests on topics currently covered in lectures. Continuous evaluations during the exercises are: a test on zoological terms and determination of animals according to the picture. To successfully complete the exercises, students must obtain at least 28 out of a maximum of 40 points. Mid-term tests from the lectures will be written using the Moodle environment. There are no correction dates for these tests. Students earn points for each test. The final grade for the subject is determined by adding up the points from the exercises and the points from the tests within lecture topics, with the points from the exercises making up 40% and the points from the tests making up 60% of the final grade. Continuous evaluations during the exercises are: a test on zoological terms (know how to define selected terms; the list is published at the beginning of the semester), determination of animals according to the picture (assign the Slovak and scientific genus and species name and classify them into a class or series; the list of animals is published at the beginning semester, the students' task is to find the correct animal pictures for the names and learn to name the animal according to the picture). Students have one correction period for the test of terms and one of animal determination. All interim assessments are scored. In addition to the points from the exercises, the points obtained for the 3 mid-term tests from the content of the taught topics will also be reflected in the final grade for the subject. Test dates will be announced at the first lecture and will also be listed in the Moodle course for the subject. For tests, taxonomic classification needs to be controlled to the level of classes, for insects to the level of orders. By adding up all the points from the interim evaluation within the exercises and tests from the previous lectures, the final grade for the subject is determined.
