University: P. J. Šafárik University in Košice

Faculty: Faculty of Arts

Course ID: ÚINF/ PPPy/24	Course name: Advanced programming in Python

Course type, scope and the method:
 Course type: Lecture / Practice
 Recommended course-load (hours):
 Per week: 1 / 1 **Per study period:** 14 / 14
 Course method: present

Number of ECTS credits: 2

Recommended semester/trimester of the course: 6.

Course level: I., N

Prerequisities: ÚINF/PAZ1a/15

Conditions for course completion:
At least 50 % of the marks in the continuous assessment
A minimum of 50 % marks in the mid-term and end-of-semester practical tests
or
The final project - 100%

Learning outcomes:
Implement solutions to selected problems in Python using available modules. Use and implement non-trivial algorithms to solve selected problems. Use an object-oriented approach to problem solving. Program in Python in an object-oriented manner using Python specifics. Test programs. Implement parallel computing.

Brief outline of the course:
1. Introduction to the environment, basic features of Python, simple and structured data types.
2. Input, output, function definition, lambda function, generator notation, function as parameter, string formatting.
3. Control structures, iterating over data structures, context manager.
4. Exception handling and exception raising. Philosophy of exceptions in Python.
5. Working with files. Serialization and deserialization of data - json and pickle protocol. Text and binary files. Manipulation with files. Open data.
6. Object-oriented programming 1. Design of custom classes, special methods, properties, philosophy of accessing methods and attributes.
7. Object-oriented programming 2. Comparison and differences with Java. Multiple inheritance.
8. Method overloading. Static methods, abstract classes, data class.
9. Decorators, memoization, modules, packages.
10. Code validation (debugging), testing (doctest, unittest), test-driven development.
11. Parallel computing, processes, process triggering and inter-process communication (shared variable, pipe, queue).
12. Graphical program design and implementation.

Prerequisities:

Conditions for course completion:
A student will choose one literary work from the list and present the following:
1. Short introduction of the author and literary work.
2. Literary interpretation based on historical and cultural context of the USA.
3. Presentation will include at least 2 academic articles from registered academic databases.
4. Presentation will formulate at least 2 academic questions related to the topic.
5. Presentation will demonstrate student´s knowledge of being able to use academic sources.

Learning outcomes:
The aim is to gain knowledge about the latest literary texts in American literature, its main representatives and trends. To develop students' literary critical thinking about American literature and the ability of the interpretation of literary texts. Student is capable of an individual literary analysis with an emphasis on historical and cultural backround. Student is able to think critically and interpret literary work based on the synthesis of several academic sources which will widen his or her communication, interpretative and public speaking skills in order to solve challenging tasks in real life.

Brief outline of the course:

Course type, scope and the method: **Course type:** Practice **Recommended course-load (hours):** **Per week:** 2 **Per study period:** 28 **Course method:** present

Number of ECTS credits: 3

Recommended semester/trimester of the course: 5.

Course level: I.

Prerequisities:

Conditions for course completion: To successfully complete the course, students are encouraged to perform well on two levels of assessment: continuous and final. Continuous assessment requires active participation and performance in each lesson, including participation in discussions based on reading required texts and watching assigned films. Students are expected to not only engage with individual texts/films but also evaluate the author's message, recognize the potential implications of the text within historical contexts, identify different perspectives, and make inferences about authors' messages. Students are also highly encouraged to challenge individual arguments presented in the texts/films. Unprepared students who have not read/watched the assigned materials prior to each class will be marked as absent. In order to successfully complete the course and receive credits, students need to achieve the cumulative score from two Final tests - one covering topics from American History and one from Social Institutions of at least 65%. Attendance: Students are expected to attend each class according to the schedule, including in the online environment. Transfers among groups are not allowed. If students miss three or more classes, they will not receive credits for the course, regardless of their overall results. The course is currently conducted in person; however, the format of individual classes may be subjected to changes due to possible precautions resulting from the Covid-19 pandemic. If the pandemic situation changes, the course will continue in an online format via MS Teams for lectures and individual classes. The final grade will be calculated as a sum of grades from the two parts - tests (50%+50%). HISTORY part : Students will write 1 test in WEEK 13 (14). There are no re-takes. INSTITUTIONS part : There will be one test in Week 13 (14). FINAL EVALUATION : A 93-100% B 86-92% C 78-85% D 72-77% E 65-71% FX 64 and less

Learning outcomes:

The course combines information on history and institutions to provide a complex insight into what constitutes American nation. From the historical perspective the course considers the economic, social and political history of the USA from the earliest period. It provides an explanation of what happened and why. It captures the events, personalities that shaped the nation. It examines how historians have interpreted the past and provides a conceptual framework through which the past can be illuminated.

From the perspective of Institutions, the course introduces basic terminology and theory that helps to understand contemporary American society. The student will be able to analyse past events, and attempt to objectively determine the patterns of cause and effect. Moreover, the student will be able to implement basic concepts of history. The target theory is a theory of identity with reference to various aspects such as religion, family, race, and class. Via the interpretation of primary sources the main objective of this part is to develop and/or improve essential analytical skills in dealing with contemporary cultural problems with the focus on social institutions as the main agent of social changes.

Brief outline of the course:

Week 1: Introduction

Week 2: History

Discovery and settlement of the New World

Independence and nation building

Week 3: History

An emerging identity

The Jacksonian period

Week 4: History

Slavery, Secession and the Civil War

Week 5: Institutions

Identity

Reading:

Generational memory in an American town, John Bodnar

Identities and Social Locations, Gwyn Kirk and Margo Okazawa-Ray

Week 6: Institutions

Family

Reading:

What we really miss about the 1950s, S. Coontz

The making and unmaking of modern families, J. Stacey

Week 7: Institutions

Religion

Reading:

The Evolving spiritual and religious landscape of American culture, Ch.J.Flor

The Impact of the American Dream on the Evangelic Ethics, W.Corbin

Week 8: History

Reconstruction and the Gilded Age

Manifest Destiny, Progressivism, World War I and the Roaring Twenties

Week 9: History

The Great Depression, The New Deal, World War II

Week 10: Institutions

Class

Reading:

Prerequisities:

Conditions for course completion:
 Oral examination.

Learning outcomes:
 To provide theoretical background for studying computer science in general, by giving the necessary knowledge in theory of automata.

Brief outline of the course:
 1: Chomsky hierarchy of grammars: alphabet, symbol (letter, character), transitive closure, word (string), empty word (empty string), length of a string, concatenation, language, grammar, nonterminal symbol, terminal symbol, initial nonterminal (initial symbol), grammar rule, derivation step, language generated by a grammar, Chomsky hierarchy of grammars - phrase-structure, context sensitive, context free, regular
 2: Deterministic finite state automata: finite state automaton, state, input symbol, output symbol, initial state, transition function, output function, examples of automata and their graphic representation, generalized transition and output functions and their basic properties
 3: Reduction of automata I: equivalent automata, minimal (optimal) automaton, reachable state, properties of reachable states, elimination of unreachable states
 4: Reduction of automata II: equivalent states, k-equivalent states, properties of equivalence and k-equivalence, relation between k-equivalence and (k+1)-equivalence, partitioning the state set into equivalence classes, elimination of equivalent states
 5: Reduction of automata III: proof of correctness, unambiguity, and optimality of reduced automaton, testing equivalence of two automata
 6: Deterministic finite state acceptors: basic definitions, language recognized by a finite state acceptor, common properties of acceptors and automata with an output, minimizing a finite state acceptor
 7: Operations with regular languages: complement, intersection, union, difference, symmetric difference, testing of emptiness, inclusion, equality, and disjointness for regular languages
 8: Nondeterministic finite state acceptors: definition, transition function, language recognized by a nondeterministic acceptor, elimination of nondeterminism
 9: epsilon-acceptors: definition, properties, elimination of epsilon-transitions

10: Regular grammars: regular grammar, extended regular grammar, transformation of acceptor to a regular grammar, transformation of extended regular grammar to an epsilon-acceptor

11: Regular expressions I: basic properties, transformation of regular expression to an epsilon-acceptor

12: Regular expressions II: regular equations, valid algebraic manipulations with regular expressions, solving an equation with a single unknown variable, solving a system of regular equations, transformation of acceptor to a regular expression

13: Another constructions: review of transformations among various representations, an example of a direct transformation of a grammar to a regular expression, closure of the class of regular languages under another language operations – concatenation and Kleene star, mirror image

14: Another operations: homomorphism and inverse homomorphism, a context-free language that is not regular

The Bachelor degree thesis demonstrates mastery of the basics of theory and professional terminology of the field of study, acquisition of knowledge, skills and competencies in accordance with the declared profile of the graduate of the study program, as well as the ability to apply them creatively in solving selected problems of the field of study. The Bachelor degree thesis may have elements of compilation. The student demonstrates the ability of independent professional work in terms of content, formal and ethical aspects. Further details of the Bachelor degree thesis are determined by Directive no. 1/2011 on the essential prerequisites of final theses and by the Study Rules of Procedure at UPJŠ in Košice for the 1st, 2nd and combined 1st and 2nd degree.
To obtain the required number of credits in the structure prescribed by the study plan.
Students' assessment will be decided upon by the state examination board. Final assessment consists of the following elements:
Assessment in the supervisor's report - 20 %
Assessment in the opponent's report - 40 %
Discussion within defence - 40 %
Contentual and formal (language) aspect of student's verbal and written presentation of knowledge will be reflected in the final assessment in the following ratio: 80 % : 20%.
The state commission decides on the student's evaluation. The evaluation shall take full account of proven knowledge, in particular the ability to apply it creatively. In the final evaluation, instead of presenting isolated facts, emphasis is placed on the ability to think in context based on the knowledge gained during the study in the whole spectrum of the field. The State Commission will further assess the content and formal (language) side of the student's speech.

Learning outcomes:
The Bachelor degree thesis demonstrates mastery of the basics of theory and professional terminology of the field of study, acquisition of knowledge, skills and competencies in accordance with the declared profile of the graduate of the study program, as well as the ability to apply them creatively in solving selected problems of the field of study. Conditions for course completion: The bachelor thesis is the result of the student's own work. It must not show elements of academic fraud and must meet the criteria of good research practice defined in the Rector's Decision no. 21/2021, which lays down the rules for assessing plagiarism at Pavol Jozef Šafárik University in Košice and its components. Fulfillment of the criteria is verified mainly in the supervision process and in the process of thesis defense. Failure to do so is reason for disciplinary action.

Learning outcomes:
The aim of the course is to acquire knowledge about the basic principles of general acoustics with regard to the production and perception of speech. Students will get acquainted with experimental methods of analysis of the sound structure of language, with the concepts, methods and terminology necessary for the study of spoken language. They will learn the procedures for creating digital speech records for phonetic research.

Brief outline of the course:
Basics of general acoustics - sound, tone, complex tone, noise, impulse, resonance, acoustic properties of speech signal, articulatory system, auditory system.
Experimental speech analysis using PRAAT and Speech Analyzer software tools - speech signal preparation for analysis and perception tests, experimental phonetics, time domain analysis, frequency domain analysis (spectrum, fundamental tone, formants, spectrogram and sonagram).
Acoustic structure of segments - vowels, diphthongs, sonorants, obstruents.
Acoustic structure of suprasegments - methods of measuring time dimensions, intensity and melody of acoustic signal.

CONTINUOUS ASSESSMENT: 1. ATTENDANCE: Attendance is compulsory in both online and in-person classes. Each student is allowed 2 absences at most. Important information regarding the final evaluation and the course in general will be discussed during the introductory session, therefore, failing to attend the WEEK 1 introductory session is ALSO COUNTED AS AN ABSENCE. Not logging into an online class is COUNTED AS AN ABSENCE. More than two missed seminars will result in failing the course, irrespective of exam or essay results. Students must be on time for class. 2. ACTIVE PARTICIPATION (20 points): Students are required to do their best with respect to active participation in seminar sessions. Students are expected to bring their own ANNOTATED copies of the required materials, complete the assigned tasks and exercises (available on UPJS OneDrive/MS Teams and during the lessons) and participate in class discussions. Throughout the semester, students will be awarded points for actively participating in class discussions. Each student can earn up to 3 active participation points per seminar session. 3. IN-CLASS ESSAY (40 points): After each topic, students are required to write a short essay (200-300 words). Each student will hand in a total of 4 essays. Essay topics will be announced during the seminars. Essays will be handwritten in class. They must conform to the guidelines of academic writing and must NOT be plagiarised. No part of the paper may be produced by AI text generators. Using material produced by AI text generators will be considered plagiarism. Plagiarised papers will be awarded 0 points. Students will NOT be given the option of rewriting plagiarised papers. 4. TEST (40 points): Students will write one written test covering ALL material studied during the course. There are NO RETAKES. If you are unable to attend the test for valid reasons (e.g. medical emergency), contact the teacher as soon as possible, or in advance if possible. To pass the course, the SUM of all points (active participation + essays + test) must be no less than 65 points. Grading scale: Mark % A 93–100 B 86–92 C 78–85

Learning outcomes:

This course is designed to help students explore British popular fiction, i.e. the texts that are not studied in traditional literature history classes, as they stand outside the canon. It is the aim of this course to teach students to critically examine and analyse the significance and cultural impact of texts they would normally consider leisure reading. Also, the course poses questions such as: What is the difference between high and low culture? What is the place of popular fiction within literature? Can popular fiction be analysed in the same manner as literature? What is genre and how is it significant for popular fiction?

Brief outline of the course:

COURSE STRUCTURE:

The course consists of an introduction and 4 two-week blocks dedicated to different genres of popular fiction. Each block is divided into two parts. During the first week, students read theoretical texts, study the characteristics and history of the respective genre and acquire a critical outlook on the genre. During the second week, students read specific works that are good examples of the genre and attempt to apply the acquired theoretical concepts in class discussions, as well as in written assignments.

WEEK 1: Introduction. Basic information: assessment, readings, etc. A note on plagiarism and AI.

WEEK 2: Popular fiction: what is it and why should I care? Can/should we analyse popular fiction in academia? What is genre? What are cultural studies?

WEEK 3: Gothic Novel 1 / Text: Clive Bloom "Now Welcome the Night: The Origins of Gothic Culture"

WEEK 4: Gothic Novel 2 / Texts: Ann Radcliff "The Mysteries of Udolpho" (excerpt); Jane Austen Northanger Abbey (excerpt) - IN-CLASS ESSAY 1

WEEK 5: Detective Fiction 1 / Text: John G. Cawelti "The Formula of the Classical Detective Story"

WEEK 6: Detective Fiction 2 / Texts: Sir Arthur Conan Doyle "The Final Problem"; Agatha Christie "The Market Basing Mystery" - IN-CLASS ESSAY 2

WEEK 7: Science Fiction 1 / Text: Adam Charles Roberts "Defining Science Fiction"

WEEK 8: Science Fiction 2 / Text: Douglas Adams "The Hitchhiker's Guide to the Galaxy", Book 1 (entire novel) - IN-CLASS ESSAY 3

WEEK 9: Chick Lit 1 / Text: Cris Mazza "Who's Laughing Now? A Short History of Chick Lit and the Perversion of a Genre"

WEEK 10: TUTORIALS –

- YEARS 1 and 2: READING WEEK (This is your time to catch up on your compulsory reading)

- YEAR 3: TEST

WEEK 11: Chick Lit 2 / Text: Helen Fielding "Bridget Jones's Diary" (whole novel) - IN-CLASS ESSAY 4

WEEK 12: THURSDAY GROUP (YEAR 1 and 2): TEST (test date: April 30) / WEDNESDAY GROUP: NO CLASS – SCHEDULE CHANGE

WEEK 13: WEDNESDAY GROUP (YEAR 1 and 2): TEST (test date: May 7) / THURSDAY GROUP: NO CLASS – PUBLIC HOLIDAY

WEEK 14: TUTORIALS

TEST DATES ARE PROVISIONAL AND MIGHT BE CHANGED BY THE TEACHER DURING THE SEMESTER IF THERE ARE VALID REASONS FOR SUCH A CHANGE. If test dates change, the teacher will inform students in advance.

UK ART AND CULTURE (50% of the grade)
Continuous Assessment:
• Regular Class Attendance
Students are allowed to miss no more than 2 seminars for whatever reason, in order to be able to complete the course. Should anyone come unprepared, they will be asked to leave and considered absent from the seminar. There are no re-takes for presentations. Please keep this in mind and make sure you are always present in class when your presentation is due.
• Active Participation in Class - 10+ points (1 for each class = a chance to earn some additional points) = 20%
At the beginning of each seminar, students will be asked to provide a brief revision of the given historical period and of the English/British literature of the time. All you have to do is go through your notes from British History 1 and British Literature 1 and 2 and provide a concise overview, focusing on what you consider important.
Another way of earning points for active participation is by contributing your knowledge and opinions to the discussion and interacting with your colleagues. These opinions should be based on your home preparation and reading.
Do not expect to earn points for active presentation if all you do is say a word or two occasionally or when asked. You are expected to interact with your colleagues, answer their questions as well as those asked by the teacher and ask relevant questions yourself.
Final Presentation - 20 points (see the document entitled "Final presentation and evaluation" for detailed instructions) = 30%
Each student will choose their own topic from the very broad area of British art and culture – a painting, statue, installation, building, monument, street art, photography etc. Please, make sure you choose something you like, find interesting and would like your colleagues to know about. Do not choose the works discussed in our seminars! You will be asked to apply the historical background and the theoretical information you have studied during the semester to the analysis of your chosen work of art and present it to your colleagues in a 10 minute presentation. All the topics must be approved by the teacher and submitted no later than during our seminar in week 8. A specific set of rules to follow and a list of criteria for presentation evaluation is available on MS Teams (or

SharePoint) for you to be able to prepare a successful presentation and to evaluate your colleagues. If you have any questions, do not hesitate to ask them in class or during my office hours.

US ARTS AND CULTURE:

To complete the course, students need to complete both parts of the continuous assessment. Continuous assessment requires students' active participation in each lesson (participation in discussions based on reading required texts). Each student also needs to present a topic chosen by the lecturer at the beginning of the course and deliver a handout. If someone fails to present their topic, they will not receive credits for this part (30%). To complete the course, students are also required to successfully pass the test at the end of the course (70%).

Attendance:

Students are expected to attend each class according to the schedule, which applies to online classes too. No transfers among the groups are allowed. Should students miss three or more classes, they will not receive credits for the course no matter what their overall results are.

FINAL ASSESSMENT:

To qualify for the final exam all students must receive minimum 65% of continuous assessment from each of the two parts separately.

There will be a final written exam taken during the examination period consisting of two tests, one covering UK Art and Culture part (50 % of the final grade) and the other one covering American Art and Culture part (50 % of the final grade). In order to be awarded final credits, each student must receive 65% minimum from the two tests combined.

Every student is entitled to 2 retakes if necessary, which means 3 chances for passing the exam. The final grade for the course will be based on the following grading scale.

A 93-100%

B 86-92%

C 78-85%

D 72-77%

E 65-71%

FX 64 and less.

Should you have any questions on the above explained forms of assessment, address them to your individual lecturer at the beginning of the semester (Dr Martausova or Dr Sabovikova).

Learning outcomes:

Aims and objectives:

The aim of this course is to develop and improve essential analytical skills in dealing with American culture and art, and to acquire knowledge of historical development of the Fine Arts in USA. The course is designed to provide students with information about the most vital eras important in the overall development of a distinctive American tradition in Arts, and to enhance students' very own interpretation of individual works of art. The course embraces eras and periods starting from Colonial America until late 20th century, focusing on both - mainstream and ethnic traditions, and all means of artistic production (visual art as well as audiovisual art of the 20th century). The main objective of the course is to present information about the development of art in coherence with wider social, cultural but also political contexts that substantially contribute to the expression of American art.

UK ART AND CULTURE

Course Description:

The course builds upon the students' prior knowledge of British history and literature and tries not only to revise this knowledge but also to put it into a broader cultural context. Proceeding chronologically from the period of English Renaissance, we shall focus on how the political and social situation of the time has been reflected in (not only) visual art and in cultural production of the time, taking British literature as a starting point. The students shall therefore be asked to

revise selected chapters of British history and literature for each seminar. This revision will be followed by reading materials that deal specifically with mostly visual art and culture of the time. This theoretical knowledge will then be applied to specific examples art and culture that may serve as a source of information not only about the artistic values of the society of the time but also about its norms, values and institutions.

Learning Outcomes:

By the end of this course, student will be able to:

• Identify some of the most significant works of British art

• Understand the connections between historical background and cultural development of the respective periods

• Identify main ideas and arguments in the texts assigned for home preparation

• Apply this theoretical knowledge to the analysis of works of art and culture and make their own analysis of a selected work of art based on the theories studied throughout the semester

• Students would also improve the transferable skills of summarising texts they have read, understanding knowledge gained in the classroom, understanding and applying it in the form of a presentation

Week 12: Presentations
Week 13: Final Test
Week 14: Tutorials
UK ART AND CULTURE
WEEK 1: Course Introduction
Content: defining culture and art, the concept of national culture, British culture and stereotypes, cultural literacy
We will discuss our understanding of the terms 'art' and 'culture' and try to come up with our own definitions. Then we will think about the term 'national' culture and British culture in particular and see how we each understand these notions and what concepts and stereotypes we associate with being British. Our next task will be to try to clarify the term 'art' and how we understand it in relation to culture. Throughout this course, we will also be working on improving certain skills that may be useful in broader context. This lesson will focus on summarising texts and presenting these summaries to others, which will later be applied in individual presentations.
Reading (in class):
• Arnold, D.: Art History. A Very Short Introduction. Oxford: OUP, 2004. Chapter 1
WEEK 2: English Renaissance
Content: Renaissance, Reformation, portrait painting, Tudors and the Golden Age
In this class, we will compare the understanding of arts and the role of artists in ancient, medieval and Renaissance society and discuss how and why Renaissance came to be a defining turning point for European culture and how our awareness of this period has been shaped by its presentation in the media.
Revision: Tudor England (history), Elizabethan and Tudor Literature (literature)
Reading:
• http://www.arthistory.sbc.edu/artartists/ancmed.html
http://www.arthistory.sbc.edu/artartists/renaissance.html
Presentation(s): compare the position of art and artist in ancient, medieval and Renaissance society
WEEK 3: Commonwealth and Restoration
Content: Charles I and Baroque portrait, art and culture of the Commonwealth, Restoration
This class will focus on the reflection of the changing social and political situation in the period art, particularly the portrait painting. We will discuss how portraits of monarchs and other influential figures reflected their ambitions and served as a message for the others. Applying our theoretical knowledge to analysing specific works of art, we will move on to discuss the form of the final presentation and its evaluation criteria.
Revision: Stuarts (history), 17th century and Restoration literature (literature)
Reading:
• Sharpe, K. 'Portrait of an Age'. In History Today, March 2009, pp. 6-7.
• Skeaping, L. 'All singing, all dancing'. In History Today, February 2010, pp. 18-24.
WEEK 4: Neo-Classicism, English School of Art
Content: The Age of Reason, Enlightenment, the rise of middle classes, satire, journalism

Neo-Classical art and culture in general marked a shift in topics, styles and target audience for writers and visual artists alike. Using our knowledge of neo-classical literature as a starting point, we will analyse several paintings of the so called English School to see how similar principles were applied in visual arts. Since this period also marked the birth of journalism and regular newspapers, we will compare some of those with our current notions of what a newspaper is.

Revision: Neoclassical prose and poetry (literature)

Reading:

• http://www.gutenberg.org/files/2176/2176-h/2176-h.htm - (Introduction and the first of the discourses)

• http://www.gutenberg.org/files/22500/22500-h/22500-h.htm#Page_113

Presentation(s): compare Hogarth's and Reynolds' attitudes to art (themes and genres they preferred) and the education and training of young artists

WEEK 5: Georgian Era

Content: architecture, domestic life, Regency

This period in British art history will give us an opportunity to pay more attention to architecture. We will look back on how architectural styles evolved but will also discuss the less visible aspects of this topic, including the notion of domesticity and the organisation of domestic life.

Revision: Jane Austen (literature), Hanoverians (history)

Reading:

• Vickery, A. 'Open House Georgian Style'. In History Today, November 2009, pp. 42-44.

• Bryson, B. At Home. A Short History of Private Life. London: Transworld Publishers, 2010. Chapter 5

WEEK 6: Romanticism, Landscape

Content: changing perception of nature, topography, history painting

Our discussion of Romantic painting will focus on the development of this genre and primarily on comparing 2 most significant English landscape painters, trying to identify their different aims and understanding of their work. We will also cover the genre of history painting, its connection to landscape in the works of Turner and discuss the reasons for its prominent status in this particular period in history.

Revision: the Age of Romanticism (literature)

Reading:

• Wilton, A.: Five Centuries of British Painting. From Holbein to Hodgkin. London: Thames and Hudson, 2002. Chapter 5

Presentation(s): compare Constable and Turner's different approaches to the genre of landscape paining

WEEK 7: Victorian Britain

Content: Empire, industrialisation, old vs. new, Arts and Crafts movement

We will start this lesson by discussing last week's reading and then move on to other aspects of Victorian Britain. We will discuss its conservatism as opposed to major innovations in technology, science and thinking, major advances and modernisation as opposed to pseudo-styles and attempts at reviving ancient arts and crafts.

Revision: Industrial Revolution, Victorian Britain (history),

Reading:

• Wilton, A.: Five Centuries of British Painting. From Holbein to Hodgkin. London: Thames and Hudson, 2002. Chapter 6 – Pre-Raphaelite Brotherhood

• Bryson, B. At Home. A Short History of Private Life. London: Transworld Publishers, 2010. Chapter 1

Presentation(s): old vs. new in Victorian Britain in terms of visual art, architecture and way of thinking

WEEK 8: Contemporary Art and Culture

Content: Young British Artists, conceptual art, new media

During this class, we will return to our initial definitions of what art means and will compare these with the theories discussed in the reading that try to respond to current styles and trends. Specific examples will include paintings, installations and other forms of art by contemporary British artists. Again, we will see how the understanding of art, artist and their role has been evolving.

Reading:

• Pooke, G. and Whitman, G. 2008. Teach Yourself Art History. Chapter 4

• http://www.london.gov.uk/fourthplinth/content/about-programme

http://www.london.gov.uk/fourthplinth/content/marc-quinn

http://www.london.gov.uk/fourthplinth/content/what-people-are-saying http://www.london.gov.uk/fourthplinth/

Presentation(s): Fourth Plinth project, its ambition, main idea and the inspiration common to most of the exhibited works; approaches to defining and understanding art ad their applicability to contemporary visual art

WEEK 9: Final Presentations

WEEK 10: TUTORIALS

WEEK 11: Final Presentations

WEEK 12: Exam Period

WEEK 13 /14: Exam Period

Conditions for course completion:
1. Active participation in teaching (absence allowed max. 90 min.),
2. Implementation of assignments and presentation of assignments focused on the application of knowledge, skills and competence in the field of communication with a particular focus on teacher communication in the school environment.
Detailed information in the electronic bulletin board of the subject in AIS2.

Learning outcomes:
The student will acquire knowledge and information about the basics of verbal and non-verbal communication, communication errors, assertive and non-violent communication. The content of the subject will be enriched with knowledge, skills and competencies necessary for the work of a teacher.
The student is able to apply the acquired communication skills in practice, is able to apply effective principles and principles of communication with others, is able to anticipate and thus prevent possible misunderstandings, which will contribute to the development of his social and professional skills.
The student will acquire the competencies to communicate effectively in work and personal life, especially in the school environment.

Brief outline of the course:
Basics of communication (Transmitter-receiver principle, "What is said is not equal to what is heard", "Internal dialogue", The concept of communication)
Active listening (The most important criteria for active listening)
Misunderstandings (How Misunderstandings Arise, How to Avoid Misunderstandings)
Body language (What is body language, Active / passive body language, Dress psychology)
Signs of Physical Expression, Disadvantages of Fake Physical Expression, Difference Between Active and Passive Body Expression
Personality development (Voices in us, "child in me" - identification of one's own personality)
Basics of assertive and non-violent communication. Specifics of communication in the school environment.

Learning outcomes:
 Students will get the informations about principles and achitecture of Internet. They will understand the principles of ISO/OSI layers reference model for network communication. They will understand the meaning and usage of terms protocol, service, interface. They will analyze the parameters of communication channels, understand the function of interconnection devices (hub, switch, router). They will understand the structure of IP packets, addressing and how packets are transmitted, the principle of routing protocols and the creation of routing tables. They will understand the priciples of acknowledged TCP transport transmission and its implementation. They will know how to use the interface of UDP and TCP protocols in a program code. They will understand the basic application protocols of the Internet.

Brief outline of the course:
 1. Introduction to computer networks, internet connection types, delay and loss in packet-switched networks, ISO OSI reference model and TCP/IP protocols family.
 2. Application layer: Web and HTTP, protocol FTP ,e-mail and protocols SMTP, POP3, IMAP,
 3. Application layer: domain names and DNS, Peer-to-peer applications. Security in computer networks.
 4. Transport layer: services, multiplexing and demultiplexing, protocol UDP, reliable data transfer
 5. Transport layer: connection oriented transport protocol TCP, flow and congestion control.
 6. Network Layer: Internet protocol IPv4, virtual circuit and datagram networks, packet fragmentation, routing table, application protocol DHCP
 7. Network Layer: network address translation NAT, ICMP protocol, internet protocol IPv6

Conditions for course completion: The conditions for passing the course are as follows: 1. Active participation in exercises. Max. the missed range is 90 min. 2. Submission of the reflection on the selected topic within the specified time. Reflection topic: My strengths and weaknesses in conflict management. In a short presentation of their reflection, in the form of deconstruction, students will describe their strengths and weaknesses in the management of conflict situations with a focus on the application of knowledge, skills and competences needed in conflict situations in the work environment and the school environment. The evaluation of the course and its subsequent completion will be based on clearly and objectively set requirements, which will be set in advance and will not change. The aim of the assessment is to ensure an objective and fair mapping of the student's knowledge while adhering to all ethical and moral standards. There is no tolerance for students' fraudulent behavior, whether in the teaching process or in the assessment process.

Learning outcomes: Successful mastery and demonstration of knowledge in the field of conflict management and control of basic rules. The method of teaching the subject will be oriented to the student. Lecturers will be interested in students' needs, expectations and opinions so as to encourage them to think critically by expressing respect and feedback on their opinions and needs. The content of the curriculum will be based on primary and high-quality sources that will reflect the topicality of the topics so as to ensure the connection of the curriculum with other subjects and also the connection of the curriculum with practice. Students will be expected to take an active approach in lectures and seminars with an emphasis on their independence and responsibility. The student is able to demonstrate an understanding of an individual's behavior in various conflict situations. The student is able to describe, explain and evaluate their own internal resources, competencies as well as limitations and weaknesses that are directly related to conflict management. The student is able to apply theoretical knowledge and principles of conflict resolution to everyday situations. After completing the course, students will be able to: a) express and summarize basic knowledge related to conflict management; b) understand the basic rules and dynamics of the origin, course and termination of the conflict; c) apply knowledge in practice, e.g. in the school environment; d)

apply key competencies that increase the possibilities of their application in all areas of practice with a special focus on the work of a teacher. They will acquire knowledge from the theory of conflict management as well as capabilities and competences for solving them, e.g. in the context of school teams.

Brief outline of the course:
Disputes and their causes (Types of disputes, External influences, Be able to reveal the causes of disputes), Dispute origin (Levels of disputes, Escalation warning signals, Escalation removal strategies, Know how to explain escalation stages; How do I approach a dispute?) Dispute Resolution, Dispute Resolution Strategies, Dispute Discussion, Dispute Settlement Initiatives, Knowing how to handle a dispute and how to effectively resolve it), Dispute Resolution (Options, Public Struggle, Covert Struggle, Indefinite Postponement, Agreement, "Fair play ", compromise, cooperation, capitulation, escape or separation), Prevention (Structures that produce disputes, The meaning and purpose of disputes, Stages and steps of dispute resolution, What does a positive corporate culture mean? This course covers the basic knowledge in understanding and using cryptography. The main focus is on definitions, theoretical foundations, and rigorous proofs of security, with some programming practice. Topics include symmetric and public key encryption, message integrity, hash functions, block cipher design and analysis, number theory, and digital signatures. The course also provides an introduction to cryptographic protocols for authentication and key management, including PKI and certificates.

Brief outline of the course:
Classical cryptography, basic information theory, cryptoanalysis, security of classical ciphers. Symmetric ciphers - stream ciphers, block ciphers (DES, AES), modes of operation. Asymmetric ciphers - RSA, Elgamal, elliptic curve cryptosystems. Hash functions, message authentication codes, digital signatures. Authentication, key establishment and distribution, certificates.

 Per week: 2 / 2 Per study period: 28 / 28
 Course method: present

Number of ECTS credits: 5

Recommended semester/trimester of the course: 3.

Course level: I.

Prerequisities:

Conditions for course completion:
 Demonstration of adequate mastery of the content standard of the subject in the ongoing and final evaluation, the ability to formulate a problem in the acquired terminology and solve it within a project.
 Written works during the semester, project.
 Written and oral exam.

Learning outcomes:
 After completing the course, the student acquires the principles of relational databases, is able to apply standard data models, design relational databases and formulate filtering queries.

Brief outline of the course:
 1) Relational databases. Query language SQL, filtering.
 2) Data types, operators, numerical, string and time functions.
 3) JOIN operations.
 4) AGGREGATION AND GROUP BY.
 5) Data and database models. Relational scheme. RDB principles. Data integrity.
 6) DB design, ER diagrams.
 7) System commands about DB and tables. Cascading deletion and update.
 8) Nested queries. ROLLUP. CASE expression.
 9) Three-valued logic. Quantifiers and NOT. Set operations.
 10) Data science and knowledge acquisition using R.
 11) Data warehouses. Data cube. Pivot table.
 12) Normalization of relational databases - 1. Relational algebra.

Course level: I.

Prerequisities:

Conditions for course completion:
Student evaluation is based on three criteria:
TWO CREDIT TESTS 70%; CONTINUOUS PREPARATION 10%, and ATTENDANCE AND ACTIVE PARTICIPATION 20%. To receive credits for this course students must pass the two credit tests; continuously and timely submit their reports and attend each class according to the schedule. Attendance is followed during the online sessions too.
TESTS constitute 70% of the final mark:
Ordinarily, student coursework is evaluated by letter grades, which are assigned a value based on a 100-point scale gained from two credit tests plus points for continuous preparation and active participation. The final mark is assigned according to the following scale:
A 100-93
B 92-86
C 85-78
D 77-72
E 71-65
FX 64-0
Students who are unable to take a credit test at the scheduled time due to a documented condition should contact the lecturer as soon as the need is apparent to discuss make-up examination accommodations and procedures. Students absent from a scheduled credit test will be examined by the lecturer separately in an ORAL EXAM to collect information about their level of preparedness. Oral exams will be realized during the lecturer's consultation hours as soon as possible after the missed credit test. The content of the oral examination will be equivalent with the content of the missed credit test but may last longer than a written test and can include deeper analysis of certain problem areas of the course.
CONTINUOUS PREPARATION constitutes 10% of the final mark (maximum 10 points):
Students are expected to prepare reports for each class by reading and processing the study materials and the required literature.
Formal requirements for the home assignments:
Minimum 2 but maximum 3 pages in Microsoft Word editor: letter type Times New Roman; letter size 12, spacing 1.5, 34 lines with 2865 characters per page with spaces. The report's header must contain the student's name and surname, study group, number of the given week according to the

syllabus of the course and the title of the topic for the week. The final document must be saved in Printable Document Format (PDF). Ignoring any of these criteria will automatically lead to the refusal of the submitted report.

Content requirements for the assignment:

Students must present the content of the reading assignment synthesized in a clear and structured way: highlighting key information and data as well as presenting logical connections between them. The submitted report must represent the student's thorough understanding of the content and the problem area discussed in the reading assignment.

WARNING: Reports must be original work of the author! Any violation of copyright or breach of anti-plagiarism rules and regulations of the university will inevitably lead to disciplinary procedures! Repeated and systematic plagiarism will lead to the loss of credits assigned for completion the course!

Deadline and the format of the report:

Students must mail their home assignments to the following email address: rozenfeld.julius2@atk.sk by Saturday 24:00 each weak. The reports must be mailed in PDF format. No other formats are accepted! No late submissions will be accepted unless separately negotiated with the supervisor of the course!

ATTENDANCE AND ACTIVE PARTICIPATION constitute 20% (maximum 20 points) of the final mark:

All students must attend all classes regardless they are organized face-to-face or online. Students must join the class sessions on time. Should anyone miss the first ten minutes of a class, will be marked as absent from the class. Points for active participation are assigned ONLY to the students who actively contribute to the learning process during the sessions with joining discussions!

Volunteer work in extracurricular activities that are organized by the Department of the British and American Studies which clearly contribute to the students' professional development such as: lectures and workshops, career week activities, organization of open-door days, language competitions, conferences, Olympiads, and other similar activities are fully supported! Should these activities be organized during the regular session times, volunteers will be acknowledged as if they had participated in the regular class session.

ABSENCE DUE TO ILLNESS

A student absent from a class must file a valid doctor's certificate by emailing it in a PDF format to the lecturer as soon as possible. Due reports for the missed class must be submitted according to the syllabus of the course and no later than the following class attended by the student.

In an emergency, if the student is unable to contact the lecturer and mail the valid doctor's certificate or is being treated elsewhere, the lecturer must be informed by sending an email to the following email address: julius.rozenfeld@upjs.sk as soon as possible. In both cases, the student must also file a letter from a physician certifying the date and nature of the illness.

ABSENCE FOR OTHER REASONS

Students who must be absent for reasons other than illness, such as a death in the family or a reason of similar gravity, must contact the lecturer as soon as possible and submit relevant documents that certify the seriousness of the case.

There may be other activities which can validate missing a class or several classes, for example participation in high-quality international competitions, scientific research, conferences, or other relevant activities, which clearly contribute to the professional development of the student but final decision about the validity of the presented excuse fully falls in the lecturer's competency. Regular full-time or part-time employment is not an acceptable excuse for a missed class.

COVID-19 regulations:

Changing pandemic situation requires continuous adaptation. Online sessions organized via Microsoft Teams are the preferred alternative to in-person sessions if necessary. Attendance will

be duly followed on online meetings too. Tests – if required for the completion of course – are also planned flexibly. Normally, the first credit test takes place during the 6th week of the term with a second credit test on the 12th week, but changes may apply. If necessary, these test dates can be changed according to the pandemic situation or replaced by online tests the form and content of which are comparable with a normal paper-based test. Students are required to follow the department's noticeboard and inform themselves continuously about the possible changes!

Learning outcomes:
The main goal of the course is to introduce students into the basics of business communication and correspondence. The course is designed to help students develop the writing skills needed to create clear messages. Special emphasis is placed on spelling, text design, style and the formal aspects of communication. By completing the course, students will be able to actively conduct business correspondence, communicate correctly and accurately in various business situations, actively use graphs and describe statistical findings in presentations, prepare reports for business needs and create their own portfolio with a resume necessary for successful job interviews.

Brief outline of the course:
1. Introduction into business correspondence
2. Basics of email communication
4. Register and its role in email correspondence
5. Style, tone, and mood
6. The customer-supplier sequence
7. Inquires, discussing terms and asking for payment politely
8. How to complain and apologise for mistakes
9. Describing business trends and designing reports
10. Job application and preparation for a job interview

Conditions for course completion:
Attendance - students are expected to attend each class according to the schedule. Should the student miss three or more classes, he/she will not receive credits for the course no matter what his/her overall results are on the test(s). The student must be on time for class or he/she will be marked as absent. 2.Active participation, completed homework assignments - students are required to come prepared and do their best with respect to active participation in seminar sessions. Students are expected to bring their own copies of the required materials and complete the assigned tasks and exercises. Should you fail to bring your own copy or a completed home assignment for a particular seminar, you will be marked as absent. 3.Final assessment – students will take 2 tests. Final grade will be calculated as a total sum of grades from the two tests. The final grade for the course will be based on the following grading scale. A 93-100%B 86-92%C 78-85%D 72-77%E 65-71%FX 64 and less. Should you have any questions on the forms of assessment, address them to your lecturer at the beginning of the semester.

Learning outcomes:
The course expands the essentials of upper-intermediate and advanced English grammar in order to make students' language competence better.
The course introduces several various grammar topics, e.g., tenses, gerunds and infinitives, passive voice, conditionals, etc. It familiarizes students with word formation and provides practice of phrasal verbs, prepositional phrases, and idioms.
Since grammar is the foundation for communication, grammar rules help learners develop the habit of thinking logically and clearly. Students will be able to become more accurate when using a grammatically correct language.

ABSENCE FOR OTHER REASONS

Students who must be absent for reasons other than illness, such as a death in the family or a reason of similar gravity, must contact the lecturer as soon as possible and submit relevant documents that certify the seriousness of the case.

There may be other activities which can validate missing a class or several classes, for example participation in high-quality international competitions, scientific research, conferences, or other relevant activities, which clearly contribute to the professional development of the student but final decision about the validity of the presented excuse fully falls in the lecturer's competency. Regular full-time or part-time employment is not an acceptable excuse for a missed class.

COVID-19 regulations:

Changing pandemic situation requires continuous adaptation. Online sessions organized via Microsoft Teams are the preferred alternative to in-person sessions if necessary. Attendance will be duly followed on online meetings too. Tests – if required for the completion of course – are

also planned flexibly. Normally, the first credit test takes place during the 6th week of the term with a second credit test on the 12th week, but changes may apply. If necessary, these test dates can be changed according to the pandemic situation or replaced by online tests the form and content of which are comparable with a normal paper-based test. Students are required to follow the department's noticeboard and inform themselves continuously about the possible changes!

Learning outcomes:
The content of the course is designed to provide an overview of the structure, functioning and development of European political institutions, economic and social policies that form the area of European equality regimes. By completing the course, students will understand the definition of equality, have erudite knowledge and understanding of European anti-discrimination policies and the impact of these policies at national and regional level. They will be able to implement the acquired knowledge in the development and administration of projects, in consultations, or in the creation of similar national and transnational policies.

Brief outline of the course:
1.Introduction into European Studies, History and Institutions
2. Discrimination vs. Tolerance; Equality, Political Rights and Social Responsibility
3. Justice, Freedom and Security Policies in the EU
4. Employment, Social Affairs and Equal Opportunities Policies

Conditions for course completion:
Continuous Assessment:
1. Attendance: Attendance is compulsory in both online and in-person classes. Each student is allowed 2 absences at most. Important information regarding the final evaluation and the course in general will be discussed during the introductory session, therefore, failing to attend the Week 1 introductory session is ALSO COUNTED AS AN ABSENCE. Not logging into an online class is COUNTED AS AN ABSENCE. More than two missed seminars will result in failing the course, irrespective of exam or essay results. Students must be on time for class.
2. Active participation (20 points): Students are required to do their best with respect to active participation in seminar sessions. Students are expected to bring their own ANNOTATED copies of the required materials, complete the assigned tasks and exercises (available on UPJS OneDrive/ MS Teams and during the lessons) and participate in class discussions. Throughout the semester, students will be awarded points for actively participating in class discussions. Each student can earn up to 3 active participation points per seminar session.
3. Annotated bibliography (20 points): In Week 4 students will be asked to compile an annotated bibliography, overviewing the critical literature on a specific aspect of fandom or fan fiction. The bibliography will comprise of a minimum of 5 scholarly sources (books or academic journal articles) and a minimum of 600 words. The annotated bibliography will be compiled in class and must be handwritten. Bibliographies must conform to the guidelines of academic writing and must NOT be plagiarised. No part of the bibliography may be written by AI text generators. Using material produced by AI text generators will be considered plagiarism. Plagiarised papers will be awarded 0 points. Students will NOT be given the option of rewriting plagiarised papers.
4. Autoethnographic essay (60 points): Students will be asked to write an autoethnographic essay discussing their personal experience as a fan. Within the essay, students will attempt to place their personal experience into the context of the academic debate on fandom (fan studies). The essays may have a visual component. The essays will be submitted twice: a first draft (deadline: April 6, min 500 words, 15 points) and a final draft (deadline: Year 1 and 2 students: May 11, Year 3 students: April 23, 1000-1200 words, 45 points). Students will perform a peer review of each other's essays in Week 9. Details on the content and form of the essay will be provided during the course. The essays must conform to the guidelines of academic writing and must NOT be plagiarised. No part of the paper may be produced by AI text generators. Using material produced by AI text generators

will be considered plagiarism. Plagiarised papers will be awarded 0 points. Students will NOT be given the option of rewriting plagiarised papers.

To pass the course, the SUM of all points (active participation + annotated bibliography + autoethnographic essay) must be no less than 65 points.

Learning outcomes:

Food is one of the few things we cannot live without. No wonder then that people across continents and throughout history have always talked and written about it. Food is by no means mere fuel that gives our body energy to conduct other, more important tasks. On the contrary, it is full of symbolic and cultural meanings, it is vital to our sense of identity, closely linked to gender roles, environmental issues, or politics. In addition, food is closely tied to pleasure and even to art. In this course, students will learn about these more abstracts meanings associated with food: they will study the metaphorical, symbolic, and political roles of food. The course will focus on how food is presented in fictional, as well as non-fictional literary texts, and on how these texts reflect the social reality within which they were produced. Students will familiarize themselves with various genres of food writing, which they will critically analyse during the seminars. Moreover, students will be encouraged to situate and understand their own daily food consumption in a broader socio-cultural context.

Brief outline of the course:

WEEK 1: Introduction. Food studies - the basics of the field. Is there food in literature? Is there a literature of food? And why should I care?

WEEK 2: Food as a metaphor: a discussion of some literary classics

--> Reading: Gopnik, A.: "What's the Point of Food in Fiction?" In: The New Yorker.

WEEK 3: Food and identity: in literature and beyond

--> Reading: Gardner Burt, K. "Perspectives: Food and Identity" In: Food Studies: Matter, Meaning, Movement.

WEEK 4: Recipes as art, memory, politics: the personal manuscript cookbook

--> Reading: Theophano, J. "Introduction" to Eat My Words: Reading Women's Lives Through the Cookbooks They Wrote.

--> Extra materials: If you have your own (or your mum's or your nan's) personal manuscript cookbook and are willing to share, please bring it to class this week.

WEEK 5: Food memoirs: creating meaning through the senses

--> Reading: Waxman, B. F.: "Food Memoirs: What They Are, Why They Are Popular, and Why They Belong in the Literature Classroom"

WEEK 6: Food journalism as activism in a globalized food chain

--> Reading: Pollan, M. "Introduction: An Eater's Manifesto" In: In Defense of Food: An Eater's Manifesto.

WEEK 7: The contemporary foodie novel

--> Reading: H. Kashiwa "The Kamogawa Food Detectives"

– 1ST DRAFT OF SEMINAR PAPER DUE: MARCH 30
WEEK 8: First draft peer review, food journals
--> Extra materials: Please bring your printed out seminar paper drafts to class this week.
WEEK 9: Food writing in the digital age: the paradoxes of the Instagram meal
--> Reading: Walsh, M. J. "Clean eating and Instagram: purity, defilement, and the idealization of food" In: Food, Culture & Society.
WEEK 10: TUTORIALS – NO CLASS – FINAL DRAFT OF ESSAY DUE: APRIL 20
WEEK 11: Group discussion and final feast
--> Extra materials: For our final session, feel free to bring any food and (non-alcoholic) drink you would like to share with your classmates. Discussions conducted around a table full of food are always the most fruitful (pun intended!).

 Course method: present

Number of ECTS credits: 2

Recommended semester/trimester of the course: 4.

Course level: I.

Prerequisities: KAaA/FRAN1/07

Conditions for course completion:
Two tests are intended for weeks 7 and 14. The tests will verify students' knowledge of materials covered during seminars and assigned for home preparation. In order to pass the course, the sum of the scores from the two tests must be at least 65%. There will not be any re-take tests. If a need arises to change the date of the test due to holiday or absence of a lecturer, the students will be informed well in advance through the official website of the Department/by email. Regular and active seminar attendance is required; more than two absences will make it impossible for the lecturer to assign a final grade. If a student is not prepared, he/she will be considered absent. Should the students fail to bring their own copy or a completed home assignment for a particular seminar, they will be asked to leave the classroom. Students shall respect their distribution into individual seminar groups.
Assessment: Test No. 1. - 50% Test No. 2. - 50% Total: 100%

Course level: I.

Prerequisities:

Conditions for course completion: This subject is assessed based on continuous assessment. The continuous assessment consists of five parts: active participation, reading journal, group presentation, AI essay review, and seminar paper. Details about the form and content of the reading journals will be discussed in the introductory meeting in Week 1 of the semester. All student papers must conform to the guidelines of academic writing and must NOT be plagiarised. No part of students' work may be produced by AI text generators/text editors. Using material produced by AI text generators/editors will be considered plagiarism. Plagiarised papers will be awarded 0 points. Students will NOT be given the option of rewriting plagiarised papers. To pass the course, the SUM of all points (active participation + reading journal + group presentation + AI essay review + seminar paper) must be no less than 65 points. Grading scale: Mark % A 93–100 B 86–92 C 78–85 D 72–77 E 65–71 FX 64-0

Learning outcomes: This course introduces to students a selection of texts from modern and contemporary Slovak literature with the aim of analysing the role of gender as a social category in these texts. The course is intended as a thematic and chronological continuation of the Slovak literature curriculum covered in standard high school courses. For this reason, the course focuses on 20th and 21st century literature and on texts by lesser known or non-canonical authors, with an emphasis on works by female authors. The course is designed to expand the students' theoretical knowledge in the field of literary studies and in the history of Slovak literature, but also to develop various practical skills: reading comprehension, textual analysis, or critical thinking skills.

Brief outline of the course:

Compulsory readings for each seminar will be available in advance via MS Teams. Students are required to read the relevant texts before each seminar and a copy of the reading materials with them to class.

SEMINAR TOPICS:

Gender as an analytical category; Women in society, women in literature; Herstory in Slovak; Feminism, realism and hyperrealism; Cookbooks as literature; Contemporary poetry I: muses and lyrical subjects; Contemporary poetry II.: rap and slam; Gender and genre: noir and romance; (Mommy)blogging and digital literature; Men, women, other: queer literature in Slovakia

Recommended literature:
COMPULSORY READING:

Students must read the seminar readings available in MS Teams before each seminar.

In addition, each student must choose and read ONE of a selection of compulsory books.

Course level: I.

Prerequisities:

Conditions for course completion: To successfully complete the course, students are encouraged to perform well on two levels of assessment: continuous and final. Continuous assessment requires active participation and performance in each lesson, including participation in discussions based on reading required texts and watching assigned films. Students are expected not only to engage with individual texts/films but also to evaluate the author's message, recognize the potential implications of the text within historical contexts, identify different perspectives, and make inferences about the authors' messages. Students are also highly encouraged to challenge the arguments presented in the texts/films. Unprepared students who have not read/ watched the assigned materials prior to each class will be marked as absent. Continuous assessment also includes two tests: the Mid-term test covering topics 1-5 and the End-of-term test covering topics 6-11. Each student must achieve a combined score of at least 65% to be eligible to take the Final exam. The final assessment is solely determined by the student's performance during the final in-person exam, which takes the form of a discussion on selected topics. To perform successfully, students will be asked to determine and define key concepts related to a chosen topic, relate these concepts to individual information sources, and synthesize the overall information. Students will be encouraged to communicate, organize, and synthesize information from various sources in order to fully support their arguments with clarity and depth. Students whose performance is deemed unsuccessful, indicated by fragmented or inappropriate communication of information from sources, will not complete the task and will not receive credits. The exam will take place during the designated exam period (Jan-Feb). Two retakes are allowed, with the most recent score always counting. The instructor will post the exam dates on the AIS platform at the beginning of December, and students will need to sign up for the exam well in advance through AIS. Any registration changes must be made at least 24 hours before the exam. Depending on the pandemic situation, the oral exam will be conducted either in contact classes or online. Students who fail to achieve the required minimum on the Mid-term and End-of-term tests have failed the course and will not proceed to the final exam. Attendance:

Students are expected to attend each class according to the schedule, including in the online environment. Transfers among groups are not allowed. If a student misses three or more classes, they will not receive credits for the course, regardless of their overall results.

The course is currently conducted in person; however, the format of individual classes may be subject to changes due to possible precautions resulting from the Covid-19 pandemic. If the pandemic situation changes, the course will continue in an online format via MS Teams for lectures and individual classes.

Exam Assessment Criteria:

Students are advised to consider the following evaluation criteria to assess their preparation for the Final exam. Students will be evaluated based on their ability to communicate and organize information from primary and secondary sources according to the following requirements:

A-B:

The student can effectively communicate and synthesize information from primary sources, explaining their relevance within the historical context with clarity and depth

C-D:

The student can communicate and organize information from the source but has not yet fully synthesized the acquired information with the historical context.

E:

The student communicates information from sources, but it is fragmented or used inappropriately (e.g., misquoted, taken out of context, or incorrectly paraphrased).

Fx:

The student cannot effectively communicate information from sources or communicates incorrect information.

The grading scale for this compulsory course for BASb, BASb (in comb.), AJEIEb, AJFJEIEb, and AJNJEIEb is:

A 93-100%

B 86-92%

C 78-85%

D 72-77%

E 65-71%

FX 64 and less

Learning outcomes:

The course serves as an introductory course for undergraduate students in American Studies, providing an overview of key themes that have shaped American culture since its discovery. We will delve into the perspectives of influential figures in American history, exploring how they conceptualize their nation through various mediums such as fiction, sermons, poetry, and film. These diverse writers and thinkers, representing different racial, ethnic, class, and gender backgrounds, will share narratives about pivotal moments in American history, encompassing both triumphs and shortcomings, as well as the connections between the past, present, and future.

The primary focus will be on reading a wide range of primary sources, including short pieces and selected excerpts from longer works, to develop a comprehensive understanding of American culture. Analyzing these primary sources and situating them within their historical context is crucial for gaining insights into individual perspectives. This approach helps students acquire information literacy skills and encourages them to evaluate the significance of selected chapters in relation to the topic, which are essential prerequisites for developing critical thinking skills.

The analysis of primary sources entails examining key arguments and assessing their relevance in comparison to historical contexts and the overviews provided by historians and thinkers in secondary sources. This analysis enables students to critically and comprehensively identify and describe pertinent information necessary for a thorough understanding of individual topics.

Additionally, it encourages students to question arguments, counter-arguments, and the viewpoints of individual authors, commentators, and interpreters. The contributions of these individuals to the understanding of various topics are historically considered crucial.

The course overview structures individual topics in a way that motivates students not only to explore the themes within their historical relevance but also to observe, assess, and analyze their implications for contemporary developments in American society. As a result, students should be able to consider the specific complexities of the discussed issues and, in addition to demonstrating their understanding, acknowledge the limitations of individual perspectives (historical, cultural, and political). They should also be able to synthesize historical evidence with the latest perspectives on various issues.

Each topic further encourages students to construct their own arguments based on informed evaluations of provided evidence, including opposing views. It also prompts them to define consequences and implications in order to draw meaningful conclusions.

Prerequisities:

Conditions for course completion: Continuous Assessment: • Regular Class Attendance   Students are allowed to miss no more than 2 seminars for whatever reason, also in the online environment. Please reserve these for when you are sick or have other serious reasons to be absent since you only have these 2 options and no more. Once you have missed more than 2 seminars (contact or online), you will not be allowed to continue the course and obtain the credits. Should anyone come unprepared, he or she will be asked to leave and considered absent from the seminar. The same applies to failure to participate in class activities and discussion. Students are expected to complete their readings prior to each class and bring a copy of readings with them to class.   • Tests   Students will write two tests (in week 7 and in week 13) which will cover materials assigned for home preparation, materials discussed in seminars and lecture materials. The test will be written in contact classes, if the situation allows. However, changes may apply according to the pandemic situation. In case of bad pandemic situation, the tests will be written via online platform. The SUM of the scores from these two tests must be AT LEAST set minimum for their study group (65% BASb komb; AJEIEb) in order for a student to be awarded the final mark.   Final Assessment 100% = test 1 (50%) + test 2 (50%)   Two written tests taken during weeks 7 and 13, covering materials assigned for home reading, discussed in seminars and lectures. There are no retakes so please keep this in mind and do not ask for any, official or unofficial.   Grading policy: Scale for BASb komb (double majors); AJEIEb and AJEIEb komb: A 100-93% , B 92-86%, C 85-78%, D 77-72%, E 71-65%, FX 64 and less

Learning outcomes: Course Description: This course introduces basic topics and concepts of British society, culture and institutions, many of which will be later studied in greater detail in separate courses. The topics include geography, politics, social and cultural issues.   Learning Outcomes: By the end of this course, student will be able to:

• understand and explain basic concepts of British Studies
• compare these with Slovak context
• apply this theoretical knowledge to understanding and analysis of simple media texts

Every student MUST have their own copy of O'Driscoll's book.

If you have any questions, do not hesitate to talk to your instructor before or after classes or, preferably, during office hours. Do not send email unless absolutely necessary and remember that in addition to teaching and preparing for classes, we have many other duties which make it impossible for us to check our emails constantly and to reply within 24 hours. Before asking a question related to the organization of the course, assessment etc., make sure it has not already been answered on the department website, in the course syllabus or in class.

Course ID: KAaA/ INLG/09	Course name: Introduction to Linguistics

Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present

Number of ECTS credits: 4

Recommended semester/trimester of the course: 1.

Course level: I.

Prerequisities:

Conditions for course completion: The course consists of lectures and seminars. For both lectures and seminars (in any form), students are supposed to be present on time not to hinder the fluency of the teaching process. If a student fails to attend a lecture/seminar it is their duty to obtain the respective information from their colleagues. Students are not allowed to record either lectures or seminars. If the situation prevents us from the contact form of lectures, there will be a switch to the online form. In the case of the online form of lectures, the tutor of the course will create a meeting in MS Teams to which all students will be invited. The program of lectures will not change (see the table below). If any situation prevents conducting of the classes, students will be provided by supplementary material. They are required to read it with comprehension. Consequently, during the meeting mediated by MS Teams (on the day and at the time specified in the regular timetable) students can consult the reading material. Seminars are obligatory for all students. Students are expected to attend each class (in any form) prepared – it means, they read the text assigned for the respective week with comprehension. If the form of seminars is changed from the contact to the online form, the tutor of the course will open a meeting in MS Teams and the seminar will be conducted online without any change of the program. The program of individual seminars is specified in the table below. Summary of students' duties: - to be prepared for each class and test - to have a university email address - to download the MS Teams application - to follow the notice board - to get the books specified as obligatory - to be in touch with colleagues in the case of missed classes - to join classes on time The assessment of the course consists of 2 parts: the continuous assessment and final evaluation. The continuous assessment for the AJEIE and BAScomb study programs consists of the following parts: - 10 short reading comprehension tests (10 minutes) before each seminar (50%). Each test is valued at 5%. Tests cover the topics of the seminars planned on the day of taking them.

- Participation in a research project (50%) will improve the quality of the student's practical knowledge of linguistic research. This way, the students will have priceless first-hand knowledge about carrying out linguistic research. The research project consists of 4 tests. Students are not graded for these tests, the completion of this part of the continuous assessment is based purely on participation. Failing to participate in even one test results in 0 participation in a research project score (which is 50% of the continuous assessment).

The minimum to pass is 65%. It is a condition for the final exam. Since it is a continuous assessment, there is no retake. In the case the students fail to achieve the required percentage in continuous assessment they will not be allowed to take part in the final exam test and they fail the course.

For the final evaluation, students are supposed to participate in an exam. The form of the exam (contact vs. online mediated by MS Teams) will be announced at the end of the semester.

Final evaluation grades: A 93 – 100; B 86 – 92; C 78 – 85; D 72 – 77; E 65 – 71; FX 64 and less.

In the case of the online form of any of the tests, students are expected to observe the following regulations:

Students are free to choose the preferred mobile equipment for this purpose (mobile phones, tablets, laptops, etc.) but they are responsible for the readiness of the device to be used (technicalities, charged device, etc.). The tutor of the course will make use of any available option to prevent students from cheating during the test. Any identified cheating attempt will result in 0 test score and the student will be reported to the management of the Department and the Faculty.

Students can take the final exam only of they pass the continuous assessment. The form of the final exam is oral.

Learning outcomes:

Aims and objectives: Mastering fundamental linguistic terminology, basic ideas, conceptions and approaches (Geneva school, Prague School of Linguistics, American descriptivism, Transformational and Generative Grammar), basic methods (synchronic, diachronic), development of language, language types, language levels.

Students are able to implenet the gained knowledge into discussion on language. They are able to participate in a discussion on approaches to a linguistic sign and read linguistic texts with comprehension.

Brief outline of the course:

Due to the present situation, the tutor of the course reserves the right to change the test dates in exceptional cases. Students will be informed at least 24 hours prior to the change.

Prerequisities:

Conditions for course completion:
The condition for passing the course is the realization of a project with the application of neural networks, successful completion of two written tests in the field of neural networks, their basic types, and genetic algorithms, as well as successful completion of the written and oral part of the exam.

Learning outcomes:
The result of the education is an understanding of the basic principles of neural networks and genetic algorithms. The student will gain the ability to apply the acquired knowledge in intelligent data analysis and also work with a selected tool for modeling neural networks.

Brief outline of the course:
1. Basic concept arising from biology. Linear threshold units, polynomial threshold units, functions calculable by threshold units.
2. Perceptrons. Linear separable objects, adaptation process (learning), convergence of perceptron learning rule, higher order perceptrons.
3. Forward neural networks, hidden neurons, adaptation process (learning), backpropagation method.
4. Recurrent neural networks. Hopfield neural networks, properties, associative memory model, energy function, learning, optimization problems (business traveler problem).
5. Model of gradually created network. ART network, architecture, operations, initialization phase, recognition phase, search and adaptation phase. Use of the ART network.
6. Applications of studied models in solving practical problems.
7. Written test I.
8. Motivation to model genetic elements. Genetic algorithm. Application of genetic algorithms.
9. Genetic programming, root trees, Read's linear code. Basic stochastic optimization algorithms: blind algorithm and climbing algorithm. Forbidden search method.
10. Genetic and evolutionary programming with typing, examples of use. Grammatical evolution.
11. Special techniques of evolutionary computations. Selection mechanisms in evolutionary algorithms.
12. Use of genetic algorithms in training neural networks. Artificial life.

Conditions for course completion: Student evaluation is based on three criteria: TWO CONTINUOUS ASSESSMENT TESTS 70%; CONTINUOUS PREPARATION 10% and ACTIVE PARTICIPATION 20%. To receive credits for this course, students must successfully complete two midterm assessment tests; submit their homework regularly and on time and attend every class according to the schedule. Attendance is monitored during online classes too. TESTS make up 70% of the final grade: This course is graded by assigning a value based on a 100-point scale obtained from two credit tests plus points for continuous preparation and active participation. The first midterm assessment test usually takes place during the 6th week of the semester and the second one during the 12th week. However, the dates may change according to the actual situation. The final grade is assigned according to the following scale: And 100-93 B 92-86 C 85-78 D 77-72 E 71-65 FX 64-0 Students who, due to a documented condition, cannot take the credit test at the specified times, should contact the teacher immediately to arrange a replacement test date. CONTINUOUS PREPARATION represents 10% of the final grade (maximum 10 points): Students are expected to prepare assignments for each class by reading and processing the study materials and required literature. Each assignment must be the original work of the author. ACTIVE PARTICIPATION constitutes 20% (maximum 20 points) of the final grade: The student must attend every lesson regardless of whether it is organized face-to-face or online. Students must respect the schedule and come to class on time. Points for active participation will be awarded when the student actively contributes to the learning process during meetings by participating in discussions and professional debates. Volunteer work in extracurricular activities organized by the Department of British and American Studies or another organizational part of UPJŠ, which definitely contribute to the professional development of students, such as lectures and workshops, career week activities, organization of

open doors, language and other knowledge competitions, conferences, Olympiads and other similar activities are fully supported. If these activities are organized at a time when the student has regular classes according to the actual schedule, volunteers will be awarded points for active participation in the class, regardless of their absence.

ABSENCE due to illness

A student absent from class must submit a valid doctor's certificate as soon as possible via e-mail sent to the teacher in PDF format. Homework for missed classes must be submitted no later than the beginning of the forthcoming class the student can attend according to the actual schedule.

In case of emergency, if the student is unable to contact the teacher and send him/her a valid doctor's certificate or is hospitalized, the teacher must be informed by sending an e-mail to the following e-mail address: julius.rozenfeld@upjs.sk as soon as circumstances allow so.

ABSENCE FOR OTHER REASONS

Students who are absent for reasons other than illness, such as serious family reasons or participation in prestigious domestic or international competitions, scientific research, conferences or other similar activities that clearly contribute to the student's professional development, must inform the teacher about these activities in a timely manner.

Regular full-time or part-time employment is not an acceptable reason for missing a class.

Learning outcomes:

The course is focused on the development of language skills and other competencies that are necessary for successful completion of the Test of English as a Foreign Language known by the acronym TOEFL and obtaining the international language certificate TOEFL iBT (i.e. Intenret-Based Test). Students develop the ability to listen with comprehension, speaking, reading and writing through practical exercises and understand the principles of using correct grammar through a variety of topics that may appear in this test. The course also provides a detailed explanation of the processes and recommendations for passing the TOEFL iBT test. By completing the course, students will be able to successfully complete the TOEFL iBT, or equivalent language test.

Prerequisities:

Conditions for course completion: Attendance and Participation: You may miss two classes without penalty. You will fail the course if you miss more than two classes or are late more than three times. Hopefully, you'll be eager to come and eager to speak up in class. Covid will be treated just like any other illness. To be excused from class, you will need a doctor's note. Drafts, Deadlines, and Late Work: Throughout the course, I will encourage you to write multiple drafts of each paper. Writing multiple drafts will improve your writing and take some of the stress out of the final deadline. Ideally, you will have a first draft well before the deadline, so you should always be able to get something in on time. If a paper or draft is late, you may email it to me anytime, but I will reduce the grade by one letter per day. Hard copies are due in class on the day of the deadline. If you cannot attend class on a due date, the paper must be emailed before the start of the class. The final paper can be sent as an attachment or handed in during tutorials. You must complete all of the assignments in order to pass. AI generated material will not be accepted. Continuous Assessment: You will write two short papers and two longer ones. There may also be occasional quizzes. Assignment descriptions are posted on Teams. For each paper, I will break down your overall grade into four categories: Concept, Structure, Language, and Documentation. On your final paper, if you receive an FX in any one of these four categories, you will fail the course. There is no final exam. Papers may not be re-submitted. Paper 1 15% A 93-100% Paper 2 15% B 86-92% Paper 3 30% C 78-85% Paper 4 40% D 72-77% E 65-71%

Learning outcomes: To teach grammatical and rhetorical forms, improve students' research and analytical skills, and clarify the conventions of academic discourse.

Brief outline of the course:

Weekly Schedule:
Week 1 16.9 Introduction.
Week 2 23.9 First assignment due. Writing process.
Week 3 30.9 Essay forms. What makes a good thesis?
Week 4 7.10 Second assignment due. Reasoning
Week 5 14.10 Research & Documentation.

Prerequisities:

Conditions for course completion:
 Student evaluation is based on three criteria:
 CONTINUOUS PREPARATION 60%,
 ATTENDANCE 10%, and
 ACTIVE PARTICIPATION DURING THE LESSONS 30%.
 To receive credits for this course, students must:
 -continuously and timely submit video-recorded speeches on the actual topic of discussion,
 -attend each class according to the schedule (attendance is followed during the online sessions too),
 -actively participate in the discussions, i.e., speak up during the lessons.
 Ordinarily, student coursework is evaluated by letter grades, which are assigned a value based on a 100-point scale gained from the submitted video recordings plus points for attendance and active participation.
 The final mark is assigned according to the following scale:
 A 100-93
 B 92-86
 C 85-78
 D 77-72
 E 71-65
 FX 64-0
 CONTINUOUS PREPARATION constitutes 60% of the final mark.
 During the course, students are required to prepare video recorded speeches of different genre.
 Video-recorded speeches are marked according to the following scheme:
 0/1/2 points for correct presentation of facts and research results,
 0/1/2 points for correct use of academic vocabulary, grammar, and pronunciation,
 0/1/2 points for correct style, tone, register, and fluency.
 Explanation:
 Students are expected to prepare video recorded speeches for each class by reading and processing the study materials and the required literature presented in the course's SharePoint group.
 Formal requirements for the speeches:
 A one-minute speech usually contains 130 words. Students are required to prepare speeches which are minimum 260 and maximum 520 words long, i.e., 2-4 minutes. The speeches must be

video recorded and sent via email to the rozenfeld.julius@atk.sk email address by Saturday 23:00 every week. No late submissions are accepted! Please DO NOT USE any other email address for submitting your speeches! Each video recording must be marked according to the following scheme: WeekX_Surname_Title.

The videos must be in HD quality, 720p, in 16:9 ratio, landscape oriented. Be careful to set up your microphone correctly! The sound recording must be DVD quality, 48kHz. No AI, simulation, or digital avatars are allowed! The videos must be the ORIGINAL work of the student.

Content requirements for the assignment:

Students must present their speeches without reading a script! No PowerPoint or any other presentation tool is required. The content of the speech must reflect the student's readings and research in the actual topic required for the given week. The content of the speech must be a synthesis of various sources (scientific journal articles, documentary films, etc.) in a clear and structured way: highlighting key information and data as well as presenting logical connections between the used data and resources. The submitted speech must represent the student's thorough understanding of the content and the problem area discussed in the reading assignment.

ATTENDANCE constitutes 10% of the final mark.

Students are required to attend each class during the term. Students are assigned 1 point for each class they attend in person.

ACTIVE PARTICIPATION DURING THE LESSONS constitutes 30% of the final mark.

Students will be called out to participate in discussions, argue, present opinions, or comment on other students' opinions during the lessons within the framework of the range of topics listed in this document. For active participation, students can collect maximum 3 points per lesson. The points will be assigned at the end of each lesson if the student speaks up at least 3 times during the lesson.

ABSENCE:

Students who must be absent for illness or reasons other than illness, such as a death in the family or a reason of similar gravity, must contact the lecturer as soon as possible and submit relevant documents that certify the seriousness of the case. The documentation should be scanned as a PDF file and sent via email to the regular institutional email of the teacher: julius.rozenfeld@upjs.sk.

There may be other activities which can validate missing a class or several classes, for example participation in high-quality international competitions, scientific research, conferences, or other relevant activities, which clearly contribute to the professional development of the student but final decision about the validity of the presented excuse fully falls in the lecturer's competency. Students must inform the lecturer about these activities too in a timely manner. Regular full-time or part-time employment is not an acceptable excuse for a missed class.

Pandemic regulations:

Changing pandemic situation requires continuous adaptation. Online sessions organized via Microsoft Teams are the preferred alternative to in-person sessions if necessary. Attendance will be duly followed on online meetings too. Students are required to follow the department's noticeboard and inform themselves continuously about the possible changes!

Learning outcomes:

This course focuses on the development of advanced speaking skills. The primary goal of the course is to prepare students for the successful defense of their bachelor's and master's theses. The course is designed to help students practice prepared formal speeches; spontaneously converse in a group and use academic English; learn the principles of intercultural communication; improve academic grammar together with pronunciation in spoken language; and develop vocabulary corresponding to the needs of academic debates. The course is aimed at developing and improving language skills at a higher level and increasing the language skills of students with a special focus on the use of academic language. The course introduces various academic topics, acquaints students with academic vocabulary and provides systematic practice of phrases and collocations. By completing

the course, students will be able to actively lead a professional debate in English, give a speech to an academic audience and professionally and factually argue in a scientific and academic context.

Brief outline of the course:
1. Facts or opinions?
2. From the general to the specific
3. Logic of speech
4. The language of research
5. Presentation problems
6. Making speech stronger
7. Why does style matter?

 Course type: Practice
 Recommended course-load (hours):
 Per week: 2 **Per study period:** 28
 Course method: present

Number of ECTS credits: 3

Recommended semester/trimester of the course: 2.

Course level: I.

Prerequisities:

Conditions for course completion:
Continuous assessment:
Students will be graded on active attendance and involvement, and two credit tests (in week 6 and week 12). Active participation, completed homework assignments - students are required to do their best with respect to active participation in seminar sessions. Being enrolled in the course means that you intend to positively take and finish the course. Students are expected to make their own copies of the required materials and complete the assigned tasks and exercises. Should you fail to have your own copy or a completed home assignment for a particular class, your presence will not count.
Attendance:
Students are expected to attend each class according to the schedule. No transfers among the groups are allowed. In case students miss three or more classes, also online, they will not receive credits for the course no matter what the overall results are.
Final assessment:
Credit tests - two credit tests (65% pass level) will take place in week 6 and week 12. There will be NO retake test for the students who failed one or more credit tests. The final grade will comprise the sum of gained points of both or more tests and the total sum must make minimum 65%.
The credit tests will include vocabulary and exercises similar to those during the seminar sessions and home preparation.
Final assessment:
The final grade for the course will be based on the following grading scale.
A 93-100%
B 86-92%
C 78-85%
D 72-77%
E 65-71%
FX 64 and less

Learning outcomes:
 Aims and objectives:
The main aim of this course is to develop and improve English vocabulary in the classroom with intermediate to upper-intermediate/advanced level students, and to increase their language competences with a special focus on some aspects of vocabulary learning. The course aims to help

to learn new words and word combinations, functioning as meaningful units with a fixed or semi-fixed form (collocations, phrasal verbs, idioms), and to show that the words can play different roles in a text, and can express a variety of meanings. Contextually based learning is of great importance, and various sources are suggested.

Brief outline of the course:

The course introduces various interesting aspects of English vocabulary learning. It revises useful points of English vocabulary (word classes/families, multi-word units, homonyms, synonyms and antonyms, etc.), familiarizes students with the ways new words are coined, learned, and presented.

WEEK1:
Introduction to the course
WEEK2:
Talking about Yourself (English Vocabulary in Use, 13)
Character and Behaviour (English Collocations in Use, 17)
Topic Vocabulary: People
WEEK3:
Relationships: Positive Aspects AND Problems (English Vocabulary in Use, 15-16)
Taboo Conversation Topics: Questions you can't ask
Topic Vocabulary: Relationships
WEEK4:
Education: Debates and issues (English Vocabulary in Use, 12)
Politically Incorrect Jokes: Is it OK to joke about disabled people, religion, death?
Freedom of the Press
Topic Vocabulary: Thinking and Learning 1
WEEK5:
World Views: Ways of Thinking (English Vocabulary in Use, 41)
National Stereotypes: "They are lazy and dishonest" Blind prejudice, or is there some truth in stereotypes?
Topic Vocabulary: Thinking and Learning 2
WEEK6: Mid-term test
WEEK7:
The News: Gathering and Delivering AND Newspaper Headline Language (English Vocabulary in Use, 54, 100)
Is This News?: What is the News for? To provide facts or to shock and entertain?
Topic Vocabulary: Communication and the Media
WEEK8:
Authorities: Customs and Police (English Vocabulary in Use, 40)
Immigration and Racism: How do You feel about people from other countries coming to live in yours?
Rules Quizz
Topic Vocabulary: Power and Social Issues
WEEK9:
Other Englishes: Language of Gender, Age and Social Class (English Vocabulary in Use, 98-99)
Swearing: Is it OK to swear? What swear words do/could YOU use?
Are you a Woman or a Man Quiz

Conditions for course completion:
1. Attendance - students are expected to attend each class according to the schedule, also in the online environment. No transfers
among the groups are allowed. Students are allowed to miss two classes at the most. Should they miss three or more classes, they will not receive credits for the course no matter what their overall results are on tests. Students must be on time for class or they will be marked as absent.
2. Active participation, completed homework assignments - students are required to do their best with respect to active participation in seminar sessions. They are expected to bring (have) their own copies of the required materials and complete the assigned tasks and exercises. Should they fail to bring (have) their own copy or a completed home assignment for a particular seminar, they will be marked as absent. Students are required to comply with the standard technical requirements of the department during the period of distance learning (as specified on the department website).
3. CONTINUOUS ASSESSMENT – Language skills 2 (LS2) as a subject comprises 3 parts
(1 - reading & speaking, 2 - listening , 3 - grammar) . Students will take 2 credit tests, presumably during tutorial weeks. The date of the test may change. All the three parts (reading & speaking, listening and
grammar) of the subject will be included in the tests. At the end of the
semester, within each part of LS2 separately, your partial scores will be calculated based on the results of partial credit tests. In order to pass one part of LS2, students need to score minimum pass mark as set for their study group.
Final assessment and evaluation:
The student will receive final credits when getting minimum pass mark as set for respective study groups for each of the three parts of LS2. In such case the final credits will be calculated as an average of all percentage results from all LS2 parts. If students fail one part of LS2, they fail the whole subject and cannot receive any credits. There will not be any re-take tests for those who failed to achieve the pass level.

Learning outcomes:
 Students understands basic lexicology concepts, theories and research methods. They are acquainted with the internal structure of words, their internal and external relations and the relation between lexicology and other linguistic disciplines.,

Brief outline of the course:
 1.The scope of lexical semantics, terminology, Saussure's semiology, semiotic triangle, Peirce's approach, types of signs.
 Scope of word-formation. Hans Marchand. Clipping, Acronymization, Blending, Gemination, Reduplication.
 2. Principle of compositionality. Defining the lexical units; semantic traits and statuses.
 Compounding
 3.Idioms, collocations and dead metaphors; their transparency and opacity. The principle of scales. Paradigmatic specification of lexical units. Influence of context on the meaning of word. Selection and modulation; promotion and demotion; highlighting and backgrounding.
 Prefixation, suffixation, expansion, transposition, circumfixation, transfixation, infixation, superfixation
 4.Lexical relations: Basic logical relations. Hyponymy, hyperonymy, antonymy, synonymy, homonymy, polysemy, quasi-relations. Semantic co-occurrence restrictions.
 Productivity, Mark Aronoff, Harald Baayen
 5.Lexical fields and lexical configurations. Hierarchies, branching and non-branching hierarchies, transitive and intransitive relations, proportional series, helices,
 Constraints on productivity
 6.Componential analysis; relational components; typology of features – denotative, connotative, deictic, inferential, relational, transfer, distinctive features.
 Lexicalization
 7. Cognitive semantics – basic units: symbolic, phonological, and semantic units, conceptualization, subjectivist view of the meaning, imagery, schemas and categorization, usage event, compositional semantic value vs. actual contextual semantic value.

Transformationalist theories of compounding
8. Fixed meaning assumption; fuzzy meaning assumption; Prototype theory; Family resemblance; Semantic shift: metaphor and metonymy.
Onomasiological theory of word-formation I
9. Corpus-based pragmatic approach to lexical semantics, semantic reversal,, form and meaning of a linguistic unit, ambiguities, categories of co-selection: obligatory categories: core and semantic prosody; optional categories: collocation, colligation, semantic preference.
Onomasiological theory of word-formation II
10. Meaning predictability of complex words – the multiplicity of factors influencing the interpretation of novel complex words; extralinguistic and intralinguistic factors; experimental approach.
Competition in word-formation
11. Creativity and meaning interpretation.
Creativity and word-formation
12. Revision.

Conditions for course completion:
Two tests, completion of individual and group homework. Assessment is given on the basis of semestral evaluation and examination test. The ability to solve selected types of problems (without context/with context) also in combination with mathematical software is evaluated. Furthermore, the understanding of concepts and relationships between them (conceptual questions / tasks) is taken into account. A total of 100 points can be obtained (60 points during the semester and 40 points for the exam test). In addition, it is possible to obtain bonus points for various activities (solving bonus tasks, active approach to the subject during the semester ...). A minimum of 25 points (out of a possible 60) and the submission of a sufficient number of individual assignments according to the instructions are required from the semester.

Learning outcomes:
To obtain basic mathematical knowledge about the divisibility of integers, congruences, number systems, vectors, matrices and determinants, as well as the functions of one real variable. To get acquainted with the applications (including the information technologies) of some fundamental mathematical concepts. To learn to work with mathematical software and together with the acquired knowledge to use it in solving various types of problems.

Brief outline of the course:
Introduction to the teaching system, technologies and mathematical software (1 week). Integers and divisibility, prime numbers and congruences, applications of congruences and residue classes - basic properties of integer divisibility, canonical decomposition of a number, greatest common divisor and least common multiple of numbers, Euclidean algorithm, solution of (linear) Diophantine equations and (linear) congruences, addition and subtraction of residue classes (3 weeks). Number systems and conversions between them - positional number systems and conversions between them, arithmetic operations in different number systems (1 week). Vectors, matrices, determinants, their applications and introduction to analytical geometry - vector and matrix operations, scalar and vector product, angles of vectors, calculation of matrix determinants (from definition, Saruss rule, row/column expansion), inverse matrix determination (using determinant and adjoint matrix, Gaussian-Jordan method), solution of linear systems equations (Gaussian elimination method, Cramer's rule, substitution/addition method), eigenvalues/eigenvectors of a matrix (3 weeks). Introduction to (elementary) functions - domains and graphs of functions, basic properties of

functions (boundedness, monotonicity, parity, periodicity), operations with functions, inverse function, basic properties of elementary functions (polynomial, power, exponential, logarithmic, trigonometric, cyclometric) (2 weeks).

Prerequisities: ÚMV/MTI4a/22

Conditions for course completion:
Two tests, completion of individual and group homework during the semester. Assessment is given on the basis of semestral evaluation and examination test. The ability to solve selected types of problems (without context / with context) also in combination with mathematical software is evaluated. Furthermore, the understanding of concepts and relationships between them (conceptual questions / tasks) is taken into account. A total of 100 points can be obtained (60 points during the semester and 40 points for the exam test). In addition, it is possible to obtain bonus points for various activities (solving bonus tasks, active approach to the subject during the semester ...). A minimum of 25 points (out of a possible 60) and the submission of a sufficient number of individual assignments according to the instructions are required from the semester.

Learning outcomes:
Gain basic knowledge of differential and integral calculus of functions of one real variable. Also get acquainted with the functions of several (mostly two) variables.

Brief outline of the course:
Differential calculus of functions of one real variable - limits and continuity of functions, derivatives of functions, applications of derivatives of functions (4 weeks). Integral calculus of functions of one real variable - primitive function, substitution method, per partes, applications of a definite integral, improper integrals (3 weeks). Functions of several (two) variables - domains and visualization, function limits, partial derivatives, determination of (local) extremes of functions (3 weeks).

Prerequisities:

Conditions for course completion:
To successfully complete the course, students are encouraged to perform well on two levels of assessment: continuous and final.
Continuous assessment requires active participation and performance in each lesson, including participation in discussions based on reading required texts and watching assigned films. However, students are expected to not only engage with individual texts/films but also to evaluate them, evaluate authors' messages, recognize the potential implications of the text within historical, cultural and social contexts, identify different perspectives, and make inferences about authors' messages in the form of a short written assignments prepared on a weekly basis. Students are also highly encouraged to challenge arguments presented in the texts/films. These assignments will be rewarded with 30% of the overall evaluation. Unprepared students who have not read/watched the assigned materials prior to each class will be marked as absent and their performance evaluated with an Fx.
To complete the course, students must also successfully pass the essay-question test at the end of the course. The test comprises 70% of the final grade.
Attendance:
Students are expected to attend each class according to the schedule, which applies to online classes too. No transfers among the groups are allowed. Should students miss three or more classes, they will not receive credits for the course no matter what their overall results are.
The course is currently conducted in person; however, the format of individual classes may be subject to changes due to possible precautions resulting from the Covid-19 pandemic. If the pandemic situation changes, the course will continue in an online format via MS Teams for lectures and individual classes.
Assignment Assessment Criteria :
Students are advised to consider the following evaluation criteria to assess their preparation for assignments. Students will be evaluated based on their ability to communicate and organize information from primary and secondary sources according to the following requirements:
A-B
The student can effectively communicate and synthesize information from primary sources, explaining their relevance within the historical context with clarity and depth
C-D:

The student can communicate and organize information from the source but has not yet fully synthesized the acquired information with the historical context.
E:
The student communicates information from sources, but it is fragmented or used inappropriately (e.g., misquoted, taken out of context, or incorrectly paraphrased).
Fx:
The student cannot effectively communicate information from sources or communicates incorrect information.
FINAL EVALUATION SCALE :
A 93-100%
B 86-92%
C 78-85%
D 72-77%
E 65-71%
FX 64 and less

Learning outcomes:
Course content:
The course presents an overview of American cinema, focusing primarily on Hollywood production (both classic and contemporary). Covered topics include Hollywood style, film techniques, studio and star system, and the analysis of their relationship to society.
Aims and objectives:
The main objective of this course is to provide students with a set of information that will help them develop and/or improve essential analytical skills in interpreting contemporary American cinema. The course will enable students to acquire knowledge of significant developments in American cinema,
from silent films to the present-day cinema, and explore their connections with broader socio-historical context. It also attempts to increase students' appreciation of diverse styles and genres and help them recognize how some of the popular genres express social and cultural tensions.
One of the main aims of this course, however, is to enable students to question their role as passive spectators and increase their ability to watch films actively and critically.

Learning outcomes:
To develop and improve essential language skills (speaking, listening, reading) in the classroom with upper-intermediate/advanced level students and to increase their language competences with a special focus on how to listen and how to use medical English. Some aspects of medical English translation into Slovak and vice versa are presented.

Brief outline of the course:
The course introduces various interesting topics, e.g. language of medicine, origin of medical terminology, history of medicine, modern medicine, medical practitioners, human body, medical examination, common diseases, their symptoms and treatment, first aid procedures, etc. The course provides useful points of medical English pronunciation, grammar, language functions and translation, familiarises students with new vocabulary, provides systematic practice of common medical terms, medical collocations, phrasal verbs, prepositional phrases, idioms, false friends, metaphors, etc

Prerequisities: KAaA/INLG/09

Conditions for course completion: Oral exam 100%

Learning outcomes: The student will master the basic morphological concepts, research methods and methods in the subject area. He / she will gain knowledge about the internal structure of words and their internal and external relations as well as about the connection of morphology with other linguistic disciplines.

Brief outline of the course: 1. Theory of sign (Saussure, Peirce, Horecký,Ogden & Richards) 2. Basic terminology. Units of morphology, allomorphs and allomorphy, free and bound morphemes, stem, root, diamorph, paradigm, prefix, suffix, infix, interfix (empty morph), circumfix, transfix, clitic (proclitic and enclitic), cranberry morph, suppletion; cumulative exponence, extended exponence, syncretism, zero morpheme, empty morph, replacement morphs apophony, combining forms, phonesteme 2. The scope of morphology. Criteria for the distinction between inflectional morphology and derivational morphology 3. Morphology vs. syntax 4. Morphology/phonology interface Allomorphy, assimilation and types of assimilation (labial assimilation, voicing assimilation, total assimilation), replacement by weakening or strengthening (T-lenition, palatalization and affrication, D-lenition; vocalization); vowel replacement; Deletion rules (consonant deletion – Sdrop, X-drop, N-drop, Vowel deletion (V-drop in hiatus, syllable syncopation; expansion rules (Uepenthesis and P-epenthesis). Fossilized allomorphy, rhotacism in Latin and Germanic, Metathesis, False cognates (boundary misplacement,pseudosuffixes). 5. Level-ordering morphology 6. Natural Morphology 7. Bybee's theory of morphology 8. Beard's Lexeme-Morpheme-Base Morphology 9. Morphological Typology and language universals 10. The notion of category, primary, secondary, and functional categories, classification of wordclasses - Plato, Aristotle, the Alexandrians, Jespersen, Lyons, categorial transition – prototype theory – cline – fuzzy edge. 11. Noun and its categories: case - Possessive Form; gender – natural vs. formal gender, number - pluralia and singularia tantum 12. Verb and its categories: tense Jespersen's conception of time and tense, Lyons and Spencer; tense and aspect, perfective and progressive aspect, the notion of finitude – finite and non-finite; mood – indicative, imperative, conditional, subjunctive, the relation between mood and sentence type, inductive (general truths), promissive. 13.  Student obtains base knowledge about the properties and internal processes of operating systems, their structure and concept. By completing the course, the student will gain a comprehensive picture of the life cycle of processes, their planning and communication between them. He will also gets a knowledge of physical, logical and virtual memory management and understands synchronization as well as phenomena such as deadlocks or starvation. The acquired knowledge will enable the student to understand the behavior of the operating system, which leads to gaining the ability to intervene with running operating system, eventually optimize it.

Brief outline of the course:
 1. History, development, user interface and structure of operating systems.
 2. Kernel of the operating system and system calls, implementation.
 3. Process - definition, structure, life cycle, implementation.
 4. Process - planning algorithms, multiprocessing.
 5. Process - inter-process communication.
 6. Thread - definition, structure, life cycle, implementation.
 7. Synchronization of processes and system resources.
 8. Deadlock and starvation - prevention, detection, recovery.
 9. Memory - definition, types of memories, usage, volatility, DMA.
 10. Memory - allocation strategies, paging, fragmentation.
 11. Memory - MMU, TLB, MPU, segmentation.
 12. Memory - virtual memory management strategies.
 13. File system - definition, structure, implementation.
 14. File system - file, directory, attributes, access control, ACL.

Conditions for course completion: CONTINUOUS ASSESSMENT: 1. Attendance: Attendance is compulsory in both online and in-person classes. Each student is allowed 2 absences at most. Important information regarding the final evaluation and the course in general will be discussed during the introductory session, therefore, failing to attend the Week 1 introductory session is ALSO COUNTED AS AN ABSENCE. Not logging into an online class is COUNTED AS AN ABSENCE. More than two missed seminars will result in failing the course, irrespective of exam or essay results. Students must be on time for class. 2. Active participation (20 points): Students are required to do their best with respect to active participation in seminar sessions. Students are expected to bring their own ANNOTATED copies of the required materials, complete the assigned tasks and exercises (available on UPJS OneDrive/ MS Teams and during the lessons) and participate in class discussions. Throughout the semester, students will be awarded points for actively participating in class discussions during the seminars. Each student can earn up to 3 active participation points per seminar session. 3. Reading journal (30 points): Students are required to write two two-sided reading journal entries. The required length of each reading journal is 250-300 words. Each journal should relate to one of the texts discussed during the seminars. Detailed instruction for writing the reading journals will be provided during the introductory session. The journals must conform to the guidelines of academic writing and must NOT be plagiarised. No part of the journals may be produced by AI text generators/text editors. Using material produced by AI text generators/editors will be considered plagiarism. Plagiarised papers will be awarded 0 points. Students will NOT be given the option of rewriting plagiarised papers. 4. Credit Test (50 points): Students will sit a written credit test in WEEK 13 There are NO RETAKES. If you are unable to attend the credit test for valid reasons (e.g., medical emergency), contact the teacher as soon as possible, or in advance if possible. To pass the course, the SUM of all points (active participation + reading journals + credit test) must be no less than 65 points. Grading scale: Mark % A 93–100 B 86–92

C 78–85
D 72–77
E 65–71
FX 64-0

Learning outcomes:

This course aims at presenting the students with a new point of view on a topic as familiar as children's literature, and consequently attempts to encourage them to adopt a critical attitude towards all, even well-known and seemingly straightforward, areas of life. The course consists in analysing specific fairy tales and other texts falling under the category of "children's literature" in order to uncover the mechanisms which these texts employ to socialise children, reflect and/or influence family dynamics, construct identities, sustain traditional gender roles, or, on the contrary, deconstruct them.

Brief outline of the course:

SEMINARS OUTLINE:

WEEK 1: Introduction. Basic information: assessment, readings, etc. How to write a two-sided reading journal. Adults reading literature for children.

WEEK 2: What is "children's literature?" Basic notions, historical overview, and the problem of "the canon of children's literature."

--> Readings: Lesnik-Oberstein, K. "What is children's literature? What is childhood?"; Watkins, T. "The Setting of Children's Literature: History and Culture"

WEEK 3: "The Impossibility of Innocence:" ideology in children's literature.

--> Readings: "ideology"; "innocence"; Winnie-the-Pooh (A. A. Milne)

WEEK 4: Critical approaches to children's literature: psychoanalysis, reader response theory, feminism.

--> Readings: "aesthetics"; "gender"; "theory"; Snow White; The Bloody Chamber (Angela Carter)

WEEK 5: Fairy tales and gender roles: constructing an ideal femininity.

--> Readings: "body"; "girlhood"; "tomboy"; Sleeping Beauty; The Famous Five (Enid Blyton)

WEEK 6: Fairy tales and gender roles: boyhood and masculinity?

--> Readings: "boyhood"; "identity"; Tarzan (Edgar Rice Burroughs); Harry Potter (J. K. Rowling); Captain Underpants (Dav Pilkey)

WEEK 7: TUTORIALS - READING JOURNAL 1 DUE: OCTOBER 31

WEEK 8: Socialisation, family, education, and the purpose of children's literature.

--> Readings: "childhood"; "education"; Mrs. Piggle-Wiggle (Betty MacDonald), The Grimm brothers

WEEK 9: READING WEEK (Time to get a head start on the readings for the remainder of the semester)

WEEK 10: Children's literature and national identity.

--> Readings: "empire"; "postcolonial"; "race"; Little Henry and His Bearer (Mary Martha Sherwood); The Jungle Book (Rudyard Kipling)

WEEK 11: Subversive fairy tales. Stereotypical versus non-conformist identities in children's literature.

--> Readings: "censorship"; "queer"; "postmodernism"; Little Women (Louisa May Alcott); Matilda (Roald Dahl)

WEEK 12: Globalisation and contemporary children's literature.

--> Readings: Bullen, E. and K. Mallan: "Local and Global: Cultural Globalization, Consumerism, and Children's Fiction" + a children's story of students' choice

WEEK 13: CREDIT TEST

WEEK 14: TUTORIALS - READING JOURNAL 2 DUE: DECEMBER 18

Learning outcomes:
Course is designed to give theoretical and practical knowledge of English phonetics and phonology. It provides a comprehensive introduction to phonetic and phonological theory and terminology, includes development of skill in sound identification and discrimination and processes related to speech production.

Brief outline of the course:
1.Introduction to phonetics and phonology.
Phonetics as a linguistic discipline - sound, phonological level – phoneme, history of phonetics and phonology – phonetic and phonological research
2.Accents of English – Received Pronunciation (RP), BBC pronunciation, Estuary English
3. The production of speech sounds I.
Respiration (egressive airstream), larynx – anatomy and physiology, voicing
4. The production of speech sounds II.
Articulators above the larynx – passive and active, place and manner of articulation
5. English consonants I.
Plosives,fricatives and affricates
6. English consonants II.
Nasals and other consonants
7. English vowels.
Cardinal vowels, English short and long vowels, diphthongs, triphthongs
8. Syllable.
Nature of the syllable, structure of the English syllable, syllable division
9. Stress in English.

The nature of stress, levels of stress, placement of stress within the word
10. Aspects of connected speech.
Rhythm, elision, linking, assimilation
11.Intonation of English I.
Tone, tone-unit, the structure of tone-unit
12.Intonation of English II.
Functions of intonation – accentual, attitudinal, grammatical, discourse
13.Phonology, distinctive features of English phonemes
Phoneme, allophone, distinctive features of English vowels and consonats

Conditions for course completion: Assessment of Study Results: The evaluation of study results for the course is conducted through continuous assessment. Active participation in seminars (a maximum of 2 absences is allowed) accounts for 20%; a presentation during the exercises on a pre-assigned date accounts for 30%; and the preparation and submission of a group year-long methodological guide on Positive Psychology accounts for 50%. Final Grading Scale: A: 100 – 90% B: 89 – 80% C: 79 – 70% D: 69 – 60% E: 59 – 50% FX: 49% or less – failed and must revise the assignment where a low score was obtained.cademic information system of the UPJŠ.

Learning outcomes: Knowledge: Students will gain basic knowledge about the origins, foundations, and applications of Positive Psychology as a new and dynamically developing field of psychology. They will become familiar with research in this area and various perspectives on personal well-being, happiness, and life meaning. They will acquire an overview of the main theoretical approaches in Positive Psychology and their application in the context of individuals and society, with an emphasis on their use in educational settings. Skills: Students will develop the ability to independently and critically address current topics in Positive Psychology, such as positive emotions, interpersonal relationships, hope, optimism, gratitude, and wisdom. They will learn to apply Positive Psychology principles in designing programs aimed at promoting personal well-being and developing positive traits, which can be utilized in working with children and youth in school environments. Competencies: After completing the course, students will be able to effectively apply the principles of Positive Psychology in educational contexts, such as fostering positive interpersonal relationships and developing optimism and gratitude in students. They will be prepared to

participate in the creation and implementation of programs focused on personal development and mental well-being, contributing to the creation of a positive and supportive school environment.

Learning outcomes:
- Know brief history of computer, classification and construction principles of computers of von Neumann type.
- Understand relation between real numbers, integers and their binary representation as well as be able to perform basic arithmetic and logic operations over binary represented numbers.
- Learn basics about logic gates, combination and sequence circuits and their structure. Understand principles of how basic circuits realize arithmetic-logic unit and other parts of computers e.g. memory.
- Know principles of communication of processor and other devices via interruptions and direct memory access.
- Get idea of device drivers, device controllers and their functionality.

Brief outline of the course:
1. Computers of von Neumannovho type, brief history of computer science.
2. Encoding of integers, real numbers and arithmetic operations. Encoding of symbols.
3. Logic functions and their realization and optimisation.
4. Combination circuits. Realization of basic functional and control elements on computer circuits.
5. Arithmetic logic unit ant its realization.
6. Sequential circuits, memory cell, organization of memory matrix, types of memories.
7. Machine cycle.
8. Types of instruction and instructions sets.
9. Instruction cycle and processing of instructions.
10. Memory and memory subsistem.
11. Communication between processor and peripheral devices. Input output devices, mechanism of interruption in computer, direct memory access. Functionality of device drivers. Device controllers and functionality.

Course ID: ÚINF/ PRS/15	Course name: Programming of robotic kits

Course type, scope and the method:
  Course type: Practice
  Recommended course-load (hours):
  Per week: 3 Per study period: 42
  Course method: present

Number of ECTS credits: 3

Recommended semester/trimester of the course: 3.

Course level: I.

Prerequisities:

Conditions for course completion: Evaluation of independent work with kits and in educational programming environments in solving robotic mini-projects. Creation of own task and presentation of the solution with methodological recommendations.

Learning outcomes: 1. To acquire an overview of robotic sets and robotic programming environments. 2. To acquire skills in constructing and programming robots in selected robotic programming environments.

Brief outline of the course: 1. Robotic kit (Lego Mindstorms EV3 and Spike Prime) - parts, motors, sensors, basics of building mechanical parts of models 2. Programming of robotic models in Lego Education Mindstorms EV3 and Classroom, Lego Education Spike - branching commands, cycles, blocks, events, parallel processes, working with sensors, datalogging. Creating mini-projects (eg explorer, rescuer, parking, Super Cleanup, Life Hacks, Rain or shine?) 3. Programming of robotic models in the block programming environment EV3 and Spike - creation of mini-projects 4. Robotic competitions, ideas for more demanding projects. 5. Creation and presentation of the final project - a programmed robotic model (eg going through a maze, sports, rescuer) with documentation.

Learning outcomes:
An overview of modern technologies for creating dynamic websites. Describing and appliyng the basic principles of creating dynamic web pages. Utilize client-side (JavaScript) and server-side (PHP) web programming technologies. Using relational databases (MySQL) to create application web pages. Know the security risks of dynamic websites and be able to eliminate them.

Brief outline of the course:
1. JavaScript - introduction to JavaScript programming.
2. JavaScript - communication with the user, validation of data in forms using JavaScript.
3. JavaScript - introduction to using the jQuery library.
4. PHP - introduction to PHP programming.
5. PHP - data and control structures of the PHP language.
6. PHP - communication with the user, validation of data in forms using PHP.
7. PHP - object oriented problem solving in PHP language. File manipulation.
8. PHP - User authentication (cookies, session).
9. MySQL - introduction to working with MySQL database system.
10. MySQL - Simple applications using the database for data storage and access.

Conditions for course completion:
 Graded activities during semester: assignments, small exams, midterm, final project.
 Final examination: practical finalterm focused on a complex task.
 Rules to pass the subject: Pass the minimal limit of points for category of homeworks (assignments, final project) and tests (small exams, midterm). Get at least 42% from the finalterm and pass the defined limit of total points for all graded activities.

Learning outcomes:
Get an ability to implement basic Java programs and obtain essential knowledge related to object-oriented programming.

Brief outline of the course:
 1. Introduction to Java and JPAZ2 framework, first Eclipse project, interactive communication with objects using turtle graphics, repeating code in loops, notion of class, object, and method.
 2. For-loops, local variables, variable types, arithmetic expressions, random numbers, random walk, conditions.
 3. While-loop, returning a value from a method, reference and reference variables, debugging.
 4. Primitive and reference types, chars, String objects (including basic algorithms), mouse events, instance variables.
 5. Array of primitive values and array of references, simple array algorithms.
 6. Advanced array algorithms, two-dimensional array.
 7. Exceptions and exception handling, files and directories, writing to text files.
 8. Reading from text files.
 9. Creating classes, encapsulation, getters and setters, constructors and their hierarchy, method overloading.
 10. Inheritance and polymorphism.
 11. Java Collections Framework, ArrayList class, wrapper classes for primitive types and autoboxing, interfaces List, Set, Map and their implementations, methods equals and hashCode.
 12. Access modifiers, abstract classes and methods, creating and implementing interfaces, sorting, static methods and variables.
 13. Creating and throwing exceptions, checked and runtime exceptions, JavaDoc, Maven.

Learning outcomes:
Ability to design and implement more complex applications with a three-tier architecture, relational database and standard design patterns. The ability to create a REST server in the Spring boot framework and a simple Angular application that can communicate with this server.

Brief outline of the course:
1. Identification of Classes, Methods and Instance Variables, Entities, Unit Tests and JUnit.
2. Introduction to JavaFX, FXML, Scene Builder, Controller.
3. Model-View-Controller design pattern, Observable and Property classes, model of JavaFx models, persistent layer, entities and identifiers, CRUD in-memory storage, GUI and persistent layer interconnection.
4. Design of interfaces for DAO objects. Advantages and disadvantages of associations between classes against manually wired associations. Implementation of the Factory design pattern as an abstraction of wired classes. Enum. Database persistent layer. JDBCTemplate configuration, RowMapper.
5. Data input via JDBCTemplate. Associations between classes. Relationships with cardinalities: 1:1, 1:M, M:N. RDB design and implementation in code. Design of a more complex data model, ResultSetExtractor.
6. Business layer, three-tier application, modal windows, entity modification in JavaFX and MySQL.
7. Logging - System.out.println as the easiest way to log. Logging with Slf4j. Secure password storage.
8. Annotations, work with lambda expressions, generic classes.
9. Spring Boot and REST services. Json format.
10. Angular - installation, TypeScript, DOM model, components and their properties, event capture in components.

11. Angular - communication between components, forms, input validation.
12. Angular - services, Observable, injection, communication with REST server via HTTP.

Conditions for course completion: The evaluation of the course and its subsequent completion will be based on clearly and objectively set requirements, which will be set in advance and will not change. The aim of the assessment is to ensure an objective and fair mapping of the student's knowledge while adhering to all ethical and moral standards. There is no tolerance for students' fraudulent behavior, whether in the teaching process or in the assessment process. 1. Active participation in seminars 2. Elaboration and presentation of PPT presentation on the assigned topic. Maximum number of points 20; minimum number of points 11. 3. Elaboration of an essay in the range of 4xA4 (standard pages). Maximum number of points 20; minimum number of points 11. The final evaluation (grade) is the sum of points for the presentation and the essay. A 40b - 37b B 36b - 33b C 32b - 29b D 28b - 25b E 24b - 21b FX 20b - 0b

Learning outcomes: The student is able to demonstrate an understanding of the individual's behavior in selected everyday situations such as conflict, group influence, empathy, helping, aggression, etc. The student is able to describe, explain and evaluate the psychological mechanisms that occur in everyday situations. The student is able to apply basic psychological knowledge to himself (self-regulation) but also in interaction with others (cooperation). The method of teaching the subject will be oriented to the student. Speakers will be interested in the needs, expectations and opinions of students so as to encourage them to think critically by expressing respect and feedback on their opinions and needs. The content of the curriculum will be based on primary and high-quality sources that will reflect the topicality of the topics so as to ensure the connection of the curriculum with other subjects and also

the connection of the curriculum with practice. Students will be expected to take an active approach in lectures and seminars with an emphasis on their independence and responsibility.

Brief outline of the course:
How to understand human behavior (overview of basic approaches in psychology); Basic overview of cognitive processes; Learning processes and their use in practice; Social influences, prosocial and antisocial behavior; How human emotions and motivations work; Deciding - why and when we take risks; Childhood experiences and their relationship to adulthood; Abnormal behavior, mental disorders and therapeutic approaches

Prerequisities:

Conditions for course completion: Regular Class Attendance Students are allowed to miss no more than 2 seminars for whatever reason. Please reserve these for when you are sick or have other serious reasons to be absent since you only have these 2 options and no more! Once you have missed more than 2 seminars, you will not be allowed to continue the course and take the exam. Should anyone come unprepared, he or she will be asked to leave and considered absent from the seminar. The same applies to failure to participate in class activities and discussion. • Presentation/leading discussion Each student will be given one topic for which they will have to prepare a short summary of the reading and questions for their colleagues to start a discussion. In addition to that, they will choose one of the research topics/questions that can be found at the end of each chapter and present their findings. This will require small research in press, television, etc. depending on each topic. Please do not hesitate to talk to your instructor about your presentation, after the seminar or during her office hours. This is not a topic for email communication. • Active participation in class Points for active participation will be awarded to actively taking part in class discussion and activities. • Panel Discussion During our last session, students will be asked to actively participate in a panel discussion covering all the topics and material assigned during the course of the semester and led by the instructor. Presentation – 35% Active participation – 30% Panel Discussion – 35% Grading policy: A 100-93% B 92-86% C 85-78% D 77-72% E 71-65% FX 64 and less Presentation – 35% Active participation – 30% Panel Discussion – 35% Grading policy: A 100-93% B 92-86% C 85-78% D 77-72% E 71-65% FX 64 and less

Learning outcomes: Considering the fact that most of the courses take a rather anglocentric point of view, it is necessary to introduce other issues and make the students aware of regional diversity of Britain. A single course is not sufficient to cover such a broad topic, therefore, Regions of the UK focus on Scotland as one of the regions. By covering a variety of topics similar to those already known to students primarily from the Introduction to British Studies, this course shall try to elicit a discussion about similarities and differences, encouraging students to contribute their own findings and areas of interest.

Brief outline of the course:

The final evaluation is given by the sum of points for regular participation in seminars, written assignment (project) and final test according to the following table: A 100% - 93% B 92% - 86% C 85% -78% D 77% -72% E 71% - 65% FX 64% - 0% In the case of the transition to online teaching through the MS Teams application, the content of the subject as well as its formal structure will remain unchanged.

Learning outcomes:
The course is a theoretical and practical introduction to studying the phonetic aspects of sociolinguistic variation and the social significance of phonetic variation. Students will develop skills throughout this course that will enable them to make appropriate methodological choices when planning research projects in sociophonetics.

Brief outline of the course:
The course will focus on the study of speech production and perception with regard to socially conditioned factors, and consider how phonetic change over the lifespan may be studied using both field- and experimental methods. The course will focus on the acoustic analysis of speech, with attention paid to speech data collected in the field.

 Per week: 2 **Per study period:** 28
 Course method: present

Number of ECTS credits: 6

Recommended semester/trimester of the course: 4.

Course level: I.

Prerequisities:

Conditions for course completion:
 Continuous assessment is a precondition for receiving final assessment.
 Assessment of continuous working on the topic.
 Development of a student research project as defined by the consultant.
 The project is to be submitted in week 13 of semester.
 Grading scale in %:
 A 100 – 93
 B 92 – 86
 C 85 – 78
 D 77 – 72
 E 71 – 65

Course type, scope and the method:
 Course type:
 Recommended course-load (hours):
 Per week: Per study period:
 Course method: present

Number of ECTS credits: 4

Recommended semester/trimester of the course: 4., 6.

Course level: I.

Prerequisities:

Conditions for course completion:
It is required to be registered for the participation on the Student Scientific Conference (ŠVK) in accordance to the Statute of the Student Scientific Conference at PF UPJŠ and the specific conditions for participation in a given year, which are announced by the dean of the faculty. Within one year of the ŠVK, a student or a research team can register in one track only. It is also possible to apply with a written work that is an integral part of a bachelor's or master's thesis or a result of a student support program. The written work at ŠVK is the result of the student's own work or the work of the research team. It must not show elements of academic fraud and must meet the criteria of good research practice defined in the Rector's Decision no. 21/2021, which lays down the rules for assessing plagiarism at Pavol Jozef Šafárik University in Košice and its components. Fulfillment of the criteria is verified mainly in the process of supervision and in the process of work presentation. Failure to do so is reason for disciplinary action. The condition for the evaluation is a successful presentation and defense of the work in the relevant track headed by a commission appointed by the dean of the faculty. The commission decides on the eligibility of credits and states its decision in the memorandum of the ŠVK.

Learning outcomes:
The student demonstrates mastery of extended theory and professional terminology of the field of study, acquisition of knowledge, skills and competences, the ability to apply them creatively in solving selected field problems, ability to present the results using appropriate presentation methods and tools and ability to actively participate in a professional discussion.

Brief outline of the course:
1. Analysis of the state of the art in the field.
2. Design and implementation of a solution to the researched problem.
3. Evaluation of achieved results.
4. Preparation of work annotation.
5. Processing the written work.
6. Preparation of results presentation.
7. Presentation and defense of the obtained results.

Recommended literature:

The recommended literature is specified individually by the student or research team in agreement with the consultant or the supervisor.

Faculty: Faculty of Arts

Course ID: KAaA/ TTTN/06	**Course name:** Theory of Translatology and Terminology

Course type, scope and the method:
 Course type: Lecture / Practice
 Recommended course-load (hours):
 Per week: 1 / 1 **Per study period:** 14 / 14
 Course method: present

Number of ECTS credits: 2

Recommended semester/trimester of the course: 4.

Course level: I.

Prerequisities:

Conditions for course completion:
 Continuous assessment:
 2 written tests, each with a value per cent, minimum value 65 per cent based on the sum of two test results is required for successful final evaluation = 65 per cent.
 Final evaluation is based on the results of continuous assessment (sum of two tests)
 100 - 92% = A = 1
 91 - 87% = B = 1.5
 86 - 82% = C = 2
 81 - 77% = D = 2.5
 76 - 65% = E = 3
 64 - 0 % = FX = 4

Learning outcomes:
 At the end of this course, students should be able:
 - to understand central concepts of translation theory and practice,
 - to understand the importance of translation in various domains of daily life,
 - to reflect the process of translation , its strategies, difficulties, and linits,
 - to analyse a text from a translational perspective, using the appropriate concepts and techniques

Brief outline of the course:
 1. Translation as a term: concept, definitions and usage.
 2. The functions of translation: Functionalism.
 3. The functions of translation: Pragmatics.
 4. Texts and translation.
 5. Reading and translation.
 6. Social aspects of translating.
 7. Translation quality.
 8. Terminology and terms.
 9. Semantic relations in terminology I.
 10. Semantic relations in terminology II.

Prerequisities:

Conditions for course completion:
 Satisfiable ability to correct mainly mathematical typesetting.

Learning outcomes:
 To provide the basic information on principles for typesetting of documents containing mathematical formulas.

Brief outline of the course:
 1. Principles for typesetting of documents containing mathematical formulas.
 2. Typesetting of a plain text, special text symbols, using of text fonts.3
 3. TeX macros.
 4. Enumerations in text and footnote command. Parameter setting determining the appearance of the pages.
 5. Typesetting of mathematical formulas in text and displays, aligning formulas.
 6. Making tables and pictures.
 7. Definitions, theorems, and proofs in a mathematical document.
 8. Contents, bibliography, sections in a document.
 9. Pictures.
 10.-12. Project.
