Detailed conditions for successful completion of the course are updated annually in the repository for digital support materials (LMS Moodle UPJŠ) or on the electronic bulletin board of the course in AiS2.	
Learning outcomes: In today's world where information is becoming an increasingly important commodity, it is crucial for public administration students to develop knowledge, skills, and competencies in the area of information sources. These competencies will enable them to work effectively in public administration and contribute to the informedness and transparency of public life. By completing this course, students will learn and understand various types of information sources relevant to public administration (official and unofficial). They will be able to identify and select appropriate information sources for a given topic or area of interest. They will be familiar with the principles of information systems and databases. They will understand the significance of open data and its use in public administration. They will acquire knowledge of the ethical aspects of working with information. Students will be able to navigate the information environment and effectively search for information in various information sources to support decision-making processes in public administration. They	

will be able to work with information and process it into a comprehensible form for interested parties. They will be able to use information technology to work with information and will be able to work with it ethically.

The course develops critical thinking and analytical skills in assessing the relevance and reliability of information sources. Students will learn to communicate effectively using information sources to convey ideas, policies, and strategies to various stakeholders.

Brief outline of the course:

Consultation:

Introduction to Information Sources in Public Administration: Emphasizing the crucial role of information and information sources in the effective functioning of public administration, characterizing the information environment in public administration (quantity, diversity, dynamics).

Official Information Sources I: Legislation (websites of relevant public authorities), strategic documents (strategic plans, concepts, and programs defining the goals and priorities of public administration in various areas).

Official Information Sources II: Statistics (statistics on various aspects of society and the economy are an important tool for monitoring and evaluating the performance of public administration, available on the websites of statistical offices – ŠÚ SR, INFOSTAT, Eurostat) and open data (portals of publicly available data from public institutions).

Research Information Sources: Data sources from research agencies (overview of research agencies), Eurobarometer, and social data archives (Slovak archive, CESSDA - Council of European Social Science Data Archives, EDAN - East European Archives Network).

Databases of research literature and scientific journals (Scopus, Web of Science, Academia.edu, ResearchGate, etc.), practical exercises in searching for and reviewing professional literature.

Unofficial information sources – media, social media, and non-profit organizations.

Characteristics of quality information sources: relevance to the given topic or area of interest, reliability (credibility of the source), timeliness (up-to-dateness of information), accessibility (ease of access, understandable form).

Information literacy and critical thinking: The importance of information literacy skills in public administration. Strategies for evaluating information in terms of credibility and reliability.

Information ethics and privacy protection: Understanding the ethical aspects of using and disseminating information. Protection of personal data and sensitive information. Objectivity and impartiality in presenting information. Combating disinformation and manipulation of information.

Basic computer skills for public administration: Basic operations in productivity software (word processing, spreadsheets, presentations). Practical exercises with common office applications – Word, Google Docs, Excel, Google Sheets, PowerPoint, Google Slides.

Introduction to email and communication tools: The importance of email communication in public administration. Basic email etiquette and best practices. Introduction to communication tools such as Skype, MS Teams, Webex, or other video conferencing platforms.

Social media and citizen engagement: The importance of social media for communicating with citizens. Strategies for effectively utilizing social media platforms in public administration. Case studies and examples of successful engagement of public authorities on social networks.

New trends in information systems for public administration: Examining new technologies such as artificial intelligence, blockchain, and the Internet of Things. Potential applications and implications for public administration. Discussion of future directions and opportunities in this area.

International information sources for public administration: public policy (UN, OECD, World Bank), public administration (International Institute of Administrative Sciences (IIAS), Organization of Local and Regional Governments (UCLG), Center for Innovation in Government (CIG), E-government - OECD Digital Government Observatory, Global e-Government Knowledge Exchange (GeGov)).

Number of ECTS credits: 5	
Recommended semester/trimester of the course: 4.	
Course level: I.	
Prerequisites:	
Conditions for course completion: The course is concluded with a graded assessment. The graded assessment is obtained based on the sum of points specified by the conditions of the graded assessment: 1. Research project. Development and presentation of an original research project on a selected topic, which will be theoretically anchored in a seminar paper with sources. Maximum points: 60. Minimum points: 31. 2. Knowledge test on the entire subject matter. Maximum points: 40. Minimum points: 21. To obtain a final grade of A, a student must obtain 91-100 points, for a grade of B 81-90 points, for a grade of C 71-80 points, for a grade of D 61-70 points, and for a grade of E 52-60 points. Credits will not be awarded to a student who does not obtain at least 52 points in the final assessment. Detailed conditions for successful completion of the course are updated annually in the repository for digital support materials (LMS Moodle UPJŠ) or on the electronic bulletin board of the subject in AiS2.	
Learning outcomes: Completion of the course will provide students with a comprehensive overview of research methods and tools and prepare them for their practical application in the field of public administration. Students will understand the principles of social research and be able to navigate the research methodology. They will be able to incorporate ethical aspects into research and apply research methods in the practice of public administration (solving real problems and issues of public administration). They will be able to formulate research objectives and hypotheses and select an appropriate methodological strategy. They will be able to design data collection tools and analyze collected primary and secondary data. They will be able to interpret and present research results, formulate conclusions and recommendations. As part of the course, students will learn: to think critically and evaluate information (assess the reliability and validity of data, interpret results in context), to be able to work independently (design and implement research projects), to communicate effectively (present research results in the field of public administration in writing and orally) and to work in a team (collaborate with others on research projects).	
Brief outline of the course: 1. Introduction to Research (Definition and objectives of research in public administration, types of research, significance of social research for public administration)	

2. Ethical Issues in Research (Ethical principles of research, protection of privacy and sensitive information, responsibility towards research participants)
3. Research Design in Public Administration (Qualitative and quantitative research, integrated research approach)
4. Research Design I (Sources of the preparatory phase of the research plan, selection and definition of the research problem in public administration)
5. Research Design II (Formulation of research questions, variables, and hypotheses)
6. Determining the Research Population, Sample, and Pre-test (Target population, sampling strategies)
7. Types of Quantitative Research (Statistical, descriptive, correlational, experimental, ex post facto)
8. Types of Qualitative Research (Case study, ethnographic approach, narrative research)
9. Methods of Collecting Primary Data (Observation, interview, questionnaire)
10. Methods of Collecting Secondary Data and Their Analysis (Content analysis of documents, databases, triangulation, validity, and reliability of data)
11. Research Implementation and Data Analysis (Verbal descriptions, graphs, tables, diagrams, images)
12. Interpretation of Research Results and Discussion (Interpretive and exploratory analysis)
13. Research Conclusions (Publication - thesis, journal article, presentation), evaluation of the research process and results in relation to public administration)

Number of ECTS credits: 5	
Recommended semester/trimester of the course: 1.	
Course level: I.	
Prerequisites:	
Conditions for course completion: Continuous Assessment Criteria: Written assignment: Maximum points: 40. Student must attend all classes. To be admitted to the final exam, a minimum of 21 points must be obtained. Final Assessment Criteria: The exam will be written. The maximum number of points that can be obtained from the exam is 60. A minimum of 31 points must be obtained from the exam. Points obtained from the assignment and the exam will be added together. To obtain a grade of A, a minimum of 91 points must be achieved, B - 81 points, C - 71 points, D - 61 points, and E - a minimum of 52 points. Conditions for Successful Completion of the Course: 1. Attendance at classes in accordance with the study regulations and the instructions of the teacher. 2. Fulfillment of the conditions of continuous and final assessment.	
Learning outcomes: Students will become familiar with the elementary elements of the social structure of society, their mutual determination, and the diversity of views on the causal relationships of specific social phenomena and processes. At the same time, they will become acquainted with the foundations on which social life is built, the mechanisms of creating individual forms of social life, the processes of social mobility, and the roles of social norms, social control, and individual forms and types of social institutions in the regulatory and control processes of social life. This creates the premise for understanding the functions of public administration in society and, at the same time, for understanding the importance of scientifically grounded knowledge about social phenomena for the practice of public administration. The graduate of the subject will be able to define and explain in their own words the basic sociological concepts, understands the basic theoretical approaches in sociology (conflictualism, consensualism, constructivism...), remembers the most important authors in the history and present of sociological thought, can assign individual authors to sociological schools, directions, and paradigms, can apply the acquired knowledge to the area of	

public administration and use it in the study of social phenomena at the theoretical and applied level, understands the difference between micro and macro-sociological aspects of social phenomena.
