Course ID: KF/ AAV/22	Course name: Aurelius Augustine: Confessions
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 2.	
Course level: I.	
Prerequisites:	
Conditions for course completion: Attendance: A student may have two unexcused absences in seminar. Absence in more than two seminars must be reasoned and substituted by consultations. Conditions of continuous and final control: during the semester a student is continuously checked and assessed according to his/her activity and own preparation for exercises. To be awarded the credits, a student must pass a test from knowledge obtained at the meetings and make a presentation for the assigned topic or the assigned part of the work Confessions. Results of the test, activity and presentation will make up the final grade. In case of online courses, the only form of evaluation is a final essay.	
Learning outcomes: Having completed the course, students are expected to be able to analyse the text of the source work by Aurelius Augustine: Confessions. The aim of the course is also to interpret the basic topics of Ancient philosophy localised also in the source text “Confessions” – such as the issue of characteristics and cognition of God, issue of time, epistemic function of memory, and relation to different shapes and forms of Christian philosophy in the Late Antiquity.	
Brief outline of the course: • Context and period: philosophy of the Late Antiquity and the Early Middle Ages. • Neoplatonism and Christian philosophy. • Augustine: life and work • Philosophy and the issue of characteristics of God. • Confessions in the context of Augustine’s work. Soul and human nature. • Faith – insight – reason – enlightenment. Origin of evil. Cognition of God. • Paths to God. Blessedness. Temptation. • Memory. • Paradoxes of Time. Concept of time in Ancient philosophy – Augustine, Aristoteles, Plotinus

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Science	
Course ID: KF/ES/22	Course name: Care Ethics
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 4.	
Course level: I.	
Prerequisites:	
Conditions for course completion: - active participation in teaching - presentation and essay on selected topic - written exam: A 100 - 90 points B 89 - 80 points C 79 - 70 points D 69 - 60 points E 59 - 50 points FX less than 50 points	
Learning outcomes: - acquiring knowledge about the concepts of care in the historical context of philosophical-theoretical thinking - a comprehensive understanding of the concepts and categories related to a range of topics and issues related to the moral perspective of care - acquiring professional skills of application of analytical tools for critical reflection, analysis, evaluation and creation of transformative strategies of social care practice in various areas of social life	
Brief outline of the course: 1. Conceptualization of care in philosophical thinking - from antiquity to the present. 2. Crisis of care and deficits of current care practices in various areas of social life (healthcare, social care, education and training, environmental care, care for democracy and civil society; problems of paternalism, parochialism, protectionism, loss of confidence in institutions, hegemonism - dominance / domination and oppression in different spheres of human relations). 3. The emergence of ethics of care - S. Ruddick: motherhood as a way of practice, C. Gilligan: two moral perspectives, N. Noddings and ethics of care in moral education. 4. Political turnover: from personal to political and global ethics of care (V. Held - caring society, S. Sevenhuijsen - caring citizenship, J. Tronto - caring democracy and democratic care, F. Robinson - global ethics).	

5. In what way is the ethics of care different? (specifics of care ethics - ontological, epistemological bases - relationality, vulnerability, precariousness, and comparison with other types of ethical concepts - deontological ethics, virtue ethics, justice ethics, narrative ethics, feminist ethics).
6. Care as a practice (unity of moral, social and political; integrity of good care practice - attention, responsibility, competence, responsiveness, solidarity).
7. Caring society, caring democracy and democratic care - the possibility of caring institutions (J. Tronto, H. Olofsdotter Svensota, S. Bourgault, Urban P.)
8. Ethics of care: from theory to application in practice. (care ethics and its concepts and categories as a tool for critical analysis, evaluation and transformation of social practice - TRACE analysis of policy documents and strategies).
9. Ethics of care in bioethics (medical ethics, nursing ethics - I. van Nistelrooij, C. Leget).
10. Ethics of care in education (N. Noddings).
11. Care ethics in the context of ecological ethics and environmental ethics.
12. Ethics of care in social services and social work (S. Sevenhuijsen, M. Barnes, L. Ward).

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Science	
Course ID: ÚGE/ KRT1/21	Course name: Cartography and Geoinformatics 1
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 5	
Recommended semester/trimester of the course: 1.	
Course level: I.	
Prerequisites:	
Conditions for course completion: During the semester, it is necessary to submit the results of the exercises. The acquired knowledge at the exercises will be verified by continuous examinations. The number of work outputs and written examinations will be announced at the beginning of the semester. It is possible to obtain 30% for meeting the evaluation criteria at the exercise (work outputs and written tests). The final evaluation of the exercises is determined by the instructor of the subject on the basis of completing the tasks in the exercises during the semester. The final evaluation of the course is based on a combination of meeting the evaluation conditions from the exercises and the final exam. A student who has met the conditions for passing the course at the seminars can apply for the final exam. The final evaluation is a weighted average of the evaluation from the exercises (30%) and the final exam (70%). Credits will be awarded only to a student who achieves the final grade at least at the level of grade E. Credits will not be awarded to a student who does not meet the requirements of the exercises and the final exam is evaluated by FX. Rating scale: A (100-91%), B (81-90%), C (71-80%), D (61-70%), E (51-60%).	
Learning outcomes: Knowledge: The student will gain theoretical knowledge in the field of cartography and geoinformatics. The student is able to understand cartographic and geoinformatics terminology, appropriately applies cartographic methods for displaying spatial information using a geographic information system, acquires a theoretical basis for the application of cartographic representations and coordinate systems and defines the composition of maps in GIS. The student acquires knowledge of the mathematical principles of mapping the Earth on a map and understands cartographic distortions, classification of cartographic representations, simple and false representations. The student acquires knowledge from the Slovak state map work (civil, military) and also acquires knowledge in cartographic expression methods (cartogram, cartodiagram) and the basics of cartometry. Skills: The student will learn to acquire and work with the basics of the QGIS program, its control, purpose and structure. The student acquires basic orientations and work in the QGIS program, and work in the basic tools, setting layer properties and is capable of exporting data in different formats. The student understands cartographic representations in QGIS. The student acquires skills in working with paper maps, scale and measurements on maps, can orient in the field using a map, compass and can determine the azimuth. The student has skills in creating a point layer, has skills in	

the principles of expressing point phenomena, the creation of a line layer as well as in the principles of expressing line phenomena, isolines. Student also has skills in creating a surface layer, in the principles of expressing surface phenomena. Controls the creation of map output, page settings, map export and output parameters settings. The student has skills in the composition of the map - setting the compositional elements of the map and in creating the map output.

Competences: The student is able to work with a high degree of independence with geodata, to visualize them and create new layers, has all the prerequisites for independent creation of digital map output with available software support within GIS. The student is fully competent in the composition of the map - setting its compositional elements. When creating a map output, the student is able to independently or in cooperation in the relevant work team to communicate and collaborate with other experts, formulate opinions and recommendations in the creation and use of GIS in cartography.

Brief outline of the course:

Lectures: Cartography, basic concepts and position in the geosciences system. History and development of cartography. Geoinformatization cartography, digital cartography. Cartography and geoinformatics and their correlation. Geoinformatics, basic terms and definitions of GIS; online maps. Digital representation of objects and phenomena in GIS, vector and raster format. Principles of methodologies of cartographic modeling of geographical information in GIS. Design, use and evaluation of cartographic imaging properties in geoinformatics applications. Map - definition, map criteria, basic properties and elements of the map, categorization of maps, map scale. Principles of mapping the Earth, geoid, reference and display areas, global and local coordinate systems, the Earth and geographical lines and their importance for cartography and geoinformatics. Cartographic distortions, classification of cartographic representations, simple (azimuthal, conical, cylindrical) and false representations. Cartographic representations used in the Slovak state map work. Slovak state map work (civil, military), ZB-GIS, samples. Workflow for creating topographic maps, mapping, overview of 3D data collection in the field and used instrumentation. Map creation - basics of map language, cartographic characters, map markers - point, line and area phenomena. Cartographic expression methods - cartogram, cartodiagram, classification and types of cartograms and cartodiagrams. Map composition, map content, map colors, map description, geographical nomenclature, map design. Basics of cartometry - positioning, measuring and determining distances, measuring and determining the size of surfaces, measuring oriented directions and angles, determining altitudes, determining the slope, profile construction, hypsometric curve. Classification of field formations. Thematic maps of various scales, applications, interpretation of maps. Maps on the Internet, map servers, Google Maps / Earth, Openstreetmaps. Office of Geodesy, Cartography and Cathars of the Slovak Republic - Geoportal.

Exercises: Basic introduction to ArcGIS, its purpose and control, program structure, data formats (*.mxd, *.shp), basic terminology - project, data layer - point, line, area, "features" and "graphics". Basic orientation in ArcMap, introduction of basic tools of the "Standard" and "Tools" packages, window "Table of contents", arrangement and properties of layers, tool "Select features" and "Data - Export Data". Defining a coordinate system, cartographic representations in ArcGIS. Introducing the options of the "Layer Properties" dialog box, working with the attribute table, working with files. Basic table editing, preparation and connection of databases (excel / shapefile) using the "Join" function. Working with paper maps, scale and measurement on maps. Orientation in the field using a map, compass, azimuth determination. Georeferencing. Point layer formation; principles of expressing point phenomena in ArcGIS. Linear layer formation; principles of expressing linear phenomena in ArcGIS, isolines. Merge lines, Split lines. Formation; principles of expressing surface phenomena in ArcGIS, Polygon, Auto Complete Polygon, Cut Polygon Tools, Merge polygons. Cartogram, cartodiagram. Map output creation - Layout view, page settings, Map export and output

parameters settings. Map composition - setting the map composition elements and creating map output.

Recommended semester/trimester of the course: 3., 5.	
Course level: I., P	
Prerequisites:	
Conditions for course completion: 1. Active participation in teaching (absence allowed max. 90 min.), 2. Implementation of assignments and presentation of assignments focused on the application of knowledge, skills and competence in the field of communication with a particular focus on teacher communication in the school environment. Detailed information in the electronic bulletin board of the subject in AIS2.	
Learning outcomes: The student will acquire knowledge and information about the basics of verbal and non-verbal communication, communication errors, assertive and non-violent communication. The content of the subject will be enriched with knowledge, skills and competencies necessary for the work of a teacher. The student is able to apply the acquired communication skills in practice, is able to apply effective principles and principles of communication with others, is able to anticipate and thus prevent possible misunderstandings, which will contribute to the development of his social and professional skills. The student will acquire the competencies to communicate effectively in work and personal life, especially in the school environment.	
Brief outline of the course: Basics of communication (Transmitter-receiver principle, "What is said is not equal to what is heard", "Internal dialogue", The concept of communication) Active listening (The most important criteria for active listening) Misunderstandings (How Misunderstandings Arise, How to Avoid Misunderstandings) Body language (What is body language, Active / passive body language, Dress psychology) Signs of Physical Expression, Disadvantages of Fake Physical Expression, Difference Between Active and Passive Body Expression Personality development (Voices in us, "child in me" - identification of one's own personality) Basics of assertive and non-violent communication. Learning outcomes: The aim of the course is to identify and eliminate the most frequent grammatical errors in oral and written communication, learning language skills of listening comprehension, speaking, reading and writing, increasing students' language competence (acquisition of selected phonological, lexical and syntactic knowledge), development of students' pragmatic competence (acquisition of the ability to express selected language functions), development of presentation skills, etc.	
Brief outline of the course: The course is aimed at practicing and consolidating knowledge of morphology and syntax of German in order to show the context in grammar as a whole. The course is intended for students who often make grammatical errors in oral as well as written communication. Through the analysis of texts, audio recordings, tests, grammar exercises, monologic and dialogical expressions of students focused on specific grammatical structures, problematic cases are solved individually and in groups. Emphasis is placed on the balanced development of grammatical thinking in the communication process, which ultimately contributes to the development of all four language skills.

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Science	
Course ID: KPPaPZ/ MANAG/25	Course name: Conflict Management
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present	
Number of ECTS credits: 4	
Recommended semester/trimester of the course: 3., 5.	
Course level: I., P	
Prerequisites:	
Conditions for course completion: The conditions for passing the course are as follows: 1. Active participation in exercises. Max. the missed range is 90 min. 2. Submission of the reflection on the selected topic within the specified time. Reflection topic: My strengths and weaknesses in conflict management. In a short presentation of their reflection, in the form of deconstruction, students will describe their strengths and weaknesses in the management of conflict situations with a focus on the application of knowledge, skills and competences needed in conflict situations in the work environment and the school environment. The evaluation of the course and its subsequent completion will be based on clearly and objectively set requirements, which will be set in advance and will not change. The aim of the assessment is to ensure an objective and fair mapping of the student's knowledge while adhering to all ethical and moral standards. There is no tolerance for students' fraudulent behavior, whether in the teaching process or in the assessment process.	
Learning outcomes: Successful mastery and demonstration of knowledge in the field of conflict management and control of basic rules. The method of teaching the subject will be oriented to the student. Lecturers will be interested in students' needs, expectations and opinions so as to encourage them to think critically by expressing respect and feedback on their opinions and needs. The content of the curriculum will be based on primary and high-quality sources that will reflect the topicality of the topics so as to ensure the connection of the curriculum with other subjects and also the connection of the curriculum with practice. Students will be expected to take an active approach in lectures and seminars with an emphasis on their independence and responsibility. The student is able to demonstrate an understanding of an individual's behavior in various conflict situations. The student is able to describe, explain and evaluate their own internal resources, competencies as well as limitations and weaknesses that are directly related to conflict management. The student is able to apply theoretical knowledge and principles of conflict resolution to everyday situations. After completing the course, students will be able to: a) express and summarize basic knowledge related to conflict management; b) understand the basic rules and dynamics of the origin, course	

and termination of the conflict; c) apply knowledge in practice, e.g. in the school environment; d) apply key competencies that increase the possibilities of their application in all areas of practice with a special focus on the work of a teacher. They will acquire knowledge from the theory of conflict management as well as capabilities and competences for solving them, e.g. in the context of school teams.

Faculty: Faculty of Science	
Course ID: KF/LMM/22	Course name: G.W. Leibniz: Discourse on Metaphysics
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 4.	
Course level: I.	
Prerequisites:	
Conditions for course completion: Assessment depends on student's active approach to fulfilment of study duties, individual work with texts in a library, active work during seminars, after interruption presents study preparation and submission of a seminar paper at the end of the semester by the agreed deadline. Information is updated annually on the subject's electronic bulletin board in AIS2, or alternatively in MS Teams.	
Learning outcomes: To present the issue of modern philosophy in the context of history of philosophy (the Middle Ages, Renaissance) between philosophy and culture by returning to the sources of philosophy – Ancient thought, mainly its peak period (classical Greek philosophy). The aim is to draw the attention to the importance of studying the texts by G. W. Leibniz who, through the optics of ancient philosophers, leads us to the returns and the need to study and think about the ideas and texts of the entire philosophical tradition.	
Brief outline of the course: To present the issue of modern thinking in the context of tradition - G. W. F. Hegel: History of Philosophy. Leibniz and history of philosophy. Leibniz: Meditations on Metaphysics. The problem of settlement with medieval culture (scholasticism and the so-called “second scholasticism”) - Descartes and Leibniz – the problems of metaphysics. Leibniz and Heidegger on the need to return to the sources of ancient thinking – mainly to its peak period (classical Greek philosophy). The aim is to draw the attention to the importance of studying the works of philosophers. Leibniz and his returns to tradition – the attempt for reconsideration of scholasticism and original texts related to the history of the ancient philosophy. Leibniz, Patočka and history of philosophy.

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Science	
Course ID: ÚGE/ GIS/15	Course name: Geographic Information Systems
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 2 / 2 Per study period: 28 / 28 Course method: present	
Number of ECTS credits: 6	
Recommended semester/trimester of the course: 3.	
Course level: I.	
Prerequisites:	
Conditions for course completion: The assessment is a combination of continual control during the practicals and the final exam in the examination period. The continual assessment is performed during the semester and it involves 2 written tests in the mid-term and end of the semester and a project report generated according to the assignment and practical skills acquired during the practicals. The student can proceed to the final exam in case he or she acquired at least 50 points of 100 in all elements of the the continual assessment. The final assessment mark is based on the average number points received in the mid-term test, project report, practicals assessment, and final exam. The final exam is a written test comprising 3-4 questions. The credits are given in case the student had reached at least the E mark in continual assessment and final exam. The following marking scheme is applied in the assessment: A (100-90 points), B (80-89 points), C (70-79 points), D (60-69 points), E (50-59 points), FX (0-49 points).	
Learning outcomes: The students gain knowledge on the intermediate levele in the theory of geoinformation science, GIS, and Remote Sensing, GIS data models, methods of data processing and spatial analysis. They gain practical skills in processing of geographic data, management, analysis, and visualisation of the geographic data in a GIS project. Students acquire competence in defining a GIS project, suitable data models, methods of data acquisition, data processing, analysis and visualisation, presentation skills and skills in team work.	
Brief outline of the course: The course is focused on the following topics: geoinformatics as a scientific discipline, components of geographic information system, digital landscape representation and data models, GIS standards for coordinate systems and transformations, collection of geographic data for GIS (GNSS, photogrammetry, multispectral satellite imagery, lidar, radar) , data management in GIS, attribute and spatial demands, layer overlap, map algebra, spatial prediction, quality and uncertainty of geographic data, GIS web solutions, legislative aspects in GIS, GIS applications in practice. Exercises are focused on working in ArcGIS Pro: basic and advanced vectorization, data organization in the geodatabase, import / export of various data formats to GIS, creation of color compositions from satellite images, mapping, 3D visualization and animation of geographic data, geoprocessing, map algebra, spatial and attribute demands, spatial prediction, analysis of digital	

elevation models (DEM). Students learn the topics of the semester project in the middle of the semester and solve the assigned task in the team using the skills and knowledge acquired during the semester.

Course ID: KF/LMPS/22	Course name: Leibniz's Metaphysics and World Perspectives
Course type, scope and the method: Course type: Lecture / Practice Recommended course-load (hours): Per week: 1 / 1 Per study period: 14 / 14 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 5.	
Course level: I.	
Prerequisites:	
Conditions for course completion: Rating. Maximum 40 points during the semester - students' active approach to fulfilling their study obligations, independent work with texts in the library, active work at seminars. Processing of a partial task in the form of a seminar paper (5-8 standard A4 pages), in compliance with the citation standard KF FF UPJŠ. Final seminar paper - student's project during the semester - scope (12 standard A4 pages) represents 60% of the assessment. Final assessment: The sum of the interim assessment and the assessment of the final seminar paper. In case of interruption of face-to-face teaching, the emphasis will be on independent study and processing of professional literature, preparation of a partial task - seminar paper (5 standard A4 pages) which will be continuously evaluated (40%), used for communication with the teacher MS Teams, e-mail, at the end of the semester preparation and submission of the semester's seminar work by the set deadline (60%). Information is updated annually on the subject's electronic bulletin board in AIS2, or alternatively in MS Teams.	
Learning outcomes: Students will gain a deeper understanding of the history of philosophy and modern times in the context of the history of philosophy. The peculiarity of the philosophy of Leibniz (one of the creators of modern society) is a departure from modern thinking, which wants to cut off medieval and scholastic ways of thinking separately. Leibniz finds possibilities in the context of dealing with medieval culture for its creative reworking and returning to the sources of ancient thought, especially to its peak period (classical Greek philosophy), in order to formulate the basic problems of the further development of European thought. The aim is to draw attention to the importance of studying the works of philosophers (Leibniz in particular) and through them to try to return and rethink some questions of philosophy.	
Brief outline of the course: Leibniz and new thinking. God - soul - world as basic issues of philosophical reflection of Leibniz. Meditations as a way of Leibniz's thinking about basic issues of philosophy and science, but also freedom of a man. Four pillars of European culture. Freedom and happiness as fundamental topics of reflections of new philosophers.

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Science	
Course ID: KF/DAT/22	Course name: M. Foucault: Discipline and Punish
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 6.	
Course level: I.	
Prerequisites:	
Conditions for course completion: Conditions of continuous control: during the semester a student is continuously assessed according to his/her activity in seminars. To be awarded the credits for semester, a student must attend seminars. Assessment of students in seminars is conditioned by receiving the respective number of points (1 point for each active participation). Reading and understanding of the assigned texts can be checked during the seminars.	
Learning outcomes: The aim of the course is to present philosophical thinking of the “Professor of the History of Systems of Thought”, genealogist and (although he did not like this description) post-structuralist thinker M. Foucault. Students have a chance to become familiar with (postmodern) genealogical understanding of history as the critique of ideologies that support (traditional) history. On the basis of Foucault’s analysis of establishment of prison and the related developing punishment practices, the seminar in written discourse attempts to draw the attention to the controversial points of our (optimistic) historical understanding of progressive ideas.	
Brief outline of the course: 1) Torture 2) Punishment 3) Discipline 4) Prison

COURSE INFORMATION LETTER

University: P. J. Šafárik University in Košice	
Faculty: Faculty of Science	
Course ID: ÚGE/MTK/21	Course name: Methods of thematic cartography
Course type, scope and the method: Course type: Practice Recommended course-load (hours): Per week: 2 Per study period: 28 Course method: present	
Number of ECTS credits: 3	
Recommended semester/trimester of the course: 2.	
Course level: I.	
Prerequisites:	
Conditions for course completion: The evaluation is based on the submitted assignments from the exercises. Exercises are realized in the form of regular teaching, the introduction of the exercise is devoted to the theoretical basis, followed by the practical part of the exercise, which aims to work with spatial data in order to create a thematic map. During the semester, students will receive assignments aimed at creating a thematic map using selected methods of thematic cartography. Students submit assignments on an ongoing basis. Each assignment is evaluated separately. In order for the assignment to be accepted, it is necessary to obtain a minimum grade E from each assignment. The final evaluation is the average of the evaluation of individual assignments. Credits will be awarded only to a student who achieves a grade of at least E in the overall evaluation. Rating scale: A (100-91%), B (81-90%), C (71-80%), D (61-70 %), E (51-60%).	
Learning outcomes: Knowledge: The student will gain knowledge and skills from thematic cartography. They will get acquainted with the theoretical aspects of the content and principles of creating thematic maps. He will gain theoretical foundations and an overview of various aspects of thematic cartography, such as color theory in cartography, types of scales and division of the statistical file into intervals. They will get acquainted with the means of expression cartographic and methods of thematic cartography and gain an overview of the use of dynamic elements of cartographic visualization. Skills: The student will learn to create thematic maps using GIS professionally and cartographically correctly. Can evaluate the suitability of the cartographic method for the representation of various geographical phenomena and determine the optimal procedure for creating thematic maps. Competences: The student is able to evaluate the thematic maps and the suitability of the methods of thematic cartography with a high degree of independence. He will get acquainted with professional terminology in the field of thematic cartography of geodesy, which will enable him to communicate and collaborate with other experts in the field of geodesy, geoinformatics and cartography.	
Brief outline of the course: Exercises: Introduction to thematic cartography (content and types of thematic maps, phases and principles of creating thematic maps, compiling the content of the thematic map); Means of expression; Colors in maps; Scales (data evaluation, division of scales, creation of interval and	

functional scales, methods for plotting extremes in a statistical file); Legend of thematic maps; Point character method; Line character method; Area character method; Comma method; Isolinia method; Cartographs and cartograms method; Cartographic anamorphosis and cartotypogram method; methods for expressing the dynamics of spatial phenomena; Description in maps; composition of thematic maps; Geospatial data topology control and map generalization. Evaluation of maps and atlases; Animations, interactive maps and virtual reality in cartography.

Prerequisites:	
Conditions for course completion: Rating. 40% continuous assessment 60% final semester seminar paper min. in the range of 12 standard A4 pages Final assessment: The sum of the interim assessment and the assessment of the final seminar paper. During the semester, the student is continuously evaluated at the seminars (oral or written), if the teaching is conducted face-to-face. In the case of switching to a distance form of study, the student will receive tasks and assignments for independent study and partial processing of the outputs in written form by the specified deadline. Final output - Processing and handing over the seminar paper (a project implemented by the student during the semester) to the student by the set date at the end of the semester with an emphasis on compliance with the citation standard valid at the KF FF UPJŠ. Information is updated annually on the subject's electronic bulletin board in AIS2, or alternatively in MS Teams.	
Learning outcomes: Students will gain knowledge by studying the original philosophical texts - Plato's The State, and also by studying his predecessors and followers (Aristotle, Hegel, Jaeger, Heidegger, Gadamer, Strauss, etc.). Approach the issue of ancient thinking of the peak period (classical Greek philosophy) through the study of original texts (Plato - State). This work is considered an encyclopedia of Platonic philosophy and Platonism in general. Greek spirit - community and man. Polis and the Greek miracle, the meaning of the word paideia.	
Brief outline of the course: Plato's State (Politeia) - as a philosophical theme. Plato and the Greeks. Greek culture and Plato in the history of philosophy. Village and man. Political aspects of Greek tragedy. The state as an encyclopedia of Plato's philosophy. Plato - The Seventh Letter. What is love? Filia as the basis of social cooperation in classical Greece. What is philosophy? A spiritual person and an intellectual. Areas and topics of research: justice, wisdom, virtue, education, leadership - constructive thinking and dialectics, sensory and rational - mental states: intellectual knowledge, thinking, belief, assumption. Plato's parables. Platonic teachings about the so-called two worlds, the sensory world and the world of ideas. Asceticism and the boundless world of pleasures - education, virtues.	

Themes of Platonic philosophy - justice, state, education - poets and philosophers. Care of the soul (care of Self) - as a human problem in the coordinates of the history of philosophy and the present.
