| During consultations Independent and creat | Conditions for course completion: During consultations during the semester. Independent and creative mastery of theoretical and practical aspects of the issue and an overview of the current state of research and further direction, in the form of an oral exam, are evaluated. | | | | |
| Learning outcomes: The aim of the course is to understand the basic features of formal conceptual analysis as one of the methods of relational-data analysis and its relationship to other data-mining methods. | | | | | |
| Brief outline of the course: Basic theorem on conceptual lattices. Fuzzifications of concept lattices. Formal conceptual analysis in terms of category theory. Relationship of formal concept analysis to other data-mining methods. Applications of formal concept analysis. | | | | | |
| Recommended literature: 1. BĚLOHLÁVEK, Radim. Fuzzy relational systems: foundations and principles. New York: Kluwer Academic/Plenum Publishers, [2002]. | Learning outcomes: To learn essential properties of the used cryptographic authentication and certification schemes and standard methods of attacks to them. To understand the theoretical background of a design of formal models and know how it is possible to utilise them in practise. To know the actual problems concerning the analysis of the security of cryptographic protocols. | | | |
| Brief outline of the course: Authentication and certification schemes, key distribution and maintenance. Formal description of cryptographic protocols and methods for their analysis. Algebraic and logic methods for attack modelling, utilisation of dynamic logical systems. Datalog for automatic security verification. | | | |

| Course ID: Dek. PF | Course name: Spring School for PhD Students |
|--------------------|---|
| UPJŠ/JSD/14 | |

Course type, scope and the method: Course type: Lecture Recommended course-load (hours): Per week: Per study period: 4d

Course method: distance, present

Number of ECTS credits: 2

Recommended semester/trimester of the course:

Course level: III.

Prerequisities:

Conditions for course completion:

Active participation in the Spring School of PhD students of UPJŠ.

Learning outcomes:

By actively participating in the Spring School of PhD Students of UPJŠ, the PhD student demonstrates a high level of ability to process the issues of his dissertation for a multidisciplinary audience with an emphasis on clarifying the motivation, scientific problem, processing methodology and own contribution to the solution of the selected topic. The PhD student demonstrates the ability to professionally discuss various research topics, present his own positions and accept a plurality of opinions. Demonstrates the ability to communicate research results to a wider professional audience with adequate means and through the Slovak language.

Brief outline of the course:

1. Interdisciplinary lectures from the fields of medicine, natural sciences, law, public affairs, humanities. Lecturers - top foreign or national experts from the mentioned fields.

2. Scientific lectures in sections created within related disciplines. Lecturers - top experts from UPJŠ from the mentioned fields.

3. Scientific contributions of PhD students in sections of related fields.

4. Panel discussions on the issue of PhD studies and current trends in the development of scientific disciplines at UPJŠ.

Recommended literature:

Proceedings of the Spring School of Doctoral Students.

| Course ID: ÚINF/ PDS/22 | Course name: The thesis for dissertation exam |
| Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present | |
| Number of ECTS credits: 20 | |
| Recommended semester/trimester of the course: | |
| Course level: III. | |
| Prerequisities: | |
| | |

Conditions for course completion:

The thesis for dissertation exam is the result of the student's own scientific research. It must not show elements of academic fraud and must meet the criteria of good research practice defined in the Rector's Decision no. 21/2021, which lays down the rules for assessing plagiarism at Pavol Jozef Šafárik University in Košice and its components. Fulfillment of the criteria is verified mainly in the process of supervision and in the process of thesis defense. Failure to do so is reason for disciplinary action.

Learning outcomes:

The thesis for dissertation exam has the character of a scientific work and the student demonstrates extensive mastery of the theory and professional terminology of the field of study, acquisition of knowledge, skills and competencies in accordance with the declared profile of the graduate of the study program, elaboration of the state of the art in the given area and formulation of original scientific goals. The student demonstrates the ability of independent scientific work in terms of content, formal and ethical. Further details on the thesis for dissertation exam are determined by Directive no. 1/2011 on the basic requirements of final theses and the Study Regulations of UPJŠ in Košice for doctoral studies.

Brief outline of the course:

1. Elaboration of the dissertation thesis in accordance with the instructions of the supervisor.

2, Presentation of the results of the dissertation thesis before the examination commission.

3. Answering oponents' questions and questions related to the topic of the dissertation thesis within the discussion.

Recommended literature:

The recommended literature is determined individually in accordance with the topic of the dissertation thesis.

Course language:

Slovak or English
