COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ KOGPS/11	Course name: Cognitive Psychology
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 3 / 2 Per study period: 42 / 28 Course method: present	
Number of ECTS credits: 7	
Recommended semester/trimester of the course: 2.	
Course level: I.	
Prerequisites:	
Conditions for course completion: During the semester, the student is required to complete three tasks: A) Written examination (max. number of points is 15, the required number of points is 8). The date is by default scheduled after a consultation week. B) Presentation of a seminar work on a chosen topic (max. number of points is 15, the required number of points is 8). C) Active participation during the seminar (max. number of points is 10, the required number is 1). To proceed to the final exam, it is necessary to obtain more than half of the total points that can be gained during the semester (note that a minimum number of points for activities A, B and C should be fulfilled as listed above). The final exam is in a written form. A student can get a maximum of 60 points. To pass, a student needs to obtain 31 and more points (note that credits will not be awarded to a student who gets less than 31 points from the final exam and whose sum of points obtained during the semester and the final exam is less than 51). The final mark is created by adding the points that the student gained during the semester and the final exam. At least 90 points must be obtained to obtain an "A" rating, 80-89 points to obtain an "B" rating, 70-79 points to obtain a "C" rating, 60-69 points to obtain a "D" rating and 51 to obtain an "E" rating 51 -59 points. The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: The main goal of the course is to acquaint students with cognitive psychology, as a scientific discipline that deals with the study of human cognition, and to provide them with the current knowledge related to human cognition. In addition, the course also emphasizes the ability to properly understand this knowledge and apply it. For this purpose, the course provides not only an overview of the main theories of selected cognitive processes and the broader context of the discipline but also practice: practical illustrations and systematic encouragement of critical thinking. The main goal of seminars is to train the ability to use and adequately present the acquired knowledge, connect this knowledge to other related areas, think about it independently, discuss it critically and, last but not least, to flexibly and creatively solve various related model activities.	

Knowledge: Students will gain an overview of the history and development of cognitive psychology, including major theories and models. They will acquire knowledge about cognitive processes such as perception, attention, memory, learning, thinking, and language. They will be familiar with the main paradigms of thinking about these cognitive processes and the research methods used in cognitive psychology.

Abilities: Students will develop the ability to think about cognitive processes within the framework of selected theoretical models. They will be able to apply cognitive psychology theories to real-life situations and problems. They will gain the skill to design and conduct experiments to investigate cognitive processes. Students can build upon the acquired abilities and further develop them in subsequent courses.

Skills

Students will be able to use the principles of cognitive psychology to solve practical problems. They will understand optimally functioning cognitive processes as well as their natural limits and will be able to effectively communicate concepts and research findings in the field of cognitive psychology. They will be prepared to critically follow current developments and research in cognitive psychology.

The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.

Course level: I., P	
Prerequisites:	
Conditions for course completion: The conditions for passing the course are as follows: 1. Active participation in exercises. Max. the missed range is 90 min. 2. Submission of the reflection on the selected topic within the specified time. Reflection topic: My strengths and weaknesses in conflict management. In a short presentation of their reflection, in the form of deconstruction, students will describe their strengths and weaknesses in the management of conflict situations with a focus on the application of knowledge, skills and competences needed in conflict situations in the work environment and the school environment. The evaluation of the course and its subsequent completion will be based on clearly and objectively set requirements, which will be set in advance and will not change. The aim of the assessment is to ensure an objective and fair mapping of the student's knowledge while adhering to all ethical and moral standards. There is no tolerance for students' fraudulent behavior, whether in the teaching process or in the assessment process.	
Learning outcomes: Successful mastery and demonstration of knowledge in the field of conflict management and control of basic rules. The method of teaching the subject will be oriented to the student. Lecturers will be interested in students' needs, expectations and opinions so as to encourage them to think critically by expressing respect and feedback on their opinions and needs. The content of the curriculum will be based on primary and high-quality sources that will reflect the topicality of the topics so as to ensure the connection of the curriculum with other subjects and also the connection of the curriculum with practice. Students will be expected to take an active approach in lectures and seminars with an emphasis on their independence and responsibility. The student is able to demonstrate an understanding of an individual's behavior in various conflict situations. The student is able to describe, explain and evaluate their own internal resources, competencies as well as limitations and weaknesses that are directly related to conflict management. The student is able to apply theoretical knowledge and principles of conflict resolution to everyday situations. After completing the course, students will be able to: a) express and summarize basic knowledge related to conflict management; b) understand the basic rules and dynamics of the origin, course	

and termination of the conflict; c) apply knowledge in practice, e.g. in the school environment; d) apply key competencies that increase the possibilities of their application in all areas of practice with a special focus on the work of a teacher. They will acquire knowledge from the theory of conflict management as well as capabilities and competences for solving them, e.g. in the context of school teams.

Number of ECTS credits: 2	
Recommended semester/trimester of the course: 1.	
Course level: I.	
Prerequisites:	
Conditions for course completion: Rating Conditions of continuous control and awarding of assessment: Active participation in teaching, the student has assignments during the semester - 2 assignments (Electronic subject bulletin board). During the semester, students take a knowledge test and a final knowledge test. If the teaching is carried out in a classical way - face-to-face form of teaching. In the case of the distance form of study, emphasis is placed on independent study and written processing of assignments (seminar work as a project for the entire semester, submission of partial outputs by the specified date. Electronic bulletin board). The condition for registering for the exam is to pass the final written test on the basic problems that are connected with the development of philosophical thinking from Thales to Nietzsche. Conditions for awarding the exam: only after successfully passing the knowledge test - the final test, the student can take the written exam. After its successful implementation, the student will receive credits for the subject.	
Learning outcomes: Students will gain an understanding of the fundamental issues in the history of philosophy from Thales to Nietzsche. The discipline presents an overview of more specialized philosophical topics and works that influenced the development of disciplines such as psychology and social work. Students will acquire basic terminology from philosophy by studying source texts of periods of the history of philosophy in relation to the discipline of their field of study. The student acquires the ability for a deeper understanding of historical events, where the emphasis is placed on critical thinking with an emphasis on self-knowledge. The information is updated annually in the subject's electronic message board in AIS2 or in the MS Teams environment.

Learning outcomes: Knowledge: Students will acquire basic knowledge of psychological measurement, including the principles of measurement and scaling, characteristics of psychodiagnostic methods, and test theories. They will learn the fundamentals of test construction, item analysis, reliability and validity assessment, as well as normalization and norm creation. These insights will enable them to apply psychodiagnostic tools in practice, not only in clinical settings but also in educational environments, such as in assessing and supporting student development. Skills: Students will learn to critically evaluate and interpret data obtained through psychological and psychodiagnostic tools. They will master basic procedures for test construction and item analysis, with the ability to apply these skills in school settings, for example, in creating tools for student assessment or supporting their individual development. Competencies: Graduates will be able to effectively apply psychological knowledge and diagnostic tools in various areas of practice, including educational settings. They will be prepared to responsibly and ethically use psychodiagnostic methods, contributing to individual development and improving the quality of the educational process.
