COURSE INFORMATION LETTER

| | |
|--|---|
| University: P. J. Šafárik University in Košice | |
| Faculty: Faculty of Science | |
| Course ID: ÚCHV/ AMS3/05 | Course name: Atomic and Molecular Spectroscopy |
| Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present | |
| Number of ECTS credits: 8 | |
| Recommended semester/trimester of the course: 2., 4. | |
| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: Based on continuous assessment and test results. | |
| Learning outcomes: Advanced theoretical and practical knowledge of the methods of atomic and molecular spectroscopy. | |
| Brief outline of the course: Enhanced information about atomic absorption and emission spectral methods. History of the spectral methods development and their use in analytical practice. Optical analytical methods, principles, classification. Theoretical principles of spectroscopy. Experimental basis of spectral methods. Atomic absorption spectrometry. Atomic emission spectrometry (optical emission spectrometry). Atomic fluorescence spectrometry. Plasma Mass Spectrometry. Mass spectrometry. Spectral methods based on the X-rays observation and observation of the released electrons. Absorption spectroscopy in the visible and UV region. Emission spectroscopy of molecules. Vibration-rotation spectroscopy in analytical chemistry. Infrared and Raman spectrometry, nuclear magnetic resonance, electron paramagnetic resonance: principles, development in analytical chemistry. Automation and miniaturization of spectral methods. Hybrid spectral methods. Organic reagents. Ionic associates with basic dyes. | |

| Course ID: ÚCHV/ COK/22 | Course name: Certified training course |
| Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present | |
| Number of ECTS credits: 4 | |
| Recommended semester/trimester of the course: | |
| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: Completion of a certified professional/training course. | |
| Learning outcomes: The PhD student acquires up-to-date scientific knowledge, develops the capabilities of scientific work and familiarizes himself with the methodologies of making scientific knowledge available. He confronts his own knowledge and skills with other course participants, develops the abilities of peer discussion in the given scientific field. | |

| Number of ECTS credits: 8 | |
| Recommended semester/trimester of the course: 1. | |
| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: On the basis of individual work. On the basis of the continuous assesment and examination. | |
| Learning outcomes: Learning of the basic methodology of experimentation and statistical evaluation of the measurements. | |
| Brief outline of the course: The basic methodology of experimentation. The sources of the scientific information. Literature search. Choice and classification of scientific journals. The sample treatment. (sampling, measurements, evaluation of results). Knowledge acquisition of the correct and theoretically-based processing and evaluation of results of chemical analysis: Signal Processing; Calibration, Data Processing. Knowledge acquisition of the methods and methodologies for results evaluation. Decision-making statistics. Information about validation of the method, about metrology, and accreditation of the laboratories. Conception of the uncertainties of results and methods. Practical application of the theoretical knowledge gained during the course. | |

| Course ID: ÚCHV/ODZP/15 | Course name: Defence of Doctoral Thesis |
| Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present | |
| Number of ECTS credits: 30 | |
| Recommended semester/trimester of the course: | |
| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: The Dissertation thesis is the result of the student's own scientific research. It must not show elements of academic fraud and must meet the criteria of correct research practice defined in the Rector's Decision no. 21/2021, which lays down the rules for assessing plagiarism at Pavel Jozef Šafárik University in Košice and its constituents. Fulfillment of the criteria is verified mainly in the process of supervising and in the process of the thesis defense. Failure to do so is grounds for disciplinary action. | |
| Learning outcomes: The Dissertation thesis has elements of a scientific work and the student demonstrates extensive mastery of the theory and professional terminology of the field of study, acquisition of knowledge, skills and competences in accordance with the declared profile of the graduate of the field of study, as well as the ability to apply them in an original way in solving selected problems of the field of study. The student demonstrates the ability of independent scientific work in terms of content, formal and ethical aspects. Further details of the Dissertation thesis are determined by Directive no. 1/2011 on the essential prerequisites of final theses and by the Study Rules of Procedure at UPJŠ in Košice for doctoral studies. The doctoral student demonstrated the ability and readiness for independent scientific and creative activity in the field of study of philology in accordance with the expectations of the relevant qualification framework and the profile of the graduate. | |

| Number of ECTS credits: 6 | |
| Recommended semester/trimester of the course: 2., 4. | |
| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: Theoretical and practical knowledge in field of electroanalytical methods. Successful completion of the final test or oral exam. | |
| Learning outcomes: Getting knowledge in the field of advanced techniques of electroanalytical methods, the latest trends in miniaturization and automation of electrochemical analytical methods. | |
| Brief outline of the course: Advanced techniques of electroanalytical methods, electrochemical measurements in flow systems, miniaturization of electrochemical analytical methods, new trends in this field of analytical chemistry. Instrumentation. Working electrodes. Electrode requirements. Principles and more detailed description of measuring technique. Potentiometry. Voltammetry. Linear and cyclic voltammetry. Pulse voltammetry. Stripping voltammetry. Voltammetric titrations. Amperometry and titrations with polarizable electrodes. Coulometry. Potentiostatic coulometry. Coulometric titration. Conductometry. Electroanalytical measurements in flow devices. Miniaturization of electrochemical analytical methods. Current trends in this area. Selected applications of electroanalytical methods such as quality control in the analysis of technological products, in bioanalytical applications, analysis of foreign substances in the environment, in diagnostic and clinical analysis, in forensic science, etc. | |

| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: | |
| Learning outcomes: Independent work of a doctoral student with books, monographies, databases and source documents, obtaining informations for elaboration of the thesis, for preparation of experiments or preparation of publication, respectively. | |
| Brief outline of the course: Independent study of literature following the suggestions of the tutor. | |
| Recommended literature: Books, monographs, Web of Science, SCOPUS, original papers | |
| Course language: English language. | |
| Notes: | |

| Number of ECTS credits: 8 | |
| Recommended semester/trimester of the course: | |
| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: Publication accepted in a foreign journal as an author/co-author. | |
| Learning outcomes: By publishing in a foreign journal as an author/co-author, the PhD student demonstrates a high level of ability to identify, evaluate, and apply correct scientific methods or research methodology. He demonstrates the ability to reflect on a scientific problem by using the latest approaches and applying them critically. He demonstrates the competence to use existing theories and concepts in an innovative way, as well as to generate new original scientific knowledge, which he can publish according to the highest qualitative and ethical standards of the field. The PhD student demonstrates the ability to critically evaluate and respond to reviewers' suggestions, to finalize his own ideas. | |

| University: P. J. Šafárik University in Košice | |
| Faculty: Faculty of Science | |
| Course ID: ÚCHV/ MET3/05 | Course name: Methodology of the chemical analysis of environmental systems and biological systems |
| Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present | |
| Number of ECTS credits: 8 | |
| Recommended semester/trimester of the course: 4. | |
| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: Individual work. Examination. | |
| Learning outcomes: The aim of the course is to obtain information about the methodology of chemical analysis of environmental and biological systems. | |
| Brief outline of the course: Chemical analysis procedure, measurement in analytical chemistry, reliability, accuracy, precision, repeatability, reproducibility, sensitivity, analytical range, limit of detection (LOD) and limit of quantification (LOQ), detection of systematic errors, nature, sources and elimination of systematic errors. Optimization of chemical analysis process. Recognition of noise sources and its reduction, planning of analytical experiment, improvement of individual modules of measuring equipment. Processing of measured analytical signal, filtration and modulation, smoothing, transformation, prediction. Selection of analytical method for solving specific tasks. Possibilities and limitations of the main chemical, electrochemical, spectral methods of analysis. Influence of experimental conditions on the reliability of analysis results. Peculiarities of treatment of environmental and biological samples before analysis. Automatic multielemental microanalysis of inorganic-organic, organic, environmental and biological samples. Isolation, evidence and determination of selected groups of organic substances and biologically important compounds (amino acids, proteins, lipids, vitamins, enzymes, sugars). Clinical chemistry. Overview of basic chemical tests and recommended methods. Qualitative and quantitative analysis of drugs and their metabolites. Analysis of organic and biologically important substances in the food chain. Analysis of toxic substances for the needs of input and output controls in the production process. Basics of automation in the laboratory. Signal processing. Automation of analytical operations. Automatic analyzers. Automation in environmental monitoring. Analyzers in production processes. Physical methods for checking the purity of very pure substances. | |

| | |
|---|--|
| University: P. J. Šafárik University in Košice | |
| Faculty: Faculty of Science | |
| Course ID: KPE/ PgVU/17 | Course name: Pedagogy for University Teachers |
| Course type, scope and the method: Course type: Lecture Recommended course-load (hours): Per week: Per study period: 28s Course method: distance, present | |
| Number of ECTS credits: 5 | |
| Recommended semester/trimester of the course: | |
| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: 1. Development of a teaching diary—100% 2. Compulsory active participation and attendance in accordance with the Study Regulations. | |
| Learning outcomes: After completing the course, the student will acquire knowledge, skills, and competencies, i.e., will be able to: Knowledge Define and apply basic didactic principles, methods, forms, and tools in the teaching process of university-level professional subjects. Identify and specify educational procedures of a university teacher aimed at effective teaching management, pedagogical diagnostics, and assessment of learning outcomes. Recognize different approaches to pedagogical evaluation and their impact on improving the quality of the educational process at the university level. Skills Implement effective educational methods and techniques into the teaching of professional subjects, tailored to the needs of university students. Conduct pedagogical diagnostics, assess students' progress, and apply appropriate evaluation methods to improve learning outcomes. Analyze and reflect on one's own teaching process, identify areas for improvement, and enhance the teaching of professional subjects, including the rationalization of the time and content structure of teaching. Present specific proposals for improving the teaching process, including the use of new technologies and innovative pedagogical approaches. Competencies Confidently and effectively manage the teaching of university subjects, applying educational competencies that consider the specifics of higher education. Critically reflect on one's own pedagogical practice and the learning outcomes of students to improve teaching methods and achieve a higher quality of the educational process. Apply innovative solutions to streamline and optimize the teaching process, aiming to increase the engagement and success of university students. | |
| Brief outline of the course: The personality of a university teacher. Teaching styles. Student in university education. Student learning styles. Possibilities of adapting teaching styles and student learning styles. University teacher–student interaction and communication in the teaching process. Pedagogical competencies | |

of a university teacher. Didactic analysis of the curriculum; teaching materials and textbooks. Forms of university teaching. Methods of university teaching. Verification methods and student assessment. Creation of a didactic test. Designing university teaching process. University teacher self-reflection.

| Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present | |
| Number of ECTS credits: 5 | |
| Recommended semester/trimester of the course: | |
| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: Presentation at the seminar | |
| Learning outcomes: By actively participating in the seminar, the PhD student demonstrates the ability to identify, evaluate, and apply correct scientific methods or research methodology in his field of study. He demonstrates the ability to reflect on a specific scientific problem by using the latest approaches and applying them critically. Demonstrates competence in using existing theories and concepts in an innovative way, as well as generating new original scientific knowledge and communicating research results by adequate means and through Slovak or a foreign language | |

| Course ID: ÚCHV/ ZRIG/22 | Course name: Principal investigator of an internal grant (VVGS) |
| Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present | |
| Number of ECTS credits: 10 | |
| Recommended semester/trimester of the course: | |
| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: Principal investigator of an internal grant (VVGS) | |
| Learning outcomes: The PhD student demonstrates the ability to process a successful application for his own research problem within the internal grant system at UPJŠ. Acquires skills with the design of research stages, their time schedule, measurable outputs and adequate distribution of funds. The very solution of the internal VVGS grant acquires the ability to implement the project intention according to the established procedure, to be responsible for achieving the set outputs. As a responsible researcher, the PhD student acquires competencies in project management, its administration, and presentation of results. | |

| University: P. J. Šafárik University in Košice | |
| Faculty: Faculty of Science | |
| Course ID: KPPaPZ/PsVU/17 | Course name: Psychology for University Lecturers |
| Course type, scope and the method: Course type: Lecture Recommended course-load (hours): Per week: Per study period: 28s Course method: distance, present | |
| Number of ECTS credits: 5 | |
| Recommended semester/trimester of the course: | |
| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: Case study, micro-output, its analysis Current modifications of the course are listed in the electronic bulletin board of the course. | |
| Learning outcomes: After completing the course, students will gain knowledge that allows them to understand, summarize and explain selected psychological knowledge from cognitive psychology, emotion and motivation psychology, personality psychology, developmental, social, educational psychology and health psychology. They will acquire skills to apply the above psychological knowledge necessary for the professional, competent performance of university teaching practice of doctoral students to create and implement the teaching of a professional topic with applied psychological knowledge and develop the competences to create and implement teaching of a professional topic with the application of psychological knowledge, as well as to evaluate their performance and the performance of their classmates in the form of constructive feedback. | |
| Brief outline of the course: The content of the course is based on selected psychological knowledge of cognitive psychology, psychology of emotions and motivation, personality psychology, developmental, social, educational psychology and health psychology. Teaching is realized by a combination of lectures with interactive, experiential methods, discussion, open communication with mutual respect, support of independence, activity and motivation of students. Syllabus: University teacher and his work in the teaching process with a focus on: teachers in relation to themselves (cognitive, personal, social and competencies in the use of methods), in relation to students and as part of the teacher-student relationship on the basis of selected areas of cognitive psychology, psychology of emotions and motivation, developmental psychology, social psychology, educational psychology and health psychology with application to the university environment | |

| Learning outcomes: Through pedagogical activity, the PhD student demonstrates the ability to transfer and integrate knowledge from his own field of study into education. He is able to select and apply the right techniques and strategies of study group management, higher education and evaluation of learning outcomes. He is capable of designing and implementing part of the educational process in accordance with current trends in higher education and the requirements placed on the level of communication and digital competencies. | |

COURSE INFORMATION LETTER

| | |
|---|--|
| University: P. J. Šafárik University in Košice | |
| Faculty: Faculty of Science | |
| Course ID: ÚCHV/ TZAC3/05 | Course name: Theoretical basics of analytical chemistry |
| Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present | |
| Number of ECTS credits: 8 | |
| Recommended semester/trimester of the course: 1. | |
| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: Written work. | |
| Learning outcomes: To expand and deepen knowledge about the theoretical foundations of modern analytical chemistry. | |
| Brief outline of the course: Analytical chemistry. Relationship between analytical chemistry and other scientific branches. History of analytical chemistry. Problems and trends in recent analytical chemistry. Objects of analysis. Instrumental equipment of a modern analytical laboratory. Research analytical chemistry and analytical practice. Validation of analytical methods. Factors important to bear in mind when choosing a proper method. Reasons of improper analytical results. Modern, highly selective methods of analysis. Speed and factors affecting the speed of analysis. Test and screening methods. Field analysis. Primary X-ray spectrometry, microprobe. Non-destructive methods of analysis, principle, utility. Distance analysis. Automation of analysis, examples. Flow analysis – FIA and SIA. Miniaturization of analytical measurements. Economic aspects of analysis. Analytical reaction, chemical equilibrium in solutions. Gravimetric. Volumetric. Instrumental methods of qualitative and quantitative determination of analytes. Absorption and emission spectroscopy, UV-VIS spectrometry, fluorescence and phosphorescence spectrophotometry, emission and atomic absorption spectroscopy, infrared spectrometry, Raman spectroscopy, Roentgen spectroscopic methods, radiochemical methods, NMR spectroscopy, mass spectrometry. Electroanalytical methods (voltamperometry, potentiometry, electroseparation, coulometry and conductometry). Thermal analysis. Kinetic methods of analysis. Separation methods. Microextraction techniques (DLLME, SDME, SPME). Gas chromatography. Liquid chromatography, TLC, HPLC. | |

| University: P. J. Šafárik University in Košice | |
| Faculty: Faculty of Science | |
| Course ID: ÚCHV/ KZP/22 | Course name: Thesis consultant |
| Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present | |
| Number of ECTS credits: 4 | |
| Recommended semester/trimester of the course: | |
| Course level: III. | |
| Prerequisites: | |
| Conditions for course completion: Final thesis consultant. | |
| Learning outcomes: By consulting the final thesis, the PhD student demonstrates broad and scientifically based knowledge in the field of study, as well as knowledge of a wide range of methods and approaches. Demonstrates the ability to critically assess a professional problem and its proposed solution, as well as to evaluate it and possibly propose another solution. He applies knowledge and skills from the field of pedagogical sciences to his own field. | |
