COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty:	
Course ID: UPZ/ KP/16	Course name: Clinical practice from patient's perspective
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 0 / 2 Per study period: 0 / 28 Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course:	
Course level: N	
Prerequisites:	
Conditions for course completion: Active participation in seminars requiring the preparation of assignments and a final seminar paper. We expect students to prepare an assignment before each seminar (a total of 6 assignments) requiring work with a database of patient experiences and to actively use them in their work during the seminar, which will be regularly evaluated (handover quality, active participation, 3x5 points for each assignment and seminar). In addition, we expect them to prepare and submit a seminar paper (submission, quality 2x5 points). A 90-100, B 80-89, C 70-79, D 60-69, E 50-59, Fx less than 50	
Learning outcomes: Expand students' knowledge and understanding of the experiences of patients, caregivers, and medical staff in selected clinical groups and situations. By completing the subject, the student acquires the ability to expand his understanding of the experiences of patients, caregivers, and medical personnel in selected clinical groups and situations and thus increase his competence in dealing with patients on a daily basis.	
Brief outline of the course: The patient's perspective -DIPEX. Adaptation to disability after injuries. Specific health problems of women and men from their perspective. Mental health issues from the perspective of patients and their loved ones. Intensive care - the experience of patients and their loved ones. Experiencing selected chronic diseases (cardiovascular, nephrological, neurological). Oncological diseases and their survival. Palliative care, dying. Organ donation, transplantation from the patient's point of view. Informed consent, joint decision-making with the patient.

University: P. J. Šafárik University in Košice	
Faculty:	
Course ID: UPZ/ KAZ/16	Course name: Cultural aspects of health and cultural competence
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course:	
Course level: N	
Prerequisites:	
Conditions for course completion: It is awarded on the basis of active participation in teaching and the test	
Learning outcomes: Understanding cultural aspects of health. An overview of the ways in which it is possible to work sensitively and practically with other perspectives on health in care services and at the population level. The course will gradually transition from an overview of related theories, demonstrated primarily on examples of world diversity, to an overview of ways of their possible use in practice in our country.	
Brief outline of the course: Cultures and health - introduction to the course. The origin of our view of health and care. The biggest problems of today from the point of view of Western medicine. Cultural influences on health. Racial and ethnic disparities in health. Differences in health between segregated Roma and non-Roma. Cultural competence in care services. Cultural competence at the population level. Example of good practice: the national program Healthy Communities.
