## COURSE INFORMATION LETTER

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Medicine	
<b>Course ID:</b> ULCHBKB/BV- VKd/22	<b>Course name:</b> Biochemistry of nutrition – selected chapters
<b>Course type, scope and the method:</b> <b>Course type:</b> Seminar <b>Recommended course-load (hours):</b> <b>Per week: 2 Per study period: 28</b> <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 5	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> seminars, solving of assigned tasks, exam; more details: <a href="https://www.upjs.sk/lekarska-fakulta/en/departament/medical-and-clinical-biochemistry/education/subjects/doctoral-study/">https://www.upjs.sk/lekarska-fakulta/en/departament/medical-and-clinical-biochemistry/education/subjects/doctoral-study/</a>	
<b>Learning outcomes:</b> The graduate will gain knowledge and will understand of human nutrition, including the importance of nutrition in disease prevention. He knows the process of digestion and resorption of essential nutrients, the importance of ballast substances in nutrition and the nutritional value of food. Students will get acquainted with the basics of proper nutrition, the specifics of artificial nutrition and alternative forms of diet. Graduates know the influence of nutrition on the emergence of diseases of civilization and get acquainted with nutrigenomics.	
<b>Brief outline of the course:</b> Introduction to human nutrition. Digestion, resorption and metabolism of essential nutrients. Ballast substances in nutrition and their relation to the intestinal microbiome. Nutritional value of food. Healthy nutrition and its contribution to reducing the risk of disease. The influence of nutrition on the emergence of diseases of civilization. Specifics of artificial nutrition and alternative forms of diet. Technological food processing. Nutrigenomics. <b>Course type, scope and the method:</b> <b>Course type:</b> Seminar <b>Recommended course-load (hours):</b> <b>Per week: 2 Per study period: 28</b> <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 5	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> oral exam	
<b>Learning outcomes:</b> To provide students with basic knowledge and understanding of the patterns and relationships between changing environmental conditions and the human organism or population. After completing the course, students will be able to use the acquired theoretical knowledge and practical knowledge of the tasks and objectives of state health surveillance and assessment of the tasks and objectives of state health surveillance, or assessment of project documentation in practice by regional public health authorities.	
<b>Brief outline of the course:</b> 1. Hygiene and environmental monitoring 2. Open air hygiene, global atmospheric change and environmental health 3. Hydrosphere 4. Water availability and basic sanitation. Drinking water 4. Importance of water in relation to health, legislation 5. Water for bathing - artificial and relaxation pools. 6. NHS in facilities for relaxation. 7. Pedosphere. 8. Waste 9. Environmental noise , monitoring, legislation. 10. Hygiene issues in personal services, HSE. 11. Transport, environment and health. Environmental health and hygiene research and assessment of various health impacts. Basics of State Health Surveillance. State health surveillance in natural bathing. Noise. Hygiene of settlements. Housing and health, factors affecting the quality of the indoor environment, sick building syndrome. Natural and artificial radioactivity. Biological effects of ionising radiation. Principles and criteria of radiation protection. Radiation burden on the population. Hygiene requirements for mass accommodation (hostels, convalescent homes, tent camps). Hygiene issues in social service facilities. Hygienic issues in the field of burial, State health supervision in the field of burial. Basic indicators of water and air pollution. State health surveillance in recreation and sports facilities. Environmental quality, food quality, contaminants. Slovak Food Code.

## COURSE INFORMATION LETTER

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Medicine	
<b>Course ID:</b> UE/E-VK/VZ/22	<b>Course name:</b> Epidemiology - selected chapters
<b>Course type, scope and the method:</b> <b>Course type:</b> Lecture / Seminar <b>Recommended course-load (hours):</b> <b>Per week:</b> 1 / 2 <b>Per study period:</b> 14 / 28 <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 10	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> solution of assigned tasks, preparation of seminar work, exam	
<b>Learning outcomes:</b> The goal is to master theoretical knowledge and scientific methods in the field of general and special epidemiology, to gain knowledge about the occurrence and distribution of infectious and non-infectious diseases and health-related conditions as well as their determinants in defined populations, and to apply the results of these studies to control health problems (diseases) and evaluating the effectiveness of implemented measures. On the basis of his/her own research and research with the help of appropriately chosen methodological procedures, the student is able to formulate conclusions and, based on them, brings proposals for solving identified problems in the field of epidemiology of diseases and evidence that can be used in the prevention and diagnosis of diseases.	
<b>Brief outline of the course:</b> Epidemiology of infectious diseases – classification, basic characteristics of their main groups, general principles of combating infectious diseases. Epidemiology of non-communicable diseases. Epidemiological studies. Surveillance of infectious and non-infectious diseases. Evaluation of the validity of collected data on the occurrence of diseases. Epidemiology and evidence-based medicine. Screening in epidemiology. Use of methods in the epidemiology of selected diseases. Preventive measures and their effectiveness.

## COURSE INFORMATION LETTER

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Medicine	
<b>Course ID:</b> UVZH/ HV/22	<b>Course name:</b> Food hygiene
<b>Course type, scope and the method:</b> <b>Course type:</b> Seminar <b>Recommended course-load (hours):</b> <b>Per week:</b> 2 <b>Per study period:</b> 28 <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 5	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> exam	
<b>Learning outcomes:</b> Acquire knowledge and practical knowledge of the activities of the Department of Nutritional Hygiene - physiology of nutrition, physiological situations in which specific /personal / nutritional requirements are applied, the detection and evaluation of the nutritional status of the population of the Slovak Republic, diseases related to nutrition - excessive and insufficient, the enforcement of the principles of good nutrition and the education of the population to changes in dietary habits, the implementation of programs and projects resulting from the state nutrition policy.	
<b>Brief outline of the course:</b> Introduction to the subject. Nutrients represented in the diet, optimal dietary regimen, number and frequency of daily meals. Physiological, environmental and occupational factors related to nutritional needs. Objectification of positive and negative nutritional factors related to the principles of health protection, promotion and development. Hygienic issues in catering with regard to the nutritional value, sensory value and wholesomeness of the food served. Application and promotion of the principles of healthy nutrition, with a focus on changes in nutritional and dietetic food systems to reduce morbidity, mortality and increase the median age of the population. Incidence of diet-related non-communicable diseases. Educational and counselling activities with emphasis on influencing dietary habits and promoting good nutrition principles in the population. Monitoring of nutritional status, nutritional disorders and the incidence of non-communicable diseases in relation to nutrition. Promotion of society-wide programmes in the field of healthy nutrition.

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Medicine	
<b>Course ID:</b> UVZH/ VZ-VK/VZ/22	<b>Course name:</b> Public Health - selected chapters
<b>Course type, scope and the method:</b> <b>Course type:</b> Lecture / Seminar <b>Recommended course-load (hours):</b> <b>Per week:</b> 1 / 2 <b>Per study period:</b> 14 / 28 <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 10	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> solving assigned tasks, preparation of a seminar paper, exam	
<b>Learning outcomes:</b> The aim of the course is to enable PhD students to understand the relationship between the current dynamically changing conditions of living, social and working environment and the emergence of chronic non-infectious diseases. Upon completion of the course, students will have a basic understanding of the prevalence of risk factors and chronic non-infectious diseases. On the basis of their own research and research using appropriately chosen methodological procedures, students are able to formulate conclusions and on their basis make proposals for solving the identified problems in the field of detection of etiological risk factors of diseases and evidence usable in the prevention and diagnosis of chronic non-infectious diseases of non-infectious type.	
<b>Brief outline of the course:</b> Globalisation and changes in the incidence of diseases: - Globalisation and changes in the incidence of non-communicable diseases. The relationship between environment and health - global public health initiatives. The position of public health in society: - definition of public health and public health care - background of public health in Slovakia and the European Union - objectives, priorities and basic functions, planning, implementation, control, public participation. The activities of the PHS in the field of employee health surveillance and the principles of occupational health protection and health promotion: - objectives of medical examinations of employees, types of examinations. Dynamics of health monitoring with regard to risk factors in the working environment - assessment of health status and fitness for work - biological monitoring of exposure - individual information of workers on the results of their health status and fitness for work - occupational health and safety - occupational health services - role of public health protection bodies. Occupational diseases: - list of occupational diseases in the Slovak Republic, comparison within the EU - compulsory reporting of occupational diseases. Intervention and treatment of tobacco dependence: - diagnostic and therapeutic procedure - smoking cessation counselling. Socio-economic aspects of public health in developing countries: distribution and characteristics of countries according to economic development. Importance of climate change, possible risks. Population intervention projects: - characteristics, areas - planning and design of intervention projects (baseline analysis, goal setting, project strategy and implementation) - evaluation of intervention projects (population intervention	

<p>impact, economic evaluation). Current public health challenges and health policy and VZ. Global strategies for human health and the environment: - preconditions for environmental health - healthy and productive life in harmony with nature - the most important elements of the environment and human health.</p>

## COURSE INFORMATION LETTER

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Medicine	
<b>Course ID:</b> UPZMV/MVaS/22	<b>Course name:</b> Research Methodology and Statistics
<b>Course type, scope and the method:</b> <b>Course type:</b> Lecture / Seminar <b>Recommended course-load (hours):</b> <b>Per week:</b> 1 / 2 <b>Per study period:</b> 14 / 28 <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 10	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> 1. Online test after each lecture 2. Problem learning after each block of lectures	
<b>Learning outcomes:</b> Introduction to basic methods of epidemiological and clinical studies and mastering their application in biomedical research. Gaining theoretical knowledge in biomedical statistics and improving their practical use.	
<b>Brief outline of the course:</b> First block of lectures / problem learning PU1: research protocol 1. Guide to the course 2. Research process 3. Measurement of impact 4. Study design 5. Validity of the study 6. Questionnaire methods Second block of lectures / problem learning PU2: working with statistical software 7. Random variable 8. Hypothesis, testing 9. Introduction to work with statistical software 10. Univariate statistical methods I 11. Univariate statistical methods II Third block of lectures / problem learning PU3: statistical data analysis 12. Linear regression 13. Logistic regression 14. Mutual influences of variables, interaction 16. Randomized controlled trials - implementation 17. Randomized controlled trials - analyzes 18. Sensitivity and specificity
