## COURSE INFORMATION LETTER

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Science	
<b>Course ID:</b> ÚINF/ PfMRI/19	<b>Course name:</b> Advanced fMRI data Analysis
<b>Course type, scope and the method:</b> <b>Course type:</b> Lecture <b>Recommended course-load (hours):</b> <b>Per week:</b> 3 <b>Per study period:</b> 42 <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 9	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> Midterm exam. Project Final exam consisting of written and/or oral part.	
<b>Learning outcomes:</b> Skills necessary for application of advanced computational tools to fMRI data analysis.	
<b>Brief outline of the course:</b> <ol style="list-style-type: none"> <li>1. Advanced GLM modeling</li> <li>2. Intro to machine learning</li> <li>3. Multi-voxel Pattern Analysis: A neuroscientific perspective</li> <li>4. Multi-voxel pattern analysis v/s Univariate</li> <li>5. CosmoMVPA toolset</li> <li>6. Split half correlation analysis</li> <li>7. Search Light analysis</li> <li>8. SVM and other classifiers</li> </ol>	
<b>Recommended literature:</b> Oosterhof, N. N., Connolly, A. C., and Haxby, J. V. CoSMoMVPA: multi-modal multivariate pattern analysis of neuroimaging data in Matlab / GNU Octave. <i>Frontiers in Neuroinformatics</i> , 2016. doi:10.3389/fninf.2016.00027. Connolly, A. ## COURSE INFORMATION LETTER

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Science	
<b>Course ID:</b> ÚINF/SPAV/22	<b>Course name:</b> Co-investigator of the applied research project
<b>Course type, scope and the method:</b> <b>Course type:</b> <b>Recommended course-load (hours):</b> <b>Per week: Per study period:</b> <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 5	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> Co-investigator of the applied research project	
<b>Learning outcomes:</b> The PhD student demonstrates the ability to participate in teamwork, to bring his own contribution to the solution of the project objective of applied research and to take responsibility for assigned tasks. By solving an applied research project, he acquires the ability to implement the project objective according to the established procedure, to follow the project schedule, to coordinate his own activities with colleagues, to participate in the creation of applied research outputs. The PhD student gains valuable experience from the practical course of a grant project with a focus on applied research.

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Science	
<b>Course ID:</b> ÚINF/ VYMD/15	<b>Course name:</b> Computational complexity and models
<b>Course type, scope and the method:</b> <b>Course type:</b> Lecture <b>Recommended course-load (hours):</b> <b>Per week:</b> 2 <b>Per study period:</b> 28 <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 9	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> Written test combined with an oral examination.	
<b>Learning outcomes:</b> Providing an extended background in the area of efficient computations, computational complexity of algorithms, fundamental time and space complexity classes, hardest complete problems, and about reducibility among problems.	
<b>Brief outline of the course:</b> <ol style="list-style-type: none"> <li>1. Measuring time and space complexity, basic computational models: single- and multi-tape Turing machines, RAM and RASP models, unit and logarithmic costs.</li> <li>2. Basic complexity classes: L, NL, P, NP, PSPACE, NPSPACE, EXPTIME, NEXPTIME, EXPSPACE.</li> <li>3. P versus NP, L versus NL. Examples of complete problems in these classes.</li> <li>4. Polynomial time and logarithmic space reducibilities, definition and basic properties of complete problems.</li> <li>5. NP-completeness of the Boolean formula satisfiability (SAT).</li> <li>6. Variants of SAT, problems related to graph coloring.</li> <li>7. Other NP-complete problems: vertex cover, Hamiltonian paths, subset sum, balancing, traveling salesman problem.</li> <li>8. Subexponential deterministic solutions for selected NP-complete problems: planar 3-colorability, balancing. Restricted variants with more efficient solutions.</li> <li>9. Space complexity classes: Savitch theorem, inductive counting.</li> <li>10. Problems complete for NL, P, and PSPACE: graph accessibility (GAP), circuit-value, quantified Boolean formulas (QBF).</li> <li>11. Hierarchy and translation theorems for time and space.</li> <li>12. Relativized complexity classes.</li> <li>13. Alternating complexity classes.</li> <li>14. Polynomial time hierarchy.</li> <li>15. Alternating logarithmic space hierarchy.</li> </ol>

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Science	
<b>Course ID:</b> ÚINF/ SDSD/15	<b>Course name:</b> Data and signal processing
<b>Course type, scope and the method:</b> <b>Course type:</b> Lecture <b>Recommended course-load (hours):</b> <b>Per week:</b> 2 <b>Per study period:</b> 28 <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 8	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> The ability to formulate a problem in the acquired terminology and solve it within a project. Project. Oral exam.	
<b>Learning outcomes:</b> During the completion of the course, the doctoral student will master the most relevant methods of signal processing and corresponding software. He will be able to explain the differences between the types of stochastic data models and thus analyze and simulate data, determine the scheme or dependence between attributes and obtain information.	
<b>Brief outline of the course:</b> <ol style="list-style-type: none"> <li>1. Random processes and time series, Moving average, ARIMA processes.</li> <li>2. Markov chains, Markov Chains Monte Carlo - MCMC.</li> <li>3. Stationary processes and correlation function.</li> <li>4. Martingales, Wiener process and SDE.</li> <li>5. Fourier transformation, FFT, Fourier series.</li> <li>6. Wavelet analysis.</li> <li>7. Filtration, Kalman filter.</li> <li>8. Modeling, Goodness of fit tests; Likelihood and Bayesian principle.</li> <li>9. Mutual information, Fisher information, Akaike criterion.</li> <li>10. Nonparametric estimation and approximation: Nadaraya-Watson kernel, Loess(locally estimated scatterplot smoothing).</li> <li>11. Smoothing Spline and penalization, Multivariate adaptive regression spline (MARS), Generalized additive model (GAM).</li> </ol>

## COURSE INFORMATION LETTER

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Science	
<b>Course ID:</b> ÚINF/ODZP/15	<b>Course name:</b> Defence of diploma thesis
<b>Course type, scope and the method:</b> <b>Course type:</b> <b>Recommended course-load (hours):</b> <b>Per week: Per study period:</b> <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 30	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> The dissertation thesis is the result of the student's own scientific research. It must not show elements of academic fraud and must meet the criteria of good research practice defined in the Rector's Decision no. 21/2021, which lays down the rules for assessing plagiarism at Pavol Jozef Šafárik University in Košice and its components. Fulfillment of the criteria is verified mainly in the process of supervision and in the process of thesis defense. Failure to do so is reason for disciplinary action.	
<b>Learning outcomes:</b> The dissertation thesis has the character of a scientific work and the student demonstrates extensive mastery of the theory and professional terminology of the field of study, acquisition of knowledge, skills and competencies in accordance with the declared profile of the graduate of the study program, as well as the ability to apply them creatively in solving selected scientific problem. The student demonstrates the ability of independent scientific work in terms of content, formal and ethical. Further details on the dissertation thesis are determined by Directive no. 1/2011 on the basic requirements of final theses and the Study Regulations of UPJŠ in Košice for doctoral studies.	
<b>Brief outline of the course:</b> 1. Elaboration of the dissertation thesis in accordance with the instructions of the supervisor. 2. Presentation of the results of the dissertation thesis before the examination commission. 3. Answering questions from oponents and questions related to the topic of the dissertation thesis within the discussion.	
<b>Recommended literature:</b> The recommended literature is determined individually in accordance with the topic of the dissertation thesis.	
<b>Course language:</b> Slovak or English

<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> Test, oral exam in accordance with the exam requirements (available at the web-site of the LTC and in MS TEAMS)	
<b>Learning outcomes:</b> The development of students' language skills - reading, writing, listening, speaking, improvement of their linguistic competence - students acquire knowledge of selected phonological, lexical and syntactic aspects, development of pragmatic competence - students can effectively use the language for a given purpose, with focus on Academic English and English for specific/professional purposes, level B2.	
<b>Brief outline of the course:</b> Academic communication (self-presentation, presenting at scientific meetings and conferences). Specific aspects of academic and professional English with focus on vocabulary development (formality, academic word-list), English grammar (passive voice, nominalisation), language functions (expressing opinion, cause/effect, presenting arguments, giving examples, describing graphs/charts/schemes, etc.). Cross-language interference.

<b>Faculty:</b> Faculty of Science	
<b>Course ID:</b> ÚINF/ FKAD/15	<b>Course name:</b> Formal concept analysis
<b>Course type, scope and the method:</b> <b>Course type:</b> Lecture <b>Recommended course-load (hours):</b> <b>Per week:</b> 2 <b>Per study period:</b> 28 <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 8	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> During consultations during the semester. Independent and creative mastery of theoretical and practical aspects of the issue and an overview of the current state of research and further direction, in the form of an oral exam, are evaluated.	
<b>Learning outcomes:</b> The aim of the course is to understand the basic features of formal conceptual analysis as one of the methods of relational-data analysis and its relationship to other data-mining methods.	
<b>Brief outline of the course:</b> Basic theorem on conceptual lattices. Fuzzifications of concept lattices. Formal conceptual analysis in terms of category theory. Relationship of formal concept analysis to other data-mining methods. Applications of formal concept analysis.	
<b>Recommended literature:</b> 1. BĚLOHLÁVEK, Radim. Fuzzy relational systems: foundations and principles. New York: Kluwer Academic/Plenum Publishers, [2002]. ## COURSE INFORMATION LETTER

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Science	
<b>Course ID:</b> ÚINF/ AFJD/15	<b>Course name:</b> Formal languages and finite-state automata
<b>Course type, scope and the method:</b> <b>Course type:</b> Lecture <b>Recommended course-load (hours):</b> <b>Per week:</b> 2 <b>Per study period:</b> 28 <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 9	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> Written test combined with an oral examinationi.	
<b>Learning outcomes:</b> To obtain background about efficient representation of regular languages and finite state automata, as well as about connection between automata and complexity theory.	
<b>Brief outline of the course:</b> Chomsky hierarchy of languages and grammars. Finite state automata and its variants: deterministic, nondeterministic, alternating, probabilistic, quantum ... one-way, two-way, reversal bounded. Regular expressions and grammars. Unary regular languages and their properties. Connection between finite state automata and complexity theory. Pushdown automata, time and space complexity for recognition of context-free languages. Closure properties of context-free, context-sensitive, and recursively enumerable languages.	
<b>Recommended literature:</b> Current journal publications on the topic, especially those related to the descriptive complexity of automata. J.E. Hopcroft, R.Motwani, J.D. Ullman: Introduction to automata theory, languages, and computation, Addison-Wesley, 2001. J. Shallit: A second course in formal languages and automata theory, Cambridge University press, 2009. M. <b>Prerequisites:</b>	
<b>Conditions for course completion:</b> During consultations during the semester. Independent and creative mastery of theoretical and practical aspects of the issue, an overview of the current state of research and open problems and further direction, in the form of a written and oral exam, are evaluated.	
<b>Learning outcomes:</b> To give the students basic techniques in systems processing imperfect information to be able read and write scientific papers in the area.	
<b>Brief outline of the course:</b> Belief and probability, Dempster-Shaferova belief. Necessity and possibility. Uncertainty in artificial intelligence. Fuzzy sets, constructions of fuzzy sets from statistic data. Uncertainty in artificial intelligence, Markov and Bayesian networks, belief updating, belief revision.

## COURSE INFORMATION LETTER

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Science	
<b>Course ID:</b> KPE/ PgVU/17	<b>Course name:</b> Pedagogy for University Teachers
<b>Course type, scope and the method:</b> <b>Course type:</b> Lecture <b>Recommended course-load (hours):</b> <b>Per week: Per study period:</b> 28s <b>Course method:</b> distance, present	
<b>Number of ECTS credits:</b> 5	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> 1. Development of a teaching diary—100% 2. Compulsory active participation and attendance in accordance with the Study Regulations.	
<b>Learning outcomes:</b> After completing the course, the student will acquire knowledge, skills, and competencies, i.e., will be able to: <b>Knowledge</b> Define and apply basic didactic principles, methods, forms, and tools in the teaching process of university-level professional subjects. Identify and specify educational procedures of a university teacher aimed at effective teaching management, pedagogical diagnostics, and assessment of learning outcomes. Recognize different approaches to pedagogical evaluation and their impact on improving the quality of the educational process at the university level. <b>Skills</b> Implement effective educational methods and techniques into the teaching of professional subjects, tailored to the needs of university students. Conduct pedagogical diagnostics, assess students' progress, and apply appropriate evaluation methods to improve learning outcomes. Analyze and reflect on one's own teaching process, identify areas for improvement, and enhance the teaching of professional subjects, including the rationalization of the time and content structure of teaching. Present specific proposals for improving the teaching process, including the use of new technologies and innovative pedagogical approaches. <b>Competencies</b> Confidently and effectively manage the teaching of university subjects, applying educational competencies that consider the specifics of higher education. Critically reflect on one's own pedagogical practice and the learning outcomes of students to improve teaching methods and achieve a higher quality of the educational process. Apply innovative solutions to streamline and optimize the teaching process, aiming to increase the engagement and success of university students.	
<b>Brief outline of the course:</b> The personality of a university teacher. Teaching styles. Student in university education. Student learning styles. Possibilities of adapting teaching styles and student learning styles. University teacher–student interaction and communication in the teaching process. Pedagogical competencies	

of a university teacher. Didactic analysis of the curriculum; teaching materials and textbooks. Forms of university teaching. Methods of university teaching. Verification methods and student assessment. Creation of a didactic test. Designing university teaching process. University teacher self-reflection.

## COURSE INFORMATION LETTER

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Science	
<b>Course ID:</b> KPPaPZ/PsVU/17	<b>Course name:</b> Psychology for University Lecturers
<b>Course type, scope and the method:</b> <b>Course type:</b> Lecture <b>Recommended course-load (hours):</b> <b>Per week: Per study period:</b> 28s <b>Course method:</b> distance, present	
<b>Number of ECTS credits:</b> 5	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> Case study, micro-output, its analysis Current modifications of the course are listed in the electronic bulletin board of the course.	
<b>Learning outcomes:</b> After completing the course, students will gain knowledge that allows them to understand, summarize and explain selected psychological knowledge from cognitive psychology, emotion and motivation psychology, personality psychology, developmental, social, educational psychology and health psychology. They will acquire skills to apply the above psychological knowledge necessary for the professional, competent performance of university teaching practice of doctoral students to create and implement the teaching of a professional topic with applied psychological knowledge and develop the competences to create and implement teaching of a professional topic with the application of psychological knowledge, as well as to evaluate their performance and the performance of their classmates in the form of constructive feedback.	
<b>Brief outline of the course:</b> The content of the course is based on selected psychological knowledge of cognitive psychology, psychology of emotions and motivation, personality psychology, developmental, social, educational psychology and health psychology. Teaching is realized by a combination of lectures with interactive, experiential methods, discussion, open communication with mutual respect, support of independence, activity and motivation of students. Syllabus: University teacher and his work in the teaching process with a focus on: teachers in relation to themselves (cognitive, personal, social and competencies in the use of methods), in relation to students and as part of the teacher-student relationship on the basis of selected areas of cognitive psychology, psychology of emotions and motivation, developmental psychology, social psychology, educational psychology and health psychology with application to the university environment

## COURSE INFORMATION LETTER

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Science	
<b>Course ID:</b> Dek. PF UPJŠ/JSD/14	<b>Course name:</b> Spring School for PhD Students
<b>Course type, scope and the method:</b> <b>Course type:</b> Lecture <b>Recommended course-load (hours):</b> <b>Per week: Per study period:</b> 4d <b>Course method:</b> distance, present	
<b>Number of ECTS credits:</b> 2	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> Active participation in the Spring School of PhD students of UPJŠ.	
<b>Learning outcomes:</b> By actively participating in the Spring School of PhD Students of UPJŠ, the PhD student demonstrates a high level of ability to process the issues of his dissertation for a multidisciplinary audience with an emphasis on clarifying the motivation, scientific problem, processing methodology and own contribution to the solution of the selected topic. The PhD student demonstrates the ability to professionally discuss various research topics, present his own positions and accept a plurality of opinions. Demonstrates the ability to communicate research results to a wider professional audience with adequate means and through the Slovak language.	
<b>Brief outline of the course:</b> 1. Interdisciplinary lectures from the fields of medicine, natural sciences, law, public affairs, humanities. Lecturers - top foreign or national experts from the mentioned fields. 2. Scientific lectures in sections created within related disciplines. Lecturers - top experts from UPJŠ from the mentioned fields. 3. Scientific contributions of PhD students in sections of related fields. 4. Panel discussions on the issue of PhD studies and current trends in the development of scientific disciplines at UPJŠ.

## COURSE INFORMATION LETTER

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Science	
<b>Course ID:</b> ÚINF/ PDS/22	<b>Course name:</b> The thesis for dissertation exam
<b>Course type, scope and the method:</b> <b>Course type:</b> <b>Recommended course-load (hours):</b> <b>Per week: Per study period:</b> <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 20	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> The thesis for dissertation exam is the result of the student's own scientific research. It must not show elements of academic fraud and must meet the criteria of good research practice defined in the Rector's Decision no. 21/2021, which lays down the rules for assessing plagiarism at Pavol Jozef Šafárik University in Košice and its components. Fulfillment of the criteria is verified mainly in the process of supervision and in the process of thesis defense. Failure to do so is reason for disciplinary action.	
<b>Learning outcomes:</b> The thesis for dissertation exam has the character of a scientific work and the student demonstrates extensive mastery of the theory and professional terminology of the field of study, acquisition of knowledge, skills and competencies in accordance with the declared profile of the graduate of the study program, elaboration of the state of the art in the given area and formulation of original scientific goals. The student demonstrates the ability of independent scientific work in terms of content, formal and ethical. Further details on the thesis for dissertation exam are determined by Directive no. 1/2011 on the basic requirements of final theses and the Study Regulations of UPJŠ in Košice for doctoral studies.	
<b>Brief outline of the course:</b> 1. Elaboration of the dissertation thesis in accordance with the instructions of the supervisor. 2. Presentation of the results of the dissertation thesis before the examination commission. 3. Answering oponents' questions and questions related to the topic of the dissertation thesis within the discussion.	
<b>Recommended literature:</b> The recommended literature is determined individually in accordance with the topic of the dissertation thesis.	
<b>Course language:</b> Slovak or English

## COURSE INFORMATION LETTER

<b>University:</b> P. J. Šafárik University in Košice	
<b>Faculty:</b> Faculty of Science	
<b>Course ID:</b> ÚINF/TNSD/15	<b>Course name:</b> Theoretical aspects of neural networks
<b>Course type, scope and the method:</b> <b>Course type:</b> Lecture <b>Recommended course-load (hours):</b> <b>Per week:</b> 2 <b>Per study period:</b> 28 <b>Course method:</b> present	
<b>Number of ECTS credits:</b> 9	
<b>Recommended semester/trimester of the course:</b>	
<b>Course level:</b> III.	
<b>Prerequisites:</b>	
<b>Conditions for course completion:</b> Evaluation of individual work in the study of theoretical issues of neural networks - advanced methods of neural networks. Oral examination based on selected type of neural network.	
<b>Learning outcomes:</b> To understand mathematical principles of neural networks and to know their capabilities. To be able to construct models of neural networks to solve some problems.	
<b>Brief outline of the course:</b> 1.-3. Computational complexity of neural networks. 4.-6. Probabilistic neural networks. 7.-9. Computational capability of neural networks, a transformation of neural networks to Turing machines, and Turing machines to neural networks. 10.-12. Approximation of functions using neural networks. 13. Kolmogorov theorem and its proof, theorems connected to Kolmogorov theorem.
