COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ APP/23	Course name: Advanced Psychopathology
Course type, scope and the method: Course type: Lecture Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites: KPS/KLP/08	
Conditions for course completion: Written tests (100%). Credits will be awarded to a student who achieves a grade of at least 60% in the final assessment.	
Learning outcomes: Knowledge: The course extends and integrates the knowledge gained from the courses Clinical Psychology, Psychiatry and Psychopathology for Psychologists. The graduate will gain a comprehensive view of individual case studies and patient psychological problems integrating the perspective and approach of the psychiatrist and clinical psychologist. The lecturer's own case studies from practice will also be presented. In addition, in conjunction with the latest theories and research, the student will gain knowledge of self-care as a future helping professional. Skills: The student will gain the ability to evaluate, analyze, and integrate theoretical knowledge with the practical possibilities of the clinical psychologist in practice. Competency: The student is able to participate in the diagnosis and management of patients in clinical practice.	
Brief outline of the course: 1. The self-assessment and work of clinical psychologist. Sources of stress, privileges, doubts and failures. 2. Self-care in the work of clinical psychologist 3. Self-improvement in the work of clinical psychologist 4. Mood Disorder 5. Alcohol Dependence 6. Paranoid Schizophrenia 7. Bipolar Disorder 8. Major Depressive Disorder 9. Social Phobia 10. Generalized Anxiety Disorder 11. Posttraumatic Stress Disorder 12. Eating Disorder 13. Borderline Personality Disorder

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PSM/21	Course name: Advanced Statistical Methods
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Students evaluation is based on class activity during the semester (10 points) and on the test in the middle of the semester (30 points). The test consists of three practical questions solved on computers with SPSS software. Students with at least 21 points during the semester are allowed to take an exam. Final exam (60 points) consists of theoretical as well as of practical questions and more than 30 points is needed to pass the exam. Final evaluation (sum of all points): A (90-100p) B (80-89 p.) C (70-79p.) D (60-69 p.) E (51-59 p.) FX (0-50 p.) The information will be yearly specified on the electronic noticeboard of the course in AiS2, aleternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: The aim of the course is to acquire in-depth theory and practical skills in the use of advanced statistical methods. Knowledge Upon completion of the course, the student will have theoretical knowledge of advanced statistical methods, e.g. various alternatives to analysis of variance, multiple regression or factor analysis. Based on an understanding of the scientific problem to be solved, the student is able to apply the theoretical knowledge to its solution. Skills The graduate is able to decide which advanced statistical methods are appropriate to apply to a particular research problem. For each of these methods, the student is able to verify the conditions for their use, implement them and interpret the results obtained. Competences The student will develop competence in analytical-synthetic reasoning in the processing and psychological interpretation of data. The student is able to critically evaluate and apply the findings obtained by appropriately chosen statistical methods in solving a scientific problem.	

Information is updated annually on the course electronic bulletin board in AiS2, alternatively in the UPJŠ LMS or MS Teams environment.					
Brief outline of the course: <ol style="list-style-type: none"> 1. Review of basic statistical methods 1 (descriptive statistics – measures of central tendency, variability, position, hypothesis testing – parametric statistics). 2. Review of basic statistical methods 2 (hypothesis testing – nonparametric statistics, correlation, regression). 3. One-way analysis of variance. Purpose, assumptions, procedure, results interpretation, post hoc tests. 4. Two-way ANOVA, repeated measures ANOVA. Purpose, assumptions, procedure, results interpretation, post hoc tests. 5. Nonparametric alternatives of ANOVA (Kruskal-Wallis, Friedman, Cochran Q). Suitable scientific questions and data, purpose of methods, assumptions, procedure, results interpretation, post hoc tests. 6. MANOVA. Purpose, assumptions, differences in comparison with ANOVA, logic of test, procedure in SPSS, results interpretation, post hoc tests (ANOVA). 7. Polynominal regression analysis, logistic regression. Differences from simple regression, purpose, methods of regression, assessing regression model and predictors. Appropriateness of logistic regression in psychological research. 8. Factor analysis (exploratory), principal components analysis. Purpose of factor analysis, methods of factor analysis, rotation, factor loadings, decisions about number of factors, interpretation of results. 9. Cluster analysis. Purpose and logic of cluster analysis. Methods, reading cluster analysis results. 10. Multidimensional scaling. Purpose and logic of multidimensional scaling, its methods and possible applications. 11. Structural equations modelling. Differences from "classical" statistical methods (confirmation technique), examples of use (confirmatory factor analysis, mediation), assessing model, changing model. <p>The information will be yearly specified on the electronic noticeboard of the course in AiS2, aleternatively in LMS UPJŠ or MS Teams environment.</p>

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ KPP/20	Course name: Career counseling for psychologists
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 2 Per study period: 14 / 28 Course method: present	
Number of ECTS credits: 5	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites:	
Conditions for course completion: - participation and written reflection from a workplace visit (20%) - completion of the online course My career (20%) - activity during the semester (10%) - final evaluation: final exam (50%) Final evaluation of the course (the final grade represents the sum of points for work during the semester and the final exam): Sum of all points: A: 90 – 100 B: 80 – 89 C: 70 – 79 D: 60 – 69 E: 51 – 59 FX: 50 and less	
Learning outcomes: The aim of the course is to provide students with current information about the role of career counselling and about its system in Slovakia and abroad. At the same time, the students will get to know career development theories, methods, tools and assessments and try them out in practice. By completing the course, students will gain an overview of the work of a psychologist as a career counsellor and his competencies. Also they will have the opportunity to meet with career counsellors and visit their workplaces.	
Brief outline of the course: 1. Career counselling in the 21st century - multidisciplinary basis of career counselling; theories and approaches of career counselling; role of the career counselling; system and concepts of career counselling in Slovakia and abroad; current trends in career counselling and changes in the labor market. 2. Methods of career counselling - tools and techniques used in career counselling. 3. Competencies of a career counsellor - conducting an interview and obtaining information about the world of work. Identification of the client's needs, identification of his competencies, interests	

and talents and their connection with the labor market, development of skills for managing the client's own career, evaluation of the client's progress. Ethics in career counselling.					
4. Career counsellor in the practice of lifelong counselling - counsellor in regional and higher education (Center for educational and psychological counselling and prevention (CPPPaP), school psychologist, educational counsellor, career counsellor at universities), career counsellor at Offices of Labour, Social Affairs and Family, career counsellor in HR, career counsellor in private practices.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ KAZKL/12	Course name: Casuistic Seminar in Clinical Psychology
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites: KPS/PDE/08	
Conditions for course completion: Students are expected to attend each seminar, actively participate in discussions and work with selected diagnostic methods throughout the whole semester (min. 5, max. 10 points). Students are also expected to prepare an assignment concerning the practical application of selected psychodiagnostic methods (min. 15, max. 30 points).	
Learning outcomes: Knowledge: The graduate will deepen gained knowledge about the most common practices of a psychologist and practical aspects of diagnostic procedures. Skills: The student will gain skills in psychodiagnostic procedures - administration, scoring, test battery preparation, and interpretation of results. Competences: The graduate will be able to practically apply gained skills to diagnostic process in specific areas (diagnostics of mental retardation, school readiness, professional orientation etc.)	
Brief outline of the course: Diagnostics of early development Intelligence scales Projective methods Diagnostics of specific areas and disorders - affective, neurotic, personality disorders, development of school skills, behaviour disorders etc. (considering the requirements of a student)

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ KLP/08	Course name: Clinical Psychology
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: The final evaluation is a combination of the seminar completion 40% (40 points) and the final exam 60% (60 points). Conditions for seminar completion: The aim of seminars is to provide insight into psychopathological manifestations of different types of mental health problems. Seminars will be realized at the Psychiatric clinic, therefore the student may have practical contact with hospitalized patients. He/she may practice interviews, to discuss the choice of psychodiagnostic methods for specific types of clinical situations, as well as possible psychotherapeutic interventions. The student has to prepare a seminar work on the assigned topic during the seminars—maximum points 40. Final exam (60 points) Requirements: Theoretical knowledge (literature, lectures) - test Case study analysis – oral discussion Final evaluation (sum of all points): For A is needed a minimum 91 points, for B a minimum 81 points, for C a minimum 71 points, for D a minimum 61 points, for E a minimum 51 points, for FX = 50 and less The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: Knowledge: The student will gain an in-depth understanding of the basic characteristics of different groups of mental health changes, and the possibilities of psychological intervention. Skills: The student will acquire the ability to conduct supervised psychological interviews with patients with psychiatric diagnoses, to work with specific clinical and test psychodiagnostic methods from the field of clinical psychology, and to formulate adequate clinical-psychological conclusions. Competencies: The graduate is able to comprehensively analyze an individual case and work independently with a patient. The student is able to apply the theoretical knowledge of	

clinical psychology in practice. He/she is oriented in psychodiagnostic procedures in individual psychological disorders. Is competent to make psychological findings and conclusions.

Brief outline of the course:

Clinical psychology

1. Basic psychological concepts of mental health changes: psychoanalytic and psychodynamic approach, behavioristic perspectives, cognitive approach, humanistic view. Factors influencing mental health.
2. Systems of classification: DSM V, ICD – 10, similarities and differences, description of basic categories of mental disorders
3. Specific issues in clinical psychology: anxiety disorders, schizophrenia, mood disorders, sexual disorders, personality disorders, eating disorders, developmental disorders, neurological disorders, addictions.
4. Psychological examination: general aspects of psychological report writing, diagnostic methods in clinical psychology (clinical and testing methods). Assessment interview (general and specific considerations, procedure in clinical interview). Clinical evaluation of intellectual function, personality assessment (inventories and projective methods in clinical practice), neuropsychological assessment.
5. Basics in psychotherapy – review of basic approaches, their principles and psychotherapeutic modalities. Psychodynamic perspective, cognitive-behavioral approach. Individual, group and family psychotherapy, therapeutic community. Principles of crisis intervention. Supportive psychotherapy.

The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/KBT1/19	Course name: Cognitive Behavioral Therapy 1
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites: KPS/PTER/08	
Conditions for course completion: Course completion conditions: 40% assessment during semester (40p), 60% exam (60p) Assessment during semester: short tests, presentation Min. the number of points obtained per semester required for admission to the examination is 21p. A final evaluation is a sum of assessment during semester and exam: A = 90 - 100 B = 80 - 89 C = 70 - 79 D = 60 - 69 E = 51 - 59 FX = 0 - 50 The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: The subject will provide students with an idea of the possibilities of CBT therapy from the first contact with the client, assessment of problems to the use of CBT techniques. They will acquire skills that enable the identification of distorted thinking, the ability to modify our beliefs, acting in different ways, and skills that modify behavior up to its change. The student is able to preformulate the case and in cooperation with the client define problems and goals, establish a relationship with the patient, arouse a sense of hope, enable the client to understand the theoretical model of the disorder and verify the patient's cooperation with the therapist in practice. The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Brief outline of the course: 1. Introduction. History CBT. Origin and evolution of behavioral therapy, basic features of behavioral therapy. 2. Basic features of cognitive therapy, integration of behavioral and cognitive approaches. Cognitive behavioral approach. 3. The position of CBT system among the other psychotherapeutic approaches. 4. Basics of cognitive - behavioral approach work, mapping of problems in Assessment, Practical	

training of the approach towards problems and survival in terms of cognitive- behavioral therapy.

5. Theory of CBT , basic concepts, models and maintenance of psychiatric disorders .
6. Structure of cognitive behavioral therapy, assessment. Behavioral analysis. Cognitive analysis. Functional analysis.
7. Definition, formulation, the goal of the therapy, treatment plan, the end therapy.
8. Cognitive behavioral techniques, The structure of the CBT session. The therapeutic relationship within the CBT.
9. Methods of cognitive - behavioral therapy - behavioral techniques. Engagement of the patient into the therapy. The relaxation, controlled breathing. Exposition. Tracking and planning of activities.
10. The methods of cognitive - behavioral therapy - Cognitive techniques. Education. Techniques aimed at diverting of the attention. Cognitive rescheduling. Work with automatic thoughts. Imagination work.

Page: 2

11. Complex cognitive - behavioral programs. Group CBT. Practical training of the social capabilities. Practice of problem solving attitudes. Coping with emotions Training, Selection of patients for the group. Construction of the CBT Group.
12. Practical application of the CBT in the treatment of selected mental disorders – Affective disorders - anxiety disorder, panic anxiety disorders - Anxiety Comorbidity disorders, diagnosis of vicious circle, planning of the activities.
13. Practical application of CBT in the treatment of selected mental disorders - social phobia, depression - a vicious circle, cognitive processing, goals of the treatment.

The information will be yearly specified on the electronic noticeboard of the course in AiS2, aleternatively in LMS UPJŠ or MS Teams environment.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ KBT2/19	Course name: Cognitive Behavioral Therapy 2
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites: KPS/KBT1/19	
Conditions for course completion: Course completion conditions: 60% assessment during semester (60p), 40% exam (40p) Assessment during semester: 4 requirements (75% attendance, active participation in seminars, work on homework and writing case studies (max. 10 points) and submission of written work (max. 50 points). The written work is focused on a specific disorder, which is the content of the semester curriculum and treatment options used in CBT. The work must contain at least 6 pages of text from at least 8 sources, primarily articles from journals published in the last 5 years, conference proceedings of KBT and professional literature. Min. the number of points obtained per semester required for admission to the examination is 31p. Exam: written, in the form of a test A final evaluation is a sum of assessment during semester and exam: A = 90 - 100 B = 80 - 89 C = 70 - 79 D = 60 - 69 E = 51 - 59 FX = 0 - 50 The information will be yearly specified on the electronic noticeboard of the course in AiS2, aleternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: The aim of this subject is to gain knowledge about CBT and expand student's ability to apply the CBT model in practice in a therapeutic relationship with their own clients. At the end of the semester, students present the issues of their clients within CBT and present the use of appropriate procedures and methods. They can follow three basic functions: 1. Describe clearly the specific problem behavior. 2. Determine what causes this problem behavior. 3. Determine what consequences sustain the problem behavior. Within the clinical experience, students conduct therapeutic sessions with the client, under supervision. They can examine problem behavior, measure its frequency, the intensity of selected manifestations, their duration. The information will be yearly specified on the electronic noticeboard of the course in AiS2, aleternatively in LMS UPJŠ or MS Teams environment.	

Brief outline of the course:

1. Basic principles of cognitive therapy, the basic assumptions of cognitive therapy, method of troubleshooting.
2. Depressive disorders – diagnostic criteria and cognitive behavioral therapy, types of depressive disorders, cognitive distortions in depressions, ways to increase patient activity.
3. Diagnostic criteria and cognitive behavioral therapy of posttraumatic stress disorder flashbacks, work with exposure in PTSD.
4. Use of social skills in the prevention of depression, training of social skills by Lieberman.
5. The prevention of depression by practicing awareness – mindfulness.
6. Diagnostic criteria and cognitive behavioral therapy of obsessive compulsive disorder, evaluation and measurement in OCD, exposure of barrier rituals.

Page: 2

7. Diagnostic criteria and cognitive behavioral therapy of eating disorders – anorexia nervosa and bulimia, working with the recording of consumption, work with ideas, change attitudes towards themselves, their physique and body weight.
8. Cognitive behavioral therapy of obesity, group programs, work with records – eating and exercise habits. Techniques of self – control and self-strengthening.
9. Cognitive behavioral approaches in management of marital and family problems.
10. Diagnostic criteria for mental and behavioral disorders caused by effects of psychoactive substances, cognitive behavioral therapy of addictions, 12 steps approach, community reinforcement approach.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ SASP/23	Course name: Current Applied Social Psychology
Course type, scope and the method: Course type: Lecture Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Written exam (100%). Credits will be awarded to a student who achieves a grade of at least 52% in the final assessment.	
Learning outcomes: The aim: The graduate will gain an overview of the current direction of research in the field of application of socio-psychological knowledge and the practical life of an individual and society. Knowledges: The participants are acquainted with selected research methods of applied social psychology and interventions. Topics are chosen with regard to their possibility of use in specific psychological practice. Skills: The student will acquire the ability to apply and transform socio-psychological knowledge in various areas in the social (politics, education, sports, etc.) and individual context (e.g. social competence, stress management, etc.). Competences: The graduate is capable of analyzing and synthesizing and applying the acquired knowledge to specific psychological practice.	
Brief outline of the course: A. Introduction: Field of Applied Social Psychology (Applied Social Psychology as a science and practice, Current methods in Applied Social Psychology research, Behaviour - focused Social Psychology interventions). B. Applied Social Psychology focused on social context: Social psychology and politics (Political psychology – personal and cognitive approach, Political psychology on macrosocial level, Psychology of power); Social psychology in health care and health (Psychology of health promotion and illness prevention); Social psychology in education and sport (School and sport as social institutions, Group dynamics in the classroom and in the sport teams); Social psychology and criminal justice system (Psychology of law, Crime behaviour, Safety perception). C. Applied Social psychology focused on individual context: Social intelligence, self-actualisation and well-being (Social and emotional intelligence, Concept of self-actualisation and self-efficacy, Social competence and social skills, Wisdom, Wellbeing and value orientations); Coping (Stress reactions and coping, Individual coping strategies, Social psychological training of coping, Resilience); Social network (Social support, Learned helplessness and gloom).

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ STP/21	Course name: Current Trends in Psychology
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Course completion conditions: 40% assessment during semester, 60% exam Assessment during semester: 4 assignments (10 points for each assignment) Exam: written, in the form of a test (30 questions) A final evaluation is a sum of assessment during semester and exam. More detailed instructions are published on the electronic bulletin board of the course. The information will be yearly specified on the electronic noticeboard of the course in AIS2, alternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: Knowledge: Students will obtain an overview of information about current direction of research in selected areas of basic and applied psychological disciplines (cognitive psychology, personality psychology, counseling, clinical psychology), which primarily leads to knowledge of individual experience and behavior in an interpersonal context from the perspective of cognitive neuroscience. Skills: A part of the learning process is to develop analytical-synthesizing thinking for the needs of deeper understanding and application of acquired knowledge. Competencies: The student is able to use a broader theoretical overview for better orientation in the field of science and clinical practice. The information will be yearly specified on the electronic noticeboard of the course in AIS2, alternatively in LMS UPJŠ or MS Teams environment.	
Brief outline of the course: 1. Social mind (cognition, emotions, and personality in the context of cognitive neurosciences). 2. Consciousness and self-awareness. 3. Unconscious: automatic versus intentional processes. 4. Social perception. 5. Rational and intuitive decision making. 6. Personality disorders. 7. Stress and post-traumatic growth. 8. Burnout and compassion fatigue. 9. Attachment and mentalization.	

The information will be yearly specified on the electronic noticeboard of the course in AIS2, alternatively in LMS UPJŠ or MS Teams environment.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/DS1/09	Course name: Diploma Thesis Seminar 1
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Requirements for obtaining credits for the course: <ul style="list-style-type: none"> - participation in joint consultations - min. 15 pages of text to include an overview of the knowledge of the chosen topic and a research project proposal - min. 5 consultations with the tutor of work The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: Processing a literary review of the solved topic. Preparation of the theoretical background of the diploma thesis and sketch of the research project. Knowledge: Students will gain an overview of how to conduct a comprehensive literature review on the chosen topic. They will gain knowledge about critically evaluating the quality of sources. They will acquire knowledge about preparing the theoretical foundations for a diploma thesis. They will become familiar with designing a research project, including formulating research questions and hypotheses. They will learn the structure and style of academic writing, particularly for a thesis. Additionally, students will understand the replication crisis in psychology and the importance of open-science practices. Abilities: Students will develop the ability to critically evaluate research findings. They will be able to design and conduct research projects on the chosen topic. They will gain the ability to analyze and interpret data from research. They will be capable of creating detailed research protocols and scientific manuscripts. They will be able to discuss and critically evaluate research procedures and findings. Furthermore, they will learn to apply open-science practices to enhance the transparency and reproducibility of their research. They will be able to critically evaluate the quality and reliability of sources. They will also be able to identify and avoid problematic research practices. Skills: Students will acquire the skill to search for literature using scientific databases. They will learn to synthesize information from various sources into a coherent literature review. They will master the skill of creating a detailed outline for the research project. They will gain competence in writing protocols and drafts for the diploma thesis. They will also develop skills in implementing open-science practices, such as sharing research data openly, pre-registering studies, etc. They will learn to critically evaluate the quality and reliability of sources.	

The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Brief outline of the course: The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ DIS2/08	Course name: Diploma Thesis Seminar 2
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present	
Number of ECTS credits: 2	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Obtaining credits is based on: - completing joint consultations - min. 5 consultation with the tutor - realization of empirical research according to the prepared project The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: The aim of the course is to ensure and guide the preparation of the thesis. Key aspects that student should pay attention during the preparation of the thesis are covered and critically discussed with emphasis on the interconnection of previously acquired knowledge from the methodology, statistics and other crucial fields of expertise. Knowledge: Students will gain an overview of advanced research preparation techniques, including planning the sample size and selecting appropriate tools and methods. They will acquire knowledge about choosing suitable data analysis methods. They will become familiar with the need for a comprehensive discussion of obtained results. This knowledge is presented in the context of the replication crisis and the importance of current trends in open science. Abilities: Students will develop the ability to plan and conduct advanced research projects. They will be able to determine the appropriate sample size and select suitable tools and methods for their research. They will gain the ability to choose and apply appropriate data analysis methods. They will be capable of providing a comprehensive discussion of the obtained results and their interpretation. Furthermore, they will learn to apply open-science practices to enhance the transparency and reproducibility of their research. Skills: Students will acquire the skill to plan the sample size and select appropriate tools and methods, as well as apply various data analysis methods. They will master the skill of providing a comprehensive discussion of research results. They will gain competence in implementing open-science practices, such as sharing research data openly and pre-registering studies. Additionally, they will develop skills in recognizing and avoiding problematic research practices. The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KSP/ DiPor/15	Course name: Distance Counselling
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: The subject is limited by the number of students due to the capacity of the training workplace - 15 psychology students, 15 social work students. The selection is made based on the time of registration of the subject - for the first 15 psychologists and the first 15 social workers! Teaching is carried out in two phases: block teaching of theory and counseling skills training, September - October; completion of services at the Children's Trust Line workplace, October - December. The point gain is max 100 points per semester in the distribution: 60b semester, 40b exam. Semester: 10 points - propagation activities 10 points - preparation of a blog article on the Children's Trust Line (LDD) 10 points - study and analysis of 10 counseling e-mails 15 points - consulting answer to 3 e-mails 15 points - conducting counseling communications at the cottage under the supervision of an LDD expert A minimum of 40 points must be obtained per semester. Subsequently, the student can take the exam. Students who get at least 45 points during the semester have the opportunity to pass the exam in advance. Written exam with a maximum gain of 40 points, the required minimum is 21 points. Rating: A 100-93b; B 92-83b; C 82-73b; D 72-66; E 65-61; FX 60-0	
Learning outcomes: Knowledge The student can compare the advantages and disadvantages of distance and face-to-face counseling He masters the basic counseling approaches Skills Interprets and can apply counseling methods Identifies the limits of distance counseling It applies the principles of the ethical code of distance counseling He controls the technological procedures of work in remote consulting Competences	

He is able to conduct consultative written communication under the supervision of an expert
Is able to prepare an advisory written response

Brief outline of the course:

Introduction – role of social work in the system of distance counselling.

Counselling.

Social-legal counselling.

Forms and types of counselling.

Attendance counselling.

Distance counselling.

Advantages and disadvantages of distance counselling.

Code of ethics.

Telephone counselling 1.

Telephone counselling 2.

E-mail counselling.

Other forms of distance counselling.

Clients of distance counselling.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PDP/08	Course name: Educational Psychology
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites:	
Conditions for course completion: I. Activity at seminars: 13 points II. Written examination: 12 points III. Pedagogical-psychological evaluation of the student - dynamic testing of learning potential: 25 points IV. Examination in the form of a written essay: 50 points. Final test in the form of an essay on an individually assigned topic, range 12-15 pages. The essay should be in the form of an overview of relevant latest findings from scientific monographs, research studies taking into account domestic and foreign studies (minimum 10 studies), using own applications, analyzes, synthesizing perspectives, evaluation. Deadline: 7 days before the exam (MsTeams). For A is needed minimum 91 points, for B minimum 81 points, for C minimum 71 points, for D minimum 61 points, for E minimum 51 points, for FX = 50 and less The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: After successfully completing the course, students master a systematic set of advanced knowledge from pedagogical psychology with an emphasis on understanding how to develop personality in the education process and using the latest research findings. The intention is simultaneously in the cognitive field to develop the ability to analyze and synthesize acquired knowledge for the needs of their application in the implementation of practical activities in the field of pedagogical psychology. Students are guided to transfer the acquired knowledge and skills in their practical application, especially in the form of creating intervention programs for different groups of students with special needs (testing and evaluating these students in the school environment, consulting with teachers and parents). In the process of study, the student should acquire a set of relevant knowledge at the level of understanding pedagogical-psychological phenomena. At the same time, the emphasis in the affective-motivational sphere is placed on independent, internally motivated activity in the study of pedagogical-psychological phenomena from currently published scientific sources, as well as on building a critical evaluation approach to the use of acquired knowledge. Part of the teaching is also the fulfillment of psychomotor goals - students acquire skills and abilities in conducting a pedagogical-psychological diagnostic interview, in the implementation of alternative methods of evaluating the study prerequisites of different groups of pupils and students, with an emphasis on	

dynamic testing in the field in school conditions, as well as in the creation of exit assessments for needs of teachers, school management and parents.
Information is updated annually on the subject's electronic bulletin board in AIS2, alternatively in the UPJŠ LMS or the MS Teams environment.

Brief outline of the course:

1. Educational Psychology - concepts and principles. Current and classical approaches to the topics of educational psychology.
 2. Taxonomy of educational objectives and its application to the development of personality in the process of education. Psychological conceptions of the learning process.
 3. Learning, current approaches, theories and applications.
 4. Meaningful learning vs mechanical learning. Basic concepts. Internal processes and structures of learning. Variables of meaningful learning. Discovery learning and meaningful learning, their nature and contribution to the effectiveness of school learning.
 5. Creativity and talents - learning, developing creativity and talents.
 6. Psychological aspects of optimization and implementation of the educational process.
 7. Individualized and group instruction from a psychological point of view.
 8. Educational activity - methods of educating. Learner-centered approach.
 9. Pedagogical-psychological approaches to the acquisition of reading, writing, mathematics, science. Acquisition of reading fluency and reading comprehension.
 10. Understanding and management of learning disorders from the viewpoint of curriculum based assessment.
 11. Alternative methods of ability assessment (format response to intervention - RTI, functional diagnostics, curriculum based assessment) in relation to school performance. Dynamic assessment of the capabilities and performance of students in relation to their classrooms potential.
 12. Individual education program and its pedagogical and psychological content and characteristics.
 13. Consultation of students school problems.
 14. Educational intervention programs and their effectiveness.
- The information will be yearly specified on the electronic noticeboard of the course in AIS2, alternatively in LMS UPJŠ or MS Teams environment.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ EPS/16	Course name: Ethics for psychological practice
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites:	
Conditions for course completion: COURSE REQUIREMENTS 1. THE ETHICS AUTOBIOGRAPHY —To explore how to be ethical and professional, you need to know where you're coming from. To help accomplish this goal, the short paper (2-3 pages), will be an "ethics autobiography" in which you will explore the aspects of your background that might make it easier or harder to be ethical. Ethics autobiography is followed with your presentation some main ethic dilemmas. 2. ACTIVE DISCUSSING AND PARTICIPATING - I invite you to be active, to come along and explore with me how we make the transition from nice, caring, bright people to effective, ethical, caring professionals. 3. COMPARISON OF APA ETHIC CODE OF CONDUCT AND CODE OF CONDUCT IN YOUR LANGUAGE - You will find out ethic code of conduct in your language and bring it to seminar lesson. 4. CLASS PRESENTATION - The presentation's purpose is to be acquainted with a variety of topics in the fields of ethics and law. Each student is required to prepare and present materials. As part of the background material and the presentation one can use articles, clips from professional and folk books and films, information from the internet etc. The presentation would be minimum 25-30 minutes, thus leaving time for a short debate in class. FINAL GRADE is sum of activities during semester 1. THE ETHICS AUTOBIOGRAPHY 30% 2. ACTIVE DISCUSSING AND PARTICIPATING during semester 10% 3. COMPARISON OF ETHIC CODEs OF CONDUCT (Slovak to APA, Izraeli to APA) 20% 4. CLASS PRESENTATION 40% = 100%	
Learning outcomes: Knowledge: The graduate will gain an overview of the basic ethical principles of psychological work. He/she knows and masters domestic and foreign ethical psychological codes. Skills: He/she can assess and analyze specific cases of ethical dilemmas with awareness of the recommendations of specific ethical codes that regulate the profession of psychologist. He/she will gain the skill to apply specific steps and procedures for solving ethical dilemmas.	

Competencies: The student can think ethically, consider multiple perspectives of ethical dilemmas in psychology. He/she is aware of his/her own ethical obstacles.					
Brief outline of the course: <ol style="list-style-type: none"> 1. Place ethics in psychology 2. Historical roots 3. Overview of national and international ethics codes and principles 4. Resolving ethical issues and competence 5. Human relations 6. Privacy and Confidentiality 7. Ethics in psychotherapy Students will work with specific ethical cases from psychological practice.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ SEX/12	Course name: Human Sexuality
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Course completion conditions: 40% assessment during semester, 60% exam Assessment during semester: active participation in classes (including lectures), fulfillment of ongoing tasks 40% Exam: written work, where the student will use the newly acquired knowledge of the course 60% Final evaluation (sum of all points): A = 90 - 100 B = 80 - 89 C = 70 - 79 D = 60 - 69 E = 51 - 59 FX = 0 - 50	
Learning outcomes: The course Human Sexuality extends the knowledge obtained in the subjects Clinical Psychology, Psychiatry, Psychopathology and Psychotherapy considering the human sexuality. The aim of the subject is for students to obtain the overview and understanding about the most important fields of sexuology, to be able to think about it globally, in connection to the consulting practice, psychotherapeutical practice and medical practice. The course is mainly focused on the connection of scientific knowledge and practical experience so that students also acquire specific tools and competencies suitable for a possible meeting with a sexological client in the performance of their work.	
Brief outline of the course: Human sexuality – historical context Czech and Slovak sexuological setting (in the past as well as in the present) Standard and Normalization in sexuology Biological frame of human sexuality Psychosexual development and deviations in development Sexual education (communication about the topics of human reproduction and intimacy, contraception, sexually transmitted diseases and sexually risk behaviour considering the particularities of children and juveniles)	

Sexual dysfunctions – diagnostics and therapy Sexual deviations in object and activity - diagnostics and therapy

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ IDYNT/19	Course name: Introduction to Psychodynamic Psychotherapy
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites: KPS/PTER/08	
Conditions for course completion: Course completion conditions: 40% assessment during semester, 60% exam Assessment during semester: short test and class presentation of selected topic. Min. the number of points obtained per semester required for admission to the examination is 21p A final evaluation is a sum of assessment during semester and exam: A = 90 - 100 B = 80 - 89 C = 70 - 79 D = 60 - 69 E = 51 - 59 FX = 0 - 50	
Learning outcomes: The discipline is a combination of theoretical lectures and practical exercises. After successful completion of lectures, students are able to orient themselves in the basic psychodynamic principles. Through exercises, students train the application of these principles in practice. Students are acquainted with the application of psychodynamic theoretical concepts in everyday practice. In addition to theoretical knowledge, they will also gain the ability to learn and listen from several perspectives.	
Brief outline of the course: Theoretical outline: Introducing key concepts of psychodynamic psychotherapy. The Unconscious <ul style="list-style-type: none"> • Early childhood experiences. • Psychosexual development • The Oedipus complex • Repression • Dreams are wish-fulfilments. • Transference - countertransference • Free association • The Ego, the Id and the Super-Ego 	

Psychic determinism Neuropsychanalytic perspective of psychodynamics Practical outline: Psychodynamic listening Theory of reflection - focus on implicit (pre-conscious) feelings Becoming a flexible listener

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/IST/21	Course name: Introduction to Systemic Therapy
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Attendance - completion of 80% of instruction (lectures, seminars). Students evaluation is also based on (1) activities during the semester (40 points) and (2) final exam (60 points) by demonstrating theoretical and practical knowledge and skills in systemic therapy. (1) Activities evaluated during the semester: short test (max 20 points) and class presentation of selected topic (max 20 points). Minimum number of points needed to enter an exam: 21. (2) The final exam (max 60 points) includes test (max 30 points) a presentation of a counselling session video in which the student demonstrates their ability to use systemic procedures and techniques. Lectures and seminars will be held in person according to schedule following standard procedures. In case of distance learning, lectures and seminars will be held remotely via the Microsoft Teams application according to schedule. Students are required to connect and actively participate in Microsoft Teams meetings. Final evaluation (sum of all points): For A is needed minimum 91 points, for B minimum 81 points, for C minimum 71 points, for D minimum 61 points, for E minimum 51 points, for FX = 50 and less.	
Learning outcomes: The purpose of the course is equipping students with comprehensive understanding of how to approach people in a respectful and professional manner, especially in the professions of psychotherapy, psychological counselling and coaching. The aim of the course is to ensure that students: (1) understand "systemic approach" (mainly the basics of constructivist philosophy, communication theory, cybernetics, and the theory of autopoietic systems), (2) adopt the basics of systemic thinking (3) master the basic techniques of systemic work with an individual (the ability to set frameworks for cooperation, establish a respectful relationship, manage supportive and competing communication, and support the transfer of results to client situations) and above all (4) are able to apply all principles and procedures to themselves. The course is highly interactive with alternating lectures and seminars. In the seminars, students discuss the theories and methodologies they learned. With the help of stimulus sheets, they adopt the basic frameworks for understanding the concepts and models of systemic approaches. It allows them to choose from a wide range of systemic theories and methodologies based on their personal	

preferences and learning styles. This helps them apply the knowledge and skills learned in the course in practice more effectively.					
Brief outline of the course:

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PTR/08	Course name: Market and Advertisement Psychology
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 2., 4.	
Course level: II.	
Prerequisites:	
Conditions for course completion: 1. Steps of sales - an interview with recordings (audio, video). 5. week - 25 points. 2. A research study - research into the effectiveness of advertising. Week 7 - 25 points. 3. Completion of 80% of lectures and seminars. Applies to both full-time and part-time online teaching. 4. Final exam: written test - 50 points, minimum 26 points. 50% continuous assessment (minimum 26 points), 50% of the final assessment (minimum 26 points) Final evaluation (sum of all points): For A is needed minimum 91 points, for B minimum 81 points, for C minimum 71 points, for D minimum 61 points, for E minimum 51 points, for FX = 50 and less The information will be yearly specified on the electronic noticeboard (even a black board can be) of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: After successfully completing the subject, students master a systematic set of expanding knowledge from the psychology of advertising and the market with an emphasis on understanding how to recognize personality in the process of sales, creating advertising and in the course of consumer behavior and using the latest research findings. At the same time, the intention is to develop the ability to analyze and synthesize acquired knowledge in the cognitive field for the needs of their application in the implementation of practical activities in the field of advertising and market psychology. Students are guided to transfer the acquired knowledge and skills in their practical application, especially in the form of creating research projects for various groups of consumers and customers to learn about their needs (testing and evaluation in a natural environment, consulting with research clients). In the process of study, the student should acquire a set of relevant knowledge at the level of understanding ongoing psychological phenomena in the market environment. At the same time, the emphasis in the affective-motivational sphere is placed on independent, internally motivated activity in the study of psychological phenomena from currently published scientific sources, as well as on building a critical evaluation approach to the use of acquired knowledge. Part of the teaching is also the fulfillment of psychomotor goals - students acquire skills and abilities in conducting psychological diagnostic and sales interviews, in the implementation of evaluation methods of various groups of advertising variables, customer and seller personality, etc., with	

an emphasis on testing in the field, as well as creating output evaluations for the needs of the organization, research client, etc.
Information is updated annually on the subject's electronic bulletin board in AIS2, alternatively in the UPJŠ LMS or the MS Teams environment.

Brief outline of the course:

1 Topics and methods of market psychology and psychology of advertising. 2 Psychological and social determinants of consumer behavior. 3 Communication and empathy. 4 Phases and steps of the sales process. 5 Motivation and sales force management. 6 Personal and social competencies of marketing personnel and vendor. 7 Marketing communications from a psychological point of view. 8 Psychological characteristics of ads. 9 Psychological determinants of effective advertising. 10 Research in market and advertising psychology. Types of market research: research of new product, image, name, package. Segmentation research and typology of consumers. Panel research. 11 Globalization and cultural differences in consumer behavior.

The information will be yearly specified on the electronic noticeboard (even a black board can be) of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.

Course ID: KPS/DPO/15		Course name: Master's Thesis Defense			
Course type, scope and the method: Course type: Recommended course-load (hours): Per week: Per study period: Course method: present					
Number of ECTS credits: 14					
Recommended semester/trimester of the course:					
Course level: II.					
Prerequisites:					
Conditions for course completion: The diploma thesis is the result of the student's own creative work. It must not show elements of academic fraud and must meet the criteria of good research practice defined in the Rector's Decision no. 21/2021, which lays down the rules for assessing plagiarism at Pavel Jozef Šafárik University in Košice and its components. Fulfillment of the criteria is verified mainly in the training process and in the process of job defense. Failure to do so is grounds for disciplinary action.					
Learning outcomes: With the diploma thesis the student demonstrates mastery of extended theory and professional terminology of the field of study, acquisition of knowledge, skills and competences in accordance with the declared profile of the graduate of the study program, as well as the ability to apply them in an original way. The student demonstrates the ability of independent professional work in terms of content, formal and ethical. Further details of the diploma thesis are determined by Directive no. 1/2011 on the basic requirements of final theses and the Study Regulations of UPJŠ in Košice for the 1st, 2nd and joint 1st and 2nd degree.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PDO/08	Course name: Psychodiagnostics of Adults
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Students are evaluated based on class participation, class presentation (20p) (the topic of presentation should relate to the field of psychological assessment. Example: multicultural issues in assessment, controversies in assessment, or the use of a specific instrument (provide a brief overview of its intended use as well as its technical features) Write a report (20p.) of 4 assessment instruments, each report will include the following: the possibility of using a diagnostic tool, advantages and disadvantages user qualification level Next, please answer the following questions: How did results confirm or disconfirm your knowledge of yourself? What are the implications of your findings as far as your understanding of yourself as a therapist ? Any surprises? Please elaborate. The reports should be at least two pages and no longer than four pages and a final exam. Activities during semester are evaluated max. 40 p, final exam max 60 p. (written form with open-end questions) Final evaluation (sum of all points): For A is needed minimum 90 points, for B minimum 80 points, for C minimum 70 points, for D minimum 60 points, for E minimum 50 points, for FX = 49 and less The information will be yearly specified on the electronic noticeboard (even a black board can be) of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: Knowledge: the graduate will acquire basic knowledge in the field of psychodiagnostics of adults, learn theoretical and practical principles of diagnosis and assessment, and gain knowledge of the main methods and selected methodologies of psychological diagnosis. Skills: emphasis is placed on practical training in the competencies and skills needed in the psychological assessment of adult individuals. The graduate will learn the principles of psychodiagnostic work, administration and interpretation of specific methods. Competences: the graduate is able to compile a psychodiagnostic battery to diagnose the observed psychological processes. The student is able to administer psychodiagnostic tests and questionnaires	

for adults and interpret the results. The student is able to formulate psychodiagnostic conclusions and recommendations.

Brief outline of the course:

Principles and specifics of adult psychological diagnosis. Clinical and test methods. Assessment of intelligence, partial and special abilities. Evaluating individual mental functions. Personality assessment: Questionnaire methods - single and multi-dimensional. Rating scale. Projective methods.

Topics

1. Psychological Testing and Assessment - definition of key terms - psychological testing, psychological tests, psychological assessment, psychological measurement, and surveys. The characteristics of psychological tests. Similarities and differences between tests. Assumptions of psychological testing. Classification of assessment methods. Brief overview of history of development and use of methods. User qualifications and professional competencies – responsibilities of test users in specific contexts. Cultural, ethical and legal context of psychological assessment. 2. Non-testing methods - observation, interview, case history. Definition. Types of Clinical Interviews (intake, diagnostic, mental status exam, case history - structure). The interviewer general and specific skills. Components of the interview (rapport, technique). Type of observation. Note-taking – cultural, ethical and technical issues. Advantages and disadvantages of non-testing methods. 3. Intelligence tests - definition of intelligence, A brief overview of models of intelligence (Spearman, Cattell, Thurstone, Vernon, Sternberg, Piaget, Gardner). Assessment of intelligence. Intelligence Quotient. Simple (partial) tests of Intelligence - Raven's Progressive Matrices (SPM, APM), Kohs Block Design Test. Complex tests of Intelligence: group-administered - Intelligence Structure Analysis (ISA), Intelligence Structure Test (IST), individually administered - Wechsler Adult Intelligence Scale, Stanford–Binet Intelligence Scale. 4. Tests of mental functions, special abilities – attention, memory, creativity, reaction time (Bourdon Test, Trail Making Test, Rey Complex Figure Test, Stroop Test, Wechsler Memory Scale, WCST, Torrance Tests of Creative thinking) - application possibilities, advantages and disadvantages. 5. Tests of organicity - neuropsychological assessment, Neurological damage and the Concept and definition of a cognitive deficit. Neuropsychological testing vs. standard psychological testing. Conditions and objectives of neuropsychological assessment. Test selection, Test administration, and preparation of the patient. (Verbal Learning Test, Bender-Gestalt, Benton Visual Retention Test, Delis-Kaplan Executive Function System.....) 6. Personality measurement – Projective methods. Characteristic and theoretical foundations of projective methods. Advantages and limits of use (reliability, validity). The difference between the methods, techniques and tests. Classification (verbal, drawing and handling projective tests – association, construction, completion, expressive choice ordering). Word Association Experiment, Hand test, The Thematic Apperception Test (History and Development, Theoretical Perspectives, Reliability and Validity, Advantages and Limitations, Administration, Typical Themes Elicited, Scoring Procedures, Interpretation) Baum test ("Tree test"), The Lüscher Color Test. 7. Personality measurement - questionnaires, inventories, rating scales - the principle, overview, classification, advantages and limits of use. Unidimensional questionnaires (Manifest Anxiety Scale, The State-Trait Anxiety Inventory, Beck Depression Inventory, Beck Depression Inventory, Hamilton Rating Scale for Depression, Hamilton Anxiety Scale, Zung Self-Rating Depression Scale, Multidimensional questionnaires (Eysenck Personality Inventory, Eysenck Personality Questionnaire, Sixteen Personality Factor Questionnaire, Big Five Inventory, Minnesota Multiphasic Personality Inventory) 8. Psychological Report - Findings of assessment and proper formulations. General guidelines (length, style, terminology, topics, presenting test interpretations, use of raw data, feedback). Format for a psychological report (referral question, evaluation procedures, behavioral observations, relevant history, test results, impressions and interpretations, summary and recommendations).

The information will be yearly specified on the electronic noticeboard (even a black board can be) of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PRAXP/19	Course name: Psychological Practice
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: Per study period: 10d Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites: KPS/PDO/08	
Conditions for course completion: The professional practise consists of 75 hours (10 working days), which the student can complete continuously at one workplace or at two workplaces (at least 37.5 hours / 5 working days each). Procedure before starting the practise: 1. the student can choose the institution in his home country where he has prior consent to complete the internship 2. student fills in the form (available at the teacher, „Request for practise“ (the name of a student, the name of the institution, the address of the institution) and send it by e-mail to the teacher of the subject (this is the form for the institution, but it is filled in by the student, for the necessary detailed information about the selected institution 3. the teacher checks the selected institution and then sends the student an opinion and an application form, which the student submits at the beginning of the internship at the workplace. Procedure after completing the internship: The student will electronically send the teacher an official confirmation of completion of the practise confirmed by the institution (stamp and signature, form available from the teacher). At the same time, student will prepare a practice report, which he will send to the teacher in electronic form. The content of the report should be an overview of activities completed during the practise at the workplace. Psychological Practise should be completed and reported until end of summer semester of 2 year of study. The information will be yearly specified on the electronic noticeboard (even a black board can be) of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: Knowledge: Through practice, the student should get acquainted with the practical activities of a psychologist. The content of the practice should be the observation of psychological examination, the psychological process counseling, intervention and prevention, which are performed by a workplace psychologist. Skills: He should gain experience in conducting psychological documentation, be able to carry out basic psychological activities with the client as an anamnestic interview, administer and evaluate psychological methods and prepare a psychological report.	

Competences: The graduate will be able to autonomously carry out basic practises of a psychologist, work with a client, apply adequate psychological methods and conduct relevant documentation.	
Brief outline of the course: The professional practise consists of 75 hours (10 working days), which the student can complete continuously at one workplace or at two workplaces (at least 37.5 hours / 5 working days each). The information will be yearly specified on the electronic noticeboard (even a black board can be) of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Recommended literature: The student follows the recommendations of the workplace.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PPER/10	Course name: Psychologist as a HR Specialist
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites: KPS/PPR/08	
Conditions for course completion: Requirements for semester: - Case study (25 points, minimum 13 points), for detailed information please see electronic noticeboard - Seminar paper (25 points, minimum 13 points), for detailed information please see electronic noticeboard - required minimum is 26 points Requirements for exam: - oral form, maximum 50 points (minimum 26 points) Final evaluation (sum of all points): - minimum 52 points for exams and semesterr	
Learning outcomes: Subject Psychologist as HR specialist deepens the knowledge gained in the course Work Psychology and Organizational Psychology (master's degree). The aim of education is that students will be able to independently prepare and lead complex selection procedures, implement employee performance management systems and development programs. During course students will acquire (from knowledge perspective): - insight how to apply obtained knowledge from Organizational psychology to praxis - deeper knowledge from following areas: recruitment and selection of employees, employee's performance evaluation, their development and coaching. - orientation in psychodiagnostics methods and procedures used in the field Besides, students can enlarge their skills in: - lead job interview without supervision - lead complex selection process – assessment center and development center under supervision - prepare personal profile of candidates - prepare evaluation material from selection process for client (company) - provide feedback to candidates and clients from complex selection process - implementation of performance management program and provide employees feedback about their performance (meaning 360 degree feedback system)	
Brief outline of the course:	

This subject combine practical examples with practicing concrete skills needed for psychologist who works with human resources. It is closely focused on skills related to employee assessing, selection (by Assessment or Development Centre, interview), evaluation (for example by 360°Feedback) and their further development (by coaching, etc.).

1. Human Resources department in the context of company, 2. Professional context: Psychologist as HR specialist, 3. Leading of selection interview, 4. Psychodiagnostics in the area of Human Resources, 5. Assembling of tests batteries, 6. Interactive Diagnostics: Assessment/Development Centre, 7. Output processing of Personal analysis, AC, DC and their presentation, 8. Providing feedback to clients, 9. Performance evaluation of employees, 10. Outplacement, 11. Coaching, 12. Development and education of employees.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PROZ/09	Course name: Psychology of Decision-Making
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 2 Per study period: 14 / 28 Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Students are evaluated based on class activity during the semester (10 points) and on the project from the selected area of decision-making (30 points). Final exam (60 points) consists of theoretical as well as of practical questions and more than 30 points is needed to pass the exam. Practical questions ask about the application of studied decision-making processes in concrete situations. Points during semester 40. Minimum number of points needed to enter an exam: 21 Written exam – 60 points 31 points necessary Final evaluation A = 91-100, B = 81-90, C = 71-80, D = 61-70, E = 51-60, FX = 50 and less The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: Knowledge Students will gain a basic understanding of the psychology of decision making. They will become familiar with the main models of decision making and judgment, historical aspects, and factors influencing decision making. Skills Students will be able to apply the knowledge of decision psychology in everyday life and in psychological practice. They will be able to identify the main errors in decision-making and ways of preventing them. Competencies Students will be able to assess the most appropriate way of assessing and making decisions about a particular problem and how to help others in their decision-making. The information is updated annually on the electronic course bulletin board in AiS2, alternatively in the UPJŠ LMS or MS Teams environment Translated with DeepL.com (free version)	
Brief outline of the course: 1. Subject of psychology of decision-making (DM). Basic terms. Approaches in psychology of DM 2. History of DM. Basic models of DM	

3. DM process. Biological correlates of DM 4. Rationality of DM. Critique of rationality 5. Reasoning 6. Hypothesis testing 7. Judgment. Cognitive biases and heuristics. Specific questions of probability judgment 8. Risk perception 9. Group DM 10. Game theory 11. Morality and DM 12. Individual differences in DM The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ ORG/15	Course name: Psychology of Organisations
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 1.	
Course level: II.	
Prerequisites:	
Conditions for course completion: Requirements for the semester (PSm_en): - Written test focusing on verifying acquired knowledge (maximum 20p., min. 11p.) - Activity during seminars focusing on application of acquired knowledge and development of related skills and competencies (max. 4p., min. 0,5p.); for more information, follow the course's electronic noticeboard and information in MsTeams. - Presentation of the assignment (max. 8p.) and preparation of essay (max. 8p.) focusing on the application of acquired knowledge and further development of related skills and competencies (min. 10p.); for more information, follow the course's electronic noticeboard and information in MsTeams. - For semester student is obliged to receive minimum 20,5p. Overall evaluation: - 40 points for semester (min. 20,5p) and 60 points for exam (min 30,5p), together minimum 51p. The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: Course: Organizational Psychology expands on the knowledge gained in the course Basics of Work Psychology, taught at the bachelor's level, and elevates it to a new level with an emphasis on research and practice in the field of organizational psychology. The goal of the education is for students to acquire comprehensive and interconnected knowledge, which they can subsequently implement in solving specific tasks and problems posed by clients, who are organizations or their members, using scientifically based methods and systemic solutions, while being aware of various complications that may arise. Knowledge: In the course, students will gain knowledge about the current state of understanding in selected research and practice topics within organizational psychology, such as organizational culture and climate, organizational changes, employee leadership, motivation, job satisfaction and related constructs, identification, and problem-solving. The created knowledge base and related development of skills and competencies enable the application of acquired knowledge of organizational psychology in practice. Skills: Students will expand their practical skills in ways to deal with the need for organizational change and employee resistance during its implementation, strategic solutions to various practical	

<p>problems of clients (e.g., organizational management) related to employee management and motivation, increasing job satisfaction, ensuring loyalty, addressing negative phenomena in the workplace, preventing burnout, etc. The systematic development of skills is based on competencies of work and organizational psychologists (classified based on three areas, namely, knowledge of work and organizational psychology theory, research skills, and professional skills) as described by Roothmann and Cooper (2022).</p> <p>Competencies: Graduates are capable of identifying problematic and inefficient processes and phenomena within an organization and subsequently proposing optimization based on scientifically verified methods. Students are aware of and can anticipate complications that may arise in the process.</p>
<p>Brief outline of the course:</p> <p>Basic signs of organizations. Organization as an activity and as a social entity. Types of organizations. Organizations and management. Structure of organizations. Organizational culture. Changes in organizations and development. Organizational commitment and citizenship. Group processes, group influence. Working group and team. Leadership. Decision making in organizations. Organizational justice. Conflicts and its solution. Negative phenomena in organizations - aggression.</p> <p>The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.</p>

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ PTER/08	Course name: Psychotherapy
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 2.	
Course level: II.	
Prerequisites: KPS/KLP/08	
Conditions for course completion: The final evaluation is a combination between semester activities 40p and an exam at the end of the semester. - Active participation during seminars is in form of active class participation and discussion - presentation of the read book - short video presentation of selected psychotherapeutic techniques and their demonstration an explanation in class Basis of exam test with next analysis and discussion about case study (maximum 60 points) Final evaluation (sum of all points): For A is needed minimum 91points, for B minimum 81 points, for C minimum 71 points, for D minimum 61 points, for E minimum 51 points, for FX = 50 and less In case of absence, it is necessary to inform the teacher in advance and clarify the reason for the absence. Book presentation: In the first seminar lesson, each student selects the psychotherapy book which he/she will read and present in class. For the seminar lesson, the student will prepare 20 minutes presentation about the selected book, personal understanding of the book, relevant associations, criticism, and interesting examples or knowledge from a book. The student's presentation is intended to be an interactive, cooperative effort involving the entire class. The class ends with a 10-minute discussion of the presentation. Students are encouraged to express their views of the book and their learning experience. Psychotherapy video presentation: The student record and prepare a short video displaying a demonstration of specific therapeutic technic. In the in-class presentation, he explains demonstrated technic, the therapeutically theoretical basis of technic. Clarify for which psychological/ psychiatric problem is this technique recommended. The information will be yearly specified on the electronic noticeboard of the course in AiS2, aleternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: Knowledge: The student is familiar with various concepts and problems related to the field of psychotherapy as a therapeutic psychological intervention. He/she knows the basic theoretical	

<p>foundations that are necessary for understanding specific theories of psychotherapy, knows and is familiar with the most widespread psychotherapeutic directions.</p> <p>Skills: The student knows how to set the goals of a therapeutic session, what a therapeutic session should look like, masters relaxation and art therapy techniques, techniques for managing stress and anxiety</p> <p>Competencies: The student is able to work with a client using selected psychological means of intervention and therapeutic techniques. He/she is able to conduct a psychotherapeutic interview. He/she practically uses selected psychotherapeutic techniques.</p> <p>Information is specified annually on the electronic bulletin board of the subject in AiS2, alternatively in the LMS UPJŠ or the MS Teams environment.</p>
<p>Brief outline of the course:</p> <ol style="list-style-type: none"> 1. Psychotherapy as a discipline and activity; Types of psychotherapy; Psychotherapy aims; training in psychotherapy. 2. Integrative psychotherapy framework; effective factors in psychotherapy; Indications for psychotherapy. 3. Praxis of psychotherapy. 4. Basic questions and communication skills in psychotherapeutic interview 5. Intake and initial psychological session. 6. Psychoanalytic and Psychodynamic psychotherapy 7. Cognitive therapy 8. Behavioral therapy 9. Person centered therapy. <p>The subject will contain theoretical information, concrete cases of clients, training-specific psychotherapy techniques and skills. Experience on yourself.</p> <p>The information will be yearly specified on the electronic noticeboard of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.</p>

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ VKP/20	Course name: Research in Clinical Psychology
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites:	
Conditions for course completion: During the semester, students have two assignments. Firstly, solving a given problem situation based on the steps from the lecturer (max. 20 points). The second assignment is a written research proposal with its oral presentation (max. 30 points). If COVID-19 pandemic aggravates, seminars and assignments will be held at the scheduled time in online form. Final exam is written and is based on open questions (max 50 points). For A is needed min. 90 points, for B 80 - 89, for C 70 - 79, for D 60 - 69, for E 51 - 59.	
Learning outcomes: Students have knowledge about the nature of research in clinical psychology, about the use of quantitative and qualitative approaches in this field of empirical research.	
Brief outline of the course: Basic questions of research in clinical psychology. Methodology and principles of scientific method. The research process: Formulation of research questions, hypothesis testing, literature review, variables, sampling in clinical research. Research design. Experiment in clinical psychology (true and quasi experiment, manipulation with independent variables, control of manipulation, sampling). Single-case experiment. Comparative research (cross-sectional, retrospective, prospective design). Correlational research. Foundations of quantitative approach - measurement (scaling, reliability, validity). Foundations of qualitative research - different approaches: case studies, phenomenological approaches, grounded theory. Qualitative research - methods of data obtaining and analysis. Ethical issues of clinical research. Publication and communication of research findings.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/ROR/08	Course name: Rorschach Method
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 1 Per study period: 28 / 14 Course method: present	
Number of ECTS credits: 5	
Recommended semester/trimester of the course: 3.	
Course level: II.	
Prerequisites: KPS/KLP/08	
Conditions for course completion: 1. Each student has to prepare one written ROR protocol. 2. Final evaluation will be based on continuous evaluation of the student's semestral work (oral answers, activity) plus written ROR protocol (see point No1) Final marks will be given according to 50/50 ratio. The information will be yearly specified on the electronic notice board (even a black board can be) of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Learning outcomes: 1. To understand in deep essence of projective methods, especially RoR 2. To get knowledge and basic skills in work with RoR (administration, preparation of summary data, and partially, also basics of interpretation). Acquaint with various types of scoring (using the Comprehensive System by Dr. John E. Exner). Acquaint with various types of scoring (information on R-pass coding provided by Prof. Lily Rothschild-Yakar in the range of 14 hours). The information will be yearly specified on the electronic noticeboard (even a black board can be) of the course in AiS2, alternatively in LMS UPJŠ or MS Teams environment.	
Brief outline of the course: Introduction into projective methods: classification of methods, essence, the ways of work. History and development in Rorschach method. Administration, coding and interpretation of RoR. Non-conventional work with RoR and RoR - modifications. Lectures: 1. Brief overview of projective methods: Theoretical issues, classification. Advantages and limits of projective assessment. 2. History of Rorschach test: Preliminaria. Herman Rorschach and his work. European and American schools: Behn, Bohm, Beck, Hertz, Klopfer. Exner and his comprehensive system. Exner, J.E. (1969): The Rorschach Systems. New York: Grune and Stratton Exner, J.E. (2003): The Rorschach. A Comprehensive System. New York: Wiley p.3 - 41 3. Administration and steps in work with Rorschach test: Preparation for taking test. Introducing test and response phase. Inquiry, scoring and interpretation. Exner, J.E. (2003): The Rorschach. A Comprehensive System. New York: Wiley p. 45 - 67 4. Scoring: Location and Developmental quality.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Arts	
Course ID: KPS/TT/23	Course name: Trauma and Therapy
Course type, scope and the method: Course type: Lecture Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 4.	
Course level: II.	
Prerequisites: KPS/KLP/08	
Conditions for course completion: The continuous activity (30 points), quiz (20 points), case study analysis (40 points) and student presentation (40 points) together form an assessment structure with a total of 130 points. The student will be awarded credits if he/she achieves at least 60 percent of the maximum points in the final assessment.	
Learning outcomes: Knowledge: The student will gain an overview of current knowledge in the field of trauma psychology, including the risks of developing post-traumatic stress disorder (PTSD), accompanying symptoms of crisis situations and potential protective factors. Based on current theoretical approaches and research findings, he will acquire a deeper understanding of clinical strategies and interventions aimed at managing the consequences of psychological trauma. At the same time, he will be able to reflect on the specifics of the cultural, social and individual context of persons affected by traumatic events. Skills and competences: In the area of practical skills, the student will acquire the ability to assess acute stress reactions, identify short-term and long-term consequences of trauma, including symptoms of PTSD, and analyze specific cases of persons affected by traumatic events. Competencies. The student can apply specific psychological intervention procedures and therapeutic strategies in the context of trauma. Students are expected to have an active approach and independent study of professional literature.	
Brief outline of the course: Stress, Crisis, Trauma Trauma and Stressor-related disorders - diagnosis, assessment Trauma: prevention, consequences, neurobiology and coping Resilience: theoretical concepts and applications Strong Emotions and Trauma Psychological First Aid, Psychosocial Support Psychological Crisis Intervention Trauma-focused psychotherapeutic interventions Loss and Grief Intervention Children and Trauma: developmental and gender aspects
